CARNEGIE LIBRARY
PITTSBURGH, PA.

TO THE TRADE.

We present our 1915 CATALOGUE, No. 60.

You will find the present issue a most attractive volume, combining all the improvements that have demonstrated their value in previous issues, with many new features that will be equally valuable.

We think the innovation in the color of the paper will appeal to you, particularly as it brings out so much more plainly the cuts and all typed matter.

Our Catalogue has been so universally used that it is known as the TEXT BOOK of the TRADE—the READY REFERENCE for everything in the Hardware line.

The cover index was one of the best features of our last issue; this has been continued and supplemented by quick indexes preceding the goods of each department. We have also added to the regular index marginal letters, which will simplify and shorten all references.

All changes to date have been embodied and all new goods added.

We will continue the approximate prices (a key to which will be found in this book) on all articles, so that a dealer can readily make a selling price on any item he does not carry in stock. Owing to the fluctuation in values, our approximate prices are at the present time made higher than our selling figures. Many articles can now be sold at our approximate prices and afford a profit to the retailer.

We believe this book will commend itself for its compactness. To those of our customers who desire to have a copy in their office and one in the store, we will be glad to furnish another, if they will make their wish known to us or to our salesmen.

It is our intention to issue this volume at frequent intervals and endeavor to keep our trade fully posted at all times.

HIBBARD, SPENCER, BARTLETT & CO.

Chicago, January 1st, 1915.

QUICK INDEX

We introduce a Quick Index System in this Book which will Save a vast amount of the Merchant's Time and place every Line in the Book at his finger tips.

To find a Spade, for example, look at the Outside Cover of the Book which shows—

	Page.
Agricultural Tools	201

Then turn to page 201 and find this—

	Page.
Shovels, Spades and Scoops	202

The Covers of the Book—front and back—show the following list of Quick Index Pages:—

	Page.		Page.
Mechanics' Tools	1	Sewing Machines and Store Fixtures	1098
Agricultural Tools	201	Saddlery	1301
Builders' Hardware . . .	301	Cutlery	1601
Wagon Hardware	633	Fire Arms and Ammunition	1901
Refrigerators and Woodenware	701	Fishing Tackle and Sporting Goods	2101
Enameled Ware	801	Bicycles and Supplies . .	2301
Tinware	823	Automobile Supplies . . .	2333
House Furnishing Goods .	890	Paints and Varnishes . .	2401
Lamps and Lanterns . . .	1001	Electrical Supplies . . .	2500
Stoves and Ranges . . .	1025

CHICAGO.

INDEX.

IMPORTANT.

All goods are indexed in at least two ways—First under the noun or last word, as for instance—

BLOCKS—
Tackle 616

As this is the usual way of indexing, we have used bold-face capital letters for the noun, and the adjective in light-face type. In the second style we simply print the words in their natural order in light-face type, thus—

Tackle Blocks 616

Everything is indexed under both headings.

REVONOC MANUAL TRAINING BENCH.

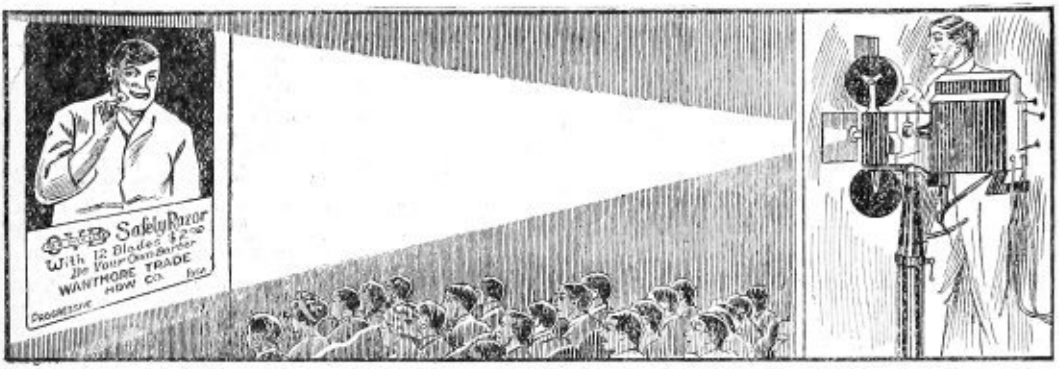
See Illustration on Opposite Page.

REVONOC—Alaska model, equipped with a No. 3 Vise, Steel Dog and Bench Stop, height 32 in., top 52x22 in., and 2¼ in. thick, tool recess 7 in. wide, drawer 32x19x6 in., fitted with bronze drawer pulls, weight 150 lbs., each .....AJBJ $20.40

Tongue and grooved joints used throughout, reinforced by heavy countersunk flush head draw bolts. The top is very solid and extra large, it is proof against rough and careless handling. 14 heavy machine bolts are used in reinforcing the joints. Absolutely the strongest manual training bench made. The carefully selected and seasoned wood used will give this bench a life of 50 years, and the special Sheldon vise will bear a strain of 150 lbs. with ease. The drawer, all the steel fixtures, etc., are the very best procurable, and if any part of the bench proves defective within three years, the purchase price will be promptly refunded. Final proof of the superiority of this bench is found in the fact that it is used in the U. S. Government's industrial schools. They are the standard make for this line of woods and dealers should see that the schools of their town have manual training rooms equipped with REVONOC benches.

The selection of the articles of these assortments are based on the specifications for manual training equipment which we are constantly receiving.
The tools are well known brands and are used by the best mechanics.
We guarantee every article of these equipments to be of first-class materials and free from defects of manufacture.

DOMESTIC SCIENCE OUTFIT FOR CLASS OF 24 PUPILS.



The Following List Comprises the Equipment Recommended By the Household Science Department of the Chicago Public Schools.

In addition to price on the entire outfit, note that catalogue page and price is shown on each item so that the outfit may be modified to meet the requirements of any particular school, or for larger or smaller classes.

FREE MOVING PICTURE MACHINE ADVERTISING SLIDES.

We Furnish These Slides Free to You with Your Name and Address. Why Not Try One in Your Local Theatre.

Realizing the great and increasing popularity of moving picture shows throughout the country, we have prepared a number of advertising slides, which we furnish to our customers under their own name.

The dealers can make arrangements to have these run in their local shows for a nominal sum or in exchange for goods. The opportunity of using advertising slides in the moving picture shows should not be overlooked. This is an excellent way for the dealer to get his name before the public and talk about his goods.

These slides are generally put in the machine while the operator is arranging films.

We illustrate on this page a few of the slides we have prepared, but we are constantly increasing this assortment, and only illustrate a few to give the dealer some idea of what we are doing for him along this line.

Order Slides By Number Only.

WELDLESS AXES

ONE PIECE CONSTRUCTION.

Eliminating high welding heats, mis-welds, soft body steel and all other faults of old style welded axes, axes are one-piece from bit to head, with no joint, seam, weld or weakness of any sort.

HIGHEST GRADE STEEL.

The result of years of experience and service tests, evolving an axe steel which is a revelation in hardness and toughness.

SPECIAL DOUBLE TEMPER.

Careful heat treatment gives extreme toughness and stiffness combined with special tempering at the bit to produce a keen edge, hard yet tough.

LONG SERVICE.

Bits are hardened all the way through, 1½ inches back, or more. Can be ground repeatedly without reaching soft temper, thus doubling the life of the axe.

RIGIDITY OF EYE.

The toughening of the steel, together with the reinforcing of the eye by our taper-punching process, affords an eye which will never buckle, even under severest service.

HARD HEADS.

Not soft steel as in most axes, but crucible steel. Will stand hard service without battering.

UNIFORMITY OF SHAPE.

Patterns are accurate and uniform, not the hit-or-miss patterns resulting from usual guess-work methods.

HANDLES.

We handle axes to order with a wide selection of handles, from genuine hand-made finest young hickory, to competitive grades of good value. Patterns large or small, straight or regular, octagon or oval, long or short as desired.

U. S. A. UNHANDLED AXES.

No. 2.

Forged Steel Body, Extra Quality Crucible Tool Steel Bits, Full Polished, Blued and Etched, Carefully Hand Tempered, and Sharpened Ready for Use. An Axe of Exceptional Quality and Handsome Appearance. Packed in Individual Wood Cartons, with Sliding Cover. Fully Warranted.

Our handled axes have the heads securely bored, with the handles projecting, and fully burlapped. Handled axes weigh about 16 lbs. per dozen more than the corresponding axes unhandled. In ordering handled axes, always specify the brand and weight of the axe, and prefix to the axe number the letter designating the handle, thus:—"1 dozen No. B2 U. S. A. Axes, 3½ to 4½ lbs.," which shows that No. 2 U. S. A. Yankee Pattern Axes are desired, fitted with No. B [illegible] octagon handles.

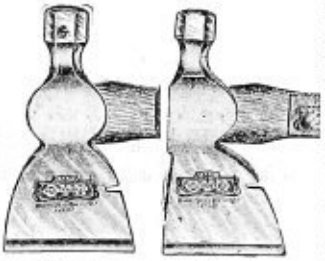
CHROME-VANADIUM.

The World's Finest Hatchet.



Forged under special high-power dies, from chrome-vanadium refined tool steel, of our own special analysis, the finest and highest priced hatchet steel ever used.

This steel contains chromium for superior hardness, and vanadium for maximum toughness, combining the two essential qualities of a perfect hatchet.

Beautiful pattern, octagon head and neck, with full mirror polish.

Finest young second growth hickory handles, tough and springy, with flared end to prevent slipping, highly polished and waxed, handsomely etched and labeled with the brand of quality.

A better hatchet cannot be made. There are none others as good.

ONE DOZEN IN A BOX.

HAMMERS.

STEEL—Crucible steel of special analysis, proven the best by years of experience and tested constantly to insure uniformity of composition.

TEMPER—Tempering and hardening heats regulated automatically by thermometer. Steel of uniform composition, uniformly treated, MUST give uniformly perfect results.

FACES—Of extreme hardness, yet not brittle, will do the severest work without cracking, denting or breaking down.

CLAWS—Short, compact, tough, with fine drawn slot, whose sharp knife edge will grip and hold and PULL STRAIGHT any nail which will enter it.

HAMMER HEAD.

Sectional cut of Bell Face Hammer Head, showing eye tapering from both ends toward the center; and Patent Wedge, which locks the handle perfectly. It cannot come out. Notice also the perfect proportions of the Head.

PATTERNS—Embodying the best suggestions of scores of practical mechanics. No "hit or miss" designs, but the best shape in each tool for comfort and efficiency.

HANDLES—Turned from best second growth white hickory, split, not sawed, insuring straight grain. Made with full grip and slightly flared end, will not slip from hand. Wedged with "Never-Slip" patent lock wedges, heads and handles never part company.

FINISH—A high mirror polish, or buffed nickel plate on copper. The artistic stamp and label brand each tool now and always as .

CHROME-VANADIUM.

The Highest Quality Ever Produced.

Forged by expensive high-powered dies, from chrome-vanadium refined tool steel of our own composition, containing chromium for maximum hardness, and vanadium for superior toughness. The highest priced hammer steel ever produced, making a tool of heretofore unattained perfection.

Exclusive pattern, round neck, OCTAGON HEAD.

Full mirror polish, handsomely stamped with the brand of quality.

Finest young second growth hickory handles, tough and springy, with flared end to prevent slipping, highly polished and waxed and handsomely labeled. THE WORLD'S SUPREME HAMMER.

No. CV11½—Chrome-vanadium, w't less handle 16 oz., w't per doz. 20 lbs. .....per dozen **ABJJ** $20.00

ONE IN A CARTON, ONE-HALF DOZEN IN A BOX.

HANDLES.

TWO-BITS, good value white hickory, the best quality which can be offered at "two-bits" retail.
IL-A-NOY, a splendid value of medium grade, strong, durable timber, partly red but well seasoned and finished. Will give service equal to many better looking, higher priced handles.
CRUSO, next in rank to the "Il-a-noy." Good strong hickory, but largely red wood. All right for ordinary use and a splendid value at the price.
These are not the lowest grade on the market as we do not carry the "culls" or unserviceable handles offered by some makers.

UNIVERSAL.

No. 67—Stanley's Improved, nickel plated, rosewood handle, for curved or straight work, length 9½ in., w't per doz. 10 lbs., per dozen .....**ACGJ** $18.00

This spoke shave has two detachable bottoms, adapting it equally well to circular work or straight; and, by means of a movable width-gauge, the tool can be used in rabbeting. Both handles are detachable, and either of them can be screwed into a socket on top of the stock, thus making it possible to work into corners or panels as no other spoke shave can do.

WOOD CARVING SETS.

No. 1—6¼x3½ in. varnished case, containing one each U tool, scraper, bevel chisel, V tool, curved gouge and straight chisel, tool steel blades, cocobolo handles, length over all 5½ in., w't per set ¼ lbs., per set **AJJ** $1.50

No. 2—9x3½ in. varnished case, containing one each V tool, bevel chisel, curved gouge, straight chisel, U tool and straight gouge, tool steel blades, cocobola handles, length over all 8½ in., w't per set 1 lb., per set .....**AEE** $2.00

No. 3—10x8½ in. case, nicely finished, containing twelve carving tools and one punch, blades of best grade steel, nicely finished, carefully tempered and sharpened, cocobola handles, length over all 8½ in., w't per set 3½ lbs. .....per set **EJJ** $7.50

This set is designed for manual training schools and for amateurs generally.

We have some calls for circular saws cheaper in price than our regular saws. Hiles Circular Cordwood Saws are first class in every respect, set and filed ready for use, and are warranted against defects in material and workmanship.

In ordering Hiles Circular Cordwood Saws, please specify circular saws.

Circular saws for bone or ivory, add 50 per cent to above list.

No extra charge for saws one gauge thicker than list.

Circular saws 48 inches and larger, if made thinner than 10 gauge, are not warranted, and are 10 per cent higher for each gauge thinner than No. 10.

Circular saws 42 inches and less in diameter beveled one gauge without extra charge; 44 inches and larger, beveled two gauges without extra charge.

Width, in.	¾	¼	1
Per dozen	$1.80	2.30	3.00
	ABJ	**AEE**	**BJJ**

Lengths given are measured from center to center of holes, an allowance being made for stretch of blade, excepting 14 and 17 inch lengths; these measure from center to center 13½ and 16½ in.

regular blades are recommended for cutting soft steel and cast-iron. Medium blades are good all-round saws, desirable for cutting tool steel and hard metals. Fine blades are adapted for cutting tool steel, drill rod, iron pipe, sheet metal, brass, etc. Hard blades are preferable to flexible for the average user.

When inserting hand blades strain well in frame. Run slowly (not over 60 strokes a minute). Bear hard on forward stroke to avoid slipping and lift slightly on backward stroke. Avoid bending sideways, adding pressure as edge of teeth wear and tighten blade in frame after first few cuts.

ONE DOZEN IN A PACKAGE; ONE-HALF GROSS IN A BOX.

SAWS AND SAW KNIVES.

ONE-HALF DOZEN IN A CASE.

Boys'.

Cut-I-Cure-U, Jr., wood saw and buck, painted red, 15 in. plain blade, w't per doz. 21 lbs.....per dozen **EDJ** $9.00

ONE IN A BOX.

WOOD SAW FRAMES.

No. 144—Braced frame, painted red, for 22 in. saw rod, without saw rod, w't per doz. 24 lbs...per dozen **BDJ** $4.50

No. 141—Short end pieces, w't per doz. 9 lbs. .....per dozen **JFJ** $1.40

No. 142—Long end pieces, w't per doz. 10½ lbs. .....per dozen **JHE** $1.60

No. 143—Center pieces, w't per doz. 4½ lbs. .....per dozen **JHE** $1.40

This frame is the same as that used for Nos. 140 *and* 145 *wood saws.*

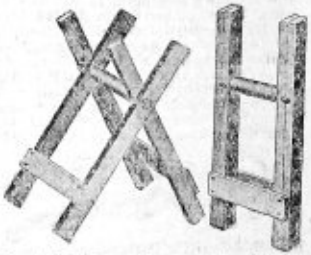
ONE-HALF GROSS IN A BOX.

SAW RODS.

No. 5—22 in., Clipper, w't per doz. 4¼ lbs. .....per dozen **JGJ** $1.50

ONE DOZEN IN A PACKAGE.

No. 15—22 in., Duplex, w't per doz. 6 lbs.....per dozen **JHE** $1.60



ONE DOZEN IN A BOX.

No. 25—22 in., Samson, extra heavy, tinned, japanned center, w't per doz. 8¼ lbs. .....per dozen **AAE** $2.25

ONE DOZEN IN A PACKAGE.

SAW BUCKS.

No. 1—Folding, w't per doz. 80 lbs., per dozen .....**BDJ** $4.00

ONE-HALF DOZEN IN A CRATE.

SAW SETS.

C H B, Special, nickel plated, adjustable for setting hand saws 4 to 16 points, rotary anvil with indicator for setting to corresponding number of teeth on saw, the gauge screw is provided with lock nut and the under lever prevents the set from wabbling when used, length 6½ in., w't per doz. 10 lbs. .....per dozen **J I E J** $15.00

Nicholson, blued finish, for hand saws, adjustable anvil and sliding gauge on top, w't per doz. 9½ lbs., per dozen .....**J F H E** $10.00
ONE IN A BOX; ONE-HALF DOZEN IN A CARTON.

No. 17—Taintor Positive, entirely of steel, parts interchangeable, length 6¼ in., w't per doz. 6½ lbs., per dozen .....**J G H J** $14.00
Twenty adjustments are obtainable. The punch moves in nearly the same circle as the tooth which it sets, consequently the tooth is not distorted nor its point curled. Faces of anvil are numbered and will produce any setting required.

No. 105—Morrill's Pattern, polished, for timber and board saws, from 6 to 14 gauge—circumference of saw makes no difference—length 15 in., w't per doz. 42 lbs. ...per dozen **A C B J** $18.00
No. 103—Morrill's Pattern, polished, for single tooth cross-cut and small circular saws, length 10 in., w't per doz. 14½ lbs.....per dozen **J G H J** $14.50
No. 104—Morrill's Pattern, polished, for Champion or M tooth cross-cut saws, length 10 in., w't per doz. 12 lbs., per dozen .....**J G H J** $14.50

No. 62—Morrill's Pattern, polished, for hand saws, length 7 in., w't per doz. 8 lbs. .....per dozen **C I J** $7.50
ONE-HALF DOZEN IN A BOX.

No. 01—Morrill's, polished, for hand saws, length 7 in., w't per doz. 8 lbs., per dozen .....**F J J** $8.00
Extra Plungers, for No. 01, each .....**A E** .20
Extra Anvils and Screws, for No. 01, per set .....**B E** $0.40

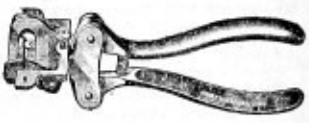
No. 1—Morrill's, polished, for hand saws, length 6½ in., w't per doz. 8 lbs.....per dozen **J H J E** $12.00
Extra Plungers, for No. 1, each .....**A D** .20
Extra Anvils and Screws, for No. 1, per set .....**B E** $0.40

No. 11—Morrill's, polished, for hand scroll and band saws, length 6¾ in., w't per doz. 8 lbs., per dozen .....**J I J J** $13.50

No. 95—Morrill's, polished, for hand saws, adjustable for 4 to 12 points, length 7 in., w't per doz. 7 lbs., per dozen .....**J I J J** $13.50
The adjustable feature whereby the correct set for every saw (according to the number of teeth to the inch) is instantly found, is an important improvement over anything yet produced by this maker. The wheel bearing numbers can be instantly adjusted.
ONE-HALF DOZEN IN A BOX.

No. 50—Morrill's Special, polished, for hand saws, adjustable for 4 to 16 points, length 6 in., w't per doz. 8 lbs., per dozen .....**J I F J** $16.00
This saw set is made with an improved revolving anvil and will give the correct set to hand saws having from 4 to 16 teeth to the inch.
ONE-HALF DOZEN IN A WOOD BOX.

No. 62-A—German, polished steel, wood handle, 6 gauges, with screw driver, length 8 in., w't per doz. 2½ lbs., per dozen .....**A B J** $3.00
ONE-HALF DOZEN IN A BOX.



No. 3—Morrill's, polished, for single tooth cross-cut and small circular saws, length 9 in., w't per doz. 15 lbs., per dozen .....**A B F J** $18.00
No. 4—Morrill's, polished, for Champion or M tooth cross-cut saws, length 9 in., w't per doz. 15 lbs., per dozen .....**A B F J** $18.00
ONE-HALF DOZEN IN A BOX.

No. 5—Morrill's, polished, for timber and board saws, from 6 to 14 gauge—circumference of saw makes no difference—length 14 in., w't per doz. 40 lbs.....per dozen **A G C J** $22.00
ONE-HALF DOZEN IN A WOOD BOX.

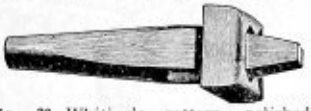
No. 21—Disston's Monarch, polished, for hand and back saws, length 6 in., w't per doz. 6½ lbs., per dozen .....**J G E J** $12.00
No. 23—Disston's Monarch, polished, for cross-cut saws, length 10 in., w't per doz. 24 lbs.....per dozen **A C H J** $21.00
NO. 21, ONE-HALF DOZEN; NO. 23, ONE IN A BOX.

No. 28—Disston's Triumph, polished, for hand saws, web and band saws, length 7½ in., w't per doz. 9 lbs., per dozen .....**J H G J** $13.50
The principal feature is the use of two plungers operated by two handles, pressure on the lower handle forcing plunger "D" against the body of the saw, thus holding it rigidly in position, while pressure on the upper handle operates plunger "C" in setting the tooth.

No. 13—Stillman's Pattern, blued, wood handle, length 6½ in., w't per doz. 3 lbs. .....per dozen **A E J** $3.25
ONE-HALF DOZEN IN A BOX.

SAW SETS AND SAW TOOLS.

SAW SETS.



Nos. 25 and 30. No. 35.

No. 25—Aiken's, polished cast steel, w't per doz 6½ lbs., per dozen **DBJ** $6.50

No. 30—Aiken's, polished cast steel, extra quality, w't per doz. 7¼ lbs., per dozen .....**EDJ** $9.00

No. 35—Hotchkiss', japanned iron body, steel mandrel and anvil, brass guides, w't per doz. 11 lbs., per dozen .....**JFJJ** $10.00

ONE DOZEN IN A BOX.

No. 20—Whiting's pattern, polished steel, for cross-cut saws only, length 3½ in., w't per doz. 3 lbs., per dozen .....**EGJ** $9.75

TWO DOZEN IN A BOX.

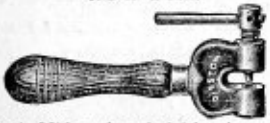
SAW GAUGES.

No. 51. No. 52.

No. 51—Atkins', single, w't per doz. 2¼ lbs. .....per dozen **JFJ** $1.20

No. 52—Atkins', double, w't per doz. 3 lbs. .....per dozen **JIJ** $2.00

The single gauge is for regulating the length of clearer teeth and width of set in cross-cut saws. The double gauge does the same for both hard and soft wood.



ONE DOZEN IN A BOX.

SAW PUNCHES.

No. 2—Midget, length 5½ in., japanned iron, for punching holes in butcher and hack saw blades, w't per doz. 6 lbs. .....per dozen **EJE** $8.00

ONE IN A BOX.

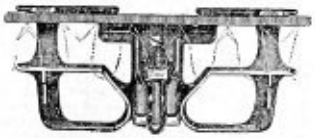
No. 1—Midget, length 6¾ in., japanned, wood handle, brass ferrule, steel punch, for punching holes in butcher and hack saw blades, w't per doz. 10 lbs. .....per dozen **ACHE** $16.80

ONE IN A BOX.

SAW TOOLS.

Jointing, Raker and Cleaner Tooth Gauge.

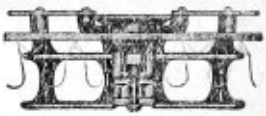
Set and Swaging Hammer.



Set Gauge.

Setting Stake.

No. 8—Simond's Crescent, including jointing, raker and cleaner tooth gauge, setting stake, set gauge and set and swaging hammer, w't per doz. sets 22 lbs., per dozen sets .....**ACIE** $18.00



Jointer.

No. 53—Atkins' Dexter, combining jointer, raker tooth, gauge, side file, w't per doz. sets 6 lbs., per dozen sets .....**CFJ** $8.00

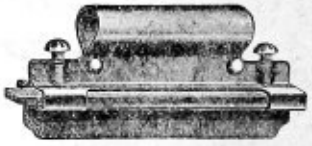
ONE-HALF DOZEN SETS IN A BOX.

SAW TOOLS.

Jointer.

Tooth Gauge.

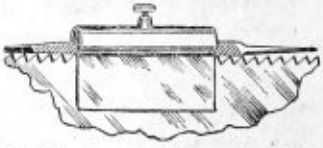
Setting Block.



Set Gauge.

No. 54—Atkins' Excelsior, combining jointer, tooth gauge, setting block and set gauge, w't per doz. sets 18 lbs., per dozen sets.....**JEDJ** $12.00

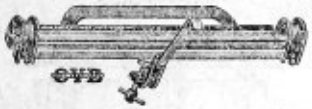
No. 054—Excelsior pattern, otherwise same as No. 54, per dozen sets.....**JDBJ** $12.00



ONE SET IN A BOX.

SAW JOINTERS.

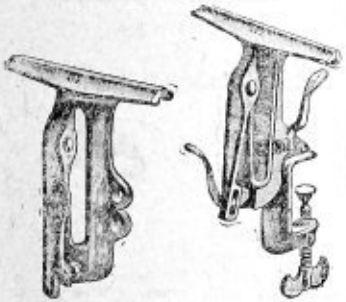
No. 1—Perfect, japanned steel, adjustable, length 4½ in., w't per doz. 8 lbs., per dozen .....**JEAJ** $10.00



It can be adjusted in a moment to the largest cross-cut or finest handsaw, and will joint or square any straight edge. Flat, triangular or half-round file can be used. Saves time, labor, wear and tear on the hands, and insures accuracy.

No. 3—Andrews, hard brass, nicely finished, length 3 in., takes taper files at right angle, w't per doz. 2 lbs., per dozen .....**DHJ** $8.00

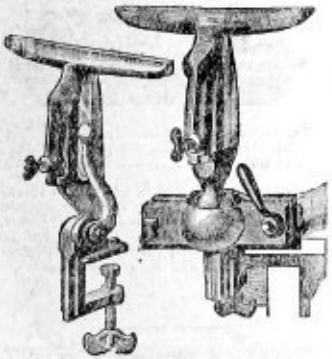
ONE DOZEN IN A BOX.



SAW CLAMPS AND VISES.

No. 77 ⊕V⊕—Folding, all steel, japanned, 11½ in. jaws, with rubber cushion, w't per doz. 35 lbs., per dozen ..... **JIFJ** $18.00

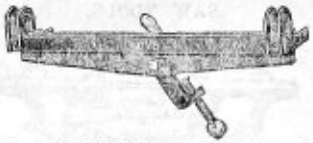
The saw is clamped the entire length of the jaws by means of the folding handle, and can be jointed as well as filed by inverting the vise.



ONE IN A BOX.

No. 0. No. 3-S.

No. 0—Cruso, japanned, 6½ in. jaws, light pattern, w't per doz. 36 lbs., per dozen ..... **CJJ** $8.50



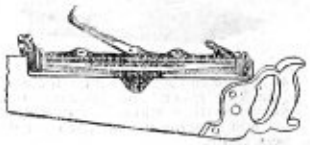
No. 3-S—Cruso, adjustable, japanned, 9½ in. jaws, malleable screw clamp, w't per doz. 51 lbs., per dozen ..... **JEDJ** $11.00

No. 10. No. 12.

No. 10—Adjustable, japanned, 9½ in. jaws, malleable screw clamp, w't per doz. 54 lbs., per dozen **JEIE** $12.00

No. 12—Ball and socket, japanned, 9½ in. jaws, adjustable to any position, malleable screw clamp, w't per doz. 78 lbs., per dozen **JHAJ** $15.00

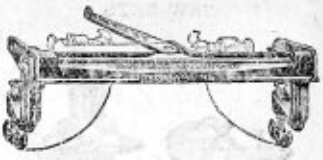
No. 15 ⊕V⊕—T and channel steel, baked japan finish, nickel plated trimmings, 11¼ in. jaws, rubber cushion, w't per doz. 34 lbs., per dozen ..... **JIFJ** $18.00



The saw is held securely by lever clamp on back jaw and is below the top of the vise.

No. 1-W—Wentworth's, japanned, 11 in. rubber cushioned jaws, w't per doz. 57 lbs.....per dozen **JFBE** $13.00

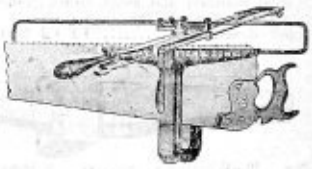
No. 3-W—Wentworth's, adjustable, japanned, 11 in. rubber cushioned jaws, malleable screw clamp, w't per doz. 66 lbs.....per dozen **JHDJ** $18.00



No. 116—Perfection, malleable iron, japanned, with drive hooks to attach to bench or board, w't per doz. 31 lbs., per dozen ..... **JEFJ** $15.00

Can be instantly and securely fastened to a work bench, saw horse, tool box, window sill, to the edge of a board, plank, joist, stick of timber, pile of lumber, rail of a fence, or any other suitable place, without the aid of screws or nails or other means of fastening.

It self-adjusts the saw, saving time, and clamps or releases the same instantly. Will hold saw for jointing by passing blade through and resting the heel on the arch of the clamp.

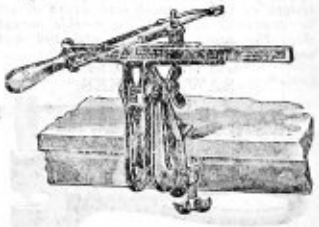


ONE-QUARTER DOZEN IN A BOX.

No. 200—Stearns', overhanging, folding, japanned, noiseless rubber cushioned jaw, w't per doz. 48 lbs., per dozen ..... **JHDJ** $18.00

Can be fastened to a bench or board by either the clamp or screws. Clamps fold out of way when not in use.

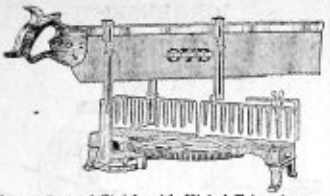
ONE IN A BOX.



No. 30—Disston's, japanned, extra heavy, adjustable, 12½ in. jaws, screw clamp for attaching to bench, complete with file, w't per doz. 234 lbs., per dozen ..... **BEBJ** $30.00

This is especially designed for those not skilled in saw filing, and is a help to an expert. It is adjustable to any and all positions, and when once set it is impossible to change the angle by mistake.

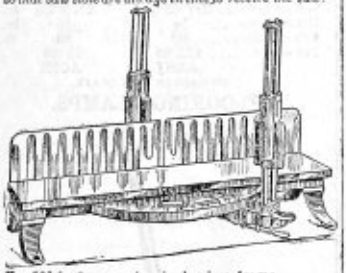
The clamp, guide, file and handle are included and not sold separately.



ONE IN A BOX.

No. 25—Stearns', japanned, nickel plated guide, adjustable to three rigid positons, 16 in. flat steel guide bar, 10½ in. planed jaws, rubber cushioned, screw clamp, complete with file, w't per doz. 105 lbs., per dozen ..... **BAFJ** $30.00

The guide has three rigid positions in which it holds the file; one position for filing the saw on first side, another for filing it on the opposite side a third for use in filing rip saws only. By means of the ball and socket joint the guide may be set at either of these positions; when thus set the file is rigidly held at the proper angle and incline for filing, it is then impossible to file the teeth inaccurately.



MITRE BOXES.

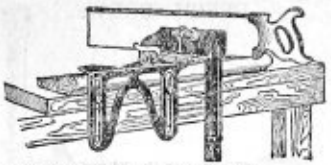
Black Enamel Finish with Nickel Trimmings—Fitted with Special Cast Back Saw.

Nos.	426	528	630
Saw	26×4	28×5	30×5in
Cap. at right angles	8	8	9 in.
Cap. at 45 degrees	6¼	6¼	7 in.
W't.	39	40	41 lbs.
Each	$13.50	14.00	14.50
	ABAJ	ABFJ	ADDJ

Its simplicity of construction and quick adjustment appeals to the most conservative mechanic at once, as it insures more accurate work, less expense for repairs and less frequent delays. The notched segment and locking device is the most important improvement made in Mitre Boxes in years as every angle is positive. The arrangement of work clamps make it possible to handle a wider range of work than with any other Mitre Box. The device for controlling the depth of saw cut and supporting saw above the work is in one piece. A slight blow on top of saw will release it when held above the work. Cast lugs on sides of saw guide posts hold saw guides in position so that saw slots are always in line to receive the saw.

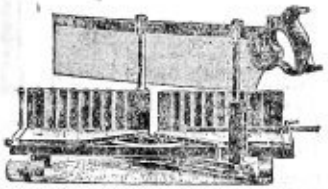
No. 60½—STANLEY'S, single-piece frame, base and back accurately machined, all parts interchangeable, adjustable saw guides, either back or panel saws may be used, w't 21 lbs.....each DHJ $6.50

OLMSTED'S, Hardwood, Oiled, Iron Guides.



No. 1—For 1½×3 in. wood, w't 5¾ lbs., each.....AJJ $2.00

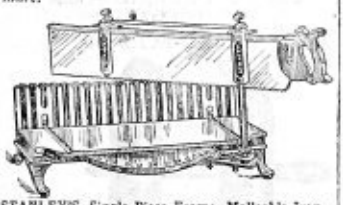
No. 2—For 2½×4 in. wood, w't 10¼ lbs., each.....ABE 3.00



No 3—For 1½×3 in. wood, w't 6¼ lbs., each.....ABE 2.50

No 4—For 2½×4 in. wood, w't 11 lbs., each.....AHJ 3.50

The guides can be adjusted to any thickness or pattern of saw; the frame cannot be cut away.

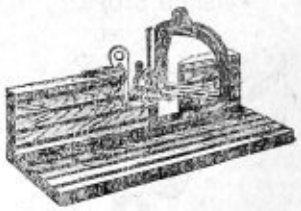


No. 10—SEAVEY'S, improved pattern, japanned, nickel plated bright parts, adjustable to any angle, degrees marked on bar with set screw, w't 2¾ lbs.....each AHE $2.00

GOODELL'S, Bessemer Steel Box, Corrugated Cold Rolled Steel Back, Complete with Disston's Saw and Attachments.

Nos.	264	286	306	306
Saw	26×4	28×5	30×5	30×6 in.
W't	30	33	40	45 lbs.
Each	$12.00	13.25	13.50	15.25
	AJHJ	AAJE	ABAJ	ACHJ

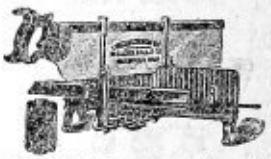
These boxes have automatic stops to hold up the saw, allowing the operator to use both hands in placing the wood. The backs are corrugated to ¼ in. in depth and ½ in. in width, allowing perfect clearance for sawdust. These boxes give 10½ in. at right angles and 7¼ in. at mitre.



STANLEY'S, Single Piece Frame, Malleable Iron Legs, Steel Saw Guide Rods, Complete with Disston's Saw.

Nos.	242	244	246
Saw	22×4	24×4	26×4 in.
W't	27	30	33 lbs.
Each	$10.75	11.00	11.25
	JIJJ	JIBJ	JIEJ
Nos.	346	358	460
Saw	26×4	28×5	30×6 in.
W't	35	40	45 lbs.
Each	$12.25	13.00	16.00
	AJBJ	AJHJ	ABIE

Nos. 242, 244 and 246 have a right angle capacity of 8¼ in., 5½ in. at 45° and 3½ in. at 30°. Nos. 346 and 358 have a right angle capacity of 9½ in. 6½ in. at 45° and 4½ in. at 30°.



In these boxes the saw is supported above the work; the swivel is clamped automatically. They are supplied with a spring catch, which allows the swivel to swing free. There is a second socket in swivel, allowing use of short saw. All parts are interchangeable.

ONE IN A CASE.

No. 15—PERFECTION, bed and back made from selected wood with inlaid strips to prevent warping, can be used with a back, hand or panel saw, capacity 45°, 30°, 30°, 22½° and 9° w't 7 lbs., each.....BDJ $4.00

TWO IN A BOX.

LANGDON ACME, Complete with Disston's No. 6 Saw.

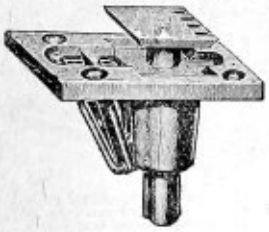
Nos.	68	69	73	74	75
Saw	22×4	24×4	26×4	28×5	30×5 in
W't	35	35½	35	35½	42 lbs.
Each	$10.00	10.50	12.00	14.00	14.50
	JHIJ	JICE	AJFE	AAGJ	ABBJ

Capacity at mitre for Nos. 68 and 69 is 5 in., for Nos. 73, 74 and 75 is 7 in.

Capacity at right angles for Nos. 68 and 69 is 7½ in., for Nos. 73, 74 and 75 is 10½ in.

In addition to notches for the positive angles commonly in use, the box has a graduated arc in front with the various degrees marked on it. A metal index plate with degrees marked thereon is attached to machine.

No. 20—MARSH, mitre machine and picture frame vise, malleable iron, japanned frame, saw is 26×4½ in., will cut any moulding 5 in. in width, or less, and will join any frame 7½×7½ in. or larger, w't 20 lbs. each ABJJ $15.00



Has a rule and measure gauge from either side of the machine alike, making it possible to cut the sides and ends of a frame the same length. The clamps on either side hold the work securely in position.

ONE IN A CASE.

ALL SAWS FURNISHED WITH MITRE BOXES SHOWN ON THIS PAGE ARE ELEVEN POINTS TO THE INCH.

Saddle is held in bar notches by indestructible spring bars. The double end malleable cranks are quick and permit the use of two hands for excessive pressure.

CARPENTERS' DOOR.

3-16x1½ In. Wrought Steel T Bar, Malleable Iron Frame and Sliding Stop, Spring Catch, ⅝ In. Wrought Iron Screw, Ebonized Handle.

Nos.	103	104	105
Length between jaws, ft.	3	4	5
W't per single doz., lbs.	98	110	122
Per single doz.	$24.00	27.00	30.00
	AIBJ	**BAFJ**	**BDJJ**

The bar is special quality rolled stiff steel; the "T" shape has much more strength for a given weight than is possessed by flat stock. The notches are cut on the lower edge of the bar, affording greater holding power to a sliding jaw than if cut on the upper edge. The wrought iron screw is provided with a deep thread.

ONE DOZEN IN A CASE.

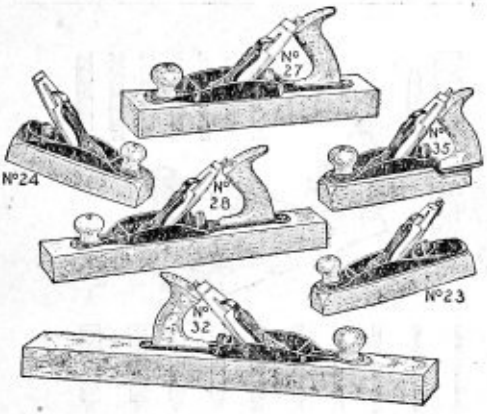
STANLEY PLANES.



"BAILEY" ADJUSTABLE IRON.

The handle and knob are made of highly finished, thoroughly seasoned rosewood. The English steel cutter is tempered, ground and honed, ready for use, is adjustable both endwise and sidewise, and bedded to the heel of bevel. The width of mouth can be varied by changing the setting of the frog. Bottoms, either flat or corrugated (see cut 7-C) as desired.

ONE IN A BOX.

STANLEY "BED ROCK."

For fine work on hard and knotty wood, this plane surpasses all others.

The cutter, frog and bottom are so machined and fitted that they are practically one solid piece of metal, thus preventing any chance of vibration.

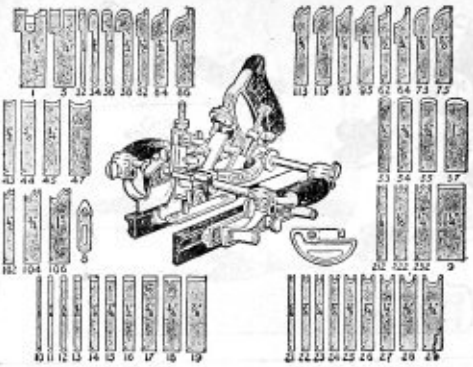
The frog travels in a groove, ensuring it being square with the mouth of the plane, and preventing shifting or "wobbling."

The width of the mouth can be regulated by use of a screw driver as shown in the cut, without removing the cutter and lever.

The cutters are made of the best English steel and are adjustable both endwise and sidewise.

The shape of the sides, a distinctive feature, adds greatly to the strength of the plane.

The handles and knobs are of rosewood and finely finished.



Bottoms either flat or corrugated (see cut No. 606–C) as desired.

STANLEY PLANES.

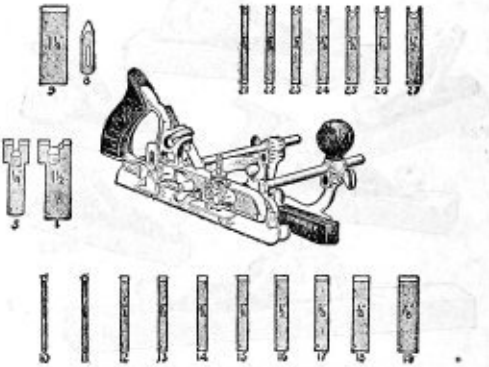
PATENT UNIVERSAL.

This tool may well be called "a planing mill within itself." It will do a greater variety of work than can be done with a full line of so-called "Fancy" planes. The regular equipment sent with the plane comprises the 52 cutters arranged in four separate cases. These cutters, together with the plane are packed in a neat wooden box.

A further line of 41 special cutters, as shown in illustration, are also made and can be furnished direct from factory.

With the complete line of cutters, there is practically no end to the variety of work which can be done.

The plane is 10 inches long, weighs only 7¾ lbs. (with 93 cutters—11 lbs.), and replaces a full line of 93 fancy wood planes, weighing probably 90 lbs.



All metal parts are nickel plated and the handle and fences are made of selected rosewood, every part being highly finished.

Special circular, showing samples of work and directions for use, is enclosed with each tool, or will be mailed on application.

No. 55—Complete with 52 cutters.....each ACDE $14.00
Extra Cutters, 52 tools, bits, etc.....per set EDJ 6.00

ONE IN A WOOD BOX.

COMBINATION.

Seven tools in one in compact and practical form—1, beading and center beading plane; 2, plow; 3, dado; 4, rabbet and fillister; 5, match plane; 6, sash plane; 7, slitting plane.

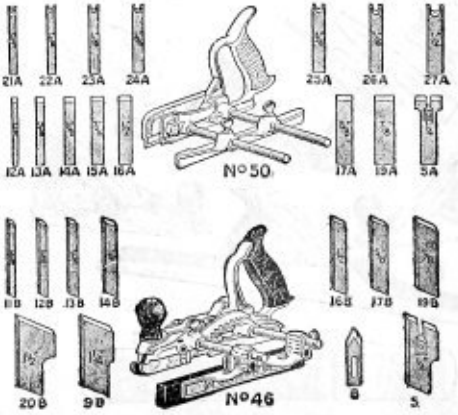
A sliding section, with the main stock, forms a bottom giving a proper bearing for different widths of cutters.

Seven beading tools, 1/8 in., 3/16 in., 1/4 in., 5/16 in., 3/8 in., 7/16 in., and 1/2 in.; ten plow and dado bits—3/16 in., 5/16 in., 1/4 in., 3/8 in., 7/16 in., 1/2 in., 9/16 in., 5/8 in., 3/4 in., and 7/8 in.; a tonguing tool, a sash tool and a slitting cutter are regularly furnished.

Each plane has an adjustable fence, a depth gauge, spurs for use across the grain, a cam leveling or steading rest, and can be used either right or left hand.

No. 45—Nickel plated, with twenty tools.....each FEJ $7.00

Extra Bottoms and Cutters.



By substituting special bottoms for the sliding section, cutters as follows may be used. Special bottom required for each cutter. Prices of hollows and rounds include two cutters and two bottoms; of nosing tool, one cutter and one bottom.

		PER PAIR
No. 6—Hollow and round 1¼ in. cutters work ¾ in. circle,	ABJ	$1.50

Extra cutters, 20 tools, bits, etc.....per set	CJJ	3.50
Extra spurs.....per dozen	BB	.50

ONE IN A WOOD BOX.

Extra Screws.....per dozen BB .50

BEADING, PLOW, DADO AND MATCHING.

No. 50 Combined Beading and Matching Plane for ordinary beading or for center beading cannot be surpassed. By adjustment of the fence, center beading can be done up to five inches from the edge of the board. Except for working across the grain, spurs need not be used.

With each plane are furnished beading tools, 1/8, 3/16, 1/4, 5/16, 3/8, 7/16 and 1/2 inch, and a pair of 1/4 inch matching tools.

No. 50—Nickel plated stock and fence.....each CGJ $4.50

Stanley Adjustable Dado, Plow, etc., is accompanied by eight plow and dado bits (3/16, 1/4, 5/16, 3/8, 1/2, 5/8, 3/4 and 1 1/4 inch), a fillet-ster cutter, a slitting tool and a tonguing tool. All except the slitting blade are secured in the main stock on a skew.

No. 46—Nickel plated, with 11 tools, bits, etc.....each PJE $8.00

This tool has a single iron with cutting edge rounded, and is particularly adapted for roughing down work before using jack or other planes.

ONE IN A BOX.

STANLEY LOW ANGLE BLOCK.

No. B62—14 in., 2 in. cutter, w't 4 lbs., each .....**BAE** $2.50

The construction of this plane is such that it is especially adapted for use in cutting across the grain on heavy work, where more power is required than can be obtained by use of the ordinary block plane. The plane is fitted with an adjustable throat, which enables the user to work equally well on hard or soft wood.

ONE IN A BOX.

PLANES AND SCRAPERS.

"BAILEY" BLOCK PLANES.

With Throat and Lateral Adjustments.

No. 9½—6 in., 1¾ in. cutter, w't 1½ lbs., each .....**JHJ** $1.10

No. 15—7 in., 1¾ in. cutter, w't 1½ lbs., each .....**JHE** $1.20

No. 60—6 in., 1½ in. cutter, nickel plated cap, w't 1¼ lbs.....each **JIJ** $1.25

No. 65—7 in., 1¾ in. cutter, nickel plated cap, w't 1½ lbs., each .....**AJJ** $1.35

No. 61—Length 6 in., 1¾ in. cutter, japan finish, w't 1¼ lbs., each .....**JHJ** $1.10

No. 131—Double end, 8 in., 1¾ in. cutter, w't 1½ lbs. .....each **JIE** $1.50

This plane has two slots and a movable cutter seat. When it is desirable to use it as a bull nose plane, the adjustable cutter seat can be reversed as indicated in cut.

ONE IN A BOX.

BULL NOSE RABBET PLANES.

No. 75—4 in., iron stock, 1 in. cutter, w't 8 oz. .....each **CJ** $0.40

ONE IN A BOX.

STANLEY BLOCK PLANES.

No. 101. No. 100.

No. 101—3½ in., 1 in. cutter, w't 4½ oz., each .....**AB** $0.20

No. 100—3½ in., handled, 1 in. cutter, w't 6 oz. .....each **AH** $0.25

No. 103.

No. 102—5½ in., 1¾ in. cutter, w't 3¼ lb., each .....**BH** $0.30

No. 103—5½ in., adjustable, 1¾ in. cutter, w't 3¼ lbs. .....each **CH** .45

No. 110—7½ in., 1¾ in. cutter, w't 1¼ lbs. .....each **CH** $0.55

No. 139—8 in., double-ender, 1¾ in. cutter, w't 1½ lbs. .....each **EC** $0.75

No. 220—7½ in., adjustable, 1¾ in. cutter, w't 1½ lbs. .....each **EC** $0.75

No. 203—Screw adjustment, rosewood knob, length 5½ in., 1¾ in. cutter, w't ⅞ lb. .....each **FJ** $0.85

CABINET MAKERS' EDGE PLANES.

No. 97—10 in., 2¼ in. cutter, w't 3¼ lbs., each .....**AFE** $2.20

Cutters, for No. 97★ .....each **DJ** .45

A useful tool for piano makers and all cabinet workers, for trimming inside work where space prevents use of any other plane.

ONE IN A BOX.

★*FOR FACTORY SHIPMENT ONLY.*

BAILEY VENEER SCRAPERS.

No 12

No. 12—6¼ in., 3 in. cutter, rosewood handle, w't 3½ lbs...each **AIJ** $2.50

No. 12½—Wood face, 6¼ in., 3 in. cutter, w't 4 lbs. .....each **BEE** $3.30

No. 12¼—2 in. cutter, otherwise same as No. 12 .....each **AGE** $2.50

Cutters, for veneer scraping, each .....**AH** .20

No. 12 takes the same cutter as No. 112 Scraper Planes. For many kinds of work, its peculiar form is of great advantage.

ONE IN A BOX.

STANLEY SCRAPER PLANES.

No. 112—9 in. adjustable, 3 in. cutter, with 1 scraper blade, w't 4 lbs., each .....**AFE** $2.20

Cutters, for veneer scraping, each .....**AH** .20

Cutters, for toothing, Nos. 22, 28, 32—22, 28 or 32 teeth per in.—each **BH** $0.30

ONE IN A BOX.

BELT MAKERS' PLANES.

No 11

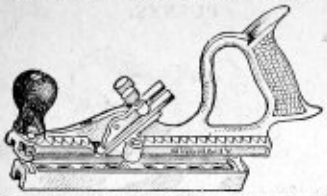
No. 11—5¼ in., adjustable, 2¼ in. cutter, w't 3½ lbs. .....each **AFE** $2.20

Cutters, for No. 11★ ....each **BG** .29

For chamfering down the laps of a belt before fastening them together.

ONE IN A BOX.

STANLEY EDGE TRIMMING PLANES.



No. 95—6 in., 7⁄8 in. cutter, japanned, w't each 1¼ lbs. .....each **JIJ** $1.15

ENTIRE COLUMN, ONE IN A BOX.

STANLEY ADJUSTABLE PLANES.

TONGUING AND GROOVING.

No. 48—8¼ in. nickel plated iron stock and fence, for ¾ to 1¼ in. boards, including two narrow and one extra wide tonguing and grooving tools, w't 3 lbs. .....each **BJE** $2.75

No. 49—8 in. nickel plated iron stock and fence, for ¾ to 1¼ in. boards, including tonguing and grooving tools, w't 2½ lbs. .....each **BJE** $2.75

Cutters, for Nos. 48 and 49★ each .....**AE** .17

The fence is set in a center pivot and can be swung around and locked either way. Set one way it exposes two cutters for cutting the tongue and when reversed leaves only one exposed for making the groove.

ONE IN A BOX.

DOUBLE END MATCH.

No. 146—Nickel plated, matches ⅜ in. boards, cuts groove ⅜ in., w't 1½ lbs., each .....**AFE** $2.20

No. 147—Nickel plated, matches ⅝ in. boards, cuts groove ⅞ in., w't 2 lbs., each .....**AFE** $2.20

No. 148—Nickel plated, matches ⅞ in. boards, cuts groove ¾ in., w't 2¼ lbs., each .....**AFE** $2.20

As shown in cut, the tool is provided with both tongue and groove irons. With one side a tongue can be cut, and by reversing ends, the plane will cut a groove to fit.

ONE IN A BOX.

IMPROVED DADO.

8 Inch, Iron Stock, with Depth Gauge and Two Adjustable Spurs.

No. 39—Cutter, in...	¼	⅜	½
Each $1.65	1.65	1.65
	ABE	**ABE**	**ABE**
No. 39—Cutter, in...	⅝	¾	⅞
Each $1.65	1.65	1.65
	ABE	**ABE**	**ABE**

Cutters, for No. 39★.....each **AH** $0.20

Holds true in narrow widths where a wood plane will not. Has a skew cutter and adjustable depth gauge and spurs on each side of plane, thus allowing wear to be taken up and depth of the cut regulated.

ONE IN A BOX.

IMPROVED RABBET.

Iron Stock, Length 8 Inches, with Depth Gauge.

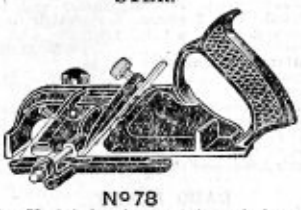
No. 180—1½ in. wide, without spur, w't 2½ lbs. .....each **JHE** $1.10

No. 1°1—1¼ in. wide, without spur, w't 2¼ lbs. .....each **JHE** $1.10

No. 182—1 in. wide, without spur, w't 2 lbs. .....each **JHE** $1.10

No. 190—1½ in. wide, with spur, w't 2½ lbs. .....each **AJJ** $1.25

No. 191—1¼ in. wide, with spur, w't 2¼ lbs. .....each **AJJ** $1.25



No. 192—1 in. wide, with spur, w't 2 lbs., each .....**AJJ** $1.25

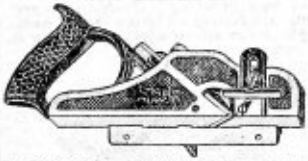
Cutters, for above★ .....each **AH** .20

This plane will lie perfectly flat on either side, and can be used with right or left hand equally well, while planing into corners or up against perpendicular surfaces.

ONE IN A BOX.

DUPLEX RABBET AND FILLETSTER.

No 78



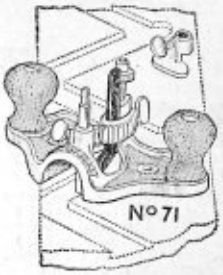
No. 78—8½ in. iron stock and fence, 1½ in. cutter, w't 3 lbs., each .....**ABE** $1.65

Cutters, for No. 78★ .....each **AH** .20

This plane has two seats for the cutter, one for regular work and the other where a bull nose is required. Has spur and removable depth gauge. Adjustable fence can be used on either side and slides under the bottom regulating width of cut. To use as rabbet plane, remove fence and arms.

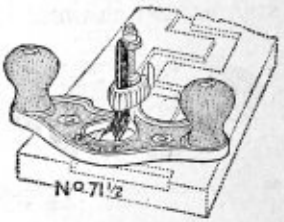
ONE IN A BOX.

SKEW CUTTER, FILLESTER AND RABBET.



No. 289—8½ in., japanned, 1¼ in. cutter, with fence and depth gauge and two adjustable spurs, one on each side, w't 4 lbs. .....each **AEJ** $1.75

The fence and depth gauge can be attached to either side so that the plane can be used equally well for right or left hand work. The adjustable fence slides under the bottom, regulating the width of the cut. By removing arms and fence a skew cutter rabbet plane is obtained.

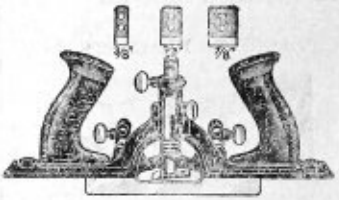


ONE IN A BOX.

WOODWORKERS' ROUTER.

No. 71—Nickel plated, width 8¼ in., open throat, ¼ and ½ in. steel bits, with throat attachment, w't 2½ lbs., each .....**AEE** $2.05

Cutters, for No. 71★ .....each **BE** .30



No. 71½—Nickel plated, width 8¼ in., closed throat, ¼ and ½ in. steel bits, w't 2½ lbs. .....each **ABE** $1.65

Cutters, for No. 71½★ ...each **CE** .30

Nos. 71 and 71½ are for surfacing the bottom of grooves and depressions parallel with the general surface of the work. The open throat design gives more freedom for chips and a better view of the work and cutter. The latter has an attachment for regulating the thickness of the chip and a second attachment for closing the throat for use on narrow surfaces.

ONE IN A BOX.

DOOR TRIM.

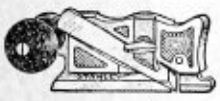
No. 171—11 in., japanned, nickel plated trimmings, rosewood handles, 3 forged steel cutters, w't 3 lbs., each .....**BCJ** $2.75

This new plane will make mortises for Butts, Face Plates, Strike Plates, Escutcheons, etc., without the use of a butt gauge or chisel. Cutter can be set to work from either end of the plane or across it. Spring prevents taking a heavier chip than can be easily carried.

ONE IN A BOX.

★*FOR FACTORY SHIPMENT ONLY.*

STANLEY PLANES, BEADERS, ETC.



CARRIAGE MAKERS' RABBET PLANES.

No. 10½—9 in., 2⅜ in. cutter, w't 3 lbs., each ..... **BJJ** $2.75
No. 10—13 in., 2¼ in. cutter, w't 4½ lbs., each ..... **BDJ** $3.30
No. 10½ C—9 in., with corrugated bottom, 2⅜ in. cutter, w't 3 lbs., each ..... **BJJ** $2.75
No. 10C—13 in., with corrugated bottom, 2⅜ in. cutter, w't 4½ lbs., each ..... **BDJ** $3.30

Adapted for mining, wagon making and other heavy work.

SIDE RABBET PLANES.

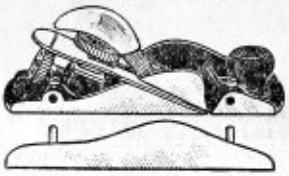
No. 98—4 in., nickel plated, right hand, w't 8 oz. ..... each **JGE** $1.00

No. 99—4 in., nickel plated, left hand, w't 8 oz. ..... each **JGE** $1.00
Cutters, for Nos. 98 and 99, each★ ..... **AH** .20

Convenient tools for side-rabbeting and trimming dados, mouldings and grooves of all sorts. A reversible nose piece will give each tool a form by which it will work close up into corners.

ONE IN A BOX.

ROOFING BRACKETS.



No. 1—Stanley's, steel, japanned, 8 in., w't per doz. 14 lbs., per dozen ..... **BFE** $3.50

So constructed that any increase of pressure or weight from above increases their security by pressing the spurs into the shingles. Steel spurs also hold the staging boards. No loose parts to get lost and no nail holes are made in the roof.

ONE-HALF DOZEN IN A BOX.

RABBET AND BLOCK PLANES.

No. 140—7 in., with detachable side, 1¼ in. cutter, w't 1¼ lbs., each ..... **AAJ** $1.40
Cutters, for No. 140★ ..... each **AH** .20

The detachable side will easily change this tool from a block plane to a rabbet plane, and vice versa. The cutter is adjustable end-wise and is set on askew.

UNIVERSAL HAND BEADERS.

No. 66—Stanley's, width 11¼ in., nickel plated stock, 7 steel cutters and 1 blank with 2 gauges for straight or curved work, w't 1¼ lbs., each ..... **JGE** $1.00
Cutters or blanks for No. 66, each★ ..... **JE** .05

Very handy for beading, reeding or fluting straight or irregular surfaces and for light routering. The handles are curved to give ample room between the user's hands and the surface of the work.

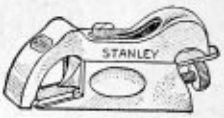
DADO PLANE.

No. 239—Stanley's, 7½ in., ⅛ in. cutter, w't each 1 lb. ..... each **AGJ** $2.20

Extra narrow cutter makes it ideal for blind wire grooving. Double spur prevents splintering in cross grain work. Depth gauge allows a ½ inch groove to be cut.

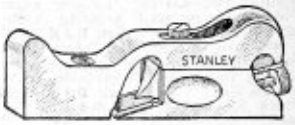
ONE IN A BOX.

BUTCHERS' BLOCK PLANE.



No. 64—Stanley's, 12½ in., two 2 in. cutters, w't each 4 lbs., each **AHE** $2.40

For truing up and resurfacing butchers' blocks. The regular plane iron is used for finishing, also for keeping in condition meat benches and tables.



ONE IN A BOX.

★*FOR FACTORY SHIPMENT ONLY.*

CABINET MAKERS' RABBET PLANES.

No. 90—4 in., bull nose, adjustable, 1 in. cutter, w't 1 lb. ..each **AFE** $2.20

Nickel Plated, with Adjustable Throat.
No. 92—5½ in., ¾ in. cutter, w't 1½ lbs., each ..... **AFE** $2.20
No. 93—6½ in., 1 in. cutter, w't 1¾ lbs., each ..... **BJJ** $2.60
No. 94—7½ in., 1½ in. cutter, w't 2 lbs., each ..... **BCE** $3.00
Cutters, for above★ ..... each **BE** .30

For fine cabinet or other work where extreme accuracy is required. The sides and bottom, being square with each other, the plane will lie perfectly flat on either side and can be worked either right or left hand. They have adjustable throats; this means that the width of the throat opening, or mouth, can be widened or narrowed as coarse or fine work may require. They are also fitted with the side groove or "Handy" grip feature. The cutters are adjustable endwise.

ONE IN A BOX.

CORNERING TOOLS.

No. 28—5¼x⅝ in., flat steel, 1/8 and ⅛ in. cutters, w't per doz. 1½ lbs., per dozen ..... **BJE** $4.80
No. 29—5¼x ⅞ in., flat steel, ¼ and ⅜ in. cutters, w't per doz. 1½ lbs., per dozen ..... **BBJ** $4.80

These tools are used by pattern makers and all wood workers for rounding sharp edges. They have a different size cutter at each end and their form is such that no depth gauge is required.

ONE-HALF DOZEN IN A BOX.

CABINET SCRAPER BURNISHERS.

No. 01—Polished oval cast steel blade, wood handle with ferrule, entire length 8½ in., w't per doz. 1¼ lbs., per dozen ..... **AHJ** $4.00

This tool is used to put a smooth finishing edge to a cabinet scraper.

ONE-HALF DOZEN IN A BOX.

CABINET SCRAPERS.

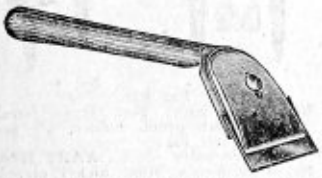
CABINET SCRAPERS.

No. 81—Stanley's, nickel plated, raised handles, length 10 in., 2½ in. cutter, w't per doz. 30 lbs., per dozen.....**ADDJ** $18.00

Designed to do fine scraping such as veneering, cabinet work, etc. Has a rosewood face which reduces friction and prevents marring the surface worked upon. Handles are raised to protect user's hands and are pierced for easy hanging up when not in use.

No. 80—Stanley's, japanned, raised handles, length 11 in., 2⅜ in. cutter, w't per doz. 21 lbs., per dozen.....**JHIJ** $12.00

Cutters, for No. 80, per doz. **BAE** 2.40



No. 82—Stanley's, japanned with polished edges, maple handle and knob, length 14½ in., 3 in. cutter, swinging adjustment, w't per doz. 21 lbs., per dozen .....**JIFJ** $12.60

Extra Cutters, for No. 82, per dozen .....**AEF** 2.00

The adjustable handle allows the blade to be tilted to any angle desired. Special blades of different forms and widths can be securely held in any position required, thus permitting the tool to be worked in many places inaccessible to other scrapers.

ONE IN A BOX.

No. 118—Barwick's, heavy nickel plated frame, 12 in. solid 3x2 in. blade, 12 in. solid socket handle, w't per doz. 24 lbs. .....per dozen **AJHJ** $24.00

This scraper especially appeals to the wood worker because of its 45 degree angle, which seems most desirable, its weight which makes smoother and much less difficult work, and because of the variety of blades which may be used—2 to 6 inch, being the width which will work perfectly. The Barwick is the only tool of its kind which will work eucalyptus successfully.

ONE IN A BOX.

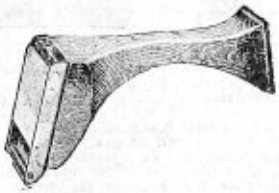
CABINET SCRAPERS.

No. 114 [illegible]—Polished steel frame, crucible steel blades, rubberoid handle, blades 3x5 in., 16 guage, w't per doz. 24 lbs.....per dozen **ABJJ** $24.00

Extra Blades.....per dozen **BAE** $4.00

The handle is adjustable to any position up or down and sidewise. Blade can be instantly removed or adjusted by releasing the lever under hand rest.

The hand rest relieves strain on the wrist and prevents chattering. Will hold any blade up to 3 in. wide.



No. 116 [illegible]—Japanned steel frame, 3x1½ in. crucible steel blade, stained handle, adjustable to any position, w't per doz. 21 lbs., per dozen.....**JIJJ** $18.00

Blade is adjustable and handle by an ingenius ball and socket arrangement, can be instantaniously set at a wide angle to the blade in any direction.

No. 150—Bennett, adjustable, nickel plated, blade 3 in. wide, 5 in. long, 11 in. maple handle, w't per doz. 17 lbs.....per dozen **JHDJ** $18.00

No. 21—Ellsworth's, 8 in., adjustable, 3 in. steel cutter, polished hickory handle, w't per doz. 15½ lbs., per dozen .....**JIFJ** $16.00

Extra blades .....per dozen **JHE** 1.50

ONE IN A BOX.

CABINET SCRAPERS.

[illegible], Best Crucible Steel, Nicely Finished, Dressed on Edges.

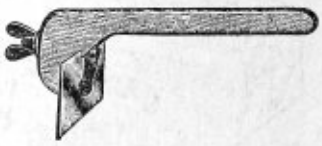
W't per doz., lbs.	2	3¼	3
Per dozen	$1.00	1.80	1.30
	JFJ	**AAJ**	**JHJ**

Made of selected high grade English steel, great care being taken to give them a special temper for this kind of work.



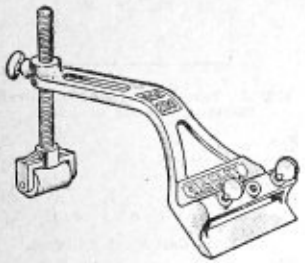
No. 87—Stanley's, 8 in., adjustable, 2 in. cutter, stationary rosewood handle and knob, w't per doz. 30 lbs., per dozen.....**AHJJ** $24.00

Cutters, for No. 87, per doz. **BAE** 2.40

In use the blade springs backward from the front end of the mouth, allowing shavings to pass through. When working pressure is released the blade springs back to its normal position.

ONE DOZEN IN A BOX.

No. 10—Ajax, 3x3 in. cast steel polished blade, polished beechwood handle, japanned malleable iron clamp, w't per doz. 10 lbs. ....per dozen **BBJ** $5.00



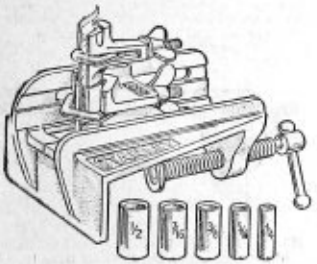
No. 11—Extra blades for No. 10, 3x3 in., 16 gauge steel ..per dozen **ADJ** $2.80

A labor saving and convenient tool, relieves the fingers from the painful stiffening effect produced by the ordinary scraper. With its aid very rapid work can be done with much less than the usual effort and correct scraping-angle is more easily preserved.

ONE-HALF DOZEN IN A BOX.

CUTTERS, JIGS, ANGLE DIVIDERS, GAUGES, ETC.

CUTTER AND CHISEL GRINDER.



STANLEY'S, Nickel Plated, All Metal.
No. 200—W't each 1¼ lbs., each .....**JGJ** $1.25

This device is designed for holding plane irons, chisels and other similar tools so that they may be ground or honed to any desired angle or bevel, insuring an accuracy that is very difficult to obtain when the tool is held in the hand. Three screw holes and two thumb screws enable one to grind any sized blade. The tool can be adjusted to any height on the roller column at the back, thus regulating the bevel of the blade. Roller can be turned at any angle to the main body, thus obtaining the slanting stroke so commonly used when tools are sharpened without a holder.

ONE IN A BOX.

DOWELING JIG.

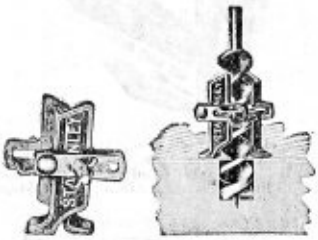
STANLEY'S, Nickel Plated, All Metal.
No. 59—Furnished with fine steel guides ¼x⅜, ⅜x⅞ and ½x1¼ in. long, w't each 1½ lbs. .....each **AEE** $2.50

This tool enables the user to bore dowel holes in the edge, end or surface of any work with ease and accuracy. It is also an excellent bit guide for mortising. Will take any thickness of material up to 3 in.

ONE SET IN A BOX.

ANGLE DIVIDERS.

No. 31—8 in. long, rosewood handle, per dozen.....**JIJJ** $12.00



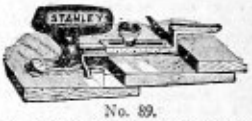
No. 30—Nickel plated, w't per doz. 8 lbs.....per dozen **ACEJ** $18.00

With this tool any angle can be found and bisected. Fitting moulding or other woodwork to odd angles can be done with ease and certainty. It is also graduated for parts of circle commonly used. A handy tool for laying out work, can also be used as a try or T square.

ONE IN A BOX.

BIT GAUGES.

No. 49—Nickel plated steel, adjustable, w't per doz. 3¼ lbs., per dozen.....**DHJ** $7.20



This gauge being adjustable will fit any bit and will always remain secure and accurate. To operate, loosen the thumb screws, insert the shank of the bit, turn the twist of the bit in the gauge to the required depth and tighten the thumb screws, stops on either side prevent the worm being bent or broken. Will hold bits of any size up to 1 in. in diameter.

ONE IN A BOX.

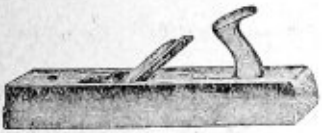
No. 15—Handle screw.
No. 16—Bottom—iron plane.
No. 35—Top casting—wood plane.
No. 36—Bottom—wood plane.

The sectional cuts show the parts assembled in the Bailey iron and wood planes. The cuts of the block planes show how the parts are assembled for this class of plane. It will be noticed that two designs of adjustment for block plane are shown. In one the plane iron rests on a support cast solid with the bottom, and is moved backward and forward on this support, by the adjusting lever 7B, which engages with the notches in the plane iron. In the other the plane iron rests on and engages with the adjustable frog 26B, and the position of this adjustable frog is directly governed by adjusting screw No. 28B.

The collection of parts marked A consists of the No. 6 frog, No. 7 "Y" adjustment, No. 8 brass adjusting nut and No. 9 lateral adjustment. These parts we term "Frog Complete," and if a "Frog Complete" is ordered, the parts are always put together before shipment from our factory.

In ordering parts for any plane, give the number and name as given in the list and also the number on the plane for which the parts are required.



We do not carry these goods in stock. All orders will be shipped from factory.

WOOD PLANES.

ONE DOZEN IN A BOX.

FLOOR SCRAPERS.

"Little Giant," complete with 6 blades, 7⅝ in. long, 2½ in. wide, w't crated 105 lbs. ..... each **CFJJ** $50.00

Extra blades, w't per doz. 2½ lbs., per dozen ..... **FEJ** $8.00

The Little Giant floor scraper is a device used for scraping any kind of a floor. The blade is mounted on a frame at an angle of 60 degrees, and the frame is mounted on four rollers. The large roller is a weight of 65 pounds and is used to give the pressure upon the blade when the scraper is in operation.

It has a capacity of from five to seven squares (100 square feet in a square) per day. The handle can be shortened, when necessary, for small rooms. Every inch of the floor can be scraped, as the blade extends to the full width of the frame and allows it to go along the base-board and quarter-round strip. Six blades are included with each machine, which will scrape 15,000 square feet of floor.

GAUGES.

MARKING.

No. 18 GVD—6 in., hexagon steel bar, ⅜ in. diameter, finely nickel plated, marked in 32nds, beveled steel roller on end for marking, w't per doz. 3 lbs. ..... per dozen DEJ $8.00

The ground level glass is accurately fitted in a brass case and the only plaster used is that necessary to plug the ends of this case. This brass case is fastened by a screw at each end, directly to the stock of the level, and is entirely independent of top plate. When a change of adjustment is necessary, the same can be readily changed by means of the screw mentioned above. When new glasses are required they are generally set in the brass case at the factory, and it is a very simple matter for the owner to replace the brass case in the stock of the level.

ONE IN A BOX.

ONE-HALF DOZEN IN A CASE.

No. 45—Stanley's, adjustable, square top plate, 2 brass lipped side views, 2 plumbs, proved glasses, with plumb rule, adapted for plumb bob and line, 1⅜ stock, 48 in., w't per doz. 80 lbs. ..... per dozen **BHAJ** $36.00

No. 45½—Stanley's, adjustable, square top plate, 2 brass lipped side views, 2 plumbs, proved glasses, with plumb rule, adapted for plumb bob and line, 1½ stock, 48 in., w't per doz. 60 lbs. ..... per dozen **BDIE** $32.00

The two plumb glasses are set in separate holes, but each on the right hand side. This will enable the workman to plumb work below where he stands, or above him, without turning the level stock end for end. There are also two plumb bob holes, so that plumb bob can be used from either end of the level. These improvements will be found a great convenience by the workingman.

ONE-HALF DOZEN IN A BOX.

No. 100—48 in., polished, 2 plumbs, 1 level, proved glasses, incased in brass tubing with movable covers for protection when not in use, w't per doz. 54 lbs. ..... per dozen **AGJE** $32.00

ONE-HALF DOZEN IN A CASE.

Reversible.

No. 101—48 in., polished stock with two grips, fitted with six improved glasses, four plumb and two level, w't per doz. 72 lbs., per dozen ..... **CCJJ** $80.00

Being of double construction this Plumb and Level, no matter how it may be picked up, is always in position for use, while the duplicate plumb glasses, one at top and the other just below center, both reading the same, add to its convenience. For low work the upper plumb glass is read and for overhead work the lower glass.

ONE-HALF DOZEN IN A CASE.

LEVEL SIGHTS.

No. 2—Stanley's, improved, length ¾ in., width 1¼ in., gun finish iron, for iron levels, w't ¼ lb., per pair .....**FJ** $0.75

Can be attached to any iron level and they afford a convenient and accurate means for leveling at a long distance.

ONE PAIR IN A BOX.

No. 1—Stanley's, improved, length 1½ in., width 2 in., gun finish iron, for wood levels, w't ¼ lbs., per pair .....**FJ** $0.75

Can be attached to any wood level and afford a convenient and accurate means for leveling at a distance.

ONE PAIR IN A BOX.

BIT AND SQUARE LEVELS.

No. 44—Stanley's, length 1¼ in., width 1½ in., polished brass, w't per doz. 1½ lbs. .....per dozen **CJJ** $3.60

Has three pairs of V slots on the back edge of the circular frame. The shank of a bit will lie in these slots horizontally, vertically or at an angle of 45 degrees and the boring can be done with accuracy by observing the level glass while turning the bit. Can also be attached to a carpenter's square, thus making an accurate spirit level when in horizontal position. The upright arm of the square will indicate an exact plumb line.

ONE IN A BOX.

STRAIGHT EDGE LEVELS.

Leonhart's—Diam. 3 in., stamped from one piece of nickel plated steel, per dozen .....**CHJ** $8.00

A unique labor saving device, for setting door jambs, window frames, plumbing walls, leveling joists, wall plates and sleepers.

Can be attached to any piece of wood.

ONE IN A BOX.

JOINTER GAUGES.

No. 9—Perfection, cast iron, japanned, polished surface, small parts nickel plated, adjustable, for squaring to any bevel, can be attached to either wood or iron plane, w't per doz. 23 lbs., per dozen .....**ABJJ** $18.00

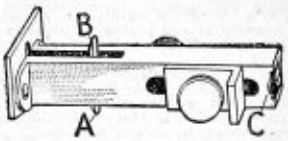
ONE IN A BOX.

No. 386—Stanley, all metal, nickeled finish, for use on all sizes iron pack or jointer planes to plane bevels of any angle between 30 and 90 degrees, w't each 2 lbs.....each **ADJ** $2.50

Also used to square up edge of boards. Can be used on either side of plane for right or left hand work.

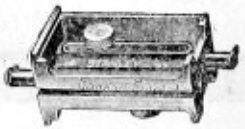
ONE IN A BOX.

IRON PLANE GAUGES.



No. 333—Shepardson's, nickel plated, adjustable, for planing bevels of any angle, length 8 in., w't 1½ lbs., each .....**ADE** $2.00

STANLEY BUTT GAUGES.

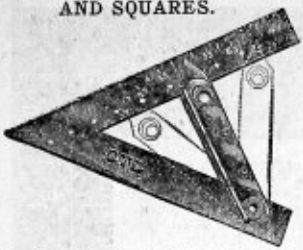


No. 95½—Stanley's, metallic, nickel plated, w't per doz. 6 lbs., per dozen .....**EDJ** $9.00

When the cutter at outer end of bar is set for gauging on edge of door, the cutter at inner end is set for gauging from back of jamb. Outer bar has a steel cutter to accurately gauge for thickness of butt.

No. 93—Steel head, brass slide, nickel plated, w't per doz. 4½ lbs., per dozen .....**JHAJ** $12.00

This gauge has two cutters on the same end of a sliding bar designed so that at one setting one cutter will mark the location of butt on the door and the other the location of butt on the casing, allowing necessary clearance. A gauge at the opposite end of the tool can be set for the thickness of butt both on casing and door.



No. 95—Stanley's Improved, metallic, nickel plated, w't per doz. 8 lbs., per dozen .....**JGIJ** $12.00

Has two bars, one bar has two steel cutters fixed upon it. When cutter at outer end of this bar is set for gauging on the end of the door, cutter at inner end is set for gauging from the back of jamb. The other bar has a steel cutter to accurately gauge the thickness of the butt.

TRY AND MITRE SQUARES.

COMBINED BEVELS. AND SQUARES.

No. 19—10x1 in., nickel plated steel blade, graduated in 8ths on one side, reverse side has scale for movable base which can be set to any angle, w't per doz. 6 lbs., per dozen .....JGBJ $12.00

This tool combines all the advantages of a mitre and square with the added feature of having a bevel.

SQUARES.

Octagon "Eight Square Scale."
This scale is one the face side of the tongue and is for laying out an eight square on a square stick of timber. Suppose the timber is eight inches square. Take the eighth mark from 0 in your divider and lay off from each side of the center line on each of the four sides of the timber, work off the corners up to these lines.

Hundredth Scale.
There is one inch graduated into one hundred parts, sub-divided into twenty parts, that will be found convenient when using the brace and rafter measures, where decimal fraction occur. This is located in the corner near the brace measure.

Brace Measure.
On back of tongue is the brace measure. 39-39-55.16 means that with a run of 39 in. each way the length of brace is 55.16 in. 18-24-30 is 18 in. run one way and 24 in. the other way, length of brace is 30 in.

Board Measure.
This is on the back of the body when you look at the square with the tongue in your left hand. If you have 14 ft. boards, look at 12 in. on the square. The lengths are the figures under it along the mark.
Find 14. Find next the figure that is the same as the width. If it is 6 in., there are 7 ft. in the board. If a board is 10 ft. long and 15 in. wide, proceed same as before, and find 12 ft. 6 in. If the board is 16 ft. long, double the 8 ft. reading.

POLISHED STEEL.

No. 10—Extra, body 1 ft. x 1½ in., tongue 8x1 in., face marked in 4ths and 8ths, back in 4ths and 12ths, w't per doz. 11 lbs. .....per dozen **DDE** $9.75

ONE-HALF DOZEN IN A BOX.

RAFTER AND FRAMING.

The "Eagle" framing square excels in the accuracy of its refernce tables for side cuts. Where other squares have only inch line marks, making close approximates to the exact angles impossible, the "Eagle" has a ⅛ in. line of graduation on the body and a constant or turning point on the tongue, the 12 inch mark. It will readily be seen that the distance between the ⅛ in. lines is so small that when the exact angle falls between these marks the distance to the nearest one can not exceed 1-32 of an inch, which is less than the size of a pencil mark in an angular opening of 12 inches. It also has a single set of reference numbers, making it impossible to transpose or get the angle wrong by laying the square on the timber with the body and tongue on the wrong numbers, as is so easy with other squares.

Another feature to be found on the "Eagle" square, are the special marks on each an every graduation mark referred to in the tables. There is still another safe guard against mistakes by having different special marks for jack rafters and hip or valley rafters. These marks are also shown in the lettering at the end of the square connected with the directions.

Another valuable point is the fact that it is necessary to remember but one number while marking the framing on a lot of timbers, while with other squares there are two.

This square has six rows of figures with large and distinct fractions, feet and inch marks. All cuts on the various members of a roof are marked by the figures in the fifth and sixth rows in the tables. The inch lines do not run across the space occupied by the tables, the decimal point is in its proper place. It has Essex' board measure on it while other squares have not. Hundredth scale is one inch graduated into one hundred parts, sub-divided into twenty parts, that will be found convenient when using the brace and rafter measures, where decimal factions occur. This is located in the corner near the brace measure.

No. 100-F —Framing, nickel plated copper, body 24x2 in., tongue 16x1¾ or 1½ in., face marked in 4ths, 8ths and 16ths, with octagon eight-square scale and rafter measure, back in 10ths, 12ths and 32nds, with board and brace measure and hundredth scale, w't per doz. 29 lbs., per dozen .....**BJAJ** $80.00

EAGLE TAKE-DOWN.

The latest improved in Take-Down squares. The strongest construction, the tongue is made of one solid piece, the body is also milled from the solid. The proportions of the two parts are such as to give the strongest possible joint. The cam is the only one ever offered that wil firmly hold the tongue into the body. Being eccentric, it draws the two parts together. It is the only square hole locking device ever offered. The convenience and durability of this square hole, into which if the key should be lost any square tool or file shank will successfully operate, needs only to be seen to be appreciated.

No. 1000—Regular, steel, oxidized copper finish, yellow figures and markings, body 2 ft. ×2 in., tongue 16×1⅝ in., face marked in 4ths, 8ths, and 16ths, with octagon eight square-scale, back in 4ths, 8ths, 10ths, 12ths and 32nds, with board and brace measure and hundredth scale, w't per doz. 28 lbs..... per dozen BEBJ $36.00

No. 1001—Framing, steel, oxidized copper finish, yellow figures and markings, body 2 ft. ×2 in., tongue 16×1⅝ in., face marked in 4ths, 8ths, and 16ths, with octagon eight square scale, and rafter measure, back in 10ths, 12ths, and 32nds, with board and brace measure and hundredth scale, w't per doz. 30 lbs..... per dozen CJJJ 42.00

Only framing square made containing the board measure in addition to complete framing tables.

The two parts of the square and the key to operate the locking cam, are enclosed in a rust-proof enamel leather case.

MAIL ORDER DEPARTMENT

Our constant attention in fifty-eight years of business has been given to the perfection of the system of handling mail orders. Our object has always been to handle them with the greatest possible speed, with the result that we are enabled, in most cases, to ship mail orders the same day they are received.

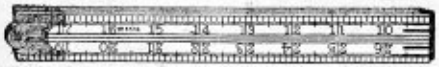
No. 53½—2 ft., arch joint, edge plates, marked in 8ths, 10ths, 12ths and 16ths in., with inside beveled edges and architect's drafting scales, 1 in. wide, w't per doz. 1½ lbs., per dozen .....**DJJ** $8.00
ONE-HALF DOZEN IN A BOX.



SHIP CARPENTERS' BEVELS.

No. 42—1 ft., boxwood, 2 brass tongues, brass tipped, marked in 8ths and 16ths in., ⅝ in. wide, w't per doz. 1½ lbs., per dozen .....**BJJ** $4.00
ONE DOZEN IN A BOX.

RULES.

BOXWOOD RULES.

No. 66½.

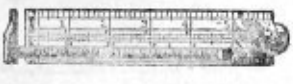
No. 66½—3 ft., 4 fold, arch joint, middle plate, marked in 8ths and 16ths in., 1 in. wide, w't per doz. 2 lbs. .....per dozen **CJJ** $6.00

No. 66¼—With edge plate at joint, otherwise the same as No. 66½, w't per doz. 2 lbs. .....per dozen **CEJ** $6.00

No. 66⅜—Full brass bound, otherwise same as No. 66½, w't per doz. 3½ lbs., per dozen .....**JGEE** $15.00

No. 18—2 ft., 2 fold, square joint, marked in 8ths and 16ths in., 1½ in. wide, w't per doz. 2 lbs. .....per dozen **BJJ** $4.00

BOXWOOD CALIPER.



No. 36—6 in., square joint, two fold, marked in 8ths, 10ths, 12ths and 16ths in., ⅞ in. wide, w't per doz. ¼ lb., per dozen .....**BBE** $4.50

No. 32—1 ft., arch joint, edge plates, four fold, marked in 8ths, 10ths, 12ths and 16ths in., 1 in. wide, w't per doz. 1¼ lbs. .....per dozen **CDE** $7.00

No. 32½—1 ft., arch joint, full bound, four fold, marked in 8ths, 10ths, 12ths and 16ths in., 1 in. wide, w't per doz. 1¾ lbs. .....per dozen **JDIE** $10.00

No. 36½—1 ft., square joint, two fold, marked in 8ths, 10ths, 12ths and 16ths in., 1⅛ in. wide, w't per doz. 1¼ lbs., per dozen .....**CBE** $6.50

ONE-HALF DOZEN IN A BOX.

IVORY.

No. 38—6 in., square joint, German silver bound, two fold, marked in 8ths, 10ths, 12ths and 16ths in., ⅞ in. wide, w't per doz. ¾ lb., per dozen .....**ABAJ** $15.00

No. 40—1 ft., square joint, German silver bound, four fold, marked in 8ths and 16ths in., ⅝ in. wide, w't per doz. 1½ lbs. .....per dozen **CEDJ** $44.00

No. 87—2 ft., arch joint, German silver bound, marked in 8ths, 10ths, 12ths and 16ths in., drafting scales, 1 in. wide, w't per doz. 3 lbs., per dozen .....**FDEJ** $80.00

ONE-HALF DOZEN IN A BOX.

BLACKSMITHS' BRASS.

No. 17—Stanley's, 2 ft., polished spring brass, two fold, marked in 8ths and 16ths in., ⅝ in. wide, w't per doz. 2½ lbs. .....per dozen **DEJ** $6.00

ONE-HALF DOZEN IN A BOX.

COMBINATION RULES.

No. 44—Johnson's, 6 in., German silver, combines caliper rule, try square, bevel square and protractor, adjustable to any angle or bevel desired, marked in 8ths, 16ths and 32nds, w't per doz. 1½ lbs., per dozen .....**ABIE** $18.00

The center joint is so constructed that the rule remains firm in any position. The vernier reads to one-half degree and is a valuable feature in obtaining fine measurements.

DAHL'S SLIDE RULES.

Nos.	23	24
Length, ft.	3	4
W't per doz., lbs.	1¼	1½
Per dozen	$7.20	9.60
	EBJ	**FIJ**
Nos.	**25**	**26**
Length, ft.	5	6
W't per doz., lbs.	2	2½
Per dozen	$12.00	14.40
	JHFE	**AJDJ**

Made of select boxwood and trimmed with brass plated steel. The principal merit of this rule if for taking inside measurements by extending to the desired width which can be instantly read. The reverse side is marked same as a regular rule.

ONE-HALF DOZEN IN A BOX.

ZIGZAG EXTENSION.

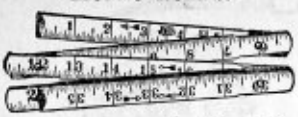
No. 204—Stanley's, 4 ft., boxwood stained, brass joints, slides and tips, marked in 8ths and 16ths in., ⅝ in. wide, w't per doz. 2½ lbs., per dozen .....**EJE** $7.00

No. 206—Stanley's, 6 ft., otherwise same as No. 204, per doz. 3⅝ lbs., per dozen .....**FGJ** $9.00

These rules have all the advantages of the regular Zigzag rules, and in addition have at one end an extension slide, by the use of which exact inside measurements may be readily obtained.

ONE-HALF DOZEN IN A BOX.

EXTENSION.



No. 604—Stanley's, 2 to 4 ft., hickory, brass extension slides and tips, brass set screw, 1 in. wide, w't per doz. 9 lbs. .....per dozen **GBJ** $8.00

No. 610—5 to 10 ft., w't per doz. 15 lbs., otherwise same as No. 604, per dozen.....**AAAJ** $12.00

@V@ auger bits are made from extra quality tool steel, they are carefully forged so that the steel may be of uniform density and every precaution is taken to secure strength at the points of strain. The tempering is done by the most accurate, modern method. The lips, spurs and throat are filed to such form that they will retain their cutting edges and give the greatest amount of service.

No. F3—*For stone bolts*, with 9 in. stock, 5½ in. tap wrench, 3 taper taps, 3 dies, cutting 1/2×24, 1/4×18, 1/2×18, for stock bolts w't per set 13¼ lbs. ..... per set **DCJ** 6.25

GREEN RIVER, Oiled, Hardwood Case.

No. 1124—With stock, adjustable tap wrench and 5 sizes taps, dies and guides, sizes 1/4×20, 5/16×16, 1/2×12, 5/8×11, 3/4×10, stock 22 in. long, diameter of dies 2⅞ in., w't per set 14 lbs. ..... per set **JJE** $11.25

No. 1104—With stock, adjustable tap wrench and 7 sizes taps, dies and guides, sizes 1/4×20, 5/16×18, 3/8×16, 7/16×14, 1/2×12, 5/8×11 and 3/4×10, stock 22 in. long, diameter of dies 2⅞ in., w't per set 16 lbs. ..... per set **AABE** 14.00

No. 1112—With stock, adjustable tap wrench and 9 sizes taps, dies and guides, sizes 1/4×20, 5/16×18, 3/8×16, 7/16×14, 1/2×12, 9/16×11, 5/8×10, 3/4×9, 1×8, stock 29 in., long, diameter of dies 2¾ in., w't per set 29 lbs. ..... per set **AICJ** 24.00

The simplicity and durability of these screw plates make them particularly attractive. They do the work in a single cut. The die is adjustable for wear and to make bolts or nuts fit tightly or loosely as may be desired.

LIGHTNING, Full Mounted, a Stock to each Die, Oiled Hardwood Case Stocks Case-Hardened and Gunlock Finished.

No. 1217—With stock to each die, adjustable tap wrench and 6 sizes taps, dies, and stocks, sizes 1/4×24, 1/4×20, 5/16×18, 3/8×16, 7/16×14 and 1/2×12, w't per set 16 lbs. . per set **AJBE** $12.75

No. 1223—With stock to each die, adjustable tap wrench and 7 sizes taps, dies and stocks, sizes 1/4×20, 5/16×18, 3/8×16, 7/16×14, 1/2×12, 5/8×11 and 3/4×10, w't per set 24 lbs. ..... per set **ACGJ** 17.00

No. 1229—With stock to each die, adjustable tap wrench and 9 sizes taps, dies and stocks, sizes 1/4×20, 5/16×18, 3/8×16, 7/16×14, 1/2×12, 9/16×11, 5/8×10, 3/4×9 and 1×8, w't per set 43 lbs. ..... per set **BBAJ** 27.50

Instead of having but a single stock to a set of several dies, each die is furnished complete with its own stock of suitable size and weight. The time and trouble in fitting and changing dies for each occasion are saved. All the dies in a set can be used at the same time. These stocks are case-hardened and gunlock finished in the most beautiful manner; the handles are of best drawn bicycle tubing, capped and knurled.

WILEY & RUSSELL'S.

FORD AUTOMOBILE SPECIAL.

No. 2500—Contains one 6½ in., one 9 in. stock, and two tap wrenches, 16 dies and taps, sizes 6-32, 10-24 and 32, 12-24, 14-24, 7/32-32, 1/4-20, 5/16-18 and 24, 3/8-16 and 24, 13/32-16, 7/16-14 and 20, 1/2-20, also 1/8 in. pipe, complete in leather case, w't per set 3¼ lbs. ..per set **ACJJ** $18.50

This set is arranged with special reference to screw threads on Ford Model T. It is also peculiarly adapted to a great variety of cars.

SCREW PLATES, STOCKS AND DIES.

OPENING DIE SCREW PLATES.

No. 11—26 in. stock, Adjustable Tap Wrench and 5 sizes taper taps, dies and collets cutting ¼x20, ⅜x18, ⅜x16, ⅞x14 and ½x12 V thread, 1/32 over size, w't per set 11 lbs., per set ..... **JIHE** $12.00

No. 22—26 in. stock, Adjustable Tap Wrench and 5 sizes taper taps, dies and collets cutting ¼x20, ⅜x16, ½x12, ⅝x11 and ¾x10 V thread, 1/32 over size, w't per set 18 lbs., per set ..... **AAAJ** $13.50

No. 55—26 in. stock, Adjustable Tap Wrench and 7 sizes taper taps, dies and collets cutting ¼x20, ⅜x18, ⅜x16, ⅞x14, ½x12, ⅝x11 and ¾x10 V thread, 1/32 over size, w't per set 55 lbs..... per set **ACAJ** $16.00

No. 77—26 in. stock, Adjustable Tap Wrench and 9 sizes taper taps, dies and collets cutting ¼x20, ⅜x18, ⅜x16, ⅞x14, ½x12, ⅝x11, ¾x10, ⅞x9 and 1x8 V thread, 1/32 over size, w't per set 23 lbs..... per set **BADJ** $25.50

Special attention is called to the opening dies, which are opened or closed by a single movement of lever on side of stock. After thread has been cut a movement of the lever throws the dies open so that the entire tool may be quickly lifted off, thus wasting no time in turning back over finished work. Prevents the marring or stripping of thread caused by chips and also increases the life of die.

EACH SET IN A HANDSOME HARD WOOD CASE.

STOCK AND DIES.

Oster Bull Dog Self-Locking and Adjustable Pipe Dies.

No. 81—One set double end dies for threading ⅛, ¼, ½ and ¾ in. pipe, w't per set 10 lbs. ..... per set **JGHJ** $13.00

No. 102—Three sets dies for threading ¼, ⅜, ½, ¾, 1 and 1¼ in. pipe, w't per set 20 lbs. ..... per set **AJBJ** $17.00

No. 103—Two sets dies for threading 1, 1¼, 1½ and 2 in. pipe, w't per set 27 lbs. ..... per set **ACBJ** $22.00

No. 104—Three sets dies for threading ¼, ⅜, 1, 1¼, 1½ and 2 in. pipe, w't per set 29 lbs. ..... per set **AEJJ** $25.00

No. 104½—Four sets dies for threading ¼, ⅜, ½, ¾, 1, 1¼, 1½ and 2 in. pipe, w't per set 30 lbs. ..... per set **AFHJ** $28.00

No. 105—Two sets dies for threading 1½, 2, 2½ and 3 in. pipe, w't per set 62 lbs. ..... per set **BDJJ** $40.00

One movement of the top lever will open or close the dies. No resetting or backing off of threads. This tool is equipped with self-locking and centering guides which do away with loose bushings. These guides, which are operated on a scroll, can be set to all sizes the tool will thread. The more pressure on the end of the guides, the more solid the locking arrangement.

STOCK AND DIES.

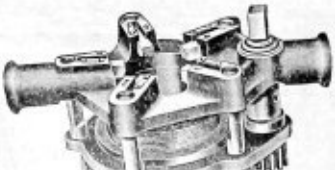
No. 900.

No. 900—Pump Makers', 15 in. stock with one each ⅜x14, and one ⅞x12 die, w't each 1¼ lbs..... per set **BAJ** $3.00

No. 901—Pump Makers', 18 in. stock with one each ⅜x14, ⅞x12 and ½x12 die, w't each 2¼ lbs..... per set **CFJ** $5.25

Toledo Adjustable.

No. 0T—Contains 24 in. stock and 3 sets R. H. dies for threading ⅛, ¼, ⅜, ½, ¾ in. pipe, w't per set 10 lbs., per set ..... **JIFJ** $16.00



No. 1T—Contains stock and 4 sets R. H. dies for threading 1, 1¼, 1½ and 2 in. pipe, w't per set 25 lbs., per set ..... **ADDJ** $24.00

One man can easily thread a 2 in. pipe with this tool.

No. 1A—Contains stock and four sets R. H. dies for threading 1, 1¼, 1½ and 2 in. pipe, w't per set 30 lbs., per set ..... **AHJJ** $30.00

This tool is like No. 1T, except that it has a ratchet. It may be used with two handles as an ordinary die stock or with one handle inserted in the ratchet case. Desirable for threading pipe down in a trench or against walls, etc. A boy can thread a 2 in. pipe with it.

No. 2T—Capacity 2½ in. to 4 in. pipe inclusive, complete with dies, ratchet and driving cross, w't per set 100 lbs., per set ..... **FFJJ** $100.00

This tool is light and compact. It is very easy to operate. No. 2T is factory shipment only.

SCREW PLATES.

Sectional View of Die and Collet

These taps and dies make perfect threads at one cut. The claim for the adjustable die is its solidity; the impossibility of stripping of threads; its perfect adjustment; its simplicity, durability and strength; doing away with all taper-pointed and cup-headed screws, common in many makes of dies. V threads 1-32 in. over size always furnished unless otherwise specified. V threads exact sizes, U. S. S. and Whitworth threads furnished at same price from factory.

Split Die.

"Little Giant," Round Adjustable Dies, 1¼ Inch in Diameter, with Stock, Adjustable Tap Wrench and Screw Driver.

No. D5—5 taps, 5 dies, cutting 4, 32; 6, 32; 8, 32; 10, 24; 12, 24; w't per set 11½ lbs.....per set **CCJ** $5.00

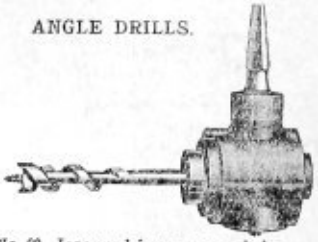
Extra Jaws .. .per dozen **CFJ** $7.20

ONE-SIXTH DOZEN IN A BOX.

MILLERS FALLS DRILLS.



No. 10-D—10 in. sweep, nickel plated steel bow and chuck, lignumvitae ball bearing head, rosewood handles, detachable gear for use as a drill, per dozen .....**CABJ** $36.00

The gear wheel can be removed, leaving a ratchet brace. The jaws are forged steel and will center and hold firmly round twist drills from 3/16 to ½ in. diameter, also tool shanks of any size or shape.

ONE IN A BOX. W'T 57 LBS. PER DOZEN.

ANGLE DRILLS.

No. 99—Japanned frame, concealed gears, length 5 in., for boring with brace at right angles in close quarters, w't per doz. 18 lbs., per doz. **AIHJ** $36.00

ONE IN A BOX.

SILL BORERS.

No. 051—Miller's Falls, japanned malleable iron frame, length 15 in., w't per doz. 40 lbs., per doz. **BBEJ** $27.00

ONE IN A BOX.

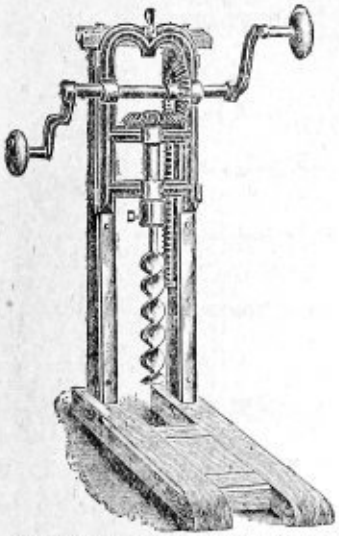
CHAIN DRILLS.

No. 70—Plain screw for ½ round chuck, with set shank drills, japanned frame, polished chuck, semi-automatic feed, w't per doz. 27 lbs., per dozen.... .....**AJHJ** $21.00

No. 71—Plain chuck, for bit stock drills, japanned frame, polished chuck, semi-automatic feed, w't per doz. 27 lbs., per dozen **AJHJ** $21.00

No. 72—Knurled bit brace chuck, for square or round shank drills, japanned frame, polished chuck, semi-automatic feed, w't per doz. 31 lbs.....per dozen **AHIJ** $36.00

CHAIN DRILLS.

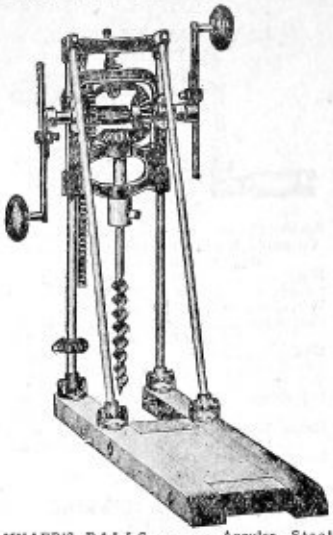


No. 73—Automatic feed, knurled bit brace chuck, for square or round shank drills, japanned frame, polished chuck, w't per doz. 33 lbs., per doz. **CJFJ** $63.00

The feed on this drill is constant and accurate and can be regulated to suit size of drill and kind of work in which it is used.

ONE IN A BOX.

BORING MACHINES.

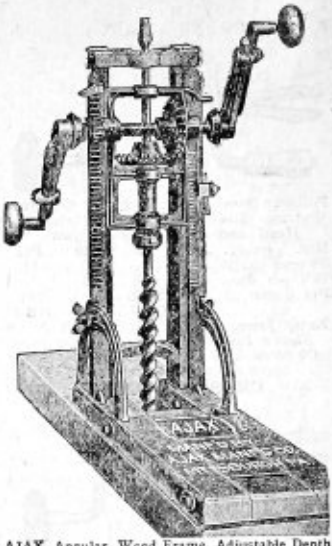


Upright, Wood Frame, Adjustable Depth Gauge Self-withdrawing Auger.

No. 6—Without augers, w't 32 lbs., each ..... CDJ $6.00
No. 10—With one each 1, 1½, and 2 in. cast steel augers, w't 36 lbs each... DIE 8.50
ONE IN A CASE OR CRATE.

Angular, Wood Frame, Adjustable Depth Gauge Self-withdrawing Auger.

No. 2—Without augers, w't 36 lbs., each ..... CGJ $6.50
No. 12—With one each 1, 1½ and 2 in. cast steel augers, w't 40 lbs each ..ECJ 9.00
ONE IN A CASE OR CRATE.



MILLER'S FALLS, Angular, Steel Frame, Adjustable Depth Gauge, Self-withdrawing Auger, Ex-tension Cranks.

No. 4—Without augers, w't 45 lbs. ..... each FIJ $7.50
No. 14—With one each 1, 1¼ and 2 in. cast steel augers, w't 49 lbs ..... each ...JHFJ 10.00
ONE IN A CASE OR CRATE.

BOSS, Angular, Japanned Iron Frame, Adjustable Depth Gauge, Self-withdrawing Auger, Two Chucks on Reversible Traveling Gear Giving Two Speeds.

No. 6—Without augers, w't 30 lbs., each..... DFJ $ 9.00
No. 16—With one each 1, 1½ and 2 in. cast steel augers, w't 34 lbs each. JFCJ 11.50
ONE IN A CASE OR CRATE.

AJAX, Angular, Wood Frame, Adjustable Depth Gauge, Self-withdrawing Auger, Chuck Adjustable to Fit Boring Machine Augers or Brace Bits, Extension Handles.

No. 24—Without augers, w't 45 lbs., each ..... JEGE $11.00
No. 34—With one each 1, 1½ and 2 in. cast steel augers, w't 48 lbs each JGEJ 13.50
ONE IN A CASE OR CRATE.

CHAIN-FEED DRILL ATTACHMENTS.

No. A—WONDER, plain socket, polished, for ½ in. round straight shank drills, w't per doz. 24 lbs . per dozen JGGE $18.00

No. B—WONDER, plain socket, polished, for bit stock drills, w't per doz. 24 lbs., per dozen ..... JGGE 18.00
No. C—WONDER, brace chuck, nickel plated, for bit stock drills, and ⅜ to ½ in. round shank drills, w't per doz. 24 lbs ..... per dozen ACHJ 24.75
These drill attachments can be used in all sorts of places and drill very rapidly with the aid of an ordinary brace. The chain can be tightened as desired by the wheel, which moves independently. ONE IN A BOX.

No. E—WONDER, automatic, nickel plated brace chuck, for bit stock drills and round shank drills ⅛ to ½ in., w't per doz. 33 lbs..... per dozen BAFJ $36.00
This drill feeds automatically at any desired speed. ONE IN A BOX.

HAND DRILLS.

No. 20—Graves', automatic, length 13 in., cocobolo handle, enclosing 8 cast steel drills in compartments, w't per doz. 11 lbs. .....per dozen **AJEJ** $18.00
Extra Springs, for No. 20 .....per dozen **ABJ** 2.00
Extra Drills, for No. 20, sizes 1 to 8 ....per set of 8 **DB** .75
Extra Drills, for No. 20, sizes 1 to 8 ....per dozen **JFF** 1.10
ONE IN A BOX.

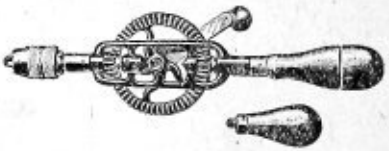
No. 7—Miller's Falls, automatic, length 10½ in., nickel plated and polished, rosewood stained handle enclosing 8 cast steel drills, sizes 1 to 8, in separate numbered compartments, with flat steel gauge showing sizes of holes, w't per doz. 6 lbs. .....per dozen **ABJJ** $18.00
Extra Drills, for No. 7, sizes 1 to 8 .....per set of 8 **DB** .75
Extra Drills, for No. 7, sizes 1 to 8 .....per dozen **JFF** 1.10
ONE IN A BOX.

No. 041—Yankee, automatic, length 10 in., nickel plated and polished, metal handle enclosing 8 cast steel drills, w't per doz. 12 lbs. .....per dozen **ADDJ** $28.00
Extra Springs, for No. 041 .....per dozen **AAJ** 1.80
Extra Drills, for No. 041, 4-64, 5-64, 6-64, 7-64, 8-64, 9-64, 10-64, 11-64 .....per set of 8 **DB** $0.75
Extra Drills, for Nos. 041 and 43, 4-64, 5-64, 6-64, 7-64, 8-64, 9-64, 10-64, 11-64 .....per dozen **JEG** $1.10
ONE IN A BOX.

No. 44—Yankee, automatic, adjustable tension, length 11¼ in., nickel plated, highly polished, 8 cast steel drills enclosed in handle, w't per doz. 8 lbs. .....per dozen **AFBJ** $33.00
ONE IN A BOX.

No. 51—Yankee, reciprocating, polished steel spindle, polished hardwood handle, ball bearing, nickel plated knurled chuck with 3 jaws for holding ⅞ in. drills or smaller, length 16 in., w't per doz. 16 lbs. .....per dozen **BFDJ** $48.00
So constructed that the drill runs continuously to the right during both forward and backward movement of the driver. The pressure to lock the drill is had by the pressure against the head of the tool which is provided with ball bearings to reduce friction.

No. 43—Yankee, automatic, length 10¾ in., nickel plated and finely finished, hardwood handle, 3 cast steel drills, ⅛, 5-64 and 3-32, not adapted to larger size drills, w't per doz. 3¼ lbs. .....per dozen **JHAJ** $15.00
ONE IN A BOX.



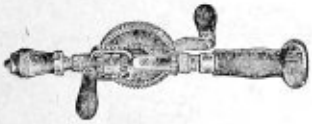
No. 1430—Yankee, malleable iron frame, dead black finish, steel chuck, nickel plated, holding round shank drills up to ⅞ in. diam., single speed, extreme length 10½ in., w't per doz. 17 lbs. .....per dozen **AHJJ** $30.00

No. 1530—Yankee, malleable iron frame, dead black finish, 3 jaw steel chuck, nickel plated, holding drills up to ⅞ in. in diam., single speed, extreme length 10½ in., 3 in. driving wheel, w't per doz. 17 lbs. .....per dozen **BGJJ** $40.00
By means of the ratchet this drill can be used as a plain, left hand, right hand or double ratchet drill.

No. 1—Miller's Falls, single gear, length 12 in., malleable iron frame, cocobolo hollow head and handles, nickel plated chuck, 8 cast steel drills enclosed in head, holds ⅞ in. round shank drills, w't per doz. 22 lbs.
per dozen .....**AEJJ** $32.00

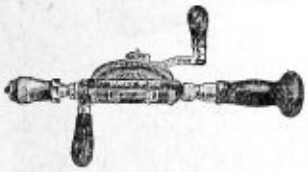
No. 5—Miller's Falls, double gear, length 11½ in., malleable iron frame, cocobolo hollow head and handles, nickel plated chuck, 8 cast steel drills enclosed in handle, holds ⅞ in. round shank drills, w't per doz. 24 lbs.,
per dozen .....**AGGJ** $36.00

No. 2—Miller's Falls, single gear, length 15 in., malleable iron frame, cocobolo hollow head and handles, nickel plated chuck, 8 cast steel drills enclosed in handle, holds ¾ in. round shank drills, ball bearing, w't per doz. 28 lbs., per dozen .....**BFAJ** $60.00



ONE IN A BOX.

HAND AND BREAST DRILLS.



HAND DRILLS.

No. 098—Millers' Falls, malleable iron frame, length 15¼ in., stained hardwood handles, nickel plated trimmings, double speed, which can be instantly changed without removing bit from work, detachable hollow end handle, with receptacle for holding twist drills, 3 jaw chuck holding round shank drills up to ⅝ in. diameter, w't per doz. 42 lbs., per dozen ..... **CJJJ** $36.00
Extra Handles for No. 098, for using as a breast drill...per dozen **EJE** $6.00

No. 445—Yankee, two speed, malleable iron frame, dead black finish, ball bearing detachable handle for holding drills, two jaw nickel-plated chuck holding drills up to ⅜ in., can be changed from single to double speed by means of shifter on frame, length 15½ in., w't per doz. 42 lbs., per dozen ..... **CJFJ** $50.00
No. 1445—3 jaw chuck, otherwise same as No. 445.....per dozen **CJFJ** $50.00

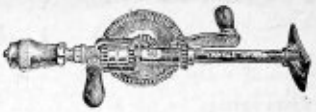
No. 545—Yankee, two speed, malleable iron frame, finished in dead black, bright parts nickel plated and polished, length 16½ in., with right and left hand ratchet movement, chuck holds either square or round shank drills or other tools up to ½ in., detachable and hollow handle instead of breast plate, which can be held in hand or against body and which can be used as a magazine for holding drills, w't per doz. 52 lbs., per dozen ..... **EJJJ** $72.00
No. 540—Yankee, one speed, w't per doz. 48 lbs., otherwise same as No. 545, per dozen ..... **DADJ** $60.00

ONE IN A BOX.

BREAST DRILLS.

No. 80—Two speed, universal chuck holding square, taper or round shank, drills up to ½ in. diameter, finished in blue and gold enamel, nickel plated trimmings, ebonized handles, w't per doz. 66 lbs., per dozen ..... **BDJJ** $48.00

No. 81—Two speed, universal chuck holding square, taper or round shank, drills up to ½ in. in diameter, has level set in frame, also a latch for holding chuck while tightening drills, finished in blue and gold enamel, nickel plated trimmings, cocobola handles, w't per doz. 60 lbs., per dozen ..... **BIDJ** $54.00
No. 82—D handles instead of breast plate, otherwise same as No. 81, per doz. **BIDJ** $54.00



No. 19—Ball bearing, alligator jaws, 5 in. drive wheel, adjustable speed gear and crank, permitting a variation in length of 3 in., black japanned hub casing, aluminum bronze gear and breast plate, w't per doz. 72 lbs., per dozen ..... **AHHE** $42.00

No. 12—Miller's Falls, with level glass, japanned iron frame, nickel plated chuck, for round or square shank drills, 2 speeds, extension crank, 2 cocobolo handles, length 17 in., w't per doz. 72 lbs., per doz. **BHBJ** $60.00
No. 15—Miller's Falls, iron D handle, otherwise same as No. 12, per dozen ..... **BHBJ** $60.00

ONE IN A BOX.

BREAST DRILLS.

No. 455—Yankee, two speed, malleable iron frame, dead black finish, ball bearing, can be changed from single to double speed by means of shifter on frame, two jaw chuck holding drills up to ½ in. in diameter, length 17¼ in., w't per doz. 72 lbs., per dozen ..... **CFJJ** $60.00
No. 1455—3 jaw chuck for holding round shank drills up to ½ in. diameter, otherwise same as No. 455, per dozen ..... **CFJJ** $60.00

No. 550—Yankee, one speed, malleable iron frame, finished in dead black, bright parts nickel plated and polished, length 18 in., with right and left hand ratchet movement, chuck holds either square or round shank drills or other tools up to ½ in., w't per doz. 66 lbs., per doz. **DGDE** $72.00
No. 555—Yankee, two speed, w't per doz. 78 lbs., otherwise same as No. 550, per dozen ..... **EFJE** $84.00
No. 1555—Yankee, 3 jaw chucks for holding round shank drills up to ½ in. in diam., w't per doz. 78 lbs., otherwise same as No. 555, per dozen ..... **EHEJ** $84.00

No. 50—P. S. & W. Co's., enameled, cut gear, extra finish, adjustable steel jaws, rosewood handles, length 15 in., will hold round or square shank drills of every size, w't 4¼ lbs., per dozen ..... **CBBJ** $45.00

No. 18—M. F. Co., with level glass, iron frame, three-jawed nickel plated chuck, capacity 0 to ½ in. for round shank drills, adjustable speed gear and breast plate, steel cone bearing, nickel plated crank, cocobolo handles, w't per doz. 90 lbs., per dozen ..... **CCCE** $60.00

ONE IN A BOX.

ONE DOZEN IN A BOX.

THE SIZE GIVEN IS LENGTH OF BLADE, EXCLUSIVE OF HANDLE.

SCREW DRIVERS.

screw drivers have the blade, shank and head formed of one piece of special steel. The projection under the head prevents the blade from turning in the handle. This construction makes the driver unusually strong and durable.

drivers are made in two forms—one in which the metal head comes through the handle, and one having a countersunk head and insulated by a non-conduction plug. Electricians require this type. On account of the parallel sides, a countersunk screw may be followed without injury to the wood, thus making it an attractive tool to the cabinet maker.

All cuts used to illustrate this line are made to scale approximately one-fourth the actual size. Two cuts are shown in order to show the general proportion of increase in shank diameter and size of handle relative to blade length.

All handles are finished in dull black and are typical of "THE VERY BEST" workmanship.

STANDARD TYPE, Special Steel, Finely Tempered Blade, Polished Steel Ferrule, Ebonite Handle.

No. 100 — Blade, in.	2½	3	4	5	6	7
Tip, in.	5-32	7/32	7-32	7-32	¼	9-32

	CHJ	DCJ	JEDJ	JFEJ

A special driver corresponding to No. 102, but having an insulated head.

ONE-HALF DOZEN IN A BOX.

SCREW DRIVERS.

Special Steel Blade, Nickel Plated Ferrule, Rosewood Handle.

Nos.	107	108
Length of blade, in.	1¾	3¼
Stock, in.	11-64	11-64
W't per doz., lbs.	½	¾
Per dozen	$3.00	3.50
	AHJ	BAJ

Blades are pinned, making a strong driver for pocket use.

ONE DOZEN IN A BOX.

"HURWOOD" SCREW DRIVERS.

Cross Section "Hurwood" Screw Driver.

Cross Section "Hurwood" Screw Driver Insulated Head.

"HURWOOD" SCREW DRIVERS have blade, shank and head formed of one piece of special steel. A rivet through the ferrule, handle and shank as well as the head with two projecting wings, (see cut) securely fasten the handle. This construction makes the "Hurwood" driver unsurpassed for strength and durability.

"Hurwood" drivers are made in two forms: one in which the metal head comes clear through the handle and one designed for electricians giving same advantage of strength but having the head countersunk in the handle and insulated by a non-conducting plug. All "Hurwood" drivers have finely tempered blades and are well finished and fully warranted.

The cuts illustrating the various lines of "Hurwood" screw drivers are all made to scale (approximately one-fourth full size), and two sizes of each number of driver are shown to illustrate the general proportion of increase in shank diameter and size of handle relatively to the length of blade.

No. 20—4 in.

No. 20—8 in.

STANDARD TYPE, Special Steel, Finely Tempered Blade, Polished Steel Ferrule, Ebonite Handle.

No. 20—Blade	2½	3	4	5	6 in.
Tip	3/32	5/64	3/32	7/64	1/8 in.
Stock	3/32	3/32	1/8	1/8	5/32 in.

Per dozen	$7.00	8.00	10.00	12.00
	CDE	CIE	JDIE	JEIE

Diameter of blade, size of tip and size of handle increase with length of blade in proportion for heavier work.

HALF DOZEN IN A BOX.

No. 50—4 in.

No. 50—8 in.

PONY, Special Steel, Finely Tempered Blade, 1/8 Inch Tip, 5-32 Inch Stock, Polished Steel Ferrule, Ebonite Handle.

No. 50—Blade	4	6	6	8 in.
W't per doz	1	1	1½	1½ lbs.
Per dozen	$4.25	5.00	6.00	8.00
	BAJ	BDE	BIE	CIE

A special driver designed for light and delicate work, and is made of very small stock and with a small tip. The size of stock, tip and handle is the same in all lengths of blade. As the small diameter of shank wire necessitates a very small rivet, the "winged" head is a great advantage.

HALF DOZEN IN A BOX.

No. 51.

No. 52.

Machinists', Special Steel, Finely Tempered Blade, Polished Steel Ferrule, Ebonite Handle.

No. 51—1¾ in. blade, 5¼ in. over all, w't per doz. 3¼ lbs., per dozen ..... BDE $5.00

No. 52—3 in. blade, 7¼ in. over all, w't per doz. 6 lbs., per dozen ..... DDE 9.00

Especially adapted for heavy work, where a heavy driver cannot be conveniently used.

HALF DOZEN IN A BOX.

No. 45—3½ in.

No. 45—7½ in.

Cabinet Makers' Tip, Parallel Sides, Insulated Head, Special Steel Finely Tempered Blade, Polished Steel Ferrule, Ebonite Handle.

ONE-HALF DOZEN IN A BOX.

REED'S LIGHTNING SCREW DRIVER.

No. 42—Nickel plated cylinder, rosewood handle, lignumvitae head, length 12 in., extended 21 in., with 1 boring and 2 screw driver bits, for light boring, driving and removing screws, w't per doz. 9 lbs. ..... per dozen ADDJ $24.00

ONE-HALF DOZEN IN A BOX.

No. 41—Nickel plated cylinder, rosewood handle, lignumvitae head, length 15 in., extended 26 in., with 1 screw driver bit, for light boring, driving and removing screws, w't per doz. 18 lbs. ..... per dozen AHJJ $30.00

ONE IN A BOX.

POCKET MAGAZINE SCREW DRIVER.

No. 60—Nickel plated, 4 polished cast steel blades, knurled handle, w't per doz. 1½ lbs., per dozen JFFJ $12.00

ONE DOZEN IN A BOX.

YANKEE QUICK RETURN SPIRAL RATCHET SCREW DRIVERS.

No. 130—Nickel plated, stained cherry handle, length with bit 11 in., extended 19¼ in., 3 forged steel bits, w't per doz. 15 lbs., per dozen ..... AHJJ $30.00

This is the regular No. 30 Screw Driver with a spring added in handle which causes the handle to come back for the next push in driving the screws in or out.

ONE IN A BOX.

YANKEE PUSH BRACE AND SCREW DRIVER.

No. 75—Nickel plated frame and chuck, hardwood polished handle, 2¼ in. diameter, length without bit 16¾ in., extended 23½ in., w't per doz. 26 lbs., per dozen ..... BGJJ $40.00

Will hold all the small tools used in a bit brace, but is operated by pushing the handle. It exceeds a bit brace in its greater rapidity and convenience in lighter work. Will bore ⅜ in. holes in metal, drive ⅝ in. auger bits in hard wood or ½ to ⅝ in. bits in white pine. A special advantage is that being straight and cylindrical and operated by pushing, it can be used in many places where a brace can not be operated. The chuck is the same design as on our Yankee Hand and Breast Drill and holds square drills up to ½ in. wood bit.

ONE IN A BOX.

YANKEE SPIRAL RATCHET SCREW DRIVER.

Right or Left Hand and Rigid at Variable Lengths.

No. 35—Nickel plated, stained cherry handle, length with bit when extended 9⅝ in., 3 forged steel bits, w't per doz. 5¼ lbs. ..... per dozen ABJJ $25.00

No. 301—Chucks and drills ..... per dozen sets BIJ $6.00

No. 302—Extra long bits, in sets of 3, per doz. sets CCE $7.00

This tool is for driving small screws only and is intended for electrical workers, cabinet makers and mechanics having a large number of small screws to drive. It is a very light and convenient tool that can be easily carried in the pocket.

Right or Left Hand Ratchet and Rigid at Variable Lengths.

No. 30—Nickel plated, stained cherry handle, length with bit 11 in., extended 19¼ in., 3 forged steel bits, w't per doz. 15 lbs. ..... per dozen ADDJ $30.00

No. 31—Length with bit 17½ in., extended 25¼ in., for extra heavy work, w't per doz. 20 lbs., otherwise same as No. 30, per dozen sets ..... BAJJ $42.00

No. 311—Extra chucks and drills for No. 31, per dozen sets ..... EGE $9.00

No. 331—Extra screw driver bits for No. 31, per dozen sets ..... CIJ $7.00

The change from right to left hand for either push or ratchet is made by simply moving the slide to either end of the slot. The ratchet movement can be used in any part of the length of tool for either right or left hand. When slide is placed in center of slot the rod is held rigidly and tool can be used as an ordinary screw driver, and this at any point in length of rod. The friction in ratchet mechanism is so slight as to be hardly felt, the backward movement is easy and noiseless.

No. 305—Extra bits with screw holder for No. 30, per dozen ..... CCJ $6.00

No. 315—Extra bits with screw holder for No. 31, per dozen ..... CCJ 6.00

A longer bit than regular with holder attached to hold screw, especially useful in places difficult to reach or where only one hand can be used.

ONE IN A BOX.

YANKEE CHUCKS, DRILLS AND BITS.

⅛ inch Drill. No. 300 with ⅝ in. Drill.

11-64 inch Drill.

No. 030.

No. 300—Steel chucks and drills, for No. 30, with spring lock, complete with 8 cast steel drill points, w't per doz. sets 1½ lbs., per dozen sets ..... JEGE $12.00

Extra Drills, for No. 30, sizes 4, 5, 6, 7, 8, 9 or 10 ..... per dozen JEH $1.10

per dozen ..... JEH $1.10

Extra Drills, for No. 30, in sets of eight, per set ..... DB $0.75

No. 030—Countersink bits, for No. 30, cast steel round shank, per dozen ..... ADE $3.00

No. 330—Extra screw driver bits, for No. 30 ..... per dozen sets CIJ $7.00

NO. 300, ONE SET IN A BOX; EXTRA DRILLS AND BITS, ONE DOZEN IN A PACKAGE.

The Yankee Calipers are manufactured under the Fay Patent, but are not quite as heavy as the Fay.

The bow on No. 73 is stiff, making the caliper reliable. After calipering inside of chambered cavity by springing in the legs they may be withdrawn, and as they spring back will show the exact size calipered.

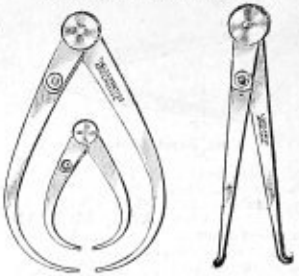
No. 27—Inside, per dozen ...	$9.60		10.80	12.00
	GFE		**JHFJ**	**JIFJ**



The improvement in these calipers consists in the construction of the joint, which is so made as to be drawn together by means of a screw. The main stud is squared and fitted to one leg, thus preventing the stud turning when loosening and tightening, and insuring a smooth and uniform friction of more or less tension to suit the user.

The quality of these calipers is incomparably superior to that of any old style riveted-joint caliper on the market.

The capacity is about one-third greater than the size given.

ONE-QUARTER DOZEN IN A BOX.

LOCK-JOINT CALIPERS.

No. 38. No. 39.

Polished Steel, Lock-Joint.

Length, in. ...	**4**	**6**	**8**
W't, doz., lbs..	1½	3	4⅜
No. 38—Outside, per dozen....	$10.80	12.00	15.00

No. 39—Inside, per dozen ...	$10.80	12.00	15.00
	JHFJ	**JIFJ**	**ABJJ**

Instantly adjusted to their full extent, and as quickly locked firm in the joint, and yet provided with a sensitive adjustment. A socket joint made tapering is locked or released by a partial turn of the knurled disk, drawing it together. A spring washer under the disk maintains an easy friction in the joint when unlocked.

In the under side of short arm is a slot containing a stiff spring. Riveted into the middle leg and projecting through an opening in the arm is a threaded stud on which is a knurled nut having a beveled hub,—this bears against a cone in the arm,—the action of the spring holding them together turns the nut, presses them apart and adjusts the leg when the joint is locked. The spring taking up all backlash, the legs are firm.

Made under the Fay patent, but not quite as heavy.

ONE-QUARTER DOZEN IN A BOX.

IMPROVED EXTENSION DIVIDERS.

Head and Arms of Best Malleable Iron and the Balance of Tool Steel, Hardened Points, Auxiliary Caliper Legs, Patent Locking Nut.

No. 85-A—7 in., with divider legs only, w't per doz. 7½ lbs., per dozen .....ABJJ $15.00

No. 85-B—9 in., with divider legs only, w't per doz. 10½ lbs., per dozen .....ADCE $18.00

No. 85-C—7 in., complete, w't per doz. 12½ lbs.....per dozen BAEE $27.00

No. 85-D—9 in., complete, w't per doz. 16 lbs.....per dozen BCIE $30.00

A well made, nicely finished divider, with auxiliary caliper legs, which, together with a common pencil, form convenient combinations. The patent locking nut between the arms, against which a spiral spring acts, is a valuable feature. After the fine adjustment is made, the nut may be turned back, locking spring and arms firmly, thus remedying the weak point which renders the common wing divider only as stiff as the adjusting spring. A full-threaded nut on the stud, through which the quadrant passes, is a more durable fastener than two or three threads tapped in the arm to hold the wing of the old style. By adjustment of points the 7 inch size becomes 9 inches, and will scribe a 22 inch circle; will caliper 11 inches outside and 13 inches inside. The 9 inch size becomes 12 inches, and will scribe a 30 inch circle and caliper 14 inches outside and 16 inches inside.

ONE IN A BOX.

STARRETT SCRIBERS.

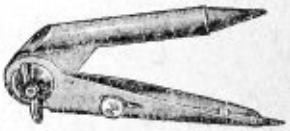
No. 67—Improved points of fine grade steel, nicely tempered, nickeled, knurled stock, length with short bent point 9 in., with long point 12 in., all parts interchangeable, w't per doz. 1½ lbs.....per dozen DDE $5.40

No. 68—Improved, adjustable sleeve knurled and nickeled, point of fine grade steel, 8 in. long, w't per doz. 1½ lbs. .....per dozen DIE $6.00

The knurled sleeve has hole clear through and a clamping device at one end, adapting it for slipping on or off different tools, securely holding them near to or away from the working point.

ONE-HALF DOZEN IN A BOX.

SURFACE GAUGES.



No. 57-A—New Universal, heavy base, grooved through bottom and end, adapting it for use on or against circular work as well as flat surfaces, height 3 in., with 9 in. spindle, w't per doz. 25½ lbs., per dozen .....BGJE $30.00

The spindle passes through a rotating head, jointed to a rocking bracket, pivoted in base. The bracket being adjusted by a knurled screw in one end against a stiff spring in the other, the spindle may be set upright or at any angle, or turned so as to work under the base and be sensitively adjusted to any position. The swag and head carrying the scriber are so made that when the clamp nut is loosened, all may be freely moved to any position and by friction springs retained in place until a slight turn of the clamp nut holds them firm. In the rear end of the base are two gauge pins frictionally held which may be pushed to bear against the edge of a surface plate or in slot of a planer bed for lineal work.

ONE IN A PACKAGE.

GEM SCRIBERS.

No. 3—Tempered polished steel, length 3 in., w't per doz. 1 lb., per dozen .....BCJ $4.00

Takes the place of the compass, and being small, can be carried in vest pocket.

ONE DOZEN IN A BOX.

POCKET SCREW DRIVER.

Steel Tubing, Knurled and Nickel Plated, Properly Tempered Blades.

No. 553-A—Handle ¼ in. diameter, blade 1⅞ in. long, w't per doz. ¾ lb., per dozen .....BGJ $3.00

No. 553-B—Handle ⅜ in. diameter, blade 3 in. long, w't per doz. 1⅝ lbs., per dozen .....CHJ $4.20

To carry in pocket, reverse the blade, inserting it in the handle, giving a slight turn of the chuck to keep it there. It takes no more room in the pocket than a penknife.

ONE-HALF DOZEN IN A BOX.

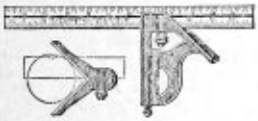
STARRETT TOOLS.

COMBINATION SETS.

Consisting of No. 11 Combination Square with Center Head and 7 Inch Bevel Protractor Head.

No. 9—Inches	9	12	18
W't, lbs.	1½	2	2¼
Per set	$3.75	4.00	4.75
	CAE	CCE	DJJ

Each head may be instantly removed, or replaced and used interchangeably with the scale, thus forming the most useful combination set of tools ever devised for mechanics' use.



ONE SET IN A PACKAGE.

PROTRACTOR HEADS.

No. 12—7 in., with level attachment, w't 12 oz. .....each **AGJ** $2.00

ONE IN A PACKAGE.

COMBINATION SQUARES.

Hardened Polished Steel Blade, Japanned Iron Stock, Polished Faces and Edges.

No. 11—9 in., without center head, w't per doz. 8¼ lbs., per doz. **ABFJ** $15.00
No. 11—12 in., without center head, w't per doz. 12¾ lbs., per dozen .....**AEAJ** $18.00
No. 011—9 in., with center head, w't per doz. 11¼ lbs., per dozen **AGFE** $21.00
No. 011—12 in., with center head, w't per doz. 16½ lbs., per dozen **BJAE** $24.00

A complete substitute for a whole set of common try squares and is one of the best gauges made for transferring exact measurements or laying out work. Also convenient for a depth gauge, or to square in a mortise. For a mitre it is perfect, while with the auxiliary center head it forms a centering square, both inside and outside, which, for convenience and accuracy has no equal.

Good Quality Hard Steel Blade, Japanned Iron Stock, Polished Faces and Edges.

No. 23—9 in., without center head, w't per doz. 8¼ lbs., per doz. **AJHJ** $15.00
No. 23—12 in., without center head, w't per doz. 12½ lbs., per dozen .....**ABIE** $18.00
No. 023—9 in., with center head, w't per doz. 11½ lbs., per dozen **AEAJ** $21.00
No. 023—12 in., with center head, w't per doz. 16½ lbs., per dozen **AGCJ** $24.00

Similar in design to No. 11. While the blade is made of good hard steel, it is not hardened.

POLISHED STEEL RULES.

Flexible, Very Thin, Spring Tempered, Graduated in 32nds and 64ths on One Side Only.

No. 320—Length, in.	3	4
W't per doz., lbs.	¾	¾
Per dozen	$4.20	5.40
	CEE	DEE
No. 320—Length, in.	**6**	**12**
W't per doz., lbs.	¾	¾
Per dozen	$7.80	15.00
	FEE	ABFJ

ONE-HALF DOZEN IN A PACKAGE.

Improved Hook, Spring Tempered, 3-64 Inch or 18 Gauge Thick, Graduated in 64ths and 32nds on One Side, 16ths and 8ths on the Other, with End Graduated in 32nds.

No. 419— Length, in...	6	9	12
Width, in.	¾	⅞	1
W't, doz., lbs..	¾	1½	2¼
Per dozen	$12.00	16.80	21.00
	AJAJ	ADAJ	AGFE

The hook rule is very convenient in taking measurements from round corners, through hubs of pulleys, setting inside calipers, etc. The hook can be quickly removed by turning eccentric stud one-half round.

ONE-QUARTER DOZEN IN A PACKAGE.

Narrow Hook, Spring Tempered, 3-64 Inch or 18 Gauge Thick, 3-16 Inch Wide, Graduated in 32nds on One Side, 64ths on the Other.

No. 422— Length, in...	4	6	9
W't, doz., lbs..	¾	¾	¾
Per dozen	$8.40	10.80	15.00
	GJE	JIJE	ABFJ

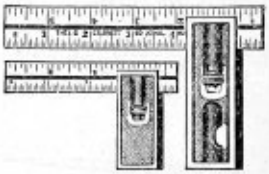
These rules are designed for use in taking measurements through small holes where the regular hook rules cannot be used. Can also be used for setting inside calipers. Measurements through holes as small as ¼ inch can be obtained.

ONE-QUARTER DOZEN IN A PACKAGE.

Spring Tempered, 3-64 Inch or 18 Gauge Thick, Graduated in 64ths and 32nds on One Side, 16ths and 8ths on the Other, Graduated in 32nds on Opposite Sides of One End..

No. 0303—Length, in.	3	4
Width, in.	⅞	⅞
W't per doz., lbs.	¾	¾
Per dozen	$4.20	5.40
	CEE	DEE
No. 0303—Length, in. ..	**6**	**12**
Width, in.	¾	1
W't per doz., lbs.	¾	2¼
Per dozen	$7.80	15.00
	FEE	ABFJ

POLISHED STEEL RULES.



Spring Tempered, 3-64 Inch or 18 Gauge Thick, Graduated in 64ths and 32nds on One Side, 16ths and 8ths on the Other, Graduated in 32nds on Both Ends of One Side.

No. 603—Length, in.	3	4
Width, in.	⅝	⅝
W't per doz.	¾	¾
Per dozen	$4.20	5.40
	CEE	DEE
No. 603—Length, in.	**6**	**12**
Width, in.	¾	1
W't per doz., lbs.....	¾	2¼
Per dozen	$7.80	15.00
	FEE	ABFJ

ONE-HALF DOZEN IN A PACKAGE.

DOUBLE SQUARES.

Polished and Hardened Steel Blade, Japanned Cast Iron Stock with Polished Face and Edges. Blade Graduated in 64ths and 32nds on One Side, 16ths and 8ths on the Other.

No. 13—Inches	4	6	9
W't, doz., lbs..	3¼	7½	11½
Per dozen	$19.80	30.00	36.00
	AGHJ	BGJJ	CBDJ

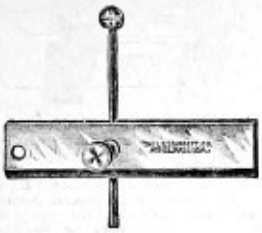
4 and 6 in. are fitted with both bevel and regular blades.

The sliding scale, shortened or extended full length makes this square very valuable, while with the extra bevel blade we have both the hexagon and octagon angles. There is a level in the stock of the 6, 9 and 12 in.

ONE IN A PACKAGE.

CENTER GAUGES.

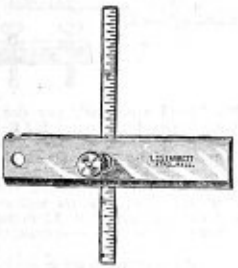
Polished Steel, Graduated One Corner Each in 32nds, 24ths, 20ths and 14ths, Length 2¼ Inches, 60° Angles.



No. 390—Not tempered, w't per doz. ¼ lb. .....per dozen **BGJ** $3.00
No. 391—Spring tempered, w't per doz. ¼ lb. .....per dozen **CHJ** $4.20

For use in grinding and setting screw cutting tools.

ONE-HALF DOZEN IN A PACKAGE.



GAUGES, SCRIBERS, PUNCHES, ETC.

STARRETT DEPTH GAUGES.

No. 45A—Polished steel, 3½ in. stock, w't per doz. 1½ lbs., per dozen ..... **GDE** $9.00

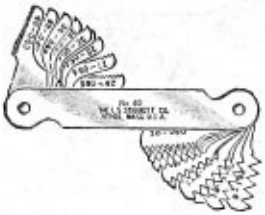
The wire in this gauge is held to a groove by a friction spring inside the nut while adjusting, and may be used close to the end, as well as in the middle of the straight edge. By loosening the nut, the gauge may be neatly folded.

No. 46A—Polished steel, 3½ in. stock, 4 in. scale, w't per doz. 1½ lbs., per dozen ..... **ABDJ** $15.00

A 4x$\frac{5}{16}$ in. scale slides in groove, and is graduated in 32ds and 64ths, and may be used separately from the gauge.

ONE IN A PACKAGE.

THICKNESS GAUGES.

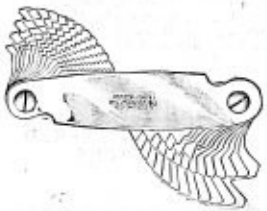


No. 172A—Polished steel, 9 tempered leaves—.002 to .0015—3½x½ in. case, 3½x½ in. leaves, w't per doz. 1½ lbs., per dozen ..... **JIIJ** $12.00

The thickness is marked on each leaf.

ONE IN A PACKAGE.

STARRETT SCREW PITCH GAUGES.



No. 40—Polished steel, 2½ in. long, 22 pitches—9 to 40— w't per doz. 1½ lbs., per dozen ..... **JIIJ** $12.00

No. 6—Polished steel, 2½ in. long, 30 pitches—4 to 42—w't per doz. 1½ lbs., per dozen ..... **ADHE** $18.00

Can be used inside a nut as well as on the outside of a screw or bolt. Each leaf is stamped in decimals showing the double depth of thread on said leaf, and this of course equals the depths of threads on the two sides of a tap having the same pitch, and helps the workman determine the size of drill needed to drill the hole the right size to leave a full V thread for a tap having the same pitch.

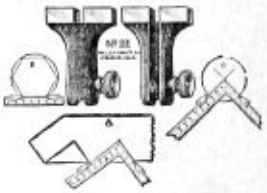
ONE IN A PACKAGE.

No. 155—U. S. Standard, polished steel, 3¼ in. long, 25 pitches—2¼ to 20—w't per doz. 3 lbs., per dozen **ADHE** $18.00

Can also be used as a center gauge with coarse and fine notch.

ONE IN A PACKAGE.

PLUMB BOBS.



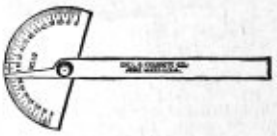
Solid Steel, Nickel Plated, Bored and Filled with Mercury, Hardened and Ground Points, Knurled Body, Braided Silk Line.

No. 87—Length, in.	**4**	**5**
Diameter, in.	½	⅝
W't per doz., lbs.....	2½	4¼
Per dozen	$12.00	18.00
	AJHJ	**AFBJ**
No. 87—Length, in.	**5½**	**6**
Diameter, in.	⅞	**1**
W't per doz., lbs.	9	12
Per dozen	$24.00	30.00
	BAFJ	**BGJJ**

The principal features are their great weight in proportion to size; low center of gravity; small diameter and patented device for fastening the string without a knot to tie or untie by simply drawing it into the peculiarly slotted neck at the top after unwinding the required length, when the bob will hang perfectly true.

ONE IN A PACKAGE.

STARRETT STAIR GAUGE FIXTURES.



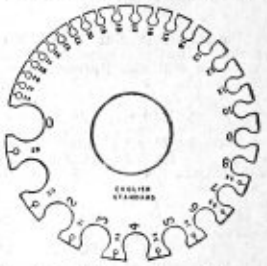
No. 111—Nickel plated steel, unpolished body, w't 4 oz. .....per pair **FE** $0.75

A pair of these fixtures can be readily clamped to a carpeter's steel square to form a gauge for various uses.

Sketch A shows the gauge as applied for laying out a stair stringer; sketch B, laying off hexagon angles; sketch C, as used as a center gauge or in quartering a circle.

THREE PAIRS IN A BOX.

STARRETT PROTRACTORS.



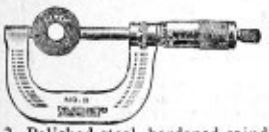
No. 19—Polished steel, graduated from 0 to 90 degrees from each end, 6 in. blade, w't per doz. 1½ lbs., per dozen ..... **ADHE** $18.00

Graduated in degrees from 0 to 90, both ways. The blade is 6 inches long, and by means of patent lock joint is set firmly by a slight turn of the nut. The back of the tool is flat. This protractor is accurate, and is convenient for setting bevels, for transferring angles, as a small T-square, or for a large number of other uses which will readily occur to a machinist or draftsman, and will be found reliable, and very satisfactory by any mechanic, especially those who do not care to pay for a more expensive tool.

ONE-SIXTH DOZEN IN A PACKAGE.

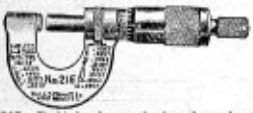
STANDARD WIRE GAUGES.

No. 2—Cast steel, round, small, gauges Nos. 6 to 36, w't per doz. 1 lb., per dozen ..... **AEHE** $30.00



No. 1—Cast steel, round, large, gauges Nos. 0 to 36, w't per doz. 2½ lbs., per dozen ..... **BDEJ** $48.00

STARRETT TOOLS.



MICROMETERS.

No. 3—Polished steel, hardened spindle, knurled sleeve and lock nut, with ratchet stop, for measurement by thousands up to 1 in., w't per doz. 5¼ lbs. .....per dozen **FDHJ** $72.00

No. 2—Polished steel, hardened spindle, knurled sleeve and lock nut, with ratchet stop and 1 in. test gauge, for measurement by thousands from 1 in. to 2 in., w't per doz. 7½ lbs., per dozen .....**GJBJ** $78.00

No. 215—Polished steel, hardened spindle, knurled sleeve and lock nut, with ratchet stop, for measurement by thousandths up to ½ in., w't per doz. 3 lbs. .....per dozen **EDJJ** $60.00

ONE IN A PACKAGE.

MICROMETERS.

Drop Forged from Bar Steel, Nicely Finished, Knurled Sleeve, with Patent Lock Nut and Ratchet Stop.

No. 226—Inches	1	2	3
For measurement, in.	0 to 1	1 to 2	2 to 3
W't, doz., lbs.	5¼	10½	12
Per dozen	$72.00	60.00	78.00
	FDHJ	**EDJJ**	**GJBJ**
No. 226—Inches	**4**	**5**	**6**
For measurement, in.	3 to 4	4 to 5	5 to 6
W't, doz., lbs.	17	20	28
Per dozen	$84.00	93.00	102.00
	GFCJ	**HCGJ**	**IAHJ**

Each micrometer is graduated to read by thousandths of an inch. The one inch has the decimal equivalents stamped on the frame. The other sizes are marked to show their capacity. No. 1 has decimal equivalents stamped on frame.

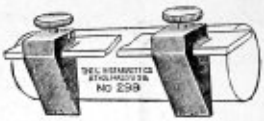
HIGH SPEED INDICATORS.

No. 104—Nickel plated scored steel handle, hardened steel pointed spindle with rubber tip for pointed or hollow centers, encased working parts, 5½ in. long, w't per doz. 3½ lbs., per dozen .....**AJHJ** $12.00

This indicator may be run at highest speed required without heating, and this on account of frictionless bearing against which the inner end of the spindle revolves. The dial plate has two rows of figures, reading right or left, as the shaft may run. The rotating disk being carried by friction, may be moved to the starting point where the raised knobs coincide. When the spindle is placed in connection with the revolving shaft, pressing the raised knob with the thumb will prevent the disc from rotating, while the hand of the watch gets to the right position to take the time. By releasing the pressure the disk is liberated for counting the revolutions of the shaft when every 100 may be noted by feeling the knob pass under the thumb lightly pressed against it, thus relieving the eye, which has only to look on the watch to note the time.

ONE IN A BOX.

REGISTERING SPEED INDICATORS.

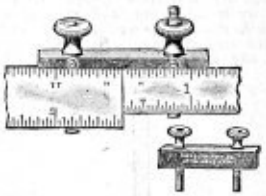


No. 107—Nickel plated, hard rubber handle, making a safe insulator when used on electricity, hardened steel pointed spindle with rubber tip for pointed or hollow centers, w't per doz. 4½ lbs. .....per dozen **CBDJ** $36.00

Devised to automatically register hundreds as well as units and tens, and thus relieve the mind from keeping tally. The instrument will register 5,000 revolutions. The large dial is graduated into one hundred lines, each one representing a revolution of the spindle. The small dial has fifty lines cut upon its face, each representing one hundred revolutions of the spindle (or one complete turn of the large dial). A spring finger trip attached to the case engages with one of the lines in the small dial and holds it from revolving until the large dial makes one complete turn, when the trip pin passing under the spring trip lifts it, and the dial is frictionally carried along by the large plate one line, thus showing that one hundred revolutions of the spindle have been made.

ONE IN A BOX.

KEY-SEAT CLAMPS.



No. 298—Steel, case-hardened and ground accurate, transforms any common steel scale into a key-seat rule, w't per doz. prs. 1½ lbs., per dozen pairs .....**FJE** $7.20

Can be put on or off almost instantly, and are a complete substitute for a more costly tool. They may be used with Starrett combination square blades, or with any straight rule, with accurate results.

ONE PAIR IN A PACKAGE.

RULE CLAMPS.

No. 299—Blued steel, w't per doz. prs. 1½ lbs..... per dozen pairs **EJE** $6.00

For clamping two steel rules together, end to end, making one long rule. The rules may be the same or different widths up to 1¼ in. Of special value to mechanics whose tool chests will usually not hold rules longer than 12 inches.

FOUR PAIRS IN A PACKAGE.

FARM LEVELS.

No. 22—Bostrom's, brass, highly lacquered and finished, consisting of 3 in. level and 9 in. telescope, tripod, plumb bob, graduated rod and target, w't 11 lbs.....each **ACBJ** $20.00

The telescope, which is "achromatic" giving a clear field, is equipped with a focusing eye-cap, and contains a system of magnifying glasses enabling you to read the target a quarter of a mile away. On account of the novel elements of construction of this level the telescope may be pointed in any direction desired with the necessity of re-adjusting the instrument.

The level has circle of degrees for obtaining angles; has spirit bubble and all necessary means of adjustment.

ONE IN A NEAT WOOD CASE.

PUNCHES AND NAIL SETS.

CENTER PUNCHES.

Tool Steel, Tempered, Knurled Center.

No. 92 H.S.&B.—In...	¾	⅞	1⅜
W't per doz., lbs. ..	½	¾	1¼
Per dozen $2.00	2.00	2.50	
	AAE	AAE	ACB

ONE DOZEN IN A BOX.

BRAD SETS.

No. 55—Excelsior, length 4 in., assorted No. 1 for ¾x18 and 20, No. 2 for ¾x16 brads, w't per doz. 1 lb., per dozen .....**BDJ** $6.00

End of set is hollow for receiving brads, which are driven by upper section of set. Will drive and set brads and finishing nails in inaccessible places; also for all moulding work.

NAIL SETS.

No. 38 H.S.&B.—Cup point, blued knurled handle, assorted 2-32, 3-32 and 4-32 in., length 5 in., w't per doz. 1½ lbs., per dozen .....**AAJ** $2.00

No. 38½ H.S.&B.—2-32 and 3-32 in., otherwise same as No. 38, per dozen .....**AAJ** $2.00

No. 40 H.S.&B.—4-32 in., otherwise same as No. 38.....per dozen **AAJ** $2.00

No. 39 H.S.&B.—Cup point, blued, 7/64 in., length 5 in., ¼ in. point, w't per doz. 2⅛ lbs. .....per dozen **ABJ** $3.00

ONE DOZEN IN A BOX.

No. 3 H.S.&B.—Car Builders', high grade tool steel, ¾x5 in., oil finished octagon barrel, ¼ in. cup point, polished taper, w't per doz. 7 lbs., per dozen .....**BIJ** $6.00

These nail sets are for use on large nails and spikes.

ONE-HALF DOZEN IN A BOX.

No. 50—Square head, cup point, blue knurled handle, sizes 2-32, 3-32 and 4-32 in., length 4 in., w't per doz. 1½ lbs. .....per dozen **AJE** $2.50

NAIL SETS.

No. 44 H.S.&B.—Cast steel, cup point, knurled handles, blued, assorted 2-32, 3-32 and 4-32 in., length 4 in., in nicely covered box, w't per box 1½ lbs., per box .....**AHJ** $5.00

TWO DOZEN IN A BOX.

No. 45 H.S.&B.—Cup point, knurled handles, blued, 2-32 in. only, length 4 in., w't per doz. ¾ lbs., per dozen .....**JIJ** $2.50

ONE DOZEN IN A DISPLAY BOX.

No. 46 H.S.&B.—3-32 in. only, otherwise same as No. 45 ..per dozen **JIJ** $2.50

ONE DOZEN IN A DISPLAY BOX.

No. 35 RUSSIA NOSE—Caest steel, cup point, knurled handle, assorted 1/8 to ⅛ in., length 3¼ in., w't per doz. 1 lb., per dozen .....**JGH** $2.50

No. 35½ RUSSIA NOSE—Cast steel, cup point, knurled handle, 1/8 in. only, length 3¼ in., w't per doz. 1 lb., per dozen .....**JGH** $2.50

No. 34 RUSSIA NOSE—Cast steel, cup point, knurled handle, 3-32 in. only, length 3¼ in., w't per doz. 1 lb., per dozen .....**JGH** $2.50

ONE DOZEN IN A BOX.

No. 37—Cast steel, cup point, knurled handle, blued, assorted 2-32, 3-32 and 4-32 in., length 4 in., in cloth covered wood form, w't per box 1½ lbs., per box .....**AHJ** $4.00

TWO DOZEN IN A BOX.

No. 92—Syracuse, cast steel, cup point, knurled handle, blued, 2-32 in. only, length 4 in., w't per doz. ¾ lb., per dozen .....**JIJ** $2.75

No. 93—3-32 in. only, otherwise same as No. 92 .....per dozen **JIJ** $2.75

ONE DOZEN IN A BOX.

SADDLERS' OR BELT PUNCHES.

H.S.&B., Length 4 Inches, Forged from Fine Tool Steel, Polished Handle, Blued Barrel, Evenly Tempered, Carefully Milled, Reamed to Allow Easy Clearance in Punching.

H.S.&B., sizes 1, 2 and 3, w't per doz. 1¼ lbs. .....per dozen **ACJ** $3.50

H.S.&B., sizes 4 and 5, w't per doz. 1¾ lbs. .....per dozen **ADE** $4.00

LOOSE.

RONSON.

No. 204—Drawn tempered high point carbon steel, nickel plated, great tensile strength, drop forged wing-nut and bolt with squared shank, length closed 6 in., consists of 9 perfect standard open end wrenches fitting U. S. Standard nuts on bolts from 1/4 to 7/8 in. diam., 7/8 in. squared opening in 1/4 in. head, w't per doz. 6 lbs. .....per dozen JFFJ $20.00

Pull out the wrench head the required size, set the wing-nut and rest of the members form a solid, well shaped handle of the greatest leverage.

In the fraction of a second, if required, the wrench may be taken apart. The members then form four perfect double end wrenches.

No. 202—Wrenches, wrought steel, hardened jaws, nickel plated and polished, length 7 in., for ⅛ to ⅜ in. pipe and ¼ to ¾ in. round iron, w't per doz. 7½ lbs.....per dozen **JGEJ** $12.00

Extra Toothed Jaws..... **BAJ** 3.60

The upper part of wrench is adjustable and is held open by a spring. It can be closed by the thumb nut until both jaws meet, giving the tool a wide range of work. The extra jaws are very easily adjusted and they renew the wrench indefinitely.

REVONOC *anvils have a greater surface area for their weight than any other on the market, owing to the correct distribution of the metal. For illustration: a* REVONOC *anvil 3½ inch by 14½ inch surface weighs 100 pounds, and frequently less; in order to obtain this same surface in a wrought anvil of other makes, the user is often compelled to buy 115 pounds or more of metal.*

The width of the base is always equal to the height, so they will not tip nor break loose from their fastenings by side blows.

The long horn is round throughout its full length, a perfect ring can be forged and welded at any point.

The long tail admits of bending small perfect U shapes, and leaves a large surface for welding.

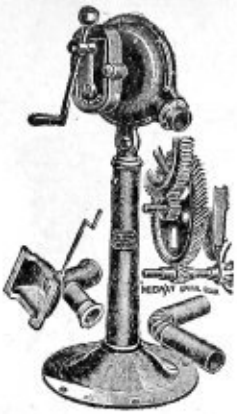
WE DO NOT BREAK BOXES.

CHAMPION BLACKSMITHS' BLOWERS.

No. 400—Best tool steel and phosphor bronze working parts, highest grade tool steel adjustable ball bearings, lathe turned cups and cones hardened and ground to highest possible finish, 12 in. fan, with "Whirlwind" blast, anti-clinker heavy nest tuyere iron and piping, w't 160 lbs., each . . . . . **AHDJ** $37.00

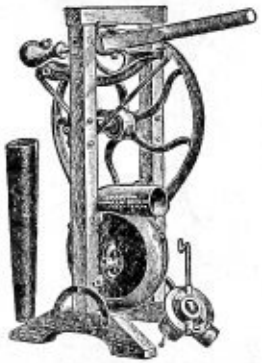
The No. 400 gearing is so constructed that it runs the blower at the extreme high speed necessary to produce a white heat blast without early destruction of the gearing.

Noise and lost motion are impossible.



The "Whirlwind" blast anti-clinker heavy nest tuyere iron increases the output of the fire fully two hours per day, with a great saving in coal, by consuming all the heating elements in the coal. It does not blow the heat and hot air up the chimney.

"Whirlwind" Blast, Anti-clinker tuyere irons for No. 400 blowers, each . . . . . **JDFJ** $10.00



No. 1—Lancaster, geared, crank motion, 12 in. fan, adjustable nozzle tuyere iron and piping, w't 110 lbs., each . . . . . **AJFE** $20.00

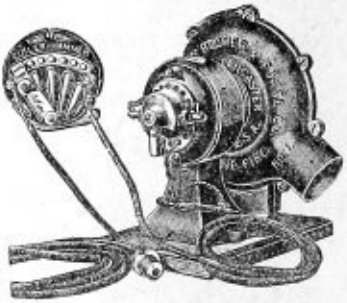
A well built, cheap, direct driven blower, smooth running, crank turns either way to make the blast.

No. 70—"Midway" spiral geared, crank motion, 12 in. fan, with 50 lb. center blast, heavy nest ball tuyere iron and piping, w't 175 lbs., each . . . . . **ACEJ** $30.00

The Champion "Midway" or cross spiral gearing is simple in construction and without small gears or pinions. The gearing runs in oil in a dust-proof casing, the crank turns in either direction to make the blast.

No. 1894—Leader, hardwood frame, lever motion, 16 in. fan, 28 in. fly-wheel, capacity of a 50 in. bellows, with patent adjustable nozzel, tuyere iron and piping, w't 125 lbs., each★ . . . . . **AJJE** $12.00

The mechanical self-acting and simple lever motion has nothing to get out of order and is absolutely perfect in construction, durable and light running, with a combination of momentum between strokes, keeping the blast regular and powerful.

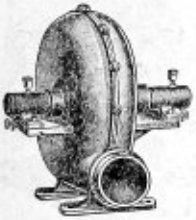


★*FOR FACTORY SHIPMENT ONLY, LANCASTER, PA.*

Alternating current, 60 cycle, single phase, 110 volts carried in stock regularly.

No. 01—Champion, "One-fire Variable Speed" Electric, with five speeds, motor capacity one-third above requirements, motor shaft of hammered steel, bearings of phosphor bronze, self-aligning, and supplied with automatic oilers, wiring of latest and best insulation, furnished with starting device, extension cord and plug to make connection to source of current, w't 35 lbs., each★ . . . . . **BGFJ** $36.00

In ordering No. 01, state if current is direct or alternating. If current is alternating, give voltage, cycle and phase; if direct, give voltage only.



No. 01½—Universal Electric, rheostat detached so it can be put any place on the wall, cord and plug attached ready to install, otherwise same as No. 01 "One-fire Variable Speed," each★ . . . . . **BGFJ** $36.00

Champion meets any demand from a horseshoeing establishment up to a general blacksmith. Operator within easy reach of blast regulator, having entire control of the five variable speeds which increase or diminish blast according to size of fire wanted; motor of special design for either direct or alternating current.

In ordering No. 01½, all that is required is the voltage as this machine will run on either direct or alternating current.

POWER BLOWERS AND PORTABLE FORGES.

POWER BLOWERS.

No. 0.

Champion, With Pulley.

No. 0—Will blow one fire, height 10 in., w't 15 lbs. .....each **DGJ** $8.00

No. 00—Will blow two ordinary fires, height 14 in., w't 30 lbs., each .....**JFJE** $10.00

No. 000—Will blow three ordinary fires, height 16½ in., w't 50 lbs., each .....**JGBJ** $12.00

Arranged for exhaust purposes, extra★ .....**ACJ** 2.00

This blower is intended for blowing fires in portable and small stationary boilers, also for forge fires and various purposes where a small current of air is desired.

PORTABLE FORGES.

No. 5—Champion Standard, lever, rivet forge, with shield and silent running clutch motion and patent oscillating bearings, 22 in. hearth, height 33 in., 10 in. fan, w't 110 lbs.,★ each .....**AJCE** $24.00

Adapted for all kinds of light portable work.

PORTABLE FORGES.

No. 150—Champion, agricultural, lever with shield, 18 in. hearth, 8 in. fan, height 30 in., w't 75 lbs., each .....**JDFJ** $14.00

No. 151—Champion, agricultural, lever, with half hood, 18 in. hearth, 8 in. fan, height 30 in., w't 80 lbs., each .....**JEGE** $16.00

No. 152.

No. 152—Champion, agricultural, crank, with shield, 18 in. hearth, 4 in. deep, height 30 in., 8 in. fan, wt 70 lbs., each .....**JEBJ** $14.00

No. 153—Champion, with half hood, otherwise same as No. 152, w't 70 lbs., each .....**JFJE** $16.00

Especially adapted for farmers or where light jobs are to be done.

FLY WHEELS.

For Nos. 150 and 151 Portable Forges, each .....**ABE** $2.20

CHAMPION AGRICULTURAL LEVER FORGES.

No. 100.

No. 100—Champion, with shield, height 30 in., hearth 22 in., fan 9 in., w't 90 lbs. .....each **JEDE** $16.00

No. 101—With half hood, otherwise same as No. 100, w't 95 lbs., each .....**JFFJ** $18.00

These forges are larger in both hearth and fan than the usual agricultural or farmer's forge. The hearth is deeper and heavier. The bearings are taper turned and long. The lever is of the ratchet motion type, simple and durable.

CHAMPION LANCASTER GEARED AGRICULTURAL FORGES.

No. 46.

No. 45—Champion, with shield, hearth 22 in., fan 10 in., w't 115 lbs., each .....**ABAJ** $27.00

No. 46—With half hood, w't 120 lbs., otherwise same as No. 45, each .....**ACEJ** $30.00

These are suitable direct drive forges for farmers' use where a well built, low priced, good blast producer is desired. They are strong, light forges for all kinds of portable work and are similar in construction and principle to the No. 70 Midway line, but are lighter and cheaper, intended principally for farmers' use. Can be easily carried about and make the best low priced rivet forges ever manufactured.

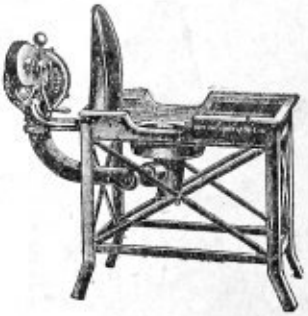
PORTABLE FORGES.

No. 86.

No. 85—Champion Imperial, lever rivet forge, with shield, 22 in. hearth, height 33 in., 9½ in. fan, w't 100 lbs., each . . . . . **JHEJ** $24.00

No. 86—With half hood, w't 105 lbs., otherwise same as No. 85, each . . . . . **AJJE** $27.00

These are adapted for tempering tools for tank and bridge builders, miners, boiler repairing, etc.



No. 81½.

No. 81—Champion Imperial blacksmiths' ratchet lever, with half hood, hardened tool steel self-acting pawls, oil caps in all bearings, hearth 32x45 in., height 30 in., 14½ in. fan, without water tank, w't 250 lbs., each★ . . . . . **AFIE** $50.00

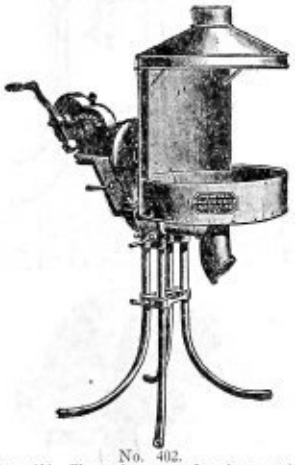
No. 81½—With water tank, w't 275 lbs., otherwise same as No. 81,★ each . . . . . **AIHJ** $55.00

The fan has a direct blast into the fire and will produce a large and steady blast for heavy and all kinds of blacksmith work.

No. 404½—Champion, steel rivet forge, with shield, adjustable ball bearings only, hearth 24x24 in., height 30 in., 9 in. fan, w't 185 lbs., each★ . . . . . **BCCJ** $45.00

A very light, stiff and practical forge for government use, race horse stables, elevated and steam railroads, bridge and tank builders, and boiler work of any kind.

Forge runs entirely noiseless and blast is produced by turning the crank in either direction.



No. 83.

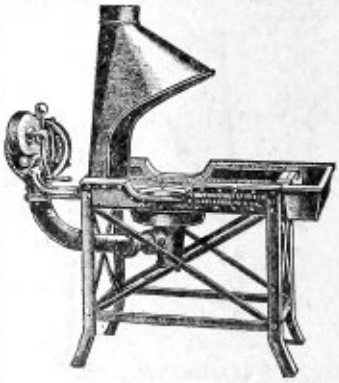
No. 82—Champion Imperial, boilermakers' ratchet lever, with shield, hearth 23x35 in., height 30 in., 12½ in. fan, w't 160 lbs.★. . . each **ACBJ** $36.00

No. 83—Champion Imperial, machinists' ratchet lever, with half hood, w't 170 lbs., otherwise same as No. 82, each . . . . . **ACBJ** $40.00

The Imperial Lever Motion is a very simple device. It is a self-acting ratchet. The three ratchet dogs are made of hardened tool steel and will stand years of hard work.

No. 82 is used by boilermakers, iron bridge and ship builders, railroad contractors, etc., and No. 83 by machinists, plumbers, millers, locksmiths, planters and in railroad repair shops.

No. 402.



No. 401—Champion, steel, rivet, with shield, made of structural steel, adjustable ball bearings, patented high speed spiral gearings, 18 in. hearth, height 30 in., 9 in. fan, w't 115 lbs., each . . . . . **AGBE** $35.00

No. 402—With half hood, w't 120 lbs., otherwise same as No. 401, each★. . . . . **AIEE** $38.00

Used by railroads, bridge builders, boiler and structural iron workers.

A strong, positive blast is produced by practically one-fourth the work required to produce less blast in other forges. The crank turns either way to produce blast.

Can be taken apart for transportation and set up in a few minutes.

No. 405½—Champion, steel tool-maker's forge, with half hood, adjustable ball bearings only, hearth 24x24 in., height 30 in., 9 in. fan, w't 190 lbs., each★ . . . . . **BECJ** $49.00

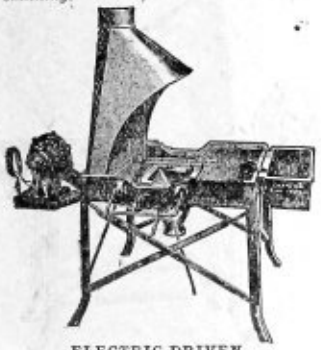
With Water Tank, extra★ BGJ $5.00

Especially adapted for tool-makers, jewelers, bicycle repairers, tempering tools, tank builders, miners, etc.

★*FOR FACTORY SHIPMENT ONLY, LANCASTER, PA.*

PORTABLE FORGES.

No. 408½.



No. 408—Champion, steel horseshoers', with half hood, heavy structural steel, working parts of highest grade tool steel and phosphor bronze, hearth 30x36x6 in., 12 in. fan, adjustable ball bearings, with "Whirlwind" blast anti-clinker heavy nest tuyere iron, w't 295 lbs., without water tank, each★ .....**CBBJ** $65.00

No. 408½—With water tank, w't 325 lbs., otherwise same as No. 408,★ each .....**CFBJ** $70.00

No. 409—Hearth 30x40x6 in., w't 300 lbs., otherwise same as No. 408, each★ .....**CFBJ** $70.00

No. 409½—Hearth 30x40x6 in., with water tank, w't 350 lbs., otherwise same as No. 408,★ each **CHHJ** $75.00

This is virtually the No. 400 Blower converted into a forge. It will make a white heat blast equal to the best power blower blast. Crank turns in either direction; it runs noiseless, smooth, easy and pleasant to the hand. It is adapted for carriage and heavy wagon work, railroad shops as well as general blacksmithing.

ELECTRIC DRIVEN.

No. 440—Champion, electric driven blacksmith steel forge, with the "Whirlwind" blast anti-clinker heavy nest tuyere iron, hearth 30x36 in., height 30 in., with hood complete, w't 300 lbs.★ .....each **DIDE** $67.00
Extra for tank★ .....**CGE** 5.00

In ordering Nos. 440 or 441 Electric Forges, state if current is direct or alternating. If current is alternating, give voltage, cycle and phase—if direct, give voltage only.

ELECTRIC DRIVEN.

No. 441—Champion, electric driven blacksmith forge, with "Whirlwind" blast anti-clinker heavy nest tuyere iron, hearth 32x45 in., height 30 in., with hood complete, w't 360 lbs., each★ .....**DFJJ** $60.00
Extra for tank★ .....**CGE** 5.00

No. 75—Champion Midway, rivet forge, with shield, cross spiral geared, 22 in. cast iron hearth, height 33 in., 10 in. fan, w't 140 lbs. ....each **ACEJ** $30.00

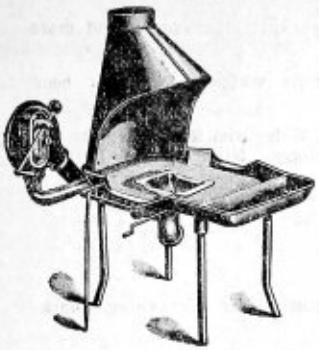
No. 78—Champion Midway, steel rivet forge, with shield, cross spiral geared, 18 in. hearth, height 30 in., 10 in. fan, w't 135 lbs.★ .....each **ACHJ** $30.00

No. 73.

No. 72—Champion Midway, boilermakers', with shield, cross spiral gearing in dust-proof casing, cast iron hearth 23x35 in., height 30 in., 10 in. fan, w't 185 lbs. .....each **AFAJ** $36.00

No. 73—Machinists', with half hood, w't 190 lbs., otherwise same as No. 72, each .....**AGEE** $40.00

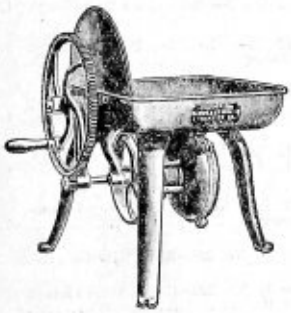
Suitable for boilermakers, bridge builders, railroad contractors, miners, jewelers, etc.



No. 76—Champion Midway, toolmakers', with half hood, cross spiral geared, 22 in. cast iron hearth, height 33 in., 10 in. fan, w't 145 lbs.,★ each .....**ADIE** $33.00

A strong and durable forge, adapted for jewelers, bicycle repairers, tempering tools, miners, prospectors, boilermakers.

FORGES, TIRE SHRINKERS AND BENDERS AND BLACKSMITHS' DRILLS.



PORTABLE FORGES.

No. 71—Champion Midway, blacksmiths', with half hood, cross spiral gearing in dust-proof casing, cast iron hearth 32x45 in., and heavy nest tuyere iron, height 30 in., 12 in. fan, w't 300 lbs. .....each **BBDJ** $50.00

The gearing used for producing the blast is simple in construction and without small gears or pinions. The crank turns either direction to make blast.

BENCH FORGES.

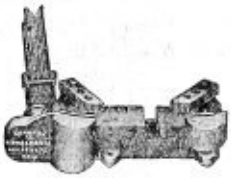
No. 21.

Champion, Crank, 14x17 Inch Hearth, 7 Inch Fan.

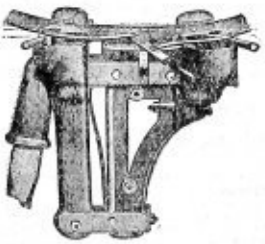
No. 21—With shield, w't 45 lbs., each . . . . . **JFJE** $16.00
No. 22—With half hood, w't 55 lbs., each★ . . . . . **JFFJ** $18.00
No. 23—With full hood, w't 65 lbs., each★ . . . . . **JGCE** $20.00

These are especially intended for light work, being very compact and easily moved, having short legs, so when used should be set on a box or bench. Will produce a welding heat on 1 in. iron in ten minutes. A very convenient forge for prospectors.

TIRE BENDERS.

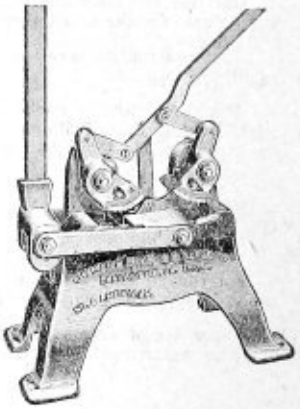


No. 1—New Style Eureka, bends 4x1 in. tire, w't 190 lbs..★ each **ACEJ** $18.00
A strong and powerful tool, built with all the latest improvements. It is double back geared and worked with two cranks which are furnished with each bender; also two speeds, one for light and fast work and the other for heavy work.



No. 2—Champion New Style, bends any size tire up to 3x1¼ in., w't 115 lbs., each★ . . . . . **JHJE** $11.00
The frame is cast strong and substantial, with double back gear, and worked with two cranks.

TIRE SHRINKERS.



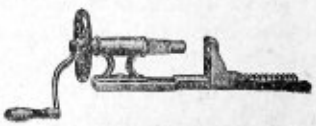
No. 11—Champion, floor space 18x10 in., shrinks tires 4x1 in., w't 140 lbs., each★ . . . . . **JIBJ** $12.00
Will shrink tires 4x1 in. and smaller.

No. 12—Lancaster, jaws and cams drop forged from solid tool steel hardened and tempered, will shrink all size tires up to a full 4x1 in., and axle up to 1½ in., w't 200 lbs..★ each . . . . . **AFAJ** $30.00
Constructed in the most mechanical manner and from the highest grade material. It is set on a post, making it as solid and strong as an anvil for hammering down kinks in the tire, and taking up but little space.

TIRE AND AXLE SHRINKERS.

No. ←American, will shrink up to 4x1 in. round edge tire, and axles up to 1¼ in., with two steel jaws 4x2 in. wide, w't 345 lbs..★ each **BGFJ** $35.00

This is a strictly high grade shrinker, made of the most costly and best materials, jaws are hammered tool steel with machine cut teeth.



Will shrink without kinking with one stroke of the lever 1¼ in., will stand all the pounding necessary to keep down kinks in tire.

The jaws work independently of each other, thus meeting all variations and thickness of tires and axles.

They are worked by a mechanical lever and are thrown in and out instantly by a simple movement of the hand, thus may be handled by one man.

Tire is gripped on flat sides, both top and bottom, which holds it in a perfect grip until it is shrunk.

BLACKSMITHS' HORIZONTAL DRILLS.

No. 012—Japanned, length 30 in., 1¼ in. screw, ⅞ in. square hole in mandril, w't 27 lbs. .....each **AGE** $6.00

The mandril is fitted to take standard drills.

★FOR FACTORY SHIPMENT ONLY, LANCASTER, PA.

BLACKSMITHS' SUPPLIES.

We are headquarters for all tools and supplies for the Blacksmith Shop or Farm Forge.

Our line is varied and complete. We have high grade supplies for the expert blacksmith and more simple ones for the small shop and for the farm.

Special attention is called to our REVONOC one-piece, Weldless Steel Anvils which have never been equalled in quality.

Also to our line of Parker & Prentiss Vises, Genuine Champion Blowers, Wiley and Russell Stocks and Dies, Forges, Post Drills and our complete line of OVB Hammers, Pincers, Nippers, etc. Detailed description of these can be found on pages 120 to 175.

BLACKSMITHS' OUTFITS.

For convenience we have selected two representative and staple assortments for the average blacksmith shop, and a similar one for the farmer's repair shop.

These are of exceptional value, and there is use for every tool in the assortment. The featuring of these assortments by the dealer will be appreciated by the users.

DRILL CHUCKS AND POST DRILLS.

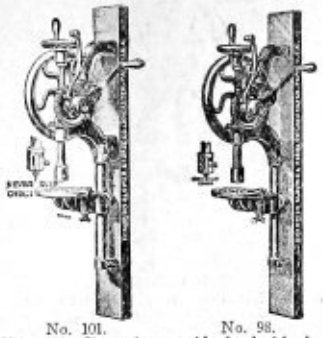
NEVER SLIP DRILL CHUCKS.

No. 1—Champion, with wrench complete to fit all Champion drills with ½ in. shank and take in 5/8 or 41-64 in. straight shank drill bits, each★ .....AGJ $2.00

No. 2—Champion, with wrench complete to fit all Champion drills with 5/8 or 41-64 in. shank and take in ½ in. straight shank drill bits,★ each .....AGJ $2.00

This illustration plainly shows the Patented Champion Never Slip Drill Chuck now furnished on all Champion drills without additional charge. It is a positive interlocking chuck, with a square shoulder mechanically worked out of the solid metal in the upper end of the chuck socket, making it a positive interlocking chuck without a loose or moving part, which means simplicity and everlasting durability, as the square shoulder in the socket which permanently meets with the flatted side of the drill bit holds the drill as firm as the combined strength of the solid metal of both the drill bit and the chuck. It is guaranteed to keep the drill bit from turning in the socket.

The CHAMPION "Patented" Never-Slip Drill Chuck, as well as the chucks on all CHAMPION Drill Spindles, comply with all the liability laws, as there is no protrusion on the outside of the Chuck to injure the operator. This has been overcome by counter-sinking the head of the set screw which is only required to keep the drill bit from dropping or pulling out while drawing the bit out of the bored hole.

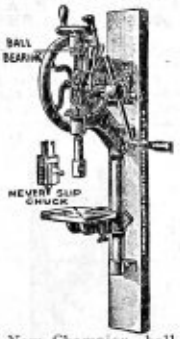


The Never-Slip Chuck enables the drill to do truer work, it gives practically double life to the drill bit, and as this great invention has been placed on all Champion drills free of charge, it is worth the attention of every man who is interested in blacksmith drills.

POST DRILLS.

No. 92—Champion, hand feed, made of best material, bearings ground out of solid metal, 7/8 in. steel spindle bored like "Never-Slip" chuck, for ½ in. straight shank drills, 3 in. up-and-down run, drills to center of 12 in. circle, holes from 1-64 to 1/4 in., w't 65 lbs. .....each CGE $6.00

POST DRILLS.

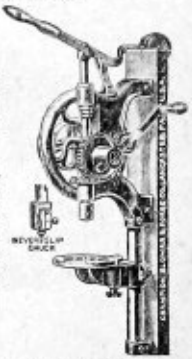


No. 101. No. 98.

No. 101—Champion, self feed blacksmiths', made of best material, bearings ground from solid metal, 7/8 in. steel spindle bored like "Never-Slip" chuck, for ½ in. straight shank drills, 3 in. up-and-down run, drills to center of 12 in. circle, holes from 1-64 to 3/4 in., single speed, with back gear, slotted lathe-turned table, w't 80 lbs., each .....EGE $7.00

No. 98—Champion, self feed blacksmiths', made of best material, bearings ground from solid metal, 1 in. steel spindle bored like "Never-Slip" chuck, for ½ in. straight shank drills, 3 in. up-and-down run, drills to center of 14 in. circle, holes from 1-64 to 1 in., single speed, with back gear, w't 95 lbs.....each FBJ $8.00

Extra, for power★ ....each BCJ 3.00

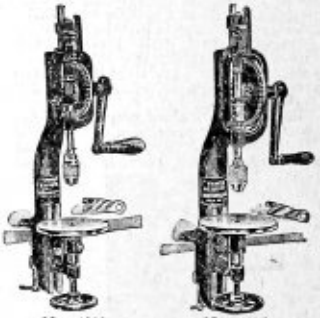


No. 95—New Champion, ball bearing self feed blacksmiths', made of best material, bearings ground out of solid metal, tempered die steel cup and cone, 1¼ in. steel spindle bored like "Never-Slip chuck, for ½ in. straight shank drills, 3½ in. up-and-down run, drills to center of 16 in. circle, holes from 1-64 to 1¼ in., back geared, w't 130 lbs. .....each AJCE $12.50

Extra, for power★ ....each BCJ 3.00

Has improved third gear principle which gives the second speed the same crank motion as on the first speed. The third gear being part of the handle hub, it is therefore disengaged when using first speed, saving the continuous labor of pulling along an intermediate gear while using the first speed; has double journal bearings to all working parts.

POST DRILLS.



This tool is designed for light and quick work, where fine drilling and counter-sinking is an object.

Our stock on above drills have spindles bored to take ½ in. straight shank drill bits. If specially ordered from factory, will be bored to take 5/8 or 41-64 in.

No. 100—Champion, lever feed blacksmiths', made of best material, bearings ground out of solid metal, steel spindle bored like "Never-Slip" chuck, for ½ in. straight shank drills, 5½ in. up-and-down run, drills to center of 14 in. circle, holes from 0 to 3/4 in., with back gear, w't 100 lbs., each .....JHJE $10.00

Extra, for power★ ....each BCJ 3.00

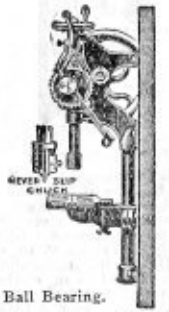
POST DRILLS.

No. 195—Champion, ball-bearing, full automatic self-feed, blacksmiths', with cups and cones of tool steel, drills to center of a 15 in. circle, drills holes up to 1¼ in., 1⅛ in. spindle, up-and-down run of 3 in., spindle bored like "Never-Slip" chuck to take in ½ in. straight shank drill bits, slotted lathe turned table, w't 115 lbs., each . . . . . **JHJE** $11.00
Extra, for power★ . . . . . **BHJ** 3.00

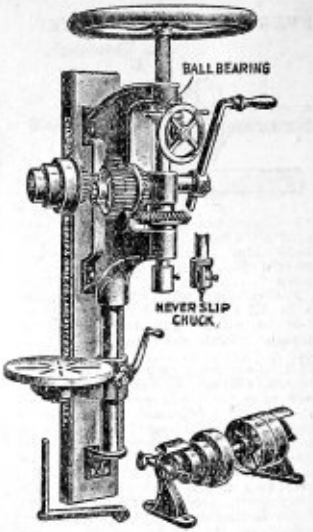
This drill has a third gear to give the second speed the same turning direction of the crank as the first speed, and full back gears with two speeds to the crank.

No. 91—Champion, ball-bearing, full automatic self-feed, blacksmiths', with cups and cones of tool steel, drills to center of a 14½ in. circle, bores holes up to 1 in., 1⅛ in. spindle, up-and-down run of 3 in., spindle bored like "Never-Slip" chuck to take in ½ in. straight shank drill bits, slotted lathe turned table, w't 100 lbs., each . . . . . **JGDE** $10.00
Extra, for power★ . . . . . **BHJ** 3.00



Ball Bearing.

No. 4—Champion, new improved upright blacksmiths', 18 in. swing, three geared automatic self feed, 2 speeds with double journal bearings to all working parts, full back geared, with improved third gear principle, which gives the second speed the same crank motion as on the first speed, bearings all ground and polished out of solid metal, 1⅛ in. steel spindle bored like "Never-Slip" chuck for ½ in. straight shank drill bits, 5 in. up-and-down run, drills to center of 18 in. circle, holes from 1-64 to 1½ in., w't 200 lbs., each . . . . . **ADBJ** $17.50
Extra, for power★ . . . . each **BCJ** 3.00

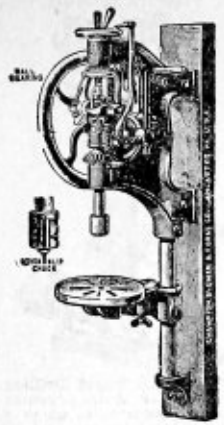


No. 5—Champion, ball-bearing, 20 in. swing, quick return and hand-feed handle, w't 240 lbs., otherwise same as No. 4★ . . . . . each **BJAJ** $25.00
Extra, for power★ . . . . . **BHE** 4.00

The Champion No. 5 has a quick-return handle, enables the mechanic to get the bit out of the work quicker and far more easily than by the use of the top or ratchet wheel. It is also very useful to feed by hand for holes up to ½ in., especially if the drill is run by power.

Ball Bearing.

No. 9—Champion, self feed, blacksmiths', made of best material, bearings ground out of solid metal, 1⅛ in. steel spindle bored like "Never-Slip" chuck, for ½ in. straight shank drills, 3 in. up-and-down run, drills to center of 15 in. circle, holes from 1-64 to 1½ in., 2 speeds, full back gear, w't 115 lbs. . . . . each **HJE** $9.50
Extra, for power★ . . . . each **BCJ** 3.00



No. 25—Champion, back-geared, automatic self-feed, with cut gears and ball bearings, drills to the center of 22 in. circle, spindle bored like "Never-Slip" chuck, to take in 41-64 in. straight shank drill bits, drills from 0 to 1½ in. holes, feed screw has up-and-down run of 6¼ in., with cone pulley and countershaft, complete for hand and power, w't 500 lbs., each★ . . . . . **CBGE** $55.00
No. 25A—Champion, with tight and loose pulleys, complete for power and hand, otherwise same as above, w't 425 lbs.★ . . . . . each **CBHJ** $44.00
No. 25B—Champion, for hand only, otherwise same as above, w't 400 lbs., each★ . . . . . **BIIJ** $40.00
Furnished with wheel hanger for drilling tires.

The Champion No. 25 New Back-Geared Automatic Self-Feed Post Drill is a perfect single or double back-geared drill which can be changed from one to the other in an instant. The gears turn or revolve in the same direction that the crank is turned, which adds to light running and momentum of the gears. Recommended for all kinds of work. The independent countershaft, with three-step cone pulley to give the drill different speeds, is a feature of great importance and advantage for a power drill. The rack for raising or lowering the table is very convenient, very quick in action and very easy to work. It will not stick and throw the drill and table out of line.

The table can be turned from under the drill spindle and out of the road precisely the same as if no rack was there. It has a large, round lathe-turned and slotted table, making it very convenient for bolting the work on. The automatic self-feed is complete and practical; the hand-feed wheel or quick return wheel meets many demands for quick work, for machine shops, carriage builders, railroad shops, blacksmith shops, etc. The wheel hanger is a valuable addition for carriage builders, avoiding scuffing of painted wheels, etc.

Ball Bearing.

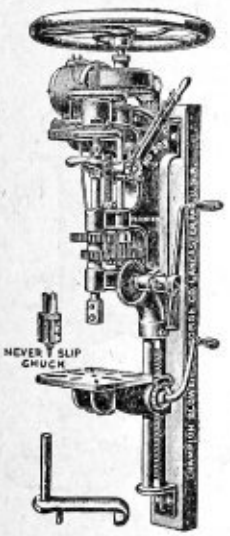
No. 203½—Champion, upright, with combination automatic self-feed and double compound lever-feed, with cut gears and ball bearings, drills to center of 21 in. circle, feed screw has an up-and-down run of 5½ in., spindle bored like "Never-Slip" chuck to take in 41-64 or ⅝ in. straight shank bits, drills holes from 0 to 1½ in., substantial and self-supporting, with cone pulley and countershaft complete, for power and hand combined, w't 700 lbs.★ .....each **FDDJ** $85.00

Furnished with wheel hanger for drilling tires.

No. 203½A—Champion, with tight and loose pulleys for power and hand combined, w't 625 lbs., otherwise same as No. 203½★ .....each **EGEJ** $75.00

No. 203½B—Champion, for hand only, w't 600 lbs., otherwise same as No. 203½★ .....each **EBIJ** $70.00



Nos. 200 to 203½ are high grade drills, particularly adapted for machine, blacksmith and carriage shops. The special feature of these drills is that they have the combination automatic self and lever feed which are independent of each other and can be changed from one to the other in a fraction of a second giving a hand power drill with a combination of feeds. All end friction is taken from the drill spindle by the use of ball bearings. The two feeds are combined and either feed is always ready for operation without interfering with the other and without the slightest change of the drill. Both lever-feed and self-feed with the perfectly balanced drill spindle give instantaneous quick return of the drill bit out of the hole bored and again instantaneous replacing of the drill bit for drilling the next hole. There is positively no turning backwards of the feed screw nut or ratchet wheel to get drill bit out of the work with either feed. The lever feed makes them a capital wood boring machine.

Our stock on above drills have spindles bored to take ½ in. straight shank drill bits. If specially ordered from factory, will be bored to take ⅝ or 41-64 in.

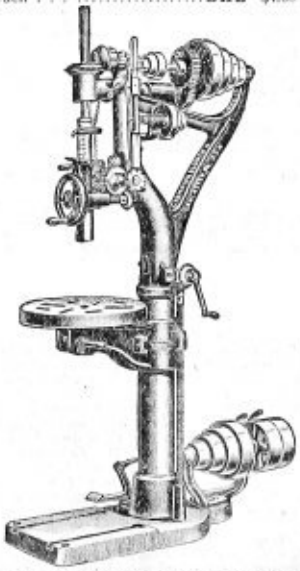
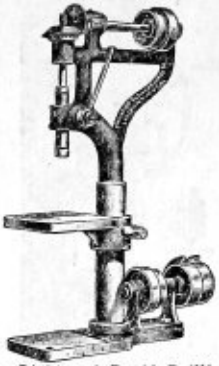
No. E203½—Champion, combination automatic self-feed and double compound lever-feed, electrically driven, otherwise same as regular No. 203½ on page 174, w't 700 lbs.,★ each ..... **ABCJE** $160.00



If ordering for direct current get the voltage only. If alternating current, get the cycle or alternations, phase and voltage.

POST.



No. 201—Champion, upright, combination automatic self-feed and compound lever-feed, with cut gears and ball bearings, table is raised and lowered by a rack and can be turned back out of the way, drills to center of 21 in. circle, up-and-down run of spindle ½ in., spindle 1¼ in. in diameter, bored like "Never-Slip" chuck, to take in ½ in. straight shank drill bits, drills from 0 to 1½ in., with wheel hanger for drilling tires, w't 375 lbs.★ .....each **BHAE** $40.00

Tight and Loose Pulleys for power for No. 201 Champion, extra,★ each ..... **BHE** $4.00

POWER BENCH.

For Light and Rapid Drilling.

No. 304—Champion, drills to center of 9 in. circle, bores holes up to ⅝ in. in diam., up-and-down run of spindle ¼ in., up-and-down run of table 9 in., greatest distance from table to spindle 10 in., greatest distance from planed base to spindle 16 in., bored with No. 1 Morse taper hole, diam. of column 2½ in., height 32 in., w't 80 lbs., each★ ..... **BCJJ** $30.00

This drill is particularly adapted for garages, pattern makers, and machine shops where light, accurate and rapid drilling is done.

The top of the drill base is planed off to use as a table when the regular drill table is turned to one side, thus giving a space of 16 in. between the chuck and the base-table.

The countershaft is supplied with a belt shift on the tight and loose pulley and the feed lever is manipulated with a spring arrangement that at all times keeps the lever and bit up and out of the work.

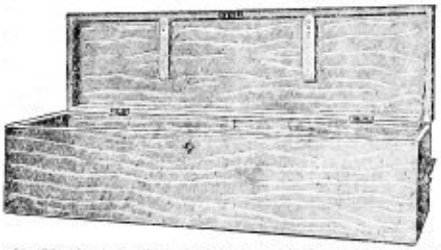
BACK-GEARED UPRIGHT POWER.

No. 305—Champion, 20 in. double back-geared upright power drill, drills to center of 20 in. circle, spindle 1¼ in. in diam. with graduated sleeve and bored with No. 4 Morse Taper, with 4-step cone pulley, carrying a 2 in. belt, spindle has up-and-down run of 8 in., pulleys for driving drill are 8x2½ in., drills holes from 0 to 1½ in., with square base complete, less belts, w't 675 lbs.★ ....each **JIGGE** $130.00

This drill combines simplicity and speed in operation with strength and rigidity. The gears are machine cut; the bearings are all large and powerful. Can be changed from a plain drill to a double back-geared drill in an instant by sliding the gears. Has eight speeds with three distinct and complete feeds, power-fed, hand screw feed and lever-feed. Has screw for raising and lowering table, convenient and quick in action with table remaining firmly where it stops.

This is the most accurate power drill that human hands can manufacture for machine shops.

TOOL CHESTS AND WORK BENCHES.



CARPENTERS' TOOL CHESTS.

WOOD-WORKING MACHINERY.

SCROLL SAWS.

No. 1—New Rogers, japanned iron frame, striped in red and gold, japanned tilting-table, selected ash arms and pitman, steel arbors, carefully fitted to bearings, 4½ in. iron balance wheel, with drilling attachment, improved saw clamps, height of table 32 in. The swing around the table under the arm is 34 in., complete with 1 dozen saw blades, wrench, sheet of designs and drill points, w't 25 lbs., boxed for shipment 42 lbs.; each .....**DCJ** $5.00

ONE IN A BOX. SHIPPED KNOCKED DOWN.

No. 7—Cast iron frame, hard maple table and arms, balance wheel runs on steel arbor, 7 in. blade, complete with 1 dozen saw blades, w't 55 lbs., boxed for shipment 80 lbs.★..each **ACHJ** $15.00

For carpenters and builders, cabinet makers and other wood workers. Will saw pine 2 in. thick, 1 ft. per minute; 1 in. thick, 4 ft. per minute. Ordinary rate of speed when sawing, from 800 to 1,200 strokes per minute. Leaves the work as smooth as is possible for any saw to do, and can be taken out and replaced in an instant for inside work. The swing around the blade under the arm is 24 in.

VELOCIPEDE SCROLL SAWS.

No. 2—Cast iron frame, hard maple table and arms, balance and drive wheels run on steel arbors, 7 in. blade, with 1 dozen blades—without attachment—w't 90 lbs., boxed for shipment 130 lbs., each★ .....**AFEE** $18.00

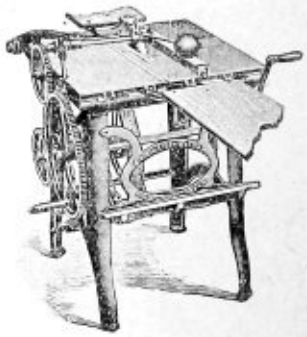
No. 2-B—With boring attachment, including one ⅞ in. bit, each★ .....**AHDJ** $20.00

The swing around the blade under the arm is 24 in. The boring attachment can be furnished at any future time, if not desired when ordering the machine. We can furnish extra bits at the following prices, each: ⅛, 15c; 3-32, 15c; ¼, 20c; 5-32, 20c; ⅜, 25c; 7-32, 30c; ½, 35c.

COMBINED CIRCULAR AND SCROLL SAWS.

Showing Circular Saw Only.

No. 25—Circular saw only—with two 6 in. saws—without attachments, each★ .....**CBBJ** $35.00



No. 26—Scroll saw attachment—1 dozen saws—★ extra.....each **DFJ** $5.00

No. 27—Boring attachment, with drill chuck,★ extra ....each **JIBJ** $10.00

No. 28—Combined machine, complete with attachments★ each **DFJJ** $50.00

Neither the circular nor the scroll saw interferes in the slightest degree with the successful operation of the other. The capacity of the scroll saw is the same as that of No. 7. The table can be handily adjusted up or down by a cam, to allow any desired depth of cut being made by the saws or cutter tools. The circular saws are 6 in. in diameter, and reach 1⅝ in. above the table. Weight boxed for shipment, 350 lbs.

CIRCULAR SAWS.

No. 4—Iron and steel frame, 30x30 in. iron table, complete with self-feed, two 10 in. circular saws—1 each rip and cross-cut—w't 400 lbs., crated 480 lbs., each★ .....**EHEE** $60.00

No. 5—With countershafts, for steam instead of foot power, otherwise same as No. 4★ .....each **FCEJ** $65.00

No. 6—Boring attachments, each★ .....**JIHJ** 10.00

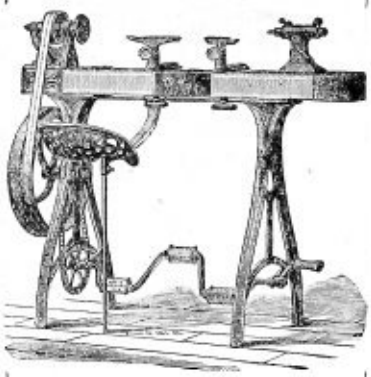
No. 7—Countershaft and belt pulleys, each★ .....**JIHJ** $10.00

No. 8—Universal mitre gauges, each★ .....**JIHJ** 10.00

Hand and foot power for hard or soft, thick or thin lumber. Can be used as a cross-cut saw. Self-feed mechanism can be instantly thrown back to rear of machine, also rip gauge, leaving table perfectly clear for cut-off work. Can be used for rabbeting and grooving. The self-feed can be used for grooving and rabbeting as well as when the machine is used for ripping. Cutter heads are also used for graining and dadoing, and with knives of suitable width for joining. Can be provided with boring attachment which is the same as used on the combined machine.

WOOD-WORKING MACHINERY.

FOOT POWER MORTISERS.



No. 9—Foot power mortisers, without chisels, w't 135 lbs., boxed 170 lbs., each★ .....**AIBJ** $20.00

No. 10—Self-cleaning mortising chisels, sizes ¼, ⅜, ½, ⅝, ¾, ⅞, 1, 1¼, 1½ and 1 in.★ .....each **JIE** $1.00

No. 11—Blind slat chisels, with 3 set bits★ .....each **EDJ** $5.00

Has great range for work, power in the chisel, accuracy in its action, and has all the required adjustments, which are easily and quickly made. Has abundant strength, is durable, and occupies but little space. Except for the supplementary table and treadle, the machine is made entirely of iron and steel.

LATHES.

Barnes, Foot Power.

No. 3C—Complete, with 3 centers—1 a spur—2 tool rests and sockets, and 1 turned face plate, w't 230 lbs., boxed 320 lbs.★ .....each **CHDJ** $40.00

No. 3W—Without lower portion, but with short bench legs,★ each .....**BDJJ** $25.00

Designed for wood turning. Will take wood 12 in. in diameter and 3 ft. long. Has velocipede foot power and improved seat. Speed can be varied from 1,000 to 2,000 revolutions per minute, and the motion can be started, stopped or reversed instantly. Adjustable sliding seat can be readily moved along to any part of the bed that the work requires. This lathe is made entirely of iron and steel, except the bed, which is of wood. The spindle is of steel, fitted up in the best manner. All the bearings are of steel, making them strong, durable and light running. The centers are accurately fitted to taper holes. No wrench is required to adjust tail-stock or tool rests and sockets, hand wheels being used instead.

LATHES.

No. 4—Barnes, all iron and steel, velocipede foot power, complete as described below, w't 210 lbs., boxed 265 lbs., each★ .....**EAJJ** $50.00

For turning both wood and iron, and for boring, drilling, polishing, etc. Swings 7 in. and takes 20 in. between centers. Speed can be varied from 1,000 to 2,000 revolutions per minute. Solid bed with V-shaped projections, over which the head, tail-stocks and hand and slide rests are fitted. Lead screw for the carriage is operated by hand; carriage can be traveled 20 in., the entire distance between the centers, and can be engaged or disengaged instantly from the lead screw. The upper or cross-feed way on which the tool post moves can be set at any desired angle, and tapers can be turned and taper holes can be bored to the extent of its travel. Tail-stock can be moved and set at any point desired, by the simple turning of a hand wheel, or taken off entirely, leaving bed free for face plate or chuck work. Head-stock spindle has taper bearings, and is capable of very nice adjustment. Tail-stock center is self-discharging. The lathe includes face plate, two pointed centers and one spur center, hand rest, wrenches and necessary belting.

No. 4½—Barnes, all iron and steel, velocipede foot power, complete as described below, w't 270 lbs., boxed 340 lbs.★ .....each **GFEJ** $75.00

It is a back-geared screw-cutting lathe. Feeds right or left, and cuts screws right or left without change of gearing. Adjustable carriage for taper boring. Thoroughly gibbed for taking up wear. Tail-stock has side movement to adjust centers for turning tapers. Head-stock has hollow spindle for rods up to ⅞ in. It swings 9 in. on the face plate and 4¾ in. over tool carriage, and takes 25 in. between centers, has three speeds, and is suitably arranged for heavy or light work in turning or polishing. With face plate, two pointed centers and one spur center, wrenches and necessary belting.

★FOR FACTORY SHIPMENT ONLY, FROM ROCKFORD, ILL.

LATHES AND GRINDING MACHINES.

LATHES.

Cut showing portion of Nos. 5 and 5½ Screw Cutting Engine Lathes.

Barnes all Iron and Steel, Velocipede Foot Power.

No. 5—Lathe, complete as described★ each **JIGGE** $100.00

No. 5—With extra long bed, 40 in. between centers, each★ ..... **AJBFE** $105.00

Swings 11 in. on the face plate, 6½ in. over the tool carriage, and is 34 in. between centers. Back-gearing and cone pulleys give great range of speed. Head stock has a steel spindle with 15-32 in. hole through its entire length. Tail stock can be readily set at any desired point, and can be taken off altogether, leaving it free for face plate or chuck work. It can also be set over for turning tapers. Spindles of both head and tail stocks are of steel, with positively true taper holes for the reception of the centers. Tail stock center is self-discharging. Tool carriage is gibbed to the bed. The tool can be set to the work at any position or angle desired; also to bore a taper hole. All the works are securely protected from chips and dirt. As a right or left screw cutting lathe it is simply perfect. All the gearing is cut from solid metal in the best machinery known for gear cutting, and is as true and noiseless as it is possible for metal gearing to be. Weight 385 lbs.; boxed ready for shipment, 500 lbs.

No. 5½ has patent twin screw feed and screw cutting combination, which makes change of feed in the tool carriage instead of in the head stock. Tail stock has side movement to adjust centers for turning tapers. Head stock has hollow spindle for rods up to ½ in. All the gearing is cut from solid metal. The boxes are accurately fitted to the spindle, with provision to keep them true and take up wear. Steel Spindle for both head and tail stocks. Tail stocks can readily be set at any desired point, or be taken off altogether. Swings on face plate, 13 in.; over tool carriage, 8 in. All the works are securely protected from chips and dirt.

If countershaft is taken instead of foot power, advance list $5.00.

With the patent velocipede foot power, motion can be started, stopped or reversed instantly, and greater power can be applied on the work than with any old-style foot power, and with greater ease. Head stock has a hollow steel spindle that will take a ½ in. rod through its entire length. Boxes are accurately fitted to the spindle, with provisions to keep them true and take up wear. Tail stock can be readily set at any desired point, or taken altogether from the lathe bed, without removing nuts or bolts. It can also be set over for turning tapers. Spindles for both head and tail stocks are of steel, with positively true taper holes for the reception of the centers. Tail stock center is self-discharging. Tool carriage is gibbed to the bed. All the works are securely protected from chips and dirt. It is indexed for threads 4 to 32 and the change gears furnished can be combined for many other threads. Swings 13 in. on face plate; over tool carriage, 8 in. Has a splined screw, giving rod feed for turning, reversing the screw for thread cutting only.

ONE IN AN INDIVIDUAL BOX.

Hindostan, although usually called an oil stone, can be used with water with equally good results. It is a very fine grained sand stone and is undoubtedly the best low priced sharpening stone for mechanics' tools.

The Arkansas oil stone is found in two grades, known as hard and soft. The hard grade is especially adapted to sharpening highly tempered tools, requiring very keen, smooth edges, also pointed tools, such as are used by engravers, watchmakers, diesinkers, wood and ivory carvers, surgeons, etc. The soft Arkansas is better adapted for carpenters, machinists, cutters and others who require a stone for putting on a fine finishing edge.

The Washita stone is more generally used by carpenters and joiners than any other. This stone is obtained in several grades, of which the Lily White brand is conceded to be the best general purpose stone yet discovered, it being capable of cutting away very rapidly and leaving a fine, smooth, lasting edge.

India oil stone has been on the market but a few years, yet its reputation has become world-wide. For rapid cutting it has no equal, and it leaves a remarkably smooth, lasting edge on the tool. It is made in coarse and medium grits. The coarse grit is used only where very rapid work is desired, the medium grit being used mostly by carpenters, joiners and others wanting a stone for general use.

The India is also made with the coarse grit on one side and medium on the other. This stone is very popular, as it saves many the necessity of buying two stones.

BENCH STONES, ONE IN AN INDIVIDUAL BOX; SLIPS, ONE DOZEN IN A BOX.

INDIA "KANT-BREAK" KNIFE SHARPENERS.

These "Stone Steels" are made of the most satisfactory abrasion known—India Corundum—a substance in hardness about that of a diamond. It is crushed into small grains, bound together under heavy pressure and hardened by heat. There is a strong reinforcing rod running the entire length of the steel as well as rubber tips at both ends and a rubber ring upon the handle. All serving to make the hone strong and less liable to break. We cannot too highly recommend these hones to the man who wants a very rapid cutting, durable sharpener.

No. 10—"Kant Break," w't per doz. 8 lbs.....per dozen **DHJ** $8.00

A STRONG, NEAT WOODEN COUNTER DISPLAY STAND PACKED WITH EVERY DOZEN HONES.

INDIA POCKET KNIFE STONES.

No. 228 Cruso—8×2×1 in., w't per doz. 19 lbs.....per dozen JCIE 10.00

Made of ground corundum, held together by special bond. One side is coarse for quick cutting on a very dull tool, and the opposite side is very fine for finishing. Not affected by moisture. The bond is of such a peculiarly tough nature that the stone is not easily broken. It may be dropped from quite a height without damage. This does away with the necessity of having each mounted in a wooden case.

IN HANDSOME PASTEBOARD CASE. HALF DOZEN IN A BOX.

RUBY OIL SLIPS.

"CRUSO."

No. C184—4½x1¾x½ tapering to ⅛ in. thick, w't per doz. 4 lbs., per dozen .....**DCJ** $6.00

ONE IN A CARTON.

POCKET HONES.

No. C140—Two dozen stones 3x⅞x⅜ in., mounted in a 10x12 in. attractive display box with easel back, per carton .....**BFJ** $3.60

This little stone is made of the finest carborundum powder, and of a hardness suitable for sharpening pocket knives, ink scratchers, scissors and small tools. It is a smooth, fast cutting stone, producing a very sharp, keen edge. This stone is put up in a neat, buff colored carton.

CARBORUNDUM STONES.

CARBORUNDUM DISPLAY CASES.

This is an attractive display. Gives an unmistakable emphasis, an emphasis which means increased sales.

This is the newest of the trade stimulating Carborundum display cases. It is about fourteen inches square and seven inches high. It is made in the natural wood colors, is strong, durable and practical as a stock keeper, and as a display medium is a most desired addition to any counter.

Four spacious drawers, each fitted with a strong drawer pull, are built into the body of the case. Each drawer is large enough to hold a good supply of the quick-selling, hardest and sharpest Carborundum Stones.

A most artistic tone is given the case by the lift-top cover, on the inside of which appears the Carborundum Indian Head trade mark done in five glowing colors.

When the case is placed in the regular stock shelves it does not entirely lose its value as a display medium as many cases do. In closing the case, the drop hinged front is lifted, covering the four-drawer ends and being secured with a small brass hook.

The lift-top cover is lowered and fits tightly to the body of the case, making the interior dust-proof. Across the hinged drop front the words "Carborundum Sharpening Stones," appear in rich gilt letters, identifying the case when it is placed with others on the store shelves, and adding greatly to its display value. This case is given absolutely free to any dealer purchasing any one of the following assortments.

No. 1 Assortment—Containing 26 carborundum stones, total retail value $16.75, w't per assortment 20 lbs., per assortment .....**ABJE** $16.75

		Retail Value

CARBORUNDUM GRAINS AND POWDERS.

GRAIN Nos. 24, 30, 36, 40, 50, 60, 70, 80, 90, 100, 120, 150, 180 and 220.
POWDER Nos. F, FF, FFF.

One pound cans, any grit, number, grain or powder, per pound **BF** $0.30

Five pound cans, any grit, number, grain or powder, per pound **BB** $0.25

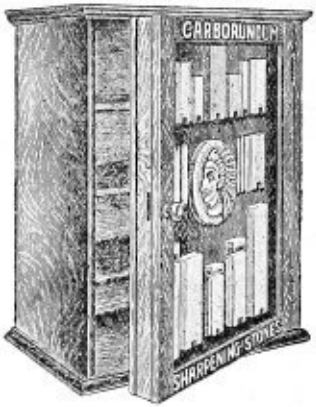
Twenty-five to Fifty pound drums, any grit, number, grain or powder, per pound .....**AH** $0.20

Fifty to One Hundred and Fifty pound kegs, any grit, number, grain or powder .....per pound **AD** $0.16

150 and 300 pound kegs, any grit, number, grain or powder, per pound .....**AB** $0.14

The carborundum grains and powders are produced by crushing the crude carborundum crystal masses.

The grains are subjected to an acid treatment, then graded into the different grits by a sieving process.



The grains too small to grade by sieving are graduated in running water, the finest grains being those which float longest.

ALL STONES GUARANTEED.

WE GUARANTEE ALL STONES IN THE DISPLAY AND STOCK, AND WILL REFUND FULL PRICE PAID FOR ANY STONE NOT GIVING ENTIRE SATISFACTION TO YOUR CUSTOMER.

CARBORUNDUM STONES.

No. 7 DISPLAY CASE.

We will furnish FREE, the above illustrated display case, providing the dealer will purchase from us the stones displayed in case, and a selling stock of stones, at a total investment of $41.60, list price.

With this proposition the dealer is assured of three things—First, of a wide margin of profit. Second, a quick selling stock of Carborundum Sharpening Stones, made of Carborundum, the hardest, sharpest, quickest cutting abrasive known, and third, of a very attractive display case of such finish and workmanship as to be quite in keeping with the furnishings of any first class hardware store.

The case is 24 inches high, 18 inches wide and 12 inches deep, made of the best grade golden finish quartered oak. The door and heavy glass-covered display panel showing an assortment of carborundum stones are in one. The stones are attractively arranged on dark cloth-covered panel, with number and selling price of stones stamped on each stone. Stones are easily removable. Back of the door are four spacious compartments for carrying stone assortment. The stock is accessible from the front of the case, making it very convenient.

This is a splendid, attractive case especially designed for the window or counter display.

The following stones are displayed on the panel of the show case. They are rapid sellers and known to the trade.

		Retail Value

ALL STONES GUARANTEED.

WE GUARANTEE ALL STONES IN THE DISPLAY AND STOCK, AND WILL REFUND FULL PRICE PAID FOR ANY STONE NOT GIVING ENTIRE SATISFACTION TO YOUR CUSTOMER.

CARBORUNDUM NIAGARA SCYTHE STONES.

Every Scythe Stone Guaranteed.

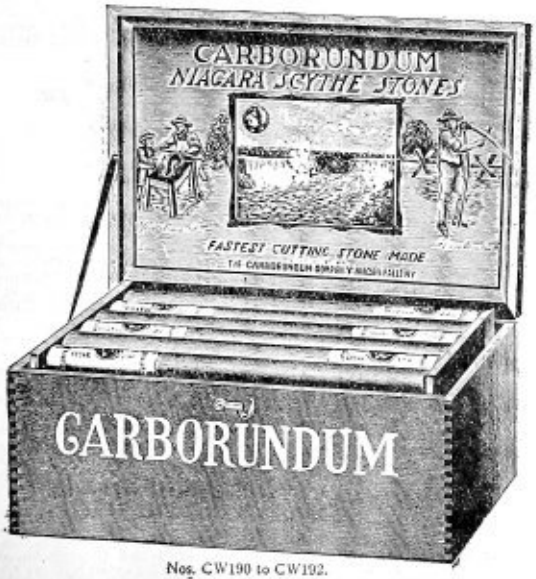
Niagara Scythe Stones are made of carborundum, the hardest and sharpest abrasive material known. The sharpness gives an exceedingly rapid cutting quality, and the hardness imparts durability unequaled by any other abrasive. As Carborundum Niagara Scythe Stones are manufactured stones, they are uniform in texture, hardness and porosity. They never get smooth or gummy, and with a few strokes readily accomplish the work of the ordinary grindstone, producing a keen, sharp edge. Carborundum does not rub or grind; it cuts clean and quick. Niagra stones are guaranteed to the user to give perfect satisfaction or money refunded.

This display box is made of card-board reinforced with wood, and covered with a buff glazed coated paper.

Three sizes are put up in this way; one dozen No. C190, 10 inches in length, one dozen No. C191, 12 inches in length, and one dozen No. C192, heavy, 10 inches in length.

The box is hinged at the center and when folded back for display, is very substantial and makes an exceedingly attractive appearance.

No. C190—Length 10 in., w't per gro. 72 lbs., per gross **BJAE $28.80**



No. C191—Length 12 in., w't per gro. 120 lbs., " **BEBJ 30.00**

No. C192—Length 10 in., heavy, w't per gro. 103 lbs., per gross..... **BEBJ 36.00**

ONE-TWELFTH GROSS IN A CARTON.

Nos. C190 to C192.

Nos. CW190 to CW192.

For the convenience of the hardware dealer, three dozen of these scythe stones are furnished in a handsome display box of highly polished wood. This box is of convenient size to stand on the counter, and thus combines the means of display and keeping the stock in order. With each box we furnish a supply of advertising matter. This case and advertising matter is furnished free to the purchaser of three dozen of these scythe stones.

No. CW190—Length 10 in., size of box 12¼×7¾×5⅝ in., w't per gro. 80 lbs.....per gross **BJAE $28.80**

No. CW191—Length 12 in., size of box 14¼×9¾×6⅝ in., w't per gro. 128 lbs.....per gross **BEBJ 36.00**

No. CW192—Length 10 in., heavy, size of box 12¼×9¾×6½ in., w't per gro. 120 lbs.....per gross **BEBJ 36.00**

THREE DOZEN IN A BOX.

SCYTHE STONES AND EMERY GRINDER HEADS.

SCYTHE STONES.

No. 80—Oval, terra cotta, corundum, length 10 in., fine, w't per gro. 95 lbs. .....per gross **AEJJ** $3.00

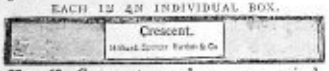
Made of pure corundum, that is, they represent between 95 and 100 per cent of pure cutting material, therefore are the fastest cutting stone on the market.

After the stones are moulded, they are cleansed from all obstructive material, through the "vitrifying" process. In other words, they are passed through a very high heat, burning out all the impurities and leaving them porous, thus insuring free and rapid cutting without glazing.

ONE-QUARTER GROSS IN A BOX.

No. 95—Oval, terra cotta, corundum, medium grit, length 10 in., w't per gro. 96 lbs., per gross .....**JHDJ** $13.50

Made of pure ground corundum, with steel rod extending entire length through center to prevent breaking.

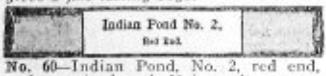


ONE-QUARTER GROSS IN A BOX.

No. 72—White Mountain, oval, square edges, best New Hampshire grit, medium fine, length 10 in., w't per gro. 148 lbs. .....per gross **AJHJ** $12.00

A nicely finished stone, especially selected from the choicest New Hampshire grit.

EACH IN AN INDIVIDUAL BOX.



No. 62—Crescent, oval, coarse, grindstone grit, length 10 in., w't per gro. 96 lbs. .....per gross **FCJ** $7.00

This stone gives a quick, coarse edge.

No. 78—Black Diamond, flat octagon, best Vermont grit, very fine, length 10 in., w't per gro. 116 lbs., per gross .....**AJHJ** $12.00

A fine gritted stone and at the same time very sharp and fast cutting. It gives a fine lasting edge.

No. 60—Indian Pond, No. 2, red end, clear grit, length 10 in., w't per gro. 104 lbs. .....per gross **DEJ** $5.00

No. 66—Pike's Genuine Indian Pond, No. 1, oval, red end, very sharp grit, length 10 in., w't per gro. 108 lbs., per gross .....**FFJ** $7.50

These stones will not glaze and they require no water. No. 66 is a nicely finished stone while No. 60 is of same stone but not so well finished.

No. 68—Willoughby Lake, round oval, bluish gray, fine sharp grit, length 10 in., w't per gro. 112 lbs., per gross .....**HAJ** $9.00

Gives a fine edge.

ONE-QUARTER GROSS IN A BOX.

SCYTHE STONES.

No. 64—Green Mountain, flat oval, Vermont grit, sharp, length 10 in., w't per gro. 112 lbs. ....per gross **FCJ** $7.00

No. 76—Lamoille, round oval, extra quality Vermont grit, very sharp, length 10 in., w't per gro. 124 lbs., per gross .....**JIIJ** $11.00

The Green Mountain and Lamoille are taken from the same quarry. The Lamoille is better finished and gives a finer edge.

ONE-QUARTER GROSS IN A BOX.

SCYTHE STONE ASSORTMENTS.

No. A Assortment—Consisting of 80 scythe stones as below, put up in a finished 12x11½x10½ in. case, w't complete for shipment 80 lbs., per assortment .....**FFJ** $9.00

18	Green Mountain .....each	$0.05	$0.90
12	Indian Pond, No. 1...each	.10	1.20
12	Quickcut .....each	.10	1.20
6	Mowing Machine ....each	.10	.60
12	White Mountain .....each	.15	1.80
12	Black Diamond .....each	.15	1.80
8	Corundum .....each	.15	1.20
80	Total.....		$8.70

THE OLD WAY—Scythe Stones kept in original rough boxes, behind the counter or in some out-of-the-way place where they could not possibly induce sales from their display, or be in attractive shape to offer to a customer for his selection.

THE NEW WAY—Scythe Stone Assortment—an assortment of scythe stones attractively displayed in a tasteful box, that looks well on a counter, with a quantity of scythe stone circulars for free distribution, giving the merits of the various kinds of stone, and with each kind of stone plainly marked with the selling price.

Each case contains seven varieties of our best selling brands, thus enabling the merchant to offer to his customer, in a well displayed compact form, a large assortment. Every stone is labeled with the retailing price as per list above.

EMERY GRINDER HEADS.

Wheels Not Included.

No. 21—5½ in. high, for jewelers, dentists, etc., will run 2 wheels 6 in. dia. and 1 in. thick, ⅝ in. steel spindle, ½ in. diam. between flanges, 10 in. long, pulley 2 in. diam., 1½ in. face, w't complete 9 lbs. .....each **BFJ** $5.00

No. 22—7 in. high, will run 2 wheels 10 in. diam., 1½ in. thick, 13 in. steel spindles ⅞ in. diam. in bearings, ¾ in. diam. between flanges, bearings adjustable, 2 in. long, with brass oil cups, pulley 2⅝ in. diam., 1⅞ in. face, w't complete 20 lbs., each .....**JEDJ** $10.00

No. 23—10 in. high, will run 2 wheels 12 in. diam., 2 in. thick, 18 in. steel spindle 1⅛ in. diam. in bearings, 1 in. diam. between flanges, babbitted bearings 2⅞ in. long, same style as engine lathe bearings, self-oiling, pulley 3½ in. diam., 2¼ in. face, w't complete 40 lbs. .....each **JHDJ** $15.00

No. 24—12½ in. high, will run 2 wheels 16 in. diam., 2½ in. thick, 26 in. steel spindle 1⅞ in. diam. in bearings, 1¼ in. between flanges, babbitted bearings 4¼ in. long, same style as engine lathe bearings, self-oiling, pulley 5 in. diam., 4 in. face, w't complete 65 lbs. .....each **AADJ** $20.00

POLISHING HEADS.

Will run emery wheels, buffers, polishing wheels and small circular saws, also fitted with chuck for holding drills. We furnish head only as shown in illustration.

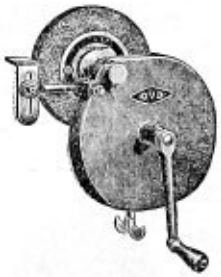
No. 10—6¼ in. high, for wheels not larger than 6x½ in., 9 in. spindle, ⅜ in. diam. between flanges, one end 2 in. taper screw, other end fitted to hold emery wheels, etc., 2 speed pulleys for ¾ in. round belting, w't 3½ lbs., each .....**AJJ** $2.00

SEE PAGE 186C FOR CARBORUNDUM SCYTHE STONES.

OVB TOOL GRINDERS.

OVB GRINDERS.

Equipped with Genuine Carborundum Wheels.



No. 1.

No. 1 OVB—Best grade cast iron castings, malleable iron handle and clamp, **spiral cut gears,** enclosed casing, equipped with 4x1 in. Carborundum wheel of fine grit, fitted with adjustable tool-grinding guide, w't 5 lbs. .....each **BDJ** $3.00

No. 4 OVB—Best grade cast iron castings, malleable iron handle and clamp, **spiral cut gears,** enclosed casing, equipped with 7½x1¼ in. Carborundum wheel of medium grit, fitted with adjustable tool-grinding guide, w't 26 lbs. .....each **FCJ** $8.00

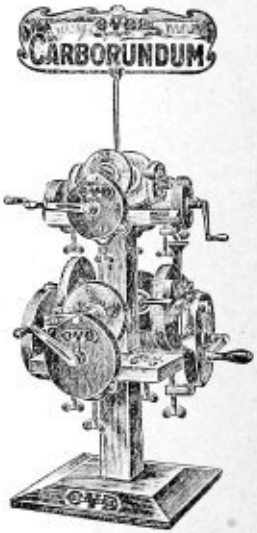
ONE IN A BOX.

OVB TWIST DRILL ATTACHMENT.

No. 23 OVB—Attachment is built expressly for Nos. 3 and 4 OVB Grinders, enables a wide range of drills to be accurately pointed, w't 1½ lbs., each .....**AFJ** $2.00

The attachment is mechanically simple and its cost is so low that every mechanic should have one.

GRINDER FOOT POWER ATTACHMENT.



No. 21—Attachment to fit No. 4 OVB Grinders, made of malleable iron and is strong and durable, readily adjusted to several heights, w't 5 lbs., each .....**ACJ** $1.50

Illustration shows attachment fitted to No. 4 OVB Grinder.

ONE IN A BOX.

No. 20—Attachment to fit No. 3 OVB Grinder, otherwise same as No. 21, each .....**ACJ** $1.50

OVB GRINDER DISPLAY STANDS.

No. 31.

No. 31 OVB—Genuine oak, golden finish, height 45 in., 15 in. square at base, one center shelf 12 in. square, one shelf at top 10 in. square, w't knocked down 36 lbs., shipped free of charge with an order for three each Nos. 1 and 2, two each Nos. 3 and 4 Grinders or their equivalent, ten machines.

ONE IN A BOX.

No. 32 OVB—Height 32 in., 12 in. square at base, one shelf 12 in. square, w't knocked down 19 lbs., otherwise same as No. 31, shipped free of charge with an order for two each Nos. 1, 2 and 3 and one No. 4 Grinder or their equivalent, seven machines.

These stands are very attractive.

ONE IN A BOX.

The construction of the OVB Grinder is mechanically correct. It is a smooth-running, high-speeded, fast-cutting and durable grinder. Each part is made of the material best adapted for the use of that part. As each machine is equipped with a genuine Carborundum wheel, only a slight pressure is needed for grinding. Carborundum is fast and cool cutting and will not burn nor draw the temper from any tool.

The OVB Grinder has spiral gears cut from tough, solid blocks of steel, affording the most approved and mechanically correct construction for gearing. All bearings in this machine are made of steel on cast iron—the most lasting bearing known to mechanics. The gears are enclosed in a one-piece oil-tight and dust-proof case of gray iron.

Both ends of all bearings run in the same casting, making it impossible for any bearing to get out of alignment.

An additional feature is the malleable iron back plate, clamp and clamp support. The back plate reinforces the supports and distributes equally the pressure of the thumb screw. Each OVB Grinder is absolutely guaranteed.

REVONOC AND CRUSO TOOL GRINDERS.

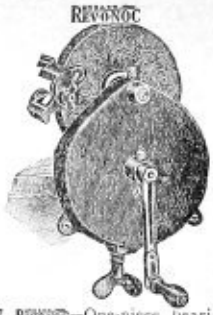
REVONOC

No. 44.

No. 45.

No. 44 REVONOC—Spiral cut overhanging gears, enclosed and dust-proof, "taper" fastening throughout, bearings of steel on cast iron, 4x1 in. medium grit Carborundum grinding wheel, equipped with tool rest and scissors guide, w't 7 lbs., each .....**BAJ** $3.50

A small, compact grinder, suitable for the home, office, or wherever a light, portable sharpening machine is wanted.



No. 45 REVONOC—Spiral cut overhanging gears, enclosed and dust-proof, "taper" fastening throughout, bearings of steel on cast iron, 5x1 in. Carborundum grinding wheel, equipped with tool rest and scissors guide, w't 9 lbs. .....each **CJJ** $5.00

This size grinder is particularly adapted for Mechanics' and Carpenters' Tool Chests.

No. 46 REVONOC—One-piece bearings of steel on cast iron, oil-retaining surfaces, enclosed dust-proof gearings, overhanging machine-cut spur gears, "taper" fastening throughout, 6x1 in. Carborundum grinding wheel, equipped with scissors guide and universally adjustable tool rest, w't 13 lbs. .....each **DBJ** $7.00

REVONOC

No. 47 REVONOC—One-piece bearings of steel on cast iron, oil-retaining surfaces, enclosed dust-proof gearing, overhanging machine-cut spur gears, "taper" fastening throughout, 7x1¼ in. Carborundum grinding wheel, equipped with adjustable tool rest and scissors guide, Combination Tool and Chisel guide and Patented Chisel and Plane Bit guide, w't 24 lbs., each .....**JFJJ** $10.00

Can be fitted with a Twist Drill Sharpening Attachment for sharpening any twist drill ¼ in. or larger in size.

REVONOC HOUSEHOLD GRINDERS.

Fig. 1.

Fig. 2.

REVONOC—Grinding wheel 4x1 in., fine grit of highest grade vetrified corundum, which is both cool and fast cutting, pinion of die cast of special alloy that will out-wear steel against cast iron, adjustable tool guide and gears, main frame black enameled, tool guide and large gear red, w't per doz. 40 lbs. ....per dozen **ADDJ** $24.00

The steel shaft supporting the grinding wheel is seated on ball bearing and runs without friction.

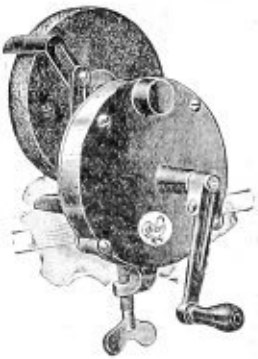
The term "Die Cast" applies to metal parts made or formed in a steel die, or mold, with the aid of great pressure. The metal used for making parts by this process is always tough, but to get it hard as well as tough, requires a special mixture which is termed "special alloy."

ONE-HALF DOZEN IN A CASE.

The REVONOC grinder is a durable, quiet-running and satisfactory grinder, combining many special features in high class construction. The most improved "taper" fastening is used to anchor the important parts to their respective shafts, namely, the grinding wheel, the main gear wheel and the handle. This "taper" fastening permits the tightening up of these parts as the machine wears, thus preventing lost motion and back lash.

The spiral gears are cut from solid blocks of steel; this means more wearing surface to the gear teeth, and makes the REVONOC a long-lived, steady and quiet-running grinder. The gears, moreover, are "overhanging"; with this construction the teeth are directly over the bearings, and all parts of the bearings and gears receive exactly the same amount of wear.

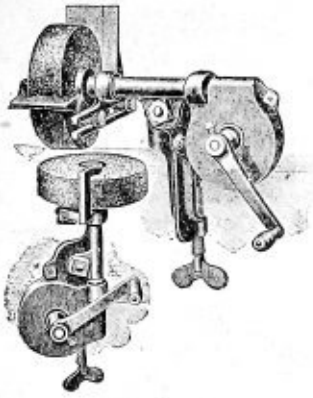
The bearings in the REVONOC are made of steel on cast iron; they are very long, with ample oil-retaining and wearing surfaces. A one-piece, dust-proof case surrounds the gears and bearings, which keeps them securely in alignment. This grinder has a genuine Carborundum wheel. All parts are of best quality and mechanics, especially, will find the REVONOC a most competent grinder.



CRUSO.

No. 14—Cruso, steel cut gearings, enclosed and dust-proof, long and durable bearings, equipped with 4x¾ in. medium grit Carborundum grinding wheel and tool rest, w't 6 lbs., each .....**AEJ** $2.50

No. 15—Cruso, steel cut gearings, enclosed and dust-proof, long and durable bearings, equipped with 5x¾ in. medium grit Carborundum grinding wheel and tool rest, w't 7 lbs., each .....**BAE** $3.60



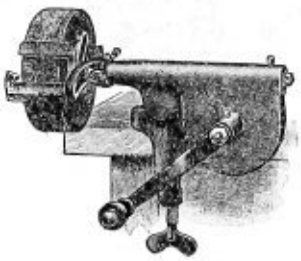
No. 16—Cruso, steel cut gearings, enclosed and dust-proof, long and durable bearings, equipped with 6x1 in. medium grit Carborundum grinding wheel and tool rest, w't 11 lbs., each .....**CJJ** $5.00

Nos. 14, 15 and 16 are good competitive grinders—good value for the money; they are durable and efficient for actual wear and reasonable use.

TOOL AND SICKLE GRINDERS.

TOOL GRINDERS.

No. 011—Best Maide, baked japan finish, all metal parts malleable iron, adjustable body so that wheel can be run either in the vertical or horizontal position, entirely enclosed cut worm gears, ball bearings making it quiet and easy running, fitted with adjustable tool rest, scissor and chisel grinding guide, equipped with a 5x1½ in. Carborundum wheel of medium grit, faced with very fine grit so that grinding and finishing can be done with the same wheel, w't 11 lbs. .....each **CFJ** $6.00



This machine is built for hard service; every part of the wheel can be used in grinding. The worm gear is of brass and is cut from the solid blank on special designed machinery.

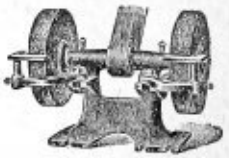
The "Best Maide" is a very popular and widely sold type of hand power grinder, due to the worm gearing and tilting frame features of its construction. The worm gears give the grinding wheel a very high speed and long life, and make it impossible for the shaft to get out of alignment. By virtue of the tilting frame, the grinding wheel will run in any angle or plane. The swivelling device allows quick and accurate adjustment, horizontal or vertical, and holds the machine rigidly in any position.

All "Best Maide" grinders have double-faced grinding wheels—medium and fine grit; all gears and shafts are of extra large diameter, with great wearing and oil-retaining surfaces. The entire mechanism is inclosed in a dust-proof casing, and ball bearings take up all end thrust.

The tool wheel is ideal for sharpening clipper blades. The sickle holder device is partly automatic, but the grinding of the sickle is at all times under full control of the operator.

TOOL GRINDERS.

No. 205C—Best Maide, steel worm shaft, cold cut gray iron worm gear, ball bearings, swivelling device makes frame adjustable to any angle, horizontal or vertical, enclosed and dust-proof parts, double-faced medium and fine sharpening wheel 5x1½ in., equipped with tool and chisel guide and chisel and plane bit guide, shipping w't 13 lbs. .....each **DBJ** $7.00



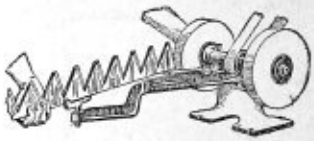
This is the best worm shaft drive grinder that can be built at any price.

SICKLE AND TOOL GRINDERS.

No. 254C—Best Maide, steel worm shaft, automatically cut steel gear, large wearing surfaces, enclosed and dust-proof parts, universal swivelling and sickle holding devices, double-faced medium and fine tool sharpening wheel 4x1½ in., also a beveled sickle sharpening wheel, equipped with same features as No. 205C, shipping w't 22 lbs. .....each **DBJ** $7.00

POWER BENCH GRINDER.

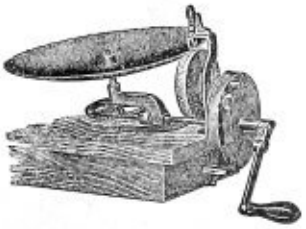
No. 309C—Heavy, broad and rigid base eliminates vibration, long bearings are fully protected from dust and grit, 2 special closing oil cups, universal adjustable tool rests afford the exact proper bevel for any tool, medium and fine sharpening wheels, size 7x1¼ in., shipping w't 40 lbs., each .....**JGBJ** $12.00



DISC SHARPENING ATTACHMENT.

For Use With Grinder No. 309C.

No. 925A—By means of this special attachment any disc up to 28 in. in diam. may be ground easily and given just exactly the right bevel, 2 hand levers regulate the pressure and rotate the disc, if desired the disc will rotate automatically, each **JHE** $1.40



SICKLE SHARPENING ATTACHMENT.

For Use With Grinder No. 309C.

No. 945A—With this attachment any mower sickle can be sharpened easily and quickly and given any bevel desired, the sharpening is done on the side face of the wheel, which not only does the work very quickly, but leaves a smooth, keen cutting edge, this attachment can be instantly adjusted to sharpen every section clear down to the bar.....each **DJ** $0.70

BULL DOG AUTOMATIC DISC GRINDER.

No. 18—Enclosed dust-proof gearing, will grind any size disc or coulter wheel from 12 to 24 in., adjustable steel roller holds disc to grinding wheel, w't 17 lbs.....each **DEJ** $9.00

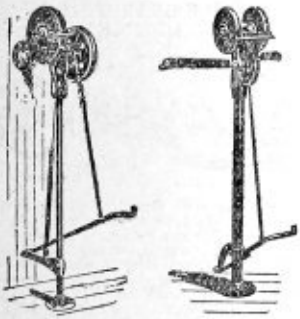
Extra, 3x1¼ in. power pulley, to fit on handle shaft for power, each .....**BJ** $0.30

This is an easy working, quick grinding and perfect disc grinder. It will do the work in one-half the time and with one-half the labor of any other hand grinder. It can be attached to any table, bench or disc harrow wheel.

ONE IN A CARTON.

TOOL, SICKLE AND FARM GRINDERS.

SICKLE GRINDER.



No. 8 REVONOC—Extra heavy cast frame, height 10 in., length 15 in., width 10 in., oscillating or stationary grinder, adjustable knife holder, 2 emery wheels, 3½x3 in. beveled face for mower knives, and 4x2 in. for tools, w't 19 lbs. .....each **CCJ** $5.40

Extra tool and barrel-shaped wheels, each .....**JEE** $1.00

Can be shifted from the oscillating movement to the stationary, or vice versa, instantly, by merely lowering or raising a lever; geared so that one revolution of the hand wheel gives twenty-two revolutions of the emery wheel; preserves original bevel of mower knives, giving a sharp, perfectly true edge from heel to toe. Emery wheel is of highest quality and can be changed to either sickle or tool grinding in thirty seconds. Will grind a set of mower knives in ten minutes.

TOOL GRINDER.

No. 6. No. 16.

No. 6—Iron frame with floor and wall supports, adjustable foot lever, 6x ¾ in. emery wheel, ⅝ in. steel shaft, new positive ball clutch, cone bearings, height 42 in., w't 25 lbs., each .....**DHJ** $8.00

The No. 6 is designed for bicycle and repair shops, hardware, stove, plumbing, carpenter shops, etc., where light grinding is required. Buffing can also be done, as a speed of 2,000 revolutions and upward is attained.

No. 16—Union, iron frame, with floor and wall supports, adjustable foot lever, machine cut gears, driving parts inside shaft, height 42 in., complete with two 6x¾ in. emery wheels, and skate attachment, w't 30 lbs., each .....**JFIJ** $11.00

Runs like a watch and requires only a few inches of floor space.

FARM HAND TOOL AND SICKLE GRINDERS.

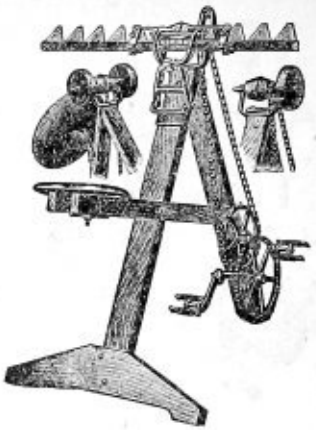
As a Sickle Grinder.

As a Tool Grinder.

Spartan, cog gear, 4¼x1¾ in. Carborundum tool grinding wheel, and barrel shaped wheel for sickles, wide bearings, high speed, w't 19 lbs., each .....**CAE** $5.30

EXTRA WHEELS.

No. 1—Carborundum, barrel shape, for Spartan Sickle Grinder, w't 2 lbs., each .....**AEJ** $2.60



The simplest, most compact and serviceable hand power sickle and tool grinder made. Nothing cumbersome or loose jointed, no lost motion of oscillating parts or difficult adjustments, clamps either to mower wheel or bench. Sickle clamp will hold any make of sickle and will allow the grinding of every section of the sickle.

Grinding wheels are of CARBORUNDUM that will give satisfaction to the inexperienced user as it will not draw the temper.

A simple adjustment holds the sickle rest rigid changing it into a first-class tool rest for use in sharpening from knives to plow shares and cultivator shovels. The wide bearings insure long life.

ONE IN A WOODEN BOX.

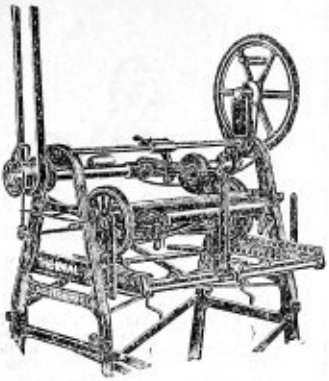
FARM SPECIAL GRINDERS.

No. 26—Farm Special, frame of selected maple wood, four Carborundum wheels one barrel shaped wheel for sickles, one medium grit tool grinding wheel, one extra rapid cutting wheel for sharpening discs and plow shares, one polishing wheel and disc holder, w't 70 lbs. .....each **JGBJ** $12.00

Sickle attachment will handle any sickle. Disc attachment will handle any disc or wheel plow coulter and sharpen it at any level. Luther's Farm Special is a grinder of the highest efficiency possessing every point of a successful sharpening machine. While the sickle and disc sharpening attachments are the best, its strongest recommendation lies in the fact that all kinds of tools can be sharpened on it with such ease and rapidity as to place it among the indispensable farm tools. It will sharpen well and quickly everything from a kitchen knife to a plow point. Mechanism simple, strong and complete.

KNOCKED DOWN; ONE IN A WOODEN BOX.

FOOT POWER TOOL GRINDER.



No. 36—"New Climax," bitreadle, rigid angle steel frame, strongly braced, height 3½ ft., 19 in. drive wheel, 8x1¼ in. emery wheel, adjustable seat, speed 1,800 revolutions, complete with tool rest, w't 50 lbs., each .....**JHGJ** $12.50

The legs are connected and held solid by shouldered cross rods which are riveted in. The pedals are braced by two angle irons of machine steel. The spindle at the head is a machine turned piece of machine steel. This spindle is threaded at one side for the emery wheel and threaded on the opposite side for a polisher. The polisher is not regular equipment, but will be furnished when ordered. The bearings are babbitted, which gives the grinder that nice, easy running quality. It folds up like a jack-knife, thereby allowing one quickly to set it back in a small corner when not in use.

ONE IN A CASE.

GRINDERS AND GRINDSTONES.

THE "IDEAL" LAWN MOWER GRINDERS.

"Ideal Lawn Mower Grinders with Skate Grinding Attachment—Made in two styles, hand and power—the power grinders can be operated either by power or by hand, furnished with sub-base, unless otherwise ordered, raising the grinder 18 inches above the floor, the hand grinder is equipped with a special balance wheel on the main shaft, making it run steadier and easier, will take any lawn mower blades up to 24 in., the grinding wheel having a travel of 24 in., w't with sub-base 200 lbs., w't of sub-base alone 40 lbs.

No. 27—For power, with sub-base, each .....DBJJ $70.00
No. 28—For hand, with sub-base, each .....DBJJ $70.00
Without sub-base, deduct.....2.00

The "Ideal" Lawn Mower Grinders are fast replacing the old unsatisfactory method of sharpening lawn mowers by means of files and emery dust. It is a well-known fact that it is next to impossible to sharpen a lawn mower successfully with a file, especially as a great many mowers made at the present time have hardened blades. If a file can be used, it is a slow and tedious job at best. By means of the "Ideal" Lawn Mower Grinder, any intelligent person can sharpen a lawnmower with accuracy in one-half the time required by the old method. One of the most important features in lawn mower grinding is to make the reel knives of a lawn mower fit the straight blade, in case the latter should become sprung or bent. The "Ideal" Lawn Mower Grinder is positively the only machine that will do this work properly.

The hand grinder is now equipped with a special balance wheel on the main shaft. On the power grinder no balance wheel is necessary, the tight and loose pulleys taking its place. In case you have no power, we recommend your ordering the hand grinder as the power attachment can be added at any future time. The "Ideal" is extensively advertised and thousands are in use giving perfect satisfaction.

F. O. B. Chicago or Plymouth, Ohio.

MOUNTED GRINDSTONES.

REVONOC—Tubular steel frame, with seat, painted red, water guard, drip cup, ball-bearing, high grade Huron stone, stone 19 to 22 in. in diam. and 1½ to 2½ in. thick, w't complete 90 lbs., each .....DBE $7.40

The frame being made of heavy steel tubing, it is the most rigid stone on the market. Can be set up in less time and with less labor than any other grindstone ever made merely by manipulating one bolt.

Trough is a thick and heavy casting and will last indefinitely. It is cast in one piece, making it watertight, avoiding all joints, which invariably work loose and leak. The legs are cast separate and are securely fastened in place with two wrought iron bolts. An adjustable tool rest, with drip pan, is furnished with each frame.

Also furnish a 12 inch diameter, 4 inch face pulley with all sizes of Keystone Frames, will substitute any required size charging only actual difference in price.

Keystone shipped mounted, ready for use unless otherwise ordered.

All stones on this page are fitted with the patent detachable fixture which enables the stone and frame to be shipped separate, and have the stone rim true when either stone or shaft are replaced without any redressing of the stone. Extra stones or frames can be furnished.

Aloxite is a new abrasive, the product of the electric furnace. It is hard, sharp and tough, especially adapted to steel cutting, and is coated on cloth, for general machine shop use.

Aloxite cloth is superior to emery cloth; the Aloxite grains being so much harder and tougher than emery, cut the metal quickly and easily, leaving a superior finish.

Aloxite cloth is made with the greatest care, the grains being thoroughly cleaned, graded and coated on the best quality of brown drill by improved process. The glues used are the purest and best quality obtainable, and as a result Aloxite cloth is uniformly coated, durable and flexible.

Aloxite cloth can be used on all work where emery cloth is used, saving time, insuring a better finish and lasting longer.

No. LJ—Made of malleable iron, equipped with one long adjustable handle, one short emergency handle, one wrench, w't 2 lbs., per dozen ..... CHIJ $48.00

EDGERS.

No. LE—Made of malleable iron, equipped with one long adjustable handle, one short emergency handle, one wrench, w't 2 lbs., per dozen ..... CHIJ $48.00

TROWELS.

Blade is Made of 21 Gauge Steel, with Malleable Mounting, Equipped with One Long Adjustable Handle, One Short Emergency Handle and One Wrench.

No. LT—Length, in.....	15	24
W't, lb.	1½	1
Per dozen	$48.00	72.00
	CHIJ	EHCJ

ONE IN A BOX; HANDLES LOOSE.

COMBINATION OUTFITS.

No. LC1—Combination, consists of one 15 in. trowel, one jointer, one edger, equipped with long handles, one interchangeable short emergency handle, one wrench, w't per set 6½ lbs., per set ..... JHAJ $10.00

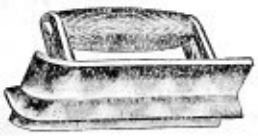
No. LC2½—Combination, consists of one 15 in. trowel, one 24 in. trowel, one edger, one jointer, equipped with long handles, one interchangeable short emergency handle, one wrench, w't per set 8½ lbs., per set AACE $14.00

ONE SET IN A BOX.

Instead of modeling the Edger and Jointer on conventional lines, both ends are raised, giving them the "rocker-shape" to enable them to cut their way instead of plowing, the result being a cleaner joint and edge with less work.

The long 5 ft. handle and perfect adjustment give them an advantage over the short handled tools, appreciated by anyone who has been obliged to do finishing on hands and knees.

CEMENT AND SIDEWALK TOOLS.

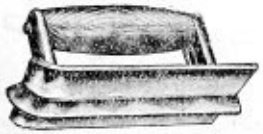


MADE OF CLOSE GRAINED CAST IRON, WELL POLISHED, WITH WAXED MAPLE HANDLES.

JOINTERS.

No. 10—Iron, 6x2¼ in., both ends curved, w't per doz. 11½ lbs., per dozen .....**CFJ** $6.00

These jointers are for grooving between the sections of a concrete walk, cutting a groove ½ in. deep, ⅜ in. wide.

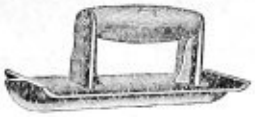


No. 12—Iron, 6x3 in., one end straight, w't per doz. 14 lbs., per dozen .....**CFJ** $6.00

These jointers are for grooving between the sections of a concrete walk, cutting a groove ½ in. deep, ⅜ in. wide.

No. 15—Iron, 6x3 in., with inserted tool steel blade, both ends curved, w't per doz. 16½ lbs. ..per dozen **EGJ** $9.50

These jointers are for grooving between the sections of a concrete walk, cutting a very narrow (⅛ in.) groove, ½ in. deep. They will far outwear the all-iron tools.



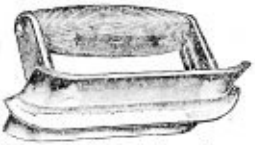
No. 16—Iron, 6x3 in., with inserted tool steel blade, one end straight, w't per doz. 12 lbs. ....per dozen **EGJ** $9.50

These jointers are for grooving between the sections of a concrete walk, cutting a very narrow (⅛ in.) groove, ½ in. deep. They will far outwear the all-iron tools.

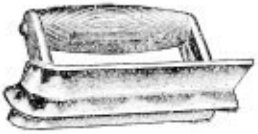
ONE-SIXTH DOZEN IN A BOX.

JOINTERS.

No. N10—Iron, 8x1¾ in., both ends curved, w't per doz. 16 lbs., per dozen .....**DHJ** $8.00



No. N12—Iron, 8x1¾ in., one end straight, w't per doz. 13 lbs., per dozen .....**DHJ** $8.00



These jointers are for grooving between the sections of a concrete walk, cutting a groove ½ in. deep, ⅜ in. wide.

ONE-SIXTH DOZEN IN A BOX.

SIDEWALK GROOVERS.

No. 13—Iron, 6x3 in., both ends curved, w't per doz. 15 lbs., per doz. **CFJ** $6.00

No. 14—Iron, 6x3 in., one end straight, w't per doz. 14 lbs., per doz. **CFJ** $6.00

Groovers make a cut ½ in. deep and ½ in. wide. Used for drainage grooves or to prevent slipping.

ONE-SIXTH DOZEN IN A BOX.

SIDEWALK ROLLERS.

No. 27—9x3¼ in., close grained cast iron, well polished and nickel plated, steel arch, hollow cast handle, w't each 7 lbs. ...per dozen **BHHJ** $48.00

PACKED LOOSE.

SIDEWALK EDGERS.

No. 01—Iron, 6x2¼ in. radius ⅜ in., depth ⅝ in., w't per doz. 16 lbs., per dozen .....**CFJ** $6.00

No. 02—Iron, 6x2¼ in., radius ¾ in., depth ⅞ in., w't per doz. 17 lbs., per dozen .....**DEJ** $7.50

No. 01-N—Iron, 8x1¾ in., radius ⅜ in., depth ⅝ in., w't per doz. 13½ lbs., per dozen .....**DHJ** $8.00

Edgers are used for finishing and slightly rounding the edges of cement walks, to prevent slipping.

ONE-SIXTH DOZEN IN A BOX.

SQUARE EDGERS.

No. 21—Iron, 6x3 in., radius ⅛ in., depth 1 in., w't per doz. 17 lbs., per dozen .....**JFJJ** $10.00

For finishing steps and all right angled corners.

ONE-SIXTH DOZEN IN A BOX.

CURBING EDGERS.

No. 22—Iron, 6⅞x3⅜ in., radius 1 in. depth 1½ in., w't per doz. 22 lbs., per dozen .....**JHFE** $14.40

For finishing curbs, copings, etc., giving a full rounded edge.

ONE-SIXTH DOZEN IN A BOX.

FOR CONCRETE MIXERS FOR SIDEWALK CONTRACTORS, SEE PAGES 196B *TO* 197.

TROWELS.

CONCRETE MACHINERY.

On the following pages we offer a line of machines and moulds which we consider unequalled for use by the farmer, builder or contractor. Though simple in construction and operation, and very low in price, all of our machines and moulds are constructed strongly and carefully, and will do clean-cut, speedy and accurate work if directions are followed, and if the proper care is used in mixing the concrete and in curing the finished product. All parts are accurately made and interchangeable. The machines are compactly built, easily portable, and without superfluous weight—a great saving in freight to the purchaser. Our line should appeal especially to the farmer and small building contractor, for our moderate priced machines will soon pay for themselves, in the saving effected in making at home such articles as building blocks, well curbing and silo blocks, drain tiles, fence posts, chimneys, gate posts, porch columns, etc.

GUARANTY.

Our machines and moulds are warranted against flaws or defects of any kind, in material or construction, for one year from the date of purchase, and defective parts will be replaced free of charge, and freight paid. Our machines are not sold on approval, but are guaranteed to do satisfactory work if directions accompanying them are followed.

GENERAL INFORMATION.

WHAT IS "CONCRETE"?

Concrete—a manufactured stone—is made by mixing together Portland cement, sand and crushed stone (or gravel) in various proportions. About half an hour after mixing the mass begins to stiffen, until, in from half-a-day to a day, it becomes so hard that it cannot be easily dented. By a month the mass is hard like stone—indeed, harder than most stones.

As a building material its use is highly recommended. It is fire proof, frost proof, wind proof, heat proof and vermin proof; cooler in the summer, warmer in the winter; attractive in appearance,—when variety and taste is used in the structure,—and a desirable all around material not affected by the ravages of time.

PORTLAND CEMENT.

Portland cement is manufactured from a mixture of two materials, a rock like limestone, or a softer chalky rock, which is nearly pure lime, and another material like shale, which is a hardened clay, or else clay itself.

A paper or cloth bag of cement weighs 95 pounds, and four such bags make a barrel of 380 pounds.

It is important that cement be kept in a dry place. Once wet, it becomes hard and lumpy, and in such condition is useless. If, however, the lumps are caused by pressure in the store house, the cement may be used with safety. Lumps thus formed can be easily broken by a blow from the back of a shovel.

SAND.

The best sand is such as will pass through a screen ¼ inch mesh and is retained in screen having mesh 1-64 of an inch. This applies to river sand, bank sand, or screenings from a stone crusher.

It is best not to use fine sand. If there is a large quantity of fine sand handy, obtain a coarse sand and mix the two together in equal parts.

Sometimes fine sand must be used, because no other can be obtained; then an additional amount of cement must be used—sometimes as much as double the amount ordinarily required. For example, in such a case, instead of using a concrete 1 part cement, 2 parts sand, and 4 parts stone, use a concrete 1 part cement, 1 part sand, and 2 parts stone.

Besides being coarse, the sand should be clean, i. e., free from clay or vegetable matter.

GRAVEL OR "AGGREGATE."

Gravel or broken stone forms the largest part of the mass of a good concrete, and is called the aggregate.

Gravel obtained either from a bank or river, should be of such size as is retained in a screen having ¼ inch mesh, or such stone from a crusher as is retained in a ½ inch screen and will pass a ¾ inch mesh. Do not use soft or rotten stone.

With gravel the danger is apt to lie in the grains being coated with clay or vegetable matter which prevents the cement from sticking to them, and hence a very weak concrete results. Dirty gravel should be thoroughly washed.

WATER.

The water used for concrete must be clean. It should not be taken from a stream or pond into which any waste from chemical mills, material from barns, as manure, or other refuse, is dumped. If the water runs through alkali soil or contains vegetable matter it is best to make up a block of concrete, using this water, and see whether the cement sets properly. Do not use sea water.

PROPORTIONS.

Concrete is composed of a certain amount or proportion of cement, a larger amount of sand, and a still larger amount of stone. The proportions for a mix of concrete given, for instance, one part of cement to two parts of sand to three parts of stone or gravel, are written 1:2:3 and this means that one cubic foot of packed cement is to be mixed with two cubic feet of sand and with three cubic feet of loose stone.

A theoretically correct concrete should consist of sand and gravel, and an amount of cement equal to the voids in such combination. In other words, interstices should be filled with cement.

The proper selection of sand and aggregate material is important. Care should be taken that the particles vary so in size as to reduce the voids to the smallest amount possible. With this careful selection the amount of cement required to produce good work is greatly reduced.

MIXING.

After the materials are selected they should be mixed together dry, until the mass is of an absolutely uniform color. Water should then be applied, and the thorough mixing repeated. The amount of water should be in all cases as great as possible without causing the materials to stick to the molds when the stone is removed.

Only such size batches should be mixed at one time as can be used up within thirty minutes from the time the water has been added.

COLORING.

In using coloring matter with concrete, the color should always be mixed with the cement dry, before any sand or water is added. This mixing should be thorough, so that the mixture is uniform in color. After this mixing the combination is treated in the same way as clear cement.

CONCRETE BLOCK WALLS.

Concrete block walls have found general favor because of their pleasing appearance, economy in construction, and also for the reason that the blocks may be made at odd times. Walls of this type can be made in a variety of face designs and colors, without the use of forms. Hollow block walls of a given size require but two-thirds the amount of material necessary for solid walls of the same dimensions, and the air spaces in hollow blocks interrupt the passage of heat and cold.

The plainer faces and ashlar designs are recommended in preference to the more common rock face. Our rock face designs, however, are beautiful and clean-cut imitations of the best cut stone, and if properly alternated with half and quarter sizes, do not present the artificial appearance found objectionable on many rock-face walls.

MIXTURES FOR BUILDING BLOCKS.

When mixed sand and gravel are used: 1 part of cement to 3 parts of coarse sand and gravel.

When sand and gravel are used, 1:2:3:, that is 1 part of cement, 2 parts of sand and 3 parts of gravel.

When sand and crushed stone are used, 1:3:2: 1 part of cement, 3 parts of sand and 2 parts of crushed stone.

When sand, gravel and crushed stone are used, 1:2:1:2: that is, 1 part of cement, 2 parts of sand, 1 part of gravel, 2 parts of crushed stone.

When sand, cinders and crushed stone are used, 1:2:1:2: 1 part of cement, 2 parts of sand, 1 part of cinders and 2 parts of crushed stone.

It is often desirable when a very nice finish is desired to use a special facing for the block which not only increases its appearance but decreases the cost. When such facing is used it should consist of 1 part of cement to 2 parts of screened sand and should be from ½ to 1 inch thick. The body of the block could then be made of material as follows:

When sand and gravel are used, 1:2:3: 1 part of cement, 2 parts of sand, 3 parts of gravel.

When sand and crushed stone are used, 1:3:2: 1 part of cement, 3 parts of sand and 2 parts of crushed stone.

When sand, gravel and crushed stone are used, 1:2:1:2: 1 part of cement, 2 parts of sand, 1 part of gravel, 2 parts of crushed stone.

When sand, cinders and crushed stone are used, 1:2:1:2: 1 part of cement, 2 parts of sand, 1 part of cinders, 2 parts of crushed stone.

The above proportions are standard and when the cement is properly mixed, you will secure blocks of the very highest compressive quality, being able to withstand from 600 lbs. to 2,000 lbs. compression per sq. in. from 7 days to 6 months old.

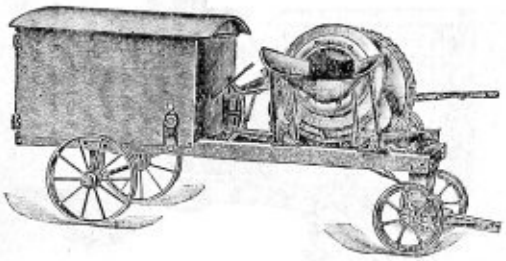
COST OF BLOCKS.

The material necessary to prepare 1 cubic yard of mixture is approximately 1.54 bbls. of cement, 0.47 cub. yard of sand, and 0.73 cub. yard of gravel, being sufficient for 69 blocks.

For manufacturing 100 blocks there is needed—2.24 bbls. cement, 0.68 cub. yard (4.93 barrels) sand, and 1.06 cub. yard (7.68 barrels) gravel; which, at the following prices, will amount to—

2.24 bbls. of best Portland Cement	at	$2.25 per bbl.	$5.05
0.68 cub. yard of Sand	"	1.25 " cub. yd.	.85
1.06 cub. yard of Gravel	"	1.50 " " "	1.59
Cost of material for 100 blocks of 8x8x16 inch.			$7.49

The labor cost will vary with the grade of machine used, and the number, skill and speed of the workmen. 8x8x16 inch blocks, however, made in reasonable quantities, should cost complete, not far from 10 cents each.



TO FIND THE NUMBER OF BLOCKS REQUIRED FOR A HOUSE OF ANY DIMENSIONS.

Find the number of feet around the walls, multiply by three and divide by four. This will give approximately the number required for one course (not taking window or door openings into account). The height of wall in inches, divided by eight, gives the number of the courses, which, when multiplied by the number in one course, gives the number of blocks for the whole building. For example: A building 30 feet square would be figured as follows: 30 by 30 equals 120 feet around, times 3, divided by 4, equals 90 blocks in one course, 240 inches high, divided by 8, equals 30 courses. 30 times 90 equals 2,700 blocks.

NUMBER OF 8x8x16 IN. CONCRETE BLOCKS NECESSARY PER LINEAR FOOT OF WALL.

Height of Wall	Number of Blocks per Linear Ft.	Height of Wall	Number of Blocks per Linear Ft.	Height of Wall	Number of Blocks per Linear Ft.
2 ft.	2.25	6 ft.	6.75	9 ft. 4 in.	10.50
2 ft. 8 in.	3.00	6 ft. 8 in.	7.50	10 ft.	11.25
3 ft. 4 in.	3.75	7 ft. 4 in.	8.25	10 ft. 8 in.	12.00
4 ft.	4.50	8 ft.	9 00	11 ft. 4 in.	12.75
4 ft. 8 in.	5.25	8 ft. 8 in.	9.75	12 ft.	13.50
5 ft. 4 in.	6.00				

NORTHWESTERN CONE BATCH MIXERS.

The Northwestern Cone Batch Mixer combines four principles which are most in demand by contractors, through long usage and practicability. First, the conical type—second, the long cylinder—third, the closed discharge end, and fourth, the low open charging end. These principles insure speed, control of mixed materials, convenience in loading and unloading, easy access for cleaning, adjustability of paddles, and correct mix of the materials.

Drum—The drum is a tapered high carbon steel plate cylinder with conical ends, made of heavy steel castings, having wide bearings and carried on four chilled semi-steel cast rollers. The drum is driven by a standard link chain on the large end. The sprocket is cast integral with the drum end. The ends are held together by means of six heavy rods.

Discharge Door—This is a new patented device, controlled by a lever within the reach of operator and free from all danger. This door permits dumping of a pailful or a full load, as desired. The entire mix can be unloaded in approximately three revolutions of the drum. The material is carried to the door by means of a chute on the inside of drum, so shaped that it will aid in mixing when door is closed.

Charging End—This end is set low, and has a large opening, from 16 in. to 24 in., depending on the size of the machine. It permits three or four men to throw material directly into the machine, also permits dumping from wheelbarrows without any delay. When wheelbarrows are used a standard hopper is necessary.

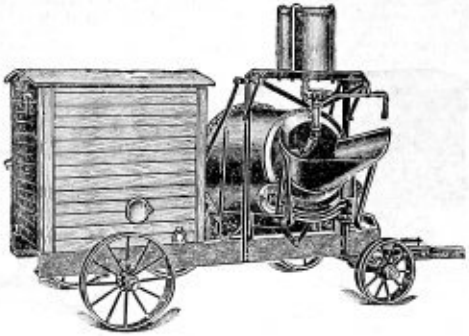
Paddles—The paddles are made of steel plate and securely fastened to the rods holding the two ends together. These paddles are separated from the shell, preventing any lodging of material in pockets, and making the machine easy to clean. The paddles carry the material forward and up, dropping the mixture in a sort of spray. The chute throws the mixture back towards the charging end, creating a "whirlpool" mix.

Frame—The frame is made entirely of steel, riveted and braced, maintaining perfect alignment and insuring long life. The frame is mounted on heavy truck wheels and axles, the faces of the wheels are amply wide to carry the full load.

Chain Drive—**The Northwestern Cone Mixer** is driven by a chain belt, of standard type, easily replaced and very inexpensive.

Lubrication—All bearings and journals are lubricated through hard oil cups and are so arranged as to force the hard oil to the spot needed.

Power—The No. 105TE—Housed—Mixer, shown above, is equipped with a four cycle, hopper cooled, jump spark ignition, 2½ horse power engine, giving ample power to handle the full load. The engine is thoroughly reliable.



Capacity—The mixer shown is a 5 ft. size, that is, it will mix thoroughly five feet of mixed material at each batch, or six feet of loose material. This machine will mix as much material as the so-called six and seven feet machines of other makes. The shape of drum gives added capacity and prevents slopping.

Portability—This machine is easily handled by two or three men and can be moved about the job without the use of a team of horses. **The Northwestern Cone** is furnished in one standard type with housing for engine, standard hopper for wheelbarrow and hand pole. A water tank is not needed with this machine, as water is thrown into the machine through the large open end.

NORTHWESTERN CONE BATCH MIXERS.

The Northwestern Cone Mixer shown on this page is the standard No. 107TE equipped with gasoline engine, automatic water tank and wood housing. This type is furnished in three sizes and with equipment as listed below.

Construction—This machine is the same style as the No. 105, except that it is much heavier in construction throughout. The shape of the drum, discharge door, the charging end, the paddle arrangement, the frame and mountings are of the same general design.

Equipment—Nos. 107, 110 and 120 can be furnished with side loader, batch hopper, either gasoline or steam engine, water tank, and wood or steel housing.

SMALL SIZE, Capacity 8 Cubic Feet Unmixed, 6 Cubic Feet Mixed Material.

No. 107—Cone mixer, on skids, with pulley, no engine, w't each 1,560 lbs.★ .....each **BEFEJ** $427.50

No. 107E—Cone mixer, on skids, with 4 H. P. gasoline engine, w't each 2,240 lbs.★ .....each **CEAJJ** $585.00

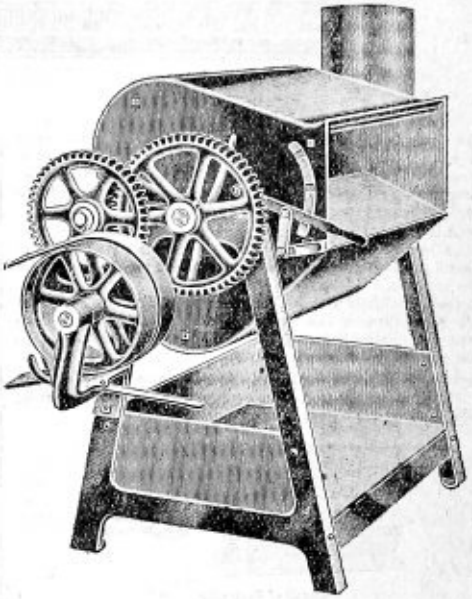
CONCRETE MACHINERY.



NORTHWESTERN TRIANGULAR MIXERS.

The Most Practical, Thorough, Rapid and Handiest Batch Mixers Made.

HAND MIXERS.

POWER MIXERS.

Principle—Triangular type with automatic door, same as No. 1 Mixer on preceding page. In every turn of the drum, three complete mixings take place. The material is carried up well onto one side and then thrown in a shower over the contents in the bottom of the drum.

Time Required to Mix One Batch—From one to two minutes will thoroughly mix up a batch of concrete. The quality of the mix as well as the saving of time and labor will soon offset the cost of either machine.

Operation—The cement and sand or gravel is placed into the machine; the cover locked, and the machine revolved about fifteen times. This will require about one minute's time. The water is then turned on and the drum revolved until the mixture is of the proper moisture. The cover is then unlocked and the drum turned over once or twice which will thoroughly empty it. It is a good rule to continue mixing until an even color is obtained. In this way porosity is greatly reduced and the question of waterproofing in a measure is solved.

Cleaning—Any mixer should be washed out with water at the end of each day's work, else the concrete will stick and harden. With these mixers, water can easily be thrown in, and a few turns of the drum will thoroughly flush the interior.

HAND MIXER.

The hand mixer consists of frame, drum, gearing, water tank and wetting device. Length of drum, 30 inches; circumference, 34 inches; diameter, 26 inches; height over all, 4 ft.; length over all, 4 ft.; capacity 4 to 5 cu. ft.; capacity of hopper bottom, two batches; speed, 15 revolutions per minute. Frames are heavy iron castings with steel hopper at the bottom to hold the mix after it is dumped from the drum. The drum is made entirely of steel and is triangular shape with rounded corners. The shell is made of 14 gauge cold rolled steel and fits into grooves in either drum head. The drum heads are made of heavy castings and grooved on the inside. The drum head and shell are held together by three rods running entire length of the drum which also serve as an elevating device to carry the material well up on the side before it drops. The left hand drum head has a cold rolled steel journal chilled to the center, which turns in a solid box on the frame and the gear wheels are fastened to this journal. The power is produced by a four-to-one set of gear wheels with a 30 inch sweep of the crank. The right drum head is a cast journal and is perforated to permit a pipe to run through it. The wetting device consists of water tank, which is fastened to a stand on the frame. Connected with this tank is a half inch pipe which runs through the journal and extends clear across the center of the inside drum head. This pipe is perforated and the water is regulated by a half inch globe valve. This method evenly distributes the water through the drum and evenness of moisture assured.

POWER MIXER.

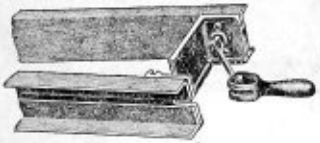
The construction of this mixer is similar to the hand mixer but is larger and more powerful. Length of drum, 86 in.; circumference, 84 in.; diameter, 26 in.; height over all, 4 ft. 2 in.; length over all, 4 ft. 8 in.; capacity 5 to 6 cu. ft.; capacity of hopper bottom, two batches; speed 15 revolutions per minute. The frame, is made of heavy iron castings with steel hopper at the bottom. The power is transmitted through an iron pulley. It is also equipped with loose pulley for throwing off the power at any place for emptying. It requires about a 3 horse power engine to operate with full capacity. In ordering belt power mixers state what size pulley is wanted or the number of revolutions per minute of the engine and size of engine pulley.

No. 3—Hand power mixer, complete, w't each 425 lbs.★	each	EFJJ	$ 93.35
No. 21—Belt power mixer, complete, w't each 600 lbs.★	each	JFGBJ	112.00

★*FOR FACTORY SHIPMENT ONLY, F. O. B. EAU CLAIRE, WIS.*

CONCRETE MACHINERY.

CORRUGATED FENCE POST MACHINES.



The Corrugated Fence Post Machine will answer all requirements of a low-priced, non-adjustable machine making tapered posts with corrugations two-thirds of the distance from the top. It is a machine which will stand plenty of hard knocks and will produce a post unusually attractive in design and strength.

Construction—Made with heavy corrugated sheet iron sides reinforced at the edges with 1-inch angle iron. The head is a plain piece of steel which slips into grooves and the machine is held together at the head by two eye bolts.

The foot consists of a plain piece of steel bolted to one side of the mould. An eccentric or cam lever slips into a groove on the opposite side and when pressed down will hold the mould solid and firm and no amount of tamping will loosen it.

Operation—The operation is very simple. Tamp in the material, level off the top, open the mould by drawing back the cam lever, swing the sides outward and remove to another position.

Detail of Fastening.

Sizes—The mould is not adjustable, but is made in all sizes suitable for lawn fence posts, field fence posts, stock fences, corner posts, etc.

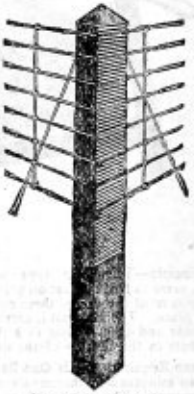
Capacity—The capacity is from one to two hundred posts a day, varying according to the size and the number of men operating it.

Cost of Post—The cost of a post as figured by the United States Department of Agriculture, averages about 15c each, figuring on a mixture of 1:2½:5 and a post 4x6 at the bottom and 3x3 at the top.

One cubic yard of concrete will make twenty posts.

The comparative cost of a good cedar post, is from twenty to thirty cents

Reinforcing—In this mould, as well as in the adjustable mould, the reinforcing is easy to accomplish. Use four strands of No. 9, twisted galvanized wire, placed in the mould in each corner and about one inch from the surface; this forms all of the reinforcing necessary.



Shape—This mould is of the tapering type and makes a very handsome post. The advantage is that it gives the strength and body to the post near the ground where there is the most strain if animals rub against it. It also prevents heaving of the post in heavy clay soils and once these posts are set they will last indefinitely.

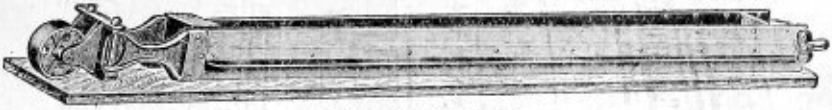
Poured or Tamped Type—With either of our post machines either wet or semi-wet material may be used. We recommend the use of a semi-wet material, just wet enough so that it will not fall down when the mould is removed.

Curing—The method of curing of posts is exactly similar to that of blocks or any other form of concrete. The material should be well mixed, broken stone or gravel being not over ¾ inch in size, and sand and gravel well mixed dry before adding the water. The posts should not be disturbed for a number of days and when left out of doors should be covered with straw, burlap or other similar covering, and should be sprinkled once or twice a day for at least fifteen days. Bevel or triangular shaped blocks can be secured by use of wooden moulding placed in the machine.

Showing How Reinforcing is Placed.

View of Corner Post, 8×8 in. square.

	LENGTH.	TOP.	BOTTOM.	CORRUGATED.	WEIGHT.		EACH.
No. 311—Lawn fence size	6 ft.	3½×3½	3½×5½	4 ft.	50 lbs.	JFEJ	$11.82*
No. 312—Field fence size	7 ft.	3½×3½	3½×5½	4½ ft.	65 lbs.	JFIJ	12.54*
No. 313—Large field fence size	7 ft.	4½×4½	4½×6½	4½ ft.	80 lbs.	JGBE	13.20*
No. 314—Stock fence size	8 ft.	4½×4½	4½×6½	5 ft.	90 lbs.	JHJJ	14.52*
No. 315—Corner post size	8 ft.	8 ×8	8 ×8	5 ft.	125 lbs.	AJAE	18.48*

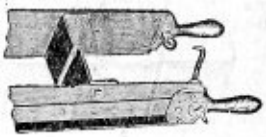


NOTE—The Large Field Fence Post is sold in preference to other sizes because of the all around use to which it can be put.

** FOR FACTORY SHIPMENT ONLY. F. O. B. EAU CLAIRE WIS.*

CONCRETE MACHINERY.

ADJUSTABLE FENCE POST MACHINES.



One Man Can Use it Easily Alone, Two or Three Men Can Work to Advantage.

Moves Like a Wheelbarrow.

Showing Roller Bearing Front and Method of Adjustment.

Notice the Handles for Moving and the Latch for Locking. Adjustment is by Means of Screw Bolts.

Construction—Made of best gray iron; sides are ⅜ in. re-inforced with 1 in. angle iron and are fastened to the head by means of bolts which also act as hinges to allow spreading of the mould when removing. Mould is locked by means of a latch. Handles and wheel head are heavy castings.

Adjustment—This machine is adjustable both as to length and width. It is possible to make either straight or tapered posts in any length up to 8 ft. The adjustment at the top is by means of two bolts which are easily and quickly moved to another position. Posts can be made 2½ in., 3 in., 3½ in., 4 in. and 4½ in. wide at the top.

The adjustment at the bottom is by means of a screw bolt; the width is changeable at the bottom to any size from 3½ in. to 6 in.

The thickness of the mould is 4 in.

Adjustment for length is by means of stopoff plates which can be unbolted and moved for any desired length.

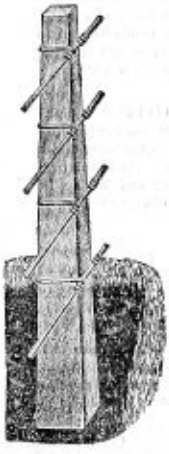
Outfit—With each machine we furnish tamper, sample wood top piece, and two adjustable clamps. These clamps are for the purpose of keeping the mould from spreading after adjusted.

Instructions—We furnish with each machine a book of instructions which will tell what mixture to use for posts, how to mix concrete and various other information which will enable anyone to make good concrete and fine looking posts at minimum cost.

Special Top—The top of the post is formed by a wooden block, sample of which is furnished with each machine. These tops may be round, square, oval, pointed or any desired shape. Anyone can make these tops as it requires no skill whatever to make them.

No. 301 —One man adjustable fence post machine, complete, w't 137 lbs.*.....each JIBE $16.80
No. 301½—Extra tampers, 4×4½ in. head, 4×1 in. wedge end, w't 10 lbs.*..... " ABE 2.30

Making Fence Posts.



A good mixture is 1 part of cement, 2 parts of sand and 4 parts of gravel and the post can be either poured or tamped, but the tamped post is equal in every way to the poured posts, and a great many more can be made in a day when tamped. The machine is simply laid on the floor and the material tamped into the mould. To release the mould, a small hook is raised. It is spread apart a little, pushed forward on the wheel like a barrow a short distance, tilted over and brought back into position for another post. It is the simplest and easiest operated post machine made.

Reinforcing Posts.

The placing of reinforcing is an easy matter. About an inch of concrete is tamped into the machine then No. 9 twisted wire or bars, angle iron or any other material placed lengthwise in the center or on both sides and the remainder of the post filled, tamped in the regular way. When wire is used it is advisable to place two twisted strands in each of the four corners about 1 inch from each corner. No pallets are necessary as the posts can be made on any smooth floor.

Attaching Fence Wires to Post.

The wire is fastened to the post either by looping a short wire around the post and attaching to the main wire, or by any of the devices used for such purposes: namely, galvanized staples placed in the material when tamped; by making holes in the post; making corrugations on one side by means of corrugated sheets or moulding placed on the inside before tamping. The method most commonly used is by looping a short wire around the post and fastening to the main wire at both sides of the post. This is called the Western Union Loop. (See cut).

Durability and Cheapness.

A 7 ft. post, 3 inches at the top and 5½ inches at the bottom, costs from 12 to 15 cents and readily sells for twice that amount.

There is not one objection that can be raised against concrete posts and they can be made during spare time and rainy days. In the one man mould you get the easiest moved, most adjustable and least expensive post machine made. Only a few years ago such things as indestructible posts were unheard of. Iron is expensive, wood rots and is destroyed by fire and worms. Concrete posts are rapidly coming into general use and today are generally adopted by the most progressive people in all sections of the country.

The making of concrete posts is a good business in itself or it is a profitable branch to any block making industry, or the moulds can be purchased by farmers and property owners and the posts made any time. They add beauty to any place when once set; make a solid foundation for the wire, not affected by the heaving of the ground. Fire does not affect them and weeds can be burned along the fence without any injury whatever to the posts. They also act as lightning arresters, saving valuable stock. Concrete posts will be appreciated by the man who, from year to year, has an endless task of replacing broken or rotten posts, especially in view of the fact that they can be made for about the same price as cedar posts.

CONCRETE MACHINERY.

BRICK MACHINES

STYLES OF FACES FOR FANCY BRICKS.

We Can Furnish Any of the Following Design Face of End Plates for the Brick Machine on this Page.

1 2 3 4 5 6 7 8 9 10

ALWAYS ORDER BY NUMBER.

Construction—Heavy grey iron castings, strongly braced, built to stand the most severe handling. Consists of base, flask and lever device for withdrawing the division plates. Flask is made with polished steel division plates, which are machined into one inch castings at the back. There are grooves at the front for holding the division plates in place. The mould is locked by means of two end levers. Plain wood pallets are used which anyone can make. Sample wood pallet is furnished with each machine.

Outfit—Tamper, sample wood pallet and steel striker for leveling the top after tamping, are furnished with the six brick machine.

Capacity and Size of Brick—Standard size brick, 2⅛×4×8¼ in. are made. Every brick will be uniform in size and perfect in shape, having sharp corners and edges. The capacity of six brick machine is 1500 to 1800 brick per day.

Operation—We furnish a complete book of instructions with each machine, which gives detailed information on all subjects regarding concrete. With these instructions anyone can make good concrete brick. The operation of these machines is very simple. A plain wooden pallet is placed on the bed of the machine; the mold locked by drawing the hand lever towards the operator; the end levers placed and the mould filled and tamped.

Fancy Face Plates—We illustrate above styles of the various fancy face plates which can be furnished with each machine. These face plates are dropped into the machine and the material tamped on top of them.

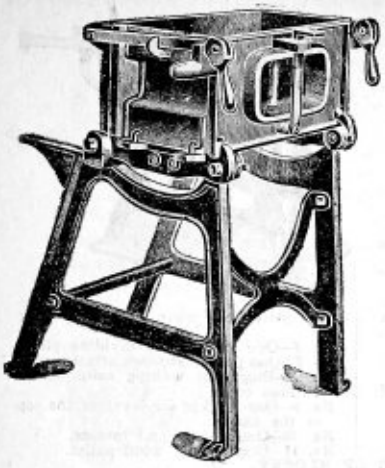
Showing Method of Drawing Division Plates.

SIX BRICK MACHINE WITHOUT FANCY PLATE ATTACHMENT.

We do not furnish face plate attachment with this machine. When making fancy brick, it is necessary to leave them on the fancy face plate until hard enough to remove, which is about twelve hours. It is necessary with this machine to have enough fancy face plates for the number of bricks of fancy design that are to be made in one day.

Pallets—It is desirable to use lumber with cleats on the back, which prevents the board from warping and forming irregular shaped bricks.

Ready for Operation



No. 261	—Six brick machine complete, w't 170 lbs. ★	each	AIAE	$34.80
No. 262	—Fancy face plates for either machine, w't 2 lbs. ★	"	CC	.60
No. 263	—Fancy end plates for either machine (see above), and always order by number, w't 1⅓ lbs ★	"	BF	.48
No. 263½	—Extra malleg tamper, head 4×4 in., wedge end 2×1, w't 10 lbs. ★	"	AJJ	1.80

Cost of Concrete Brick—The cost of making concrete brick is about $5.50 per thousand. The comparative cost of clay brick is $6.00 to $8.00 per thousand and as high as $17 is charged for pressed brick. Concrete has every appearance of pressed brick when made on the polished steel pallet. The profits in this line are attractive and every block-making plant should be equipped with such a machine. The making of concrete brick is so easy that they can be made anywhere, saving freight and selling for a higher price than common clay brick. They are justly popular because they are handsome in appearance, cheaper, more durable and better in every respect, becoming harder with age and being indestructible by fire, requiring no expensive firing or machinery. Clay brick chip easily, and must be handled with extreme care to avoid a large percentage of breakage. The use of concrete is endorsed by engineers and architects everywhere and is desirable in every way. Our ten brick machine will make as many brick as any plant can take care of and will not require any expensive repairs. Masons prefer our brick because they are easy to lay and make a smooth wall. A couple of boys will make brick as fast as a mason can lay them and equipped with this machine the contractor, mason, builder or farmer is entirely independent of the brick manufacturer

CONCRETE MACHINERY.

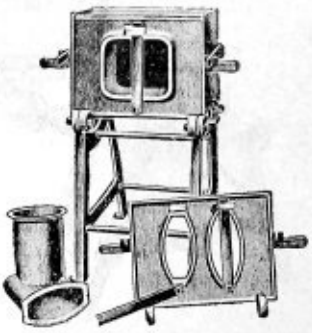
LEADER FACE-DOWN BLOCK MACHINES.

Ready for Tamping.

Outfit.

We furnish the following outfit free with each machine.

No. 1—One rock face plate for full size blocks. *If other than Rock Face is desired we give option of any face plate shown on page 200 or 200A, numbers 11 to 31 inclusive.*



No. 2—One rock face plate for one half and two quarter size blocks.

No. 3—One interchangeable rock end plate.

No. 4—One pair core end plates.

No. 5—One pair dividing plates for fractional size blocks.

No. 6—One gable block dividing plate.

Showing Single and Double Cores.

No. 7—One pair joist block attachments.

No. 8—Plugs for making solid blocks without cores.

No. 9—One striker for leveling the top of the mould.

No. 10—One double end tamper.

No. 11—One sample wood pallet.

ABOVE OUTFIT MAKES THE FOLLOWING STYLES OF BLOCK

"LEADER" BLOCK MACHINES.

Makes the Blocks Face Down. Single or Double Core. Most Adjustable and Convenient, Inexpensive Block Machine Made. Makes 100 to 200 Blocks Per Day. Operated by One, Two or Three Men.

Construction—Heavy gray iron; 22 inches high; base 18 in. × 23 in. Frame strongly braced to withstand jar from tamping. Face plates made of close grained castings. Machine consists of frame and flask. Flask consists of core plate, back plate, two end plates, face plate and levers to hold the flask together. All plates are fastened to the face plate, which in turn is fastened to the base by rocker bearings. The locking device consists of a lever fastened to the back plate and an eccentric lever at the end, by means of which it is possible to partially lock the mould and to adjust the end plates or pallet before fully locking.

Cores—Machine is made with either single or double core. Unless otherwise specified, we ship single core. The cores are inserted in the core plate, as shown in the illustration above. Cores are held in place by means of a lever, and are removed by hand vertically after the flask is turned.

Extra Flasks—This machine is adjustable to three different sizes. At a slight additional cost we can furnish extra flask attachments for changing machine to make blocks of another size. In this way it is not necessary to buy an entirely new machine for a change in size of blocks. Flask attachments are fully described on page 199.

Pallets—Plain wooden pallets are used. These are made by cutting common lumber to the proper size and nailing cleats on the back. Anyone can make these pallets using the sample furnished with the machine, as a pattern.

Sizes and Kinds of Blocks—The regular outfit furnished with each machine makes all of the blocks shown on page 200. On page 199 we illustrate the various attachments for this machine. Page 200A shows the large range of faces which can be made when using the various face plates.

Principle—Blocks are made face down and removed in their natural position as they lay in the wall. By this method it is possible to use a better grade of concrete for the face of the block and coarser material for the remainder. This secures a block much more attractive in appearance and at less expense. By this method it is possible to use coloring material,—securing brown, black, gray, slate, red, white and various other colors at little expense over the regular block.

Instructions—The operation is so simple that anyone can make good blocks. On actual test 265 blocks were made in one day on this machine. We furnish complete instructions with each machine which explain in detail the operations. We also furnish a comprehensive pamphlet on the making and mixing of concrete which explains all of the processes necessary to make high grade concrete. With these instructions anyone can make concrete articles with but little experience.

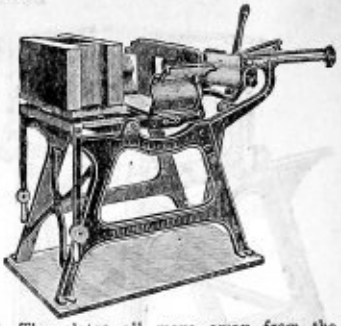
CONCRETE MACHINERY.

IMPROVED FACE-DOWN BLOCK MACHINES.

Outfit.

We furnish the following outfit free with each machine.

No. 1—One rock face plate for full size blocks.



If other than rock face is desired we give option of any face plate shown on pages 200 or 200A, numbers 11 to 31, inclusive.

No. 2—One rock face plate for one half and two quarter size blocks.

No. 3—One interchangeable rock end plate.

No. 4—One pair core end plates.

No. 5—One pair dividing plates for fractional size blocks.

The plates all move away from the block.

No. 6—One gable block dividing plate.

No. 7—One pair joist block attachments.

No. 8—Plugs for making solid blocks without core.

No. 9—One striker for leveling the top of the mould.

No. 10—One double end tamper.

No. 11—One sample wood pallet.

ABOVE OUTFIT MAKES THE FOLLOWING STYLES OF BLOCKS.

The Highest Development of Horizontal Core Machine, Makes the Blocks Face Down, Perfect in Mechanical Construction, Entirely New and Original Method of Core and Block Removal, Makes 150 to 300 Blocks in a Day, Operated by One, Two or Three Men.

Construction—Heavy gray iron, 22 in. high, base 18x30 in. Frame strongly braced to withstand jar from tamping. Face plates made from close grained castings. Machine consists of frame, flask and lever device for removing the cores. Mould is locked by a lever fastened to the back plate and an eccentric lever at the end, which permits of partially locking the mould, making adjustment of the pallet easy. Core device consists of two arms fastened to the base of the machine. Two steel guides draw the cores in a true straight line from the mould by means of a hand lever. The lever works in machined ways. All cores and levers work smoothly and without jar.

Cores—Machines supplied with either single or double core. Unless otherwise specified, we ship single core.

Extra Flasks—Machine is adjustable to three different sizes. At a slight additional cost we can furnish extra flask attachments for changing machine to make blocks of another size. This avoids the necessity of purchasing an entirely new machine for a change in size of blocks. Flask attachments fully described on page 199.

Pallets—Plain wooden pallets are used. These are made by cutting common lumber to the proper size with cleats nailed on the back. Anyone can make them, using the sample furnished with the machine as a pattern.

Sizes and Kinds of Blocks—The regular outfit furnished with each machine makes all of the blocks shown on page 200. With the various attachments shown on page 199, a large range of sizes and styles of blocks can be made.

Principle—This machine has not only all of the advantages of the face-down machines, using wetter mixture, making better looking faces and using less cement, but also the advantage of cores being removed by lever, increasing efficiency of the machine at least 30 per cent. This lever centralizes the control so that all of the work can be done in one spot. The result is more and better blocks in a day. Every operation is performed at one side of the machine, including locking and unlocking the flasks, tamping, removing the cores and withdrawing the block.

Instructions—The operation of this machine is very easy and very speedy. 300 blocks a day were made on test. We furnish full directions for operation with each machine, also a complete pamphlet explaining every step necessary in the manufacture of all kinds of concrete articles. This book will save the expense incidental to mistakes.

CONCRETE MACHINERY.

SUPPLEMENTARY ATTACHMENTS FOR "LEADER" AND "IMPROVED" BLOCK MACHINES.

Prices and Sizes Shown Under Each Machine, Pages 198E and 198F.

Four Inch Course Block Attachment—Heavy gray iron; consists of two face plates, two end plates, two center dividing plates and four small sectional dividing plates. Plate "A," with division plate "D" and four sectional plates "F" will make two blocks, 8 in. long, 4 in. high, and four blocks, 4 in. long and 4 in. high at one time. The division plates slip into the mould in the position in which they are shown in the illustration.

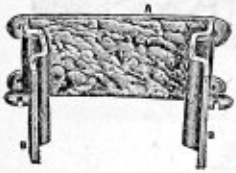
Four 4 in. and Two 8 in. Blocks made at one time.

Face plate "B" with special core dividing plate "E" will make two blocks 16 in. long, 4 in. high at one time, with special cored centers.

Core ends "C" are slotted, to permit of inserting the division plates and also to hold them absolutely vertical.

Face Plates—We can furnish Plain, Rock, Panel, and Tooled Face Plates. (See page 200A.) Unless otherwise specified, we ship Rock Face.

Octagon Bay Window Attachment—Heavy gray iron; consists of face plate "A" 12 in. long, face plate "B" 4 in. long, and stop-off plate "C," which is 8, 10, or 12 in. long according to the size of the machine.

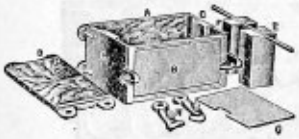


This Attachment is adjustable by means of a set screw located on face plate "A" to any angle from 30 to 80 degrees, making the necessary blocks for any bay window.

Face Plates—We can furnish this attachment in Rock and Panel Faces. Unless otherwise specified, we ship Rock Face.

Octagon Bay Window Block.

Inside Angles—This attachment does not make inside angle blocks. No attachment is necessary for this purpose as the proper shape blocks can be made with the gable dividing plate, furnished free with each machine. See page 200 for cut of inside corner bay window block.

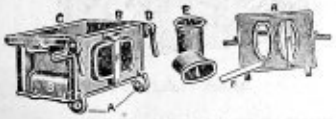


Circle Bay Window Attachment—Consists of circular face plate "A" and two core ends "B." Can be furnished for 6, 7, 8, or 9 ft. radius. The two core ends are held at the proper angle by special lugs which are longer than those furnished on the regular machine.

Face Plates—We can supply Rock face design only. Always state radius of circle wanted.

Circle Bay Window Block.

Silo Block Attachment—Consists of face plates "A" and "B," two end plates "C," back plate "D," special center cores "E," Dove-tail end cores "F," dividing plate "G" and Rocker bearings "H."



When attached to machine, the rocker bearings "H" are substituted for those on the regular machine. Face plate "A" or "B" is then fastened to the Rocker bearings; then cores "F" placed; back plate put into position, and locked by means of the end levers. Face plate "B" and dividing plate "G" are for making two half size blocks. Dove-tail end cores "F" are withdrawn by means of small hooks, and center cores are simply lifted out.

Dove Tail Silo Block

Face Plates—We can furnish Rock Face design only.

Diameters—We can furnish attachments for 12, 14, 16 and 18 ft. diameter. Always state diameter desired.

Single Core, Double Core.

Flask (or mould) Attachments—Heavy gray iron; furnished with either single or double core. Consists of core plate "A," end cores "B," sample wood pallet "C," two end levers "D," special center cores "E" and levers "F" for holding the cores in position. For the "Improved" Machine, a special core plate is furnished for attaching to the levers. As the same face plate is used for all size blocks, no face plate is furnished with extra flask attachment. Every thing is provided to make entire change from one size block to another. Two Rock Face End Plates are furnished, as these vary with the size of the block.

FOR PRICES SEE LIST UNDER EACH MACHINE.

CONCRETE MACHINERY.

ADJUSTABLE SILLS AND CAP MOULDS.

For Making Sill Caps, Lintels, Steps, Water Table Blocks, Slabs, Etc.

Construction—Gray iron castings, reinforced at all joints and edges. Mould is 5 ft. long and 16 in. wide. Consists of front plate, back plate, two end plates, one stop off plate and two stop off rods, three feet long. Face plate is fastened to the end plates by means of thumb screws. End plates are hinged to the back plate. Both end plates have notches at the top and bottom into which the face plate is set for the different widths. The left end plate has two holes through which the adjustable rods pass and can be set to any length by means of a collar and set screws on the inside. Special tamper furnished with each machine. Mould is adjustable to three different widths, 10, 12 and 14 inches, and 8 inches high. Also adjustable to any length from 2 to 5 ft.

Extra Face Plates—Unless otherwise specified, we furnish plain face, but can furnish any of the following designs at a slight additional cost, or any one of them free, in place of the regular plain face.

No. 1—Rock face with tooled margin.
No. 2—Horizontal tooled face.
No. 3—Bushhammer face with tooled margin.
No. 4—Vertical tooled face.
No. 5—Panel face.
No. 6—Whirlwind scroll.

Reinforcing—It is advisable to use reinforcing for steps, slabs, etc., where they bear considerable weight. In an open mould of this kind, the reinforcing is very easily placed. Woven wire, angle iron, chains, old rods, and material of like nature, laid lengthwise, can be used.

No. 291 —Adjustable sill and cap mould, complete, w't 170 lbs.★ ..... each **ABFJ** $21.00
No. 292 —Extra face plates, styles 1 to 6, w't 55 lbs.★ ..... each **DCJ** 7.20
No. 292½—Extra tampers, 4½x4 in. head, 4x1 in. wedge end, w't 10 lbs.★ ..... each **AEJ** 2.50

WELL CURBING MOULDS.

Suitable Also for Making Supply and Water Tanks, Keeps the Water Pure and Sweet, Prevents Caving and is Everlasting.

Construction—Heavy gray iron. Mould consists of front and back plate, circle end and key end. The two ends are hinged to the back plate and the face plate is fastened by means of two latches.

Pallets—No pallets are required When desired, pallets may be used. smooth floor or other surface. as the blocks can be made on any These are made of common lumber, cut to the proper size, with cleats on the back to prevent warping.

Sizes—We can furnish any of the sizes, diameters, shown below. It will be noticed that the length varies for the different diameters. The purpose of this is to have blocks of the proper length, to avoid the necessity of using fractional size blocks to complete the circle. Plain face blocks only can be made.

Principle—The blocks are made with one circle end and one key end. When these are laid together a small space is left for mortar, and when this is filled, the curb will stand a very great lateral strain.

Instructions—With each mould we furnish instructions as to the proper method of mixing and making concrete which explain also the process of making these blocks. Everything is provided so that the blocks can be made by anyone.

CONCRETE MACHINERY.

CHIMNEY, PIER OR GATE POST MOULDS.

Showing Mould with Core in Position.

Showing Finished Block.

Suggestion for Chimney, Showing Various Designs of Faces.

Construction—The moulds are made of heavy gray iron castings, nicely fitted together with hinges on one side and levers on the other. A core is furnished with each mould, slightly tapered to permit of easy removal.

Pallets—Plain wooden pallets are used. Common lumber of good thickness with cleats nailed on the back answers for this purpose. These blocks can be made on any smooth floor without the use of pallets.

Chimney Blocks—Concrete is, without doubt, the best material for chimney blocks, standing intense heat without cracking. It is safer and cheaper than brick.

Piers—For pier blocks this mould is unsurpassed. Pier blocks when made of concrete can be laid in damp earth with every assurance that the dampness will not affect them in any way. The blocks can either be made hollow or solid.

Gate Posts—Combined with our fancy ball mould some very handsome gate posts can be produced and the effect will be everything desired.

Porch Columns—For porch columns, a mould of this kind is indispensable. Our rock face designs are especially recommended. They are deep cut and have every appearance of cut stone.

Designs—We can furnish 8 in. in Rock Face only, 10 in. in Rock or Panel Face, 12 in. in Rock, Panel or Plain Face, and 14 and 16 in. in Rock, Panel, Plain or Brick Face.

Pier and Ball Moulds Make Fine Looking Gate Posts.

GALVANIZED STEEL GRAIN BINS.

No. 8.

No. 8A.

No. 8D.

Entire page.—CJ%

Portable, Sectional, Corrugated. For Wheat, Oats, Barley, Rye and Flax.

CONSTRUCTION.

The body of the tank is made of heavy galvanized iron, corrugated and curved. The tank is erected complete at factory and before taken down and crated for shipment each sheet is marked so that there is no trouble in setting up.

Body is fitted with two port-holes each 10 inches in diameter, with covers and one man-hole with 20×22 in. opening, with cast-iron door and frame, which gives easy access to bin when partially emptied. This door is also fitted with a 10 in. port-hole.

There is also a chute with slide gate attached to man-hole which allows of the emptying of a great portion of the contents by gravity.

A hopper on the inside permits scooping out the balance.

SPOUTS.

With each bin is furnished a spout that fastens to the outside of any port-hole, so when sliding door is opened, the grain runs through by pressure alone. A hopper is supplied to fit spout. These are included without extra cost to purchaser. Size of hopper 19×30 in., length of hopper and spout 4 ft. 6 in.

COVER.

The cover to the bin is cone shaped, and is also made of galvanized iron with pressed standing seam, reinforced with ⅜×1 in. steel bands, and when bolted together will easily carry much more than the weight of an ordinary man. Covers are made and shipped in sections, the number of sections depending upon the size of bin. Cover has a projecting edge at top of bin of 3 in. which insures the shedding of any water or moisture. Cover is fastened to top of bin with galvanized iron cleats and bolts. We furnish with each bin a small cone shaped ventilator, which thoroughly ventilates the bin and prevents the grain from becoming overheated. Cover is also fitted with two 20 in. man-holes, with tight covers, fitted with hinge hasps.

BOTTOM.

Bottoms are made in sections and so shipped. The number of sections depending upon the size of bin. The seams in the bottom are made with a standing seam which is more easily put together, and make a much more rigid bottom than the lock or riveted joint. All that is necessary in erecting is a screw driver to screw up the slotted bolts used for bolting the sections together. A man and boy will put one up complete on the farm in half a day.

A FEW FACTS.

Portable—The necessity for a portable granary lies largely in being able to move it easily, as required to point convenient for threshing. The ordinary granary built of wood, with capacity of 1,000 bushels weighs over 45,000 lbs. Contrast this with the weight of these sheet metal granaries, which do not weigh over 2,500 lbs.

Strong—By test it is proven that curving a corrugated sheet iron increases its bending strength twenty-nine times. This alone ought to make it twenty-nine times better than any other granary.

Durable—Experience has proven that the life of galvanized steel is much longer than any other material that could be used for this purpose.

Wind-proof—The steel grain bin is just as rigid when empty as if built of wood.

Vermin Proof—No danger whatever from field mice or other rodents.

Fire Proof—No danger whatever from fire or lightning damage, either to the bin or to the contents, this alone ought to commend it to any farmer.

Handy—The grain can be run right into the bin from the separator and when through threshing, the straw may be burned without any danger to the bin or contents.

Cheap—To build a granary of wood of the same capacity and strength would cost more than double the price of these corrugated metal bins.

Always specify the exact length of each culvert wanted for the following reasons:

1st—Made of 48 inch lengths, with one 28 inch length furnished for each culvert to make the break joint construction. (See rules for applying).

2nd—The end of each culvert is reinforced with a 7-16×1½ inch half oval galvanized iron band.

The lower half of the pipe is made with a horizontal flange with an outer vertical flange to receive the flange of the upper or top half. These flanges are punched to receive galvanized machine bolts and when bolted together makes the strongest, cheapest and most efficient culvert pipe on the market.

McMartin's "Knocked Down" Culverts require no extra flanged or bands, have less joints and require less labor to put together than any other culvert made. Owing to the construction of this pipe, any length can be put together as readily in the field as in the factory.

McMartin's culverts nest closely together when packed for shipment, consequently a much larger stock of culvert pipe may be carried in less than half the space required for the ordinary style of culvert; this makes it possible to secure the lowest rate of freight. Takes third class rate in less than carloads, and fifth class in carloads.

The factory guarantees these culverts to stand without injury under the strains and usage that a road culvert is subject to and will replace at their expense any part of culvert that fails to give perfect satisfaction after being properly placed in position.

McMartin's Knocked Down Culverts will not rust, crumble, rot, nor crack. Easiest to install. Easiest to transport. Will not wash out nor cave in. Practically indestructible. When once installed the cost ceases and no more attention need be paid to it.

Corrugated culverts are twenty-nine times stronger and will stand a much greater strain than the smooth bore style. They will not crack from freezing, as the corrugations allow for expansion and contraction. Their great strength is due to the heavy gauge of iron used and the reinforced flange-joint construction along both sides of the cylinder, while the break-joint reinforcements serve as still further strengtheners at the point where smooth bore or round corrugated culverts are the weakest.

Directions for Installing.

Made in 48 in. lengths, two halves to each length, with one 28 in. length furnished for each culvert, half of which is to be placed at each end. On even foot culverts the two half pieces are used on top, on odd foot culverts one half is used above and the other below. This produces the break joint construction. For this reason always specify length of each culvert wanted exactly as if ordering set-up culvert.

Culverts are joined by bolting with galvanized bolts which we furnish.

Each end joint is fitted with a 7-16×1½ in. half oval galvanized iron band which thoroughly protects the ends from being in any way jammed.

Lay under 12 inches or more of ground. Make bed of ditch smooth so that part of Culvert to be covered will rest on the bottom. Lay culvert in place and tamp earth well under each side of culvert. Finish with loose earth. Lay culvert so that water will not run against joints. When installing a drainage system of culverts it is sometimes necessary to know how large one culvert should be in order to carry all water running into it from two or more smaller ones. For example, it takes one 24 in. pipe to carry as much water as three 15 in. or thirteen 8 in. culverts, all having the same fall. The following table, computed by a drainage expert, will be found very convenient in laying out a drainage system of any extent:

8 IN.	10 IN.	12 IN.	15 IN.	18 IN.	20 IN.	24 IN.	30 IN.	36 IN.	48 IN.	60 IN.	72 IN.
244.	136.	85.	55.6	34.7	26.7	17.6	9.8	6.1	2.9	1.6	1.
148.	82.	51.6	34.4	21.4	16.5	11.	6.1	3.8	1.8	1.	
81.	45.	28.8	19.2	12.	9.2	6.1	3.4	2.1	1.		
39.	21.7	13.6	9.1	5.7	4.4	2.9	1.6.	1.			
24.3	13.5	8.4	5.6	3.5	2.7	1.8	1.				
13.	7.2	4.5	3.	1.9	1.5	1.					
9.	5.	3.1	2.1	1.3	1.						
6.8	3.8	2.4	1.6	1.							
4.1	2.4	1.5	1.								
2.9	1.6	1.									
1.8	1.										

In setting them up the sections over-lap each other one corrugation, whereupon the bolt holes match. A hammer and a wrench are the only tools needed and they cannot possibly be set up wrong.

Note.—We can furnish from factory, Elbows, Crosses and Tees for all sized culverts, prices quoted on application.

Gold Hibbard Shovels and Spades

A quarter of a century of sustained quality is behind the reputation of goods bearing this brand.

Gold Hibbard Shovels and Spades Are Good because the question of cost is never allowed to interfere with the quality. They are made of the finest crucible steel, finished in the most workmanlike manner and very carefully inspected. The brand is a safe guarantee of the highest quality.

If you want the very best buy **"GOLD HIBBARD"**

EDGE TOOLS

It does not pay to buy or sell poor tools. A first-class mechanic demands the best, and it would be foolish for us to recommend an article which will not stand the test. Every article branded "Our Very Best" is **Warranted,** and we know will give lasting satisfaction. O. V. B. tools are made for a variety of different purposes, but only one quality.

GOLD HIBBARD SHOVELS AND SPADES.

Gold Hibbard Shovels and Spades are made of the finest steel put into a shovel. The thickness of the blade is graduated so as to secure the greatest efficiency. They are well balanced and perfect in detail. The handles are thoroughly seasoned, well finished and securely riveted. Gold Hibbard Shovels and Spades are largely used by railroads and contractors and give the best of satisfaction. We unhesitatingly recommend them to all those who desire the most efficient tools.

SHOVELS AND SPADES.

The lightest shovel ever made of this pattern. After years of experimenting our factory has succeeded in making Emperor Shovels and Spades of high carbon steel, enabling them to considerably reduce the weight without loss in strength. These goods are finely finished and very attractive in appearance.

POST HOLE DIGGERS.

[illegible]

No. 18 [illegible]—Extra quality forged steel blades, half polished, 6 in. spread, japanned malleable double-hinged frame castings, select straight grained ash handles, with steel reinforcing plate where bolted, w't per doz. 140 lbs., per dozen ..... **ABJJ** $24.00

The [illegible] *Post Hole Digger is fitted with a double hinge, preventing the side play of handles and making the blades close perfectly true, holding the maximum amount of dirt.*

The steel is of such quality as to permit easy digging in all kinds of soil and is especially adapted for the rough work in rocky or gravel soil.

The handles are made of best second growth ash and will outlast two or three of the handles usually furnished with post hole diggers.

The handles where joined to the frame are enclosed in a socket on all sides which takes the strain from the bolt holes, the place where digger handles generally break.

ONE-THIRD DOZEN IN A BUNDLE.

No. 14 [illegible]—Hercules pattern, high carbon, forged steel blades, double hinged, full bolted, malleable frame castings, painted red, hard wood handles, w't per doz. 142 lbs., per dozen ..... **AJHJ** $21.00

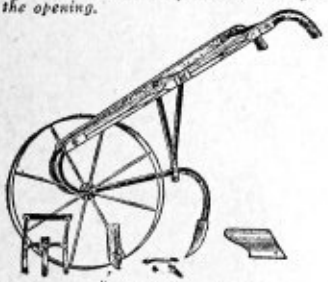
GARDEN PLOWS.



No. 419 —Adjustable standard, all steel construction with varnished hardwood cross handle, frame painted red, steel tools, 24x1⅞ in. wheel, 11x5 in. moldboard with landslide, weeder and cultivator combined, 4x8 in. shovel, 7x2 in. calf tongue, w't 25 lbs. .....each **BDJ** $4.00

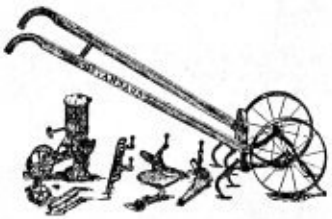
This plow is noted for its easy running qualities; it can be propelled with a minimum amount of strength. The cross handle makes it more easily guided and pushed, with less strain on the arms.

Instead of pushing directly against the axle the handles extend above and beyond the axle, thus elevating the draft and making it run much easier. The handles may be raised or lowered to suit man or boy.

The weeder and cultivator is a reversible tool. The cultivator end has three 4½ inch teeth spaced three inches apart, which is much better than a rake. The weeder is formed with a knife that pushes along under the earth and cuts off the weeds which fall back through the opening.

No. 425 —Improved by having brace between the upright bars, connecting handle and beam, adjustable standard, No. 1 quality oak handles varnished with black hand holds, 24x1⅞ in. wheel, steel tools, cultivator with dodge center tooth, side teeth 5 in., center tooth 6 in., 8½ in. weeder, 11x5 in. moldboard with landslide, 4x8 in. shovel, 7x2 in. calf tongue, w't 24 lbs., each **BDJ** $4.00

It is so constructed that it can be arranged for working in either heavy or light soil, by adjusting only two small bolts.



In this plow the center of weight falls directly over the pivoting point, making it self balancing.

Instead of pushing directly against the axle the handles extend above and beyond the axle, thus elevating the draft and making it run much easier. The handles may be raised or lowered to suit man or boy.

No. 4—Il-a-noy, single and double wheel, adjustable bent oak handles braced near top, enabling operator to work to and from the row or between the hills, 16 in. wheel, all attachments made from hard steel, ground and polished with separate operations, complete with four shovels, one pair hoes, one pair diamonds, one pair rakes, two leaf guards and wrench, w't 35 lbs., each **EEJ** $9.00

Light weight but strong enough to last a life time. Can be instantly changed from a double wheel for cultivating astride the rows to single wheel to cultivate between the rows. Wheels can be adjusted up or down to gauge depth of work, handles can be adjusted to suit man or boy.

No. 9—Il-a-noy, combined double and single wheel, chain drive, adjustable, best quality bent oak handles, 16 in. steel wheels, malleable iron tools, one set of four cultivating teeth, one pair hoes, one pair plows, one pair rakes, one hill and drill seeder, one wrench, shipping w't 40 lbs., each .....**JIFJ** $15.40

This combination makes a very complete outfit for all kinds of garden work. It will plant the seed in hills at 4, 6, 8, 12 and 24 in. apart or drill a continuous row, very accurately.

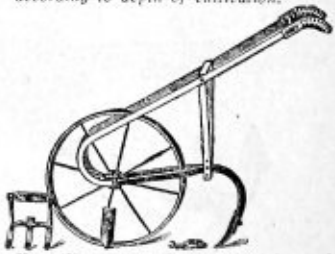
Both sides of the row may be plowed at once until the plants are too high, then this tool may be changed to a single wheel tool and used between rows.

When set up as a seeder one wheel only is used, the seeder attachment is driven from the front wheel with an endless chain which makes an even, steady draft.

Has very few parts and a new agitator rotary force feed that will positively sow any kind of garden seed from peas and beans to celery evenly and in any quantity desired.

The seeder is attached to the plow frame with two bolts.

No. 2—Il-a-noy, double wheel, best spring steel beam, best quality bent oak handles, two-piece arch adjustable in width, 16 in. wheels, steer tools, four cultivating teeth, one pair hoes, one pair diamonds, one pair rakes, one wrench, w't 30 lbs., each .....**EAJ** $8.50



This cultivator plows both sides of the row at one time and does the closest work that can be done by a wheel cultivator.

The handles being bolted to the spring beams allow the attachments to be worked to and from the row or in between the hills. The adjustable arch permits of the adjustment of the wheels and attachments to and from the row to suit the size of plants.

No. 426—Il-a-noy, two wheels, best quality oak handles, steel braces nicely finished, 14 and 18 in. wheels with ⅛x1 in. rims and ⅞x⅜ in. oval spokes, adjustable for deep, medium or shallow cultivation, steel tools, 11 in. reversible bull tongue 1½ in. wide on one end and 3½ in. on other end, with sweep, turn shovel, rake and wrench, w't 20 lbs., each .....**BAJ** $3.50

The construction of the foot permits of changing the height of attachments according to depth of cultivation.

No. 420 —Same principle and shape as No. 425 , but with steel handles, malleable iron hand grip, giving all steel construction, height of wheel 24 in., complete with moldboard with landslide, shovel, calf tongue, weeder and cultivator, w't 30 lbs. .....each **BDJ** $4.00

Handle can be raised or lowered to suit man or boy; self-balancing.

GARDEN TOOLS.

WEEDERS.

No. 22—Norcross, 3 prongs, ¼ in. square spring steel, attached to malleable head by two bolts, prongs detachable by loosening nuts, metal parts painted black, except shovels which are silver bronzed, 9 in. natural wood finish handle, w't per doz. 10½ lbs., per dozen .....**BGJ** $5.50

Designed for use in flowers, small shrubbery, etc., or for cultivating small vegetables where the use of a long handle tool is less practical. Excellent in strawberries and all similar low-growing plants where tedious hand cultivation is required.

ONE-HALF DOZEN IN A CRATE.

No. 30—5 prongs, tinned, steel ferrule, wood handle, 10 in. long, w't per doz. 3½ lbs., per doz. **JFE** $1.50

ONE DOZEN IN A BOX.

No. 8—Sugar Beet, 4½x1¼ in., heavy steel blade, riveted wire shank, stained wood handle, w't per doz. 3 lbs. .....per dozen **ABJ** $1.50

These are used for spacing the beets as well.

No. 33½—Onion, 3 in. polished steel blade, solid shank, 8 in. handle, with steel ferrule, w't per doz. 3 lbs., per dozen .....**BIE** $5.00

No. 35—Hazeltine's, 1 in., cast steel blade, knife edge, brass ferrule, 4 in. hardwood handle, w't per doz. 4 lbs., per dozen .....**BDJ** $5.00

WEEDERS.

No. 36—Eureka, three 8½ in. cast steel oval polished tines, 5 in. hardwood handle, brass ferrule, tines have 2½ in. turn, w't per doz. 5½ lbs., per dozen .....**CJJ** $5.00

Will fill the demand for a weeder of better quality than the ordinary, being made of the same quality steel and in the same manner as a hay fork.

ONE DOZEN IN A BOX.

No. 39—Cleveland, japanned iron, steel blade, polished wood handle, spring lever, length 44 in., w't per doz. 22 lbs., per dozen .....**JFFJ** $18.00

The curved edge of the blade enters and loosens the soil, pressure on the lever then causes the toothed jaw to grasp the plant, and a slight pull suffices to dislodge it without disturbing the surrounding sod.

ONE DOZEN IN A BUNDLE.

MATTOCKS.

No. 3-T—Cronk's, malleable eye and steel, size 3x1¼ in., 4½ ft. handle, w't per doz. 30 lbs., per doz. **DHJ** $8.00

SOD LIFTERS.

No. 90—9 in. polished steel blade, strap ferrule, gold bronzed shank and ferrule, malleable iron "D" handle, with ebonized wood grip, length of handle 2¾ ft., length over all 4 ft., w't per doz. 50 lbs. ..per dozen **AAJE** $14.00

DANDELION SPUDS.

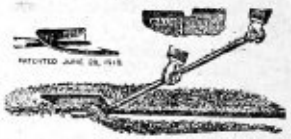
TURF EDGERS.

No. 95—9x5 in., cast steel, polished blade, gold bronzed ferrule, 4 ft. handle, w't per doz. 25 lbs., per dozen .....**JEDJ** $11.50

ONE DOZEN IN A BUNDLE.



COMBINED HOE AND EDGE TRIMMERS.

No. 1—Hough patent, five keen cutting edges, no lost motion, works going and coming, w't per doz. 36 lbs., per dozen .....**JGHJ** $13.00

ONE DOZEN IN A BUNDLE.

IMPERIAL LAWN EDGE TRIMMERS.

No. 139—Steel blade, 3 ft. handle, w't per doz. 40 lbs., per doz. **JGBJ** $12.00

This plows a clean "U" shaped trench close to sidewalks and is a great time saver.

ONE-THIRD DOZEN IN A BUNDLE.

AUTOMOBILE SPADES.

No. 125—Forged steel blades, 5x8 in., curved and polished, round points, solid shank, malleable D handle, length over all 24 in., w't per doz. 9 lbs. .....**EAJ** $8.50

A convenient tool for all motorists, is very light, can be carried in tool box or under seat and can be used in close quarters. Just the thing for digging ferns or wild flowers on holiday trips. Finished in gold.

TIED ONE-HALF DOZEN IN A BUNDLE.

GARDEN TOOLS.

WEED PULLERS.

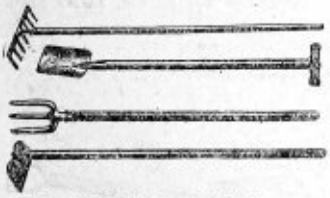
No. 42—Champion, three strong steel prongs, heavy malleable head works automatically, length over all 3 ft. 9 in., w't per doz. 11 lbs., per dozen .....**BDJ** $4.00

Working automatically on the handle and prongs is a wire ejector to loosen and throw the weeds and roots from the prongs. It is superior to any other implement for pulling weeds.

IDEAL DANDELION KILLER.

No. 43—Killer consists of tube for gasoline 30 in. long and 1½ in. in diam., with screw cap at top for filling, and brass valve and plunger in bottom, w't per doz. 12 lbs., per dozen .....**AJBJ** $17.00

Just fill the tube with gasoline, put the valve plunger in the center of the plant, press lightly, and the plant is doomed. The IDEAL is a quick and sure dandelion killer, cheap and easy to use, and does not injure the grass roots.



GARDEN SETS.

Hardwood Handles.

No. 1—6 tooth malleable rake, 21 in. handle, 3¼ in. riveted shank steel hoe, 22 in. handle, 5x3¼ in. steel socket shovel, 18 in. straight handle, w't per doz. sets 10 lbs., per dozen sets .....**AJJ** $1.70

Fender in Use. As a Cultivator.

As a Seed Drill.

No. 136—Osborne, 3 steel blades and fender, center blade adjustable and removable, 4½ ft. handle, w't per doz. 48 lbs. .....per dozen **JHGJ** $14.50

ONE-HALF DOZEN IN A BUNDLE.

No. 137—Norcross, spring steel prongs, malleable iron socket and clamp plates, best quality 4 ft. white ash handle, shovels forged from the steel prongs, prongs clamped firmly by 4 strong bolts, w't per doz. 40 lbs., per dozen .....**JGBJ** $12.00

No. 135—Norcross, spring steel prongs, malleable iron socket and clamp plates, best quality 4 ft. white ash handle, shovels forged from the steel prongs, prongs clamped firmly by 2 strong bolts, w't per doz. 24 lbs., per dozen .....**DHJ** $8.00

FEATHERWEIGHT CULTIVATORS.

No. 138—4 prongs, forged from a single piece of high grade steel, oil tempered, and very light in weight, 4 1-3 ft. ash handle, w't per doz. 27 lbs., ...per dozen **EDJ** $9.00

This cultivator is well finished and will be found very serviceable and at a moderate price.

ONE DOZEN IN A BUNDLE.

GARDEN TOOLS AND GRASS HOOKS.

GARDEN TROWELS.

Polished Steel Blade, Riveted Shank, Steel Ferrule, Polished Hardwood Handle.

No. 6—6 in., w't per doz. 4¼ lbs., per dozen ..... **EJ** $0.80
No. 7—7 in., w't per doz. 4½ lbs., per dozen ..... **EE** $0.95
No. 8—8 in., w't per doz. 5 lbs., per dozen ..... **JFE** $1.10

ONE DOZEN IN A BOX.

No. 20—Cruso, 6 in., one-piece steel blade, steel ferrule, polished ebony stained handle, w't per doz. 3½ lbs., per dozen ..... **JFJ** $1.00

ONE DOZEN IN A BOX.

No. 22—"Never-Break," 6 in., heavy stamped steel, natural finish, lacquered, one-piece blade and socket, riveted handle, w't per doz. 6 lbs., per dozen ..... **AJJ** $1.70

ONE DOZEN IN A BOX.

No. 26—6 in., English pattern, extra heavy, cast steel, natural finish, polished, one-piece blade, steel ferrule, hardwood handle, w't per doz. 5½ lbs. .....per dozen **BAJ** $3.00

ONE-HALF DOZEN IN A BOX.

No. 1—6 in., one-piece heavy sheet steel, full polished, shank bent hollow to give strength, w't per doz. 7 lbs. .....per dozen **BGJ** $4.50

An exceptionally fine trowel, designed for florists and gardeners. It is well made in every particular.

ONE-HALF DOZEN IN A PACKAGE.

No. 2—6 in., blade and trowel shank forged from one piece of steel, front part of blade polished, rear part of blade and shank varnished a nice blue, w't per doz. 8 lbs., per dozen ..... **DHJ** $8.00

As fine a trowel as can be made. Great care has been taken in the design, material and workmanship. No detail has been overlooked to produce a satisfactory tool that will last a lifetime.

ONE-HALF DOZEN IN A PACKAGE.

GARDEN TROWELS.

No. 14—Highly tempered carbon steel, hand forged, full polished, solid socket, drop shank, 6 in. blade, total length 12¾ in., w't per doz. 8½ lbs., per dozen ..... **JFJJ** $10.00

ONE-HALF DOZEN IN A BOX.

FLOWER TROWELS.

No. 216—Ladies', 6 in. cold rolled steel blade, firmly riveted by new method, hardwood handle, w't per doz. 3 lbs., per dozen ..... **JFJ** $1.00

ONE DOZEN IN A BOX.

TRANSPLANTING TROWELS.

No. 217—6 in., blade and shank of one-piece sheet steel, narrow blade, deeply curved, polished hardwood handle, w't per doz. 3½ lbs., per dozen ..... **ABE** $2.00

For many purposes this is better than the bent shank trowel and answers for both trowel and dibble. Unequaled for setting out cabbage, strawberry and tobacco plants. Excellent for lifting and setting out plants and tree seedlings.

ONE DOZEN IN A BOX.

GARDEN FORKS.

No. 10—Cruso, malleable iron, brass ferrule, polished hardwood handle, length 9 in., w' per doz. 4½ lbs., per dozen ..... **JGJ** $1.20

ONE DOZEN IN A BOX.

No. 115—Gem, three 6 in. cast steel tines, one-third bronzed, brass ferrule, 5 in. hardwood handle, w't per doz. 5½ lbs. ...per dozen **BCJ** $4.50

This is a high grade fork, made of the same quality steel as our Ashtabula steel goods.

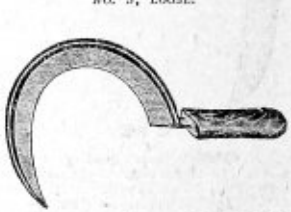
ONE DOZEN IN A BOX.

No. 400—strong, nicely finished, with polished hardwood handle, length of prongs 4½ in., length over all 10½ in., cast steel, tinned brass ferrule, w't per doz. 4¾ lbs., per dozen ..... **AAE** $2.00

LOOSE.

DIBBLES.

No. 2180—Wood handle, steel point, 1¼ in. across large part, w't per doz. 12 lbs. .....per dozen **CHJ** $6.30



ONE DOZEN IN A BOX.

GRASS HOOKS.

No. 2—Cruso, cast steel, gold bronzed, ribbed blade, length 16 in., w't per doz. 12 lbs.....per dozen **BAE** $3.30
No. 3—Cruso, cast steel, gold bronzed, ribbed blade, length 18 in., w't per doz. 13 lbs. ....per dozen **BCJ** $3.80

NO. 2, ONE-HALF DOZEN IN A BUNDLE; NO. 3, LOOSE.

No. 1—German, cast steel, oil finish, length 14 in., w't per doz. 5½ lbs., per dozen ..... **BDJ** $4.00

The length given is distance from end of handle to tip of blade.

ONE-HALF DOZEN IN A BUNDLE.

GRAIN SICKLES.

Cast Steel, Oil Finish, Serrated Edge.

Nos.	2	3

ONE DOZEN IN A CASE.

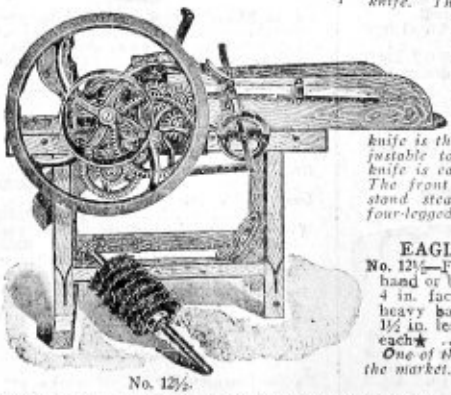
No. 8 —Sickle edge, four sectional, straight edge, serrated blades of high grade tool steel, sections riveted to a strong, angular, malleable iron bar gradually running to a taper handle, wood grips, adjustable to any desired angle, w't per doz. 100 lbs., per dozen ..... **AJBJ** $17.00

No. 10 —Back adjustable to any degree or angle, scalloped serrated edge, blades attached, w't per doz. 100 lbs. .....per dozen **JIJJ** $15.00

NOS. 8 AND 10, ONE-HALF DOZEN IN A CASE.

HAY KNIVES.



No. 6—Spear Point, cast steel forged blade, painted red, length 34 in., hickory handle, cast steel ferrule, w't per doz. 79 lbs., per doz. **ABJJ** $20.00

ONE-HALF DOZEN IN A CASE.

FEED CUTTERS.

No. 10.

No. 12½.

FEED CUTTERS.

No. 09—11 in. spiral knife, length of feed rollers 11in., top roller has heavy, sharp teeth, lower roller is smooth, heavy balance wheel, making three cuts to one turn of the crank, by changing ratchet cuts 4 different lengths, eccentric feed, and downward shearing cut, capacity about 150 lbs. dry, and 300 lbs. green fodder per hour, w't 160 lbs.....each **AJEJ** $17.50

No. 090—Fitted with pulley for belt power, otherwise same as No. 09, each★ .....**ABJJ** $20.00

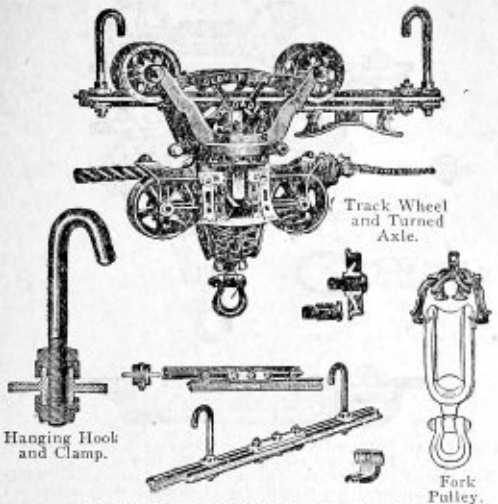
Packed as shown in cut, and in a very compact form, which is a great convenience both in shipping and in the small amount of space required for storage. Strong, handsomely finished, and the original and best knockdown feed cutter on the market today.

HAND LEVER.

No. 10—Hard wood frame, best tool steel knife, top caver over mouth and adjustable gauge plate are of steel, cutter and frame around the end of cutting box are of cast iron, w't each 40 lbs. .....each **CAJ** $5.20

This is the latest improvement in Hand Lever Feed Cutters. The knife is of high carbon steel and so curved that it gives a shearing cut the full length of the knife. The guard extending above the lever closes the throat of the box when the knife is down so that no straw can fall out. An adjustable guard is attached just below the knife and can be moved in or out to regulate the length of the cut. The adjustment of the knife is the simplest possible and is adjustable to a fine shearing cut. The knife is easily removed for sharpening. The front legs being spread makes it stand steadier than the old style of four-legged feed cutters.

EAGLE FEED CUTTERS.



No. 12½—Fitted to be operated by either hand or belt power, 12 in. pulley with 4 in. face, two heavy 11 in. knives, heavy balance wheel, cuts ¼, ½ and 1½ in. lengths, w't 275 lbs., each★ .....**BEHJ** $38.00

One of the best small power cutters on the market.

★*FOR FACTORY SHIPMENT ONLY, LANCASTER, OHIO.*

HAY CARRIERS.

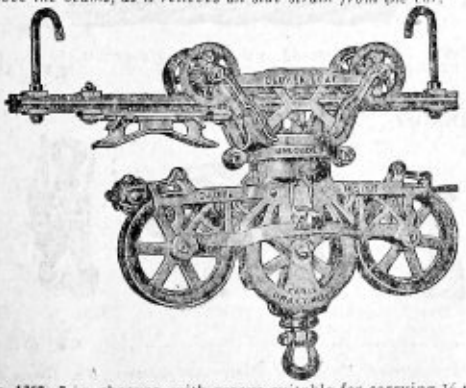
MYERS CLOVER LEAF.

Double Steel Track with Splicing Clamp.

No. 1031—Hay Carriers, for double steel track, malleable iron, aluminum finish, ⅜ in. turned steel axles, swivel and reversible, w't 27 lbs.....each **CHJ** $7.00

No. 644—Double Steel Track, with splicing clamps, in lengths of 6 or 12 ft., w't per foot 2 lbs.....per foot **AJ** $0.20

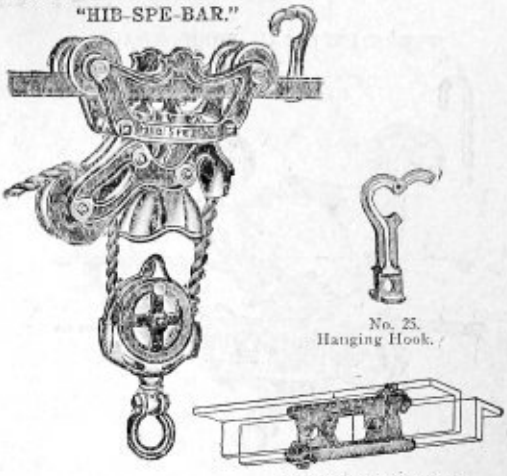
No. 302—Hanging Hooks, 6 in., measured after bending, with clamp, w't per doz. 8 lbs.....per dozen **JGE** $1.40



No. 824—Extra Splicing Clamps, w't per doz. 14 lbs., per dozen .....**AEJ** 2.50

No. 1046—End Stops, for double steel track, per dozen .....**JGJ** 1.00

No. 1085—End Stops, for single steel track, per dozen .....**DE** .60



This combination machine (both swivel and reversible) can be reversed by drawing the rope through from end to end or by turning the swivel.

It is constructed with flanged wheels revolving on ⅜ in. turned steel bearings. The lock is composed of three parts and has no springs. The carrier has a large, flaring mouth to receive the fork pulley. The pulley can swing backward or forward without becoming detached. This swinging fork pulley is a decided advantage when used for filling a mow above the beams, as it relieves all side strain from the car.

No. 1368—7 in. sheaves, with groove suitable for carrying ⅜ to ½ in. **steel wire rope** instead of Manila or Sisal draft rope, w't 37 lbs., otherwise same as No. 1031.....each **DCJ** $8.00

"HIB-SPE-BAR."

Showing No. 20 Track.

No. 5—Hay carrier, for 4x4 in. wood track, otherwise same as No. 4 .....each **CJJ** $7.00

MYERS IMPERIAL—STEEL TRACK.

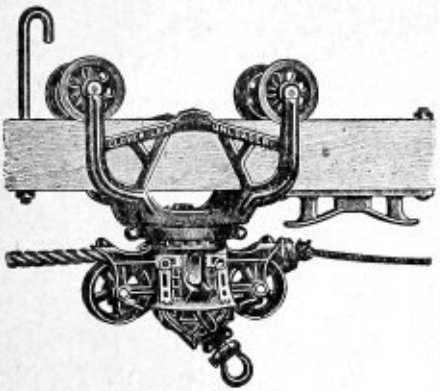
No. 1038—Hay Carriers, for single steel track, malleable iron, aluminum finish, ⅜ in. turned steel axles, swivel and reversible, w't 32 lbs.....each **CHJ** $7.00

No. 518—Single Steel Track, with splicing blocks, lengths of 6 or 12 ft., w't per foot 2 lbs.....per foot **AJ** $0.20

No. 517—Extra Splicing Clamps, w't per doz. 16 lbs., per dozen .....**AEJ** $2.50

No. 519—Hanging Hooks, two pieces bolted, easily removed, w't per doz. 5 lbs.....per dozen **JGE** $1.40

No. 301—Malleable Rafter Brackets, w't per doz. 3 lbs., per dozen .....**CJ** $0.60



The Imperial Single Rail Carrier is heavy and substantially built. Has wide mouth to receive the fork pulley when approaching from any direction. The track wheels revolve on ⅜ in. steel axle. The rope sheaves have extra long hub. The locking device is composed of three pieces and is so arranged as to grasp the fork pulley on both sides of the frame.

The track is an eye beam 1¼ in. deep with 2⅛ in. flange at bottom, which forms the tread for the carrier.

Each carrier is supplied with end stops to prevent carrier from running off track.

HAY CARRIERS.

MYERS IMPERIAL—WOOD TRACK.

No. 1032—Hay Carriers, malleable iron, aluminum finish, ⅞ in. turned steel axles, swivel and reversible, w't 32 lbs., each ..... **J CHJ** $7.00

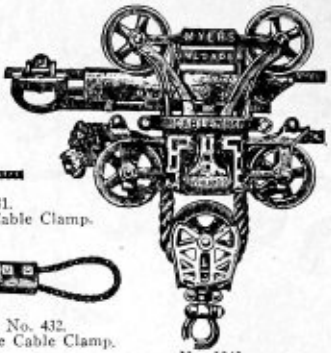
No. 267—Hanging Hooks, ½x10 in., measured after bending, w't per doz. 9 lbs. .....per dozen **J F J** $1.00

No. 268—Hanging Hooks, ½x14 in., measured after bending, w't per doz. 12 lbs. .....per dozen **J G J** $1.20

No. 301—Malleable Rafter Brackets, w't per doz. 3 lbs., per dozen ..... **C J** $0.60

This carrier is identical in construction throughout with the steel track carrier, with the exception of the size of track. It is adapted for 4x4 in. wood track.

AN AVERAGE OUTFIT CONSISTS OF ONE CARRIER, TWELVE HANGING HOOKS, TWELVE RAFTER BRACKETS, FIVE PASS KNOT PULLEYS AND TWO FLOOR HOOKS.



Directions for Making Wood Track.

The track may be hardwood or pine scantling, 4x4, dressed to about 3¾ in. width. If not convenient to get this size for the full length, 4x2 or 4x3 may be used by nailing a piece on where the stop is placed, so as to fit the carrier and operate the lock properly. The pulley used to pull the carrier back in mow should be directly under and in line with the track. Always put an extra hook over the load near the stop.

All Myers hay carriers are made of malleable iron throughout. They are constructed with flanged wheels revolving on ¾ inch turned steel bearings. The carriers have a large flaring mouth to receive the fork pulley when approaching from any direction. The swinging fork pulley is a decided advantage in drawing hay into a well filled mow or over a beam.

The locking device is composed of three pieces and is so arranged as to grasp the fork on both sides of the frame.

MYERS' CABLE OR ROD.

No. 431.
Single Cable Clamp.

No. 432.
Double Cable Clamp.

No. 1043.

Showing an Enlarged View of the Swinging Knocker or Stop Block as Used on the Cable Carrier.

No. 1043—Hay Carriers, for cable or rod track, malleable iron, aluminum finish, with ⅞ in. turned steel axles, w't 31 lbs. .....each **C H J** $7.00

No. 431—Single cable clamps, 2 pieces, bolted, easily removed, w't per doz. 9 lbs. .....per dozen **A F J** $2.75

No. 432—Double cable clamps, 2 pieces, bolted, w't per doz. 15 lbs. .....per dozen **B A E** $3.75

The knocker is one of the special features of this machine. It is so arranged that it swings loose on the track, and stands immediately under the cable, under any and all circumstances. It is held to the cable by means of a steel sleeve through which the cable passes. The sleeve is attached to the knocker by means of two bolts, and can be removed at any time without taking down the cable. The knocker is located at any desired point on the cable by means of an ordinary cable clamp.

AN AVERAGE OUTFIT CONSISTS OF ONE CABLE CARRIER, ONE HAY FORK, 150 FT. ½ IN. GALVANIZED CABLE, TWO SINGLE CABLE CLAMPS, TWO DOUBLE CABLE CLAMPS, TWO ⅝x10 IN. CARRIAGE BOLTS FOR SECURING POLES TOGETHER, 130 FT. ¾ IN. MANILA ROPE, TWO PULLEYS AND FOUR POLES 4x4 IN. X 30 FT. LONG.

Cable.

Cable, ½ in., 7 strand, galvanized, w't per ft. ½ lb., per 100 feet ..... **B F E** $5.50

K. hay carrier, No. 16 for Myers' combination hay carrier, No. 19 for Haymaker, Imperial, and Myers' single rail hay carriers, No. 276 for Myers' new style hay carriers, and No. 69 for Porter's Meadow King hay carriers.

MYERS HAY CARRIERS.

MYERS RIGHT ANGLE FORK AND SLING ELEVATORS.

In Operation.

With Two Sure Grip Pulley Blocks, ⅞ in. Turned Steel Bearing, Double or Triple Hoist.

No. 1173—Sling Carriers, for double steel track, annealed malleable iron, improved rope lock and locking device, w't 52 lbs. .....each **J F G E** $12.00

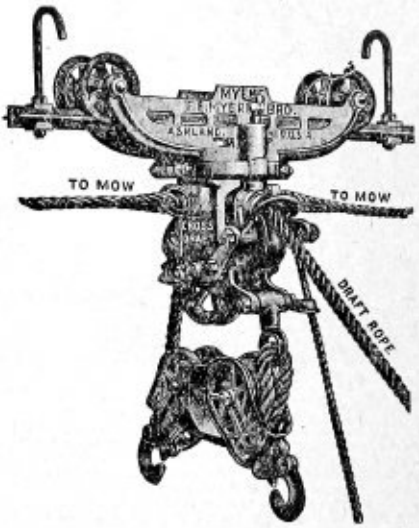
No. H130—Knocker for No. 1173 Sling Carriers, each .....**E J** $0.80

No. 644—Double Steel Track, with joint clamps, in lengths of 6 or 12 ft., w't per ft. 2 1-6 lbs. .....per foot **A J** $0.20

No. 302—6 in. Hanging Hooks, with clamp, measured after bending, w't per doz. 8 lbs. .....per dozen **J G J** $1.40

No. 824—Extra Joint Clamps, w't per doz. 14 lbs., per dozen .....**A D J** $2.50

No. 1139—Triple Hoist Pulleys, for No. 1173 Carriers, per dozen .....**D A J** $7.20



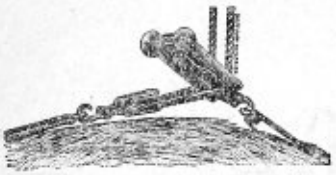
The machine is so arranged that IT ELEVATES THE LOAD AT RIGHT ANGLES WITH THE TRACK, WITH THE RESULT THAT WHEN THE LOAD IS DISCHARGED IN THE MOW, IT LIES PARALLEL WITH THE LOAD ON THE WAGON, a feature not accomplished by sling carriers, unless they use special right angle pulleys which add at least one-half horse power to the draft.

If, by chance, the operator overloads the carrier, the result is that the rope slips through the lock, causing it to wear. This has been overcome on the right angle fork and sling elevator, as it is so arranged that the tension of the rope lock IS REGULATED ENTIRELY BY THE WEIGHT OF THE LOAD. The result is that it is impossible for rope to slip through the lock; hence NO CHAFING OF THE ROPE. THE LOCK ADJUSTS ITSELF TI ANY SIZE ROPE, ¼ TO 1 INCH.

The right angle fork and sling elevator operates automatically, and is tripped by the sling pulley striking a plate immediately under the carrier. IT IS ALSO ARRANGED WITH A SEPARATE TRIP ROPE, BY THE USE OF WHICH THE LOAD MAY BE CARRIED INTO THE MOW AT ANY ELEVATION DESIRED WITHOUT DRAWING ENTIRELY TO THE TOP OF THE BARN.

Many farmers prefer to use two forks, one attached to each pulley.

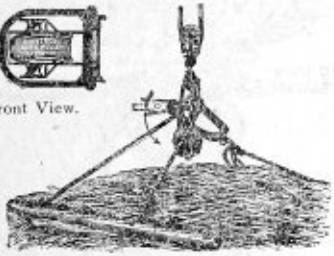
MYERS CROSS DRAFT.



No. 1386—For use on No. 644 double steel track, entire weight of load bears on locking device, therefore the heavier the load the greater the pressure on the lock, no chance for the rope to slip, main rope sheave fitted with lugs which engage the dogs, stopping the revolving of the wheels and assisting the rope lock, holds load at any elevation whenever team stops, and runs to mow from that point, track wheels 3¼ in. in diam., and revolve on ⅞ in. turned steel journals, frame or truck extra heavy and long, w't 34 lbs., each .....J G H J $13.00

The draft rope running direct from the carrier to the floor permits the use of a much shorter draft rope and less walking for the horse than is the case with the other style of sling carriers. The carrier is so constructed that a knocker or stop block is not required. Large rope sheave carrying the rope revolves on large steel axle. Extra heavy and long truck distributes the load over a greater portion of the track.

SLING PULLEYS.



SLING PULLEYS.

Showing Pulley with Fork Approaching.

Front View.

Side View.

Showing Pulley after Load Has Been Compressed.

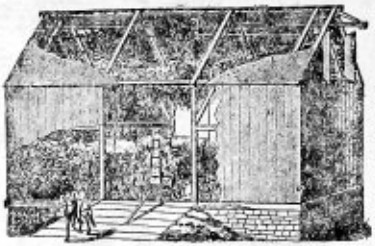
No. 1052—Myers' Universal, malleable iron, reversible, w't 10 lbs.....each **AHJ** $3.00

Can be used with any make of hay carrier, except 7 in. Sheave Cable Carrier, without a change of fork pulley or using a registering head. It is so arranged that it cannot be misplaced on the load as it can be used either side up and in connection with any shape or style of fork pulley.

With this sling attachment the hay is deposited in the mow in the same relative position as on the wagon, and not crosswise as on many sling carriers.

No. 806. Sling Pulley, Locked Together.

No. 806. Sling Pulley, Spread Apart.



No. 806—Myers', malleable iron, self-locking, with registering head for any make carrier, in ordering give number of registering head, w't 10 lbs.....each **AHJ** $3.00

PARALLEL SLING PULLEYS.

No. 1276—Malleable frame, with 4½ lb. iron sheave, fitted for using ⅝ or ¾ in., 6 strand, 19 wire cable hoisting rope, for handling slings for stacking purposes, w't per doz. 91½ lbs.....per pair **AHJ** $3.00

DIRECTIONS FOR REVERSING CARRIER.

Set fork in hay. Tie ends of rope together, to which horse and weight are attached. Pull on small rope until knot comes to the floor, then untie ropes. Fasten weight on small rope, change pulley to floor hook. This reverses carrier for opposite direction without leaving the floor or climbing up. Use all knot passing pulleys. For taking in bay at end barn use V-shaped brace for track support, as shown in cut.

MATERIAL REQUIRED FOR A STEEL TRACK OUTFIT FOR DIFFERENT LENGTH BARNS.

For a 40-foot Barn—One Hay Unloader, 36 feet Steel Track, 19 Hanging Hooks, 19 Rafter Brackets, 5 Knot Passing Pulleys, 1 Fork, 6 Floor Hooks, 110 feet ¾-in. Manila Rope, 50 feet ⅜-in. Check Rope, 40 feet ⅜-in. Reverse Rope.

For a 50-foot Barn—One Hay Unloader, 48 feet Steel Track, 25 Hanging Hooks, 25 Rafter Brackets, 5 Knot Passing Pulleys, 6 Floor Hooks, 130 feet ¾-in. Manila Rope, 55 feet ⅜-in. Check Rope, 50-feet ⅜-in. Reverse Rope.

For a 60-foot Barn—One Hay Unloader, 54 feet Steel Track, 28 Hanging Hooks, 28 Rafter Brackets, 5 Knot Passing Pulleys, 6 Floor Hooks, 160 feet ¾-in. Manila Rope, 60 feet ⅜-in. Check Rope, 60 feet ¾-in. Reverse Rope.

For a 70-foot Barn—Hay Unloader, 66 feet of Track, 34 Hanging Hooks, 3½ lbs. Bracket Nails, 5 Fig. 1120 Pulleys, 1 Fork, 6 Floor Hooks, 190 feet ¾-in. Draft Rope, 70 feet ⅜-in. Check Rope, 70 feet ⅜-in. Reverse Rope.

For an 80-foot Barn—Hay Unloader, 78 feet of Track, 40 Hanging Hooks, 40 Rafter Brackets, 4 lbs. Bracket Nails, 5 Fig. 1120 Pulleys, 1 Fork, 6 Floor Hooks, 210 feet ¾-in. Draft Rope, 80 feet ⅜-in. Check Rope, 80 feet ⅜-in. Reverse Rope.

Different lengths of barns will use track, hanging hooks and rope in same ratio as above.

If required to take hay in at end of barn and have rope pass down at far end to horse, same amount of draft rope. If draft rope be returned to same end of barn and then down, this requires about one-fourth more draft rope.

HAY RACK LOOPS, BRACKETS, ETC.

DOUBLE STEEL TRACK.

Put Together Before Shipping.

All Double Steel Track is put together as shown in illustration before shipping. The advantage of this plan is that in erecting the only thing necessary is to attach the splice clamps. Instead of old method of breaking joints in center of rail, a long, heavy clamp is used. This plan is recommended, as it adds all the advantages of the single rail, and makes the double rail more desirable for dealers to handle.

How Track Should Be Placed.

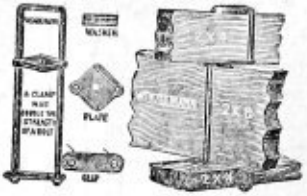
Showing how track should be put up and how rope is tied from one rafter to the other close under the track to make stop for carrier at end of barn. Also how rafter brackets are placed, and how pulley should be fastened.

Directions for Erecting Myers' Patent Steel Track.

Scaffold, by placing rope from rafter to rafter, say 6 ft. from ridge pole or peak and about 10 ft. apart. Then place extension ladder across the ropes with board to stand on. Now nail one rafter bracket at each end of barn and draw a line from one end to the other and stretch tight. Then nail all rafter brackets even with this line. You are now ready to put up the track, which can be done either in sections or by clamping the entire length together. Hoist near to rafter brackets by ropes. Then place hanging hook over rafter bracket and finish by putting in bolt.

Material Required—One reversible carrier, track the required length of barn, one hanging-hook and rafter bracket for each rafter, five malleable knot passing pulleys, one fork, two floor hooks, one rope hitch, enough ¾ or ⅞ in. rope to operate the carrier—usually takes from 125 to 160 ft., but depends upon length of barn—½ in. reverse rope the length of track, trip rope required length.

HAY RACK LOOPS.



Showing Loop in Use.

No. 42—Hall's, steel, painted blue, w't per doz. sets 96 lbs., per dozen sets ..... **JGBJ** $13.00

These are designed to bolt on the ends of cross timbers of the hay rack, so that the side stakes of the basket of the rack will fit therein at the end of the timbers as shown in cut. Will hold the 2x4 in. stake securely having its lower end made tapering.

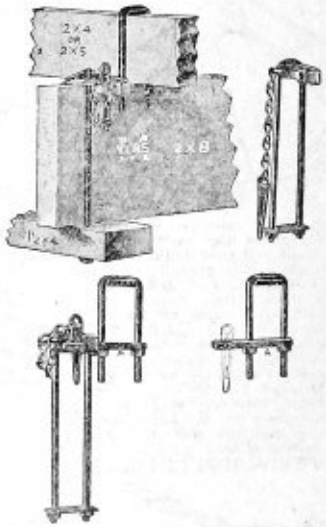
ONE SET OF EIGHT IN A BUNDLE, WIRED.

HAY RACK BRACKETS.

WENZELMANN.

No. T1—Consists of eight 14 in. wrought steel clamps, to clamp 2x4 in., 2x8 in. and 2x4 in., complete with brackets, upper washers, lower clips and nuts, w't per doz. sets 204 lbs. .....per dozen sets **AJHJ** $18.00

No. T0—12 in. clamps, otherwise same as No. 1, per dozen sets ..... **AJHJ** $18.00



No. T2—Consists of eight 16 in. wrought steel clamps, to clamp 2x6 in., 2x8 in. and 2x4 in., complete with brackets, upper washers, lower clips and nuts, w't per doz. sets 222 lbs. .....per dozen sets **AAEJ** $19.20

No. T3—18 in. clamps, otherwise same as No. T2, per dozen sets ..... **ABBE** $20.40

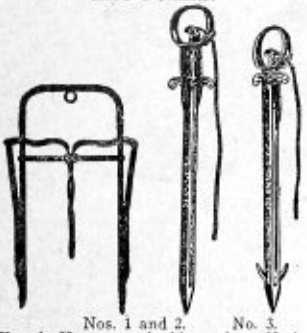
These brackets make the strongest hay racks, as the wood is not weakened by boring holes for bolts where strength is most essential. By their use lighter material can be used.

ONE SET IN A BOX.

TAKE-DOWN HAY RACK CLAMPS.

No. 06—Sills 2x8 in., cross timbers 2x4 or 2x5 in., steel bar passes through malleable iron loop, held in place by malleable key, w't per doz. sets 216 lbs., per dozen sets ..... **ADDJ** $24.00

The special advantage of this clamp over the Wenzelmann is that the hay rack is built in two sections and held together by two wedge shape pins, this enables one man to place the rack on the wagon or remove it without assistance.



In addition to this, the lower part composed of sills and lower cross pieces making an ideal body for hauling wood, timber, lumber and such things not conveniently handled with an ordinary wagon box. By the use of a set of stake irons it may be transformed into a hog rack.

This is the most convenient form of hay clamp now on the market and is thoroughly recommended.

ONE SET IN A BOX.

HAYING TOOLS.

HAY FORKS.

Nos. 1 and 2. No. 3.

No. 1—Harpoon, double point, 25 in. spring steel tines, w't per doz. 132 lbs. .....per dozen **AAEJ** $19.20

No. 2—Harpoon, double point, 31 in., spring steel tines, w't per doz. 222 lbs. .....per dozen **ADDJ** $34.00

No. 3—Nellis, harpoon, single point, spring steel, w't per doz. 198 lbs., per dozen .....**BAFJ** $36.00

No. 617—Myers', automatic grapple, tines and arms of high carbon spring steel, locks of best annealed malleable iron, 4 tines, double grapple, spreads 55 in., w't 34 lbs. ....each **DBJ** $8.00

No. 619—6 tines, triple grapple, w't 51 lbs., otherwise same as No. 617, each .....**EAJ** $9.50

This fork is unlike any other, inasmuch as it is not only balanced at all points, but in addition the natural pull on the trip rope closes the fork and locks it securely, thus returning it to the load all ready to enter the hay without any attention whatever from the operator as to setting of lock, etc.

CENTER TRIP SPRING LOCKS.

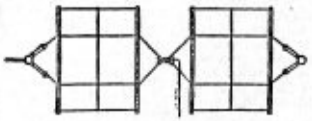
Showing Lock Closed.

Showing Lock Open.

No. 622—Myers', malleable iron, 3 pieces, w't 1½ lbs. ..each **JFJ** $1.00

CENTER TRIP ADJUSTABLE SLINGS.

Showing No. 620 Sling Complete.

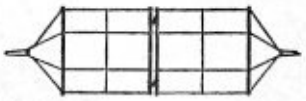


No. 620—Myers' Pattern, 4 ft. seasoned ash cross bars, malleable iron center trip spring lock, ½ in. loose twist ropes, adjustable from 17 to 20 ft., w't 20 lbs. .....each **AIJ** $3.20

No. 625—5 ft. cross bars, w't 23 lbs., otherwise same as No. 620, each .....**BCJ** $3.80

No. 1231—5 ft. seasoned ash cross bars, malleable iron center trip spring lock, 3 ropes, adjustable from 17 to 20 ft., each .....**BDJ** $4.00

These are especially adapted for the Minnesota trade.



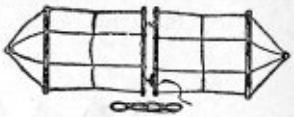
Showing No. 621 Sling Complete.

No. 621—Utah Pattern, 6 ft. seasoned ash cross bars, Myers' center trip spring lock, ½ in. ropes, extra end and center ropes, adjustable from 17 to 20 ft., w't 26½ lbs., each .....**CJJ** $5.00

The ropes are fitted with adjustable take-ups at either end, allowing the length of the sling to be varied from 17 to 20 feet. Any number of slings can be used on a load, depending on the size and number of bundles to the load.

DOUBLE LOCK SLINGS.

No. 1308—With hook and eye at one end of the sling stick and a lock at the other end making two separate connections, w't 40 lbs., each **DBJ** $7.00



This sling is connected and locked with one motion. The two separate connections add great strength and cause the load to be carried without drooping at each side.

See page 242 for Hay Fork Pulleys.

DOUBLE LOCK ADJUSTABLE CHAIN SLINGS.

No. 1589.

No. 1590.

New Design Having Two Connections Between the Two Halves of the Sling Instead of the One Center Lock Generally Used, Otherwise the Same as No. 1308.

No. 1589—Myers' pattern, 5 ft. long, galvanized No. 00 brown chain, w't 19 lbs. .....each **CFJ** $6.00

No. 1590—Myers' pattern, 6 ft. long, galvanized No. 00 brown chain, w't 26 lbs. .....each **DHJ** $8.00

These slings are made for handling hay or bundles of grain and fodder from the wagon; they are used extensively in some of the Western States.

SNATCH BLOCKS AND SINGLETREES.

No. 628—Myers' Snatch Blocks, malleable iron, w't per doz. 48 lbs., per dozen .....**JFJJ** $11.00

This device shortens the distance the horse travels, without reducing the elevating power.

No. 472—Myers' Hoisting Singletrees, wood, with malleable iron attachment, w't 6½ lbs., per dozen .....**AJDJ** $19.20

A very convenient article. It prevents the whiffletree from dragging on the horse's heels.

HAY CARRIER EXTRAS, PULLEYS, ETC.

HAY CARRIER EXTRAS.

Fork Pulley for Myers' New Style Hay Carriers.

No. H254—4½ in. wheel, malleable iron frame extending around entire surface of sheave, malleable iron clevis, steel bolt, swivel, w't per doz. 43½ lbs. .....per dozen **JGBJ** $12.00

This pulley is especially designed for rough usage. The frame is made in two pieces riveted together at swivel eye. The frame extending entirely around the sheave is a great protection to the rope.

No. H50. Fork Pulley, Complete.

No. 103. Stop Block or Knocker.

No. 201. Rope Sheave.

No. H413 Knocker.

No. H280 Knocker.

No. H130 Knocker.

No. H280—Knockers, for cable unloaders .....each **JFJ** $1.00

No. H50—Fork Pulleys, complete, for Myers' old style hay carriers, w't 3½ lbs. .....each **JFJ** $1.00

No. 103—Stop Blocks or Knockers, for Myers' single steel track hay carriers .....each **CE** $0.50

No. H413—Extra Knockers or Trip Blocks, for Myers' Clover Leaf steel or wood track and Imperial wood track hay carriers.....each **CE** $0.50

No. H130—Extra Knockers or Trip Blocks, for Nos. 1173 and 1175 Myers' Sling Carriers .....each **EJ** $0.80

No. 201—Rope Sheaves, with bushings for Myers' old style hay carriers, each .....**CE** $0.45

No. H258—Rope Sheaves, for Myers' new style hay carriers, each .....**CE** $0.45

HAY FORK HOOKS.

Wrought Iron.

No. 50—⅝x7 in., w't per doz. 8 lbs., per dozen .....**JFJ** $1.20

No. 60—¾x8 in., w't per doz. 16 lbs., per dozen .....**JHJ** $1.40

MYERS' ROPE HITCHES.

No. 376—Malleable iron, swivel hook, w't per doz. 15 lbs., per dozen .....**AGE** $3.20

The rope can be released from whiffletree instantly with this hitch. The hitch can be shortened to any desired length by drawing on the end of the rope. A twist in rope is removed by means of swivel, instead of going to the end to affect the working of the carrier.

HAY FORK PULLEYS.

No. 15.

No. 36.

No. 15—3½ in. iron wheel, ¾ in. bearing, swivel, frame reinforced with heavy ribs on edge and center, w't per doz. 43 lbs., per dozen **BAJ** $3.20

No. 36—6 in. maple wheel dipped in hot oil, 1 in. loose pin, heavily ribbed cast iron frame, "pass knot," swivel, w't per doz. 48 lbs., per dozen .....**BFJ** $4.00

Extra Wood Wheels, per dozen .....**JIE** 1.50

No. 26.

No. 046.

No. 26—6 in. maple wheel, 1⅛ in. loose pin, cast iron frame, swivel, w't per doz. 36 lbs. ....per dozen **BAJ** $3.20

Extra Wood Wheels, per dozen .....**JIE** 1.50

No. 046—Reed's pattern, 4½ in. wood wheel, hollow axle, wrought iron strap, forged steel eye, riveted hardwood shell, swivel, self-lubricating, w't per doz. 35 lbs., per dozen .....**BFJ** $4.00

Extra Wood Wheels, per dozen .....**JIE** 1.40

ONE DOZEN IN A BUNDLE.

HAY FORK PULLEYS.

No. 1133.

No. 1120.

No. 1133—"O. K.," plain, 6 in. maple wheel dipped in hot oil, heavily ribbed cast iron frame, 1⅛ in. loose pin, swivel, w't per doz. 42 lbs., per dozen .....**BFJ** $4.00

No. 1120—"O. K.," pass knot, 6 in. maple wheel dipped in hot oil, heavily ribbed cast iron frame, 1 in. loose pin, swivel, w't per doz. 56 lbs., per dozen .....**CBJ** $5.00

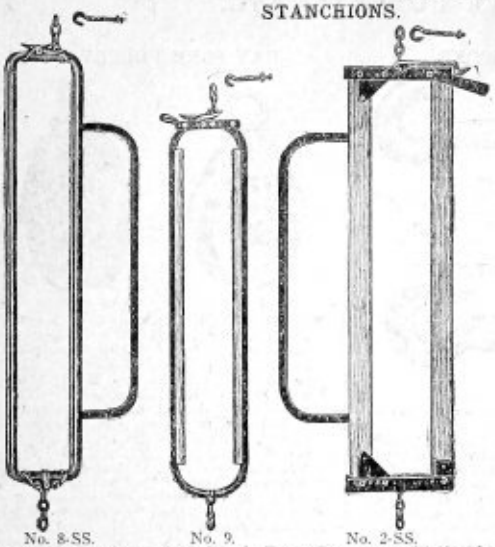
The frames of Nos. 1133 and 1120 are two separate heavy ribbed halves riveted together at the swivel eye. The construction of the frame provides an easy approach for the rope.

No. 56—One piece wrought steel frame, malleable swivel eye, cast iron sheave 5½ in. in diameter, revolving on steel bearing, w't per doz. 43 lbs., per dozen .....**BCJ** $3.50

No. 1550.

No. 189.

No. 1550—For ⅜ or ½ in. wire cable, 7 in. iron wheel, high carbon steel frame, steel bushing, roller bearings, w't per doz. 80 lbs., per dozen .....**JIJJ** $14.20



The iron sheave revolves on a steel bushing and a heavy machine bolt passes through the bushing, making it very strong and durable.

No. 189—Derrick, 1½ in. hard maple frame, wood wheel, steel yoke and hook, w't per doz. 56 lbs., per dozen .....**EJE** $8.00

The frame of this pulley is wider than the sheave, so as to allow two pulleys to be used together, the one sheave not interfering with the other. This is an extra heavy pulley intended for heavy work.

STANCHIONS AND STALLS.

STANCHIONS.

No. 8-SS. No. 9. No. 2-SS.

Steel Stanchions, Rust-Proof Enameled, with Malleable Fittings, Chain Hung, with Eye Bolt, Gravity Latch, No Springs.

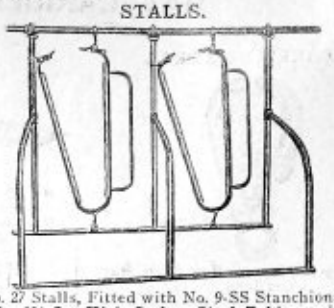
No. 9—Adjustable, wood lined, Channel bar, length inside 48 in., adjusts to inside widths 6½, 7¼ or 8 in., w't per doz. 228 lbs. .....per dozen **AHDE** $38.40

No. 9-SS—Adjustable, wood lined, with Sure-Stop, otherwise same as No. 9, w't per doz. 240 lbs..★ per doz. **BACJ** $44.40

No. 8—Adjustable, U-Bar, not wood lined, length inside 48 in., adjusts to inside widths 6½, 7¼ or 8 in., w't per doz. 204 lbs. .....per dozen **AFAE** $33.60

No. 8-SS—Adjustable, U-Bar, with Sure-Stop, not wood lined, otherwise same as No. 8, w't per doz. 216 lbs., per dozen★ .....**AIJJ** $39.60

No. 7—Non-Adjustable, U-Bar, not wood lined, length inside 48 in., width inside 6¼ in., w't per doz. 216 lbs., per dozen .....**AEJJ** $31.20



Wood Stanchions, Best Oiled Hard Maple, with Steel and Malleable Fittings, Chain Hung, with Eye Bolt. Gravity Latch, No Springs.

No. 2—Adjustable, Wood, length inside 48 in., adjusts to inside widths 5, 6, 7 or 8 in., w't per doz. 180 lbs., per dozen★ .....**ADDJ** $30.00

No. 2-SS—Adjustable, Wood, with Sure-Stop, otherwise same as No. 2, w't per doz. 192 lbs.★ .....per dozen **AGCJ** $36.00

PACKED LOOSE.

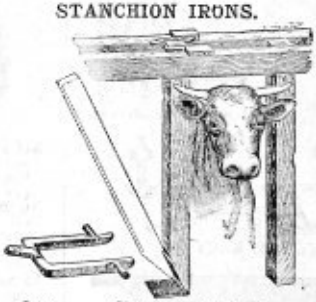
STALLS.

No. 27 Stalls, Fitted with No. 9-SS Stanchions.

Steel Stalls, 1¾ In. High Carbon Steel Tubing, with Malleable Clamps. Bottoms Bolt to Angle Steel Anchor Bars, which, Embedded in Concrete Floor, Prevent Racking and Insure Perfect Alignment. Stalls Do not Include the Stanchions, which Must Be Ordered Separately.

No. 27—Stall only, galvanized, without stanchion or manger, w't each 42 lbs.★ .....each **DEJ** $9.30

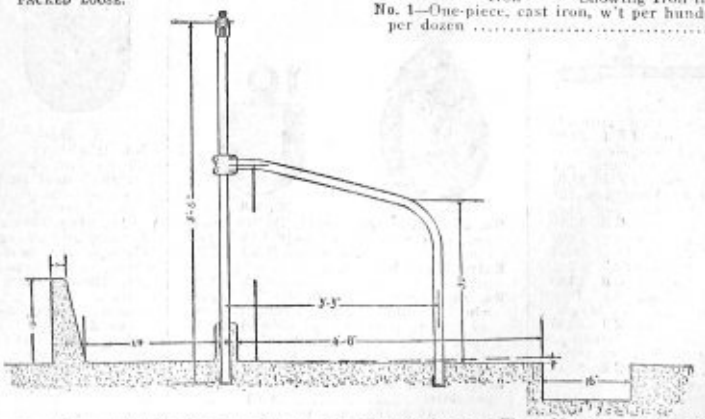
No. 27P—Stall only, rust-proof enameled, without stanchion or manger, w't each 42 lbs.★ .....each **CCJ** $6.30



No. MP—Galvanized steel manger partitions, for dividing built-in concrete mangers, w't eatlh 19 lbs., each★ .....**AGJ** $3.50

No. M—Galvanized steel complete mangers, with tension spring, for use where mangers are not built in, w't each 40 lbs.★ .....each **BIJ** $6.00

NOTE—Nos. MP and M Mangers are Hinged to the Stall Uprights, and can be easily lifted up or inverted for cleaning.



PACKED LOOSE.

STANCHION IRONS.

Iron Showing Iron in Use.

Nos. 3 and 4 have a positive draw or sliding cut of vast advantage to the operator.

ONE DOZEN IN A WOODEN BOX.

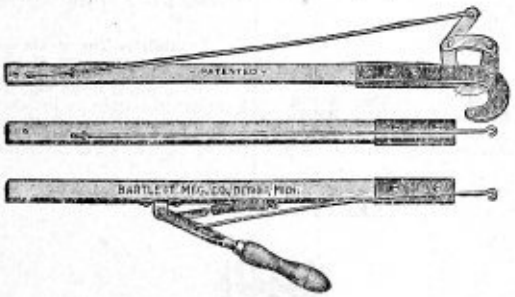
TREE PRUNERS.

WATERS' Improved, Polished Steel Blade, Enameled Cast Steel Hook.

No. 50—Feet	6	8	10	12
W't per doz., lbs.	34	44	50	58
Per dozen	$27.00	30.00	30.00	33.00
	JFFJ	JGBJ	JGEJ	JHJE

Extra Blades ..... per dozen **AAE** $3.50

ONE DOZEN IN A BUNDLE.



SEARIGHT'S Forged Steel, High Grade Crucible Tool Steel Blades, Mounted on Hardwood Poles.

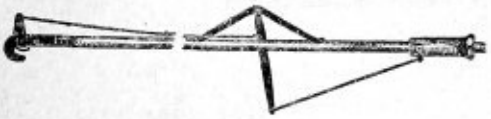
No. CL1—Feet	8	10	12	14
W't per doz., lbs.	54	60	66	72
Per dozen	$36.00	39.00	39.00	42.00
	BJGJ	BBDE	BBDE	BDAE

No. 1 is made with a hook and side lever. It is calculated for heavy work and will cut a limb up to 1¼ inches in diameter. Instead of running the rod connecting the knife lever along one side the pole to a handle lever, handle lever is placed on the opposite side, which allows the rod to cross the pole. As a result one-half the strain is thrown on one side of the pole and one-half on the other, which gives double strength, and instead of the pole warping and bending, it has a tendency to remain straight and stiff.

The strength, durability and easy cutting qualities of these pruners will appeal to both the merchant who handles them, and the man who may have the pleasure to use them. Each trimmer is fully warranted.

Compound Lever Tree Pruner with Jointed Handle in 4 Ft. Sections Which Can Be Arranged to Cover Any Length Desired.

No. CL4-J—Length, ft.	8	12	16
W't per doz., lbs.	56	68	80
Per dozen	$36.00	39.00	42.00
	CJBE	CBDJ	CDEE



This Pruner is composed of the cutting head on a 4 ft. top section and the operating handle and lever on a 4 ft. bottom section, any greater length is obtained by adding middle sections of 4 ft. each. Thus, a 4 section or 16 ft. Pruner combines an 8, 12 or 16 ft. Trimmer, enabling one to reach the lowest or highest trees. The cutting head is made truss shaped from strong high grade rolled steel, the compound levers working between the side plates. The complete head is attached to the pole by three strong bolts, the operating wires that lead to the handle section are of the very best coppered Bessemer steel, joined by close fitting loops at each pole intersection. The cutting strength lies in the compounding of the leverage, and by crossing the pole with wire, the strain is distributed and hence pole is stronger than on ordinary Pruners.

The great efficiency of these knives, their easy cutting features, strength and lasting qualities, should appeal to those who appreciate a thoroughly high grade tool.

The knives are rolled from high grade crucible tool steel, carefully tempered in a heat treating furnace, are concave ground on both sides, making easy cutting up to the full capacity of the hook.

TREE PRUNERS AND FRUIT PICKERS.

Superior features of these Pruners and Pickers—

Power—Through the application of the new compound leverage it requires only a quick pull on the slide grip to cut the smallest twig or inch limb, thus leaving no chance for the blade to bind.

Ease—Being held in the natural way with both hands, one hand always on the slide grip ready for the cutting stroke, and having blades of Sheffield tool steel, properly tempered and ground to the finest cutting edge, makes the Bastian by far the easiest to operate.

Speed—Operated exactly like a pump gun, but without ammunition, the Bastian brings down the limbs while the other fellow is still bracing himself.

Durability—The strain on the pole, possibility of bending hooks, and breaking of blades has been reduced to a minimum, through use of the slide grip around the pole, which gives a direct down pull with no strain, instead of the side pull with strain as in other pruners. All this coupled with selected material, blades guaranteed against defects and skilled workmanship makes the Bastian the best pruner on the market which explains its increasing popularity.

KEES FRUIT PICKERS.

No. 8—Circle and ferrule are of 16 gauge steel protected by a coat of black japan baked on, cloth bag, 8 in. deep, 6 in. in diameter, w't per doz. 10½ lbs. .....per dozen **DHJ** $8.00

There are no ends of wire to injure the fruit; nothing to catch in the branches.

The superiority of these fruit pickers can be seen at a glance. Picking can be done at any angle by a gentle push or pull. The fruit falls into the cloth bag so there is no danger of bruising it. Can be gathered as carefully as by hand, without the work of climbing ladders and moving them about.

While these pickers are being introduced into America for the first time, it is by no means an experiment, being in general use in Germany.

We do not furnish pole or handle. A fish pole will serve as well as anything.

No. R-3 REVONOC—32x26x11 in., capacity 3 cu. ft., w't 78 lbs., each **DEJ** $7.50

REVONOC *round back scrapers are made deeper and longer than other brands and of an extra quality of steel.*

The REVONOC *scraper has a perfect cutting edge and, therefore, fills easily. The back is shaped to prevent the dirt going over the top of the back while filling.*

The scraper carries steadier and loses less dirt in going to the dump than any other round back scraper.

It has steel hooks, steel bail painted vermilion and a perfect working stee swivel.

The seamless japanned bowls are made of a special grade of steel. They scour easily and will work in any kind of soil.

IL-A-NOY, American Pattern, One-Piece Pressed Steel Bowl, 10 Gauge, Round Back, Steel Bail, 30 in. Hardwood Handles, with Runners.

Nos. C1 and C2 are Climax Brand, for farm work and light road work.

Nos. A1 to A3 are American Brand, for regular and heavy road work.

No better scrapers made.

DESCRIPTION.

Wheels—Best wood hub wheels, made of thoroughly seasoned stock.

Axle—Of hammered square steel. Arched high to give more room for the dirt in filling.

Tongue—Best quality of oak, very strongly ironed, with additional brace to draft bars.

Cross Bars—Heavy wooden cross bar, which not only serves as a brace to the draft bars, but prevents draft bars from bending down at the corners.

Draft Bars—Special steel. Very strong. Securely braced.

Bowl—Best quality of high carbon steel made especially for the purpose. It raises high to clear obstructions when going to the dump.

Bail—Conforms to shape of the top of the bowl, thus increasing its capacity, and avoiding the difficulty experienced with the old style bail when pulling down the lever.

Hooks—The hooks to prevent the scraper from dumping while filling are of ample strength, and carefully adjusted to enable the scraper to fill readily, and at the same time prevent the bowl from going too deep.

Sand Excluders on the axles are simple, practical and efficient. No trouble to take the wheel off to properly oil the spindles.

WHEELED SCRAPERS.

BUCK SCRAPERS.

No. 1—Without runners, 5 ft. cutting edge, capacity 18 cu. ft., w't 325 lbs., each★ ..... AEIJ $26.50

No. 1R—With runners, otherwise same as above★..... each AFEJ $27.50

No. 2—Without runners, 4 ft. cutting edge, capacity 24 cu. ft., w't 300 lbs., each★ ..... AEJJ $25.00

No. 2R—With runners, otherwise same as above★..... each AEFJ $26.00

No. 3—Without runners, 3½ ft. cutting edge, capacity 12 cu. ft., w't 265 lbs., each★ ..... ADDJ $24.00

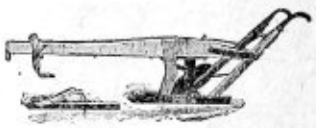
No. 3R—With runners, otherwise same as above★..... each AEJJ $25.00

These scrapers on account of their large capacity are especially recommended for use in loose or sandy soil and for leveling land for irrigating purposes. The cutting edges are made extra heavy of a superior quality of high carbon steel These cutting edges can be replaced when worn.

Width of blade, 12 in.; depth of back, 20½ in.; thickness of blade, ⅛ in.; thickness of back, 1/16 in.

FLAT BOARD SCRAPERS.

No. 50—Width 50 in., w't 80 lbs., each★ ..... EAJ $8.50



For Factory Shipment Only, F. O. B. Sidney, Ohio.

Because of the peculiar shape and attachment of the curved draw bars, the user can handle this scraper with ease, and can make or clean out a ditch without driving the team into it. Just the thing for cleaning barnyards and filling tile drains.

Furnished with bent handles unless otherwise ordered. The steel blade is wide and extra heavy.

★*FOR FACTORY SHIPMENT ONLY.*

For Factory Shipment Only, F. O. B. Sidney, Ohio.

**These weights include the extra share. No extra share is supplied with No. T7. Nos. T7 and T6, are township road plows. Nos. R1 to R3 are suitable for extra heavy road work and for railroad construction.*

Beams of the best white oak or hickory. Heavy iron strap on both upper and lower side of beams. Standards of heavy wrought-iron, thoroughly braced. Mouldboards and shares of best plow steel, extra heavy and double shinned. Landsides very heavy and long.

All of these plows are furnished with reversible steel cutter. Handles of the best white oak or hickory, strapped with iron, well braced, and made with solid iron hand-holds. Steel clevis, made extra strong, with two steel rings. The steel gauge shoe is much better and more durable than a gauge wheel. The handles are protected while plow is dragging, by a steel runner which is bolted to the beam. These plows will work in any soil and are built for the hard service required of road plows.

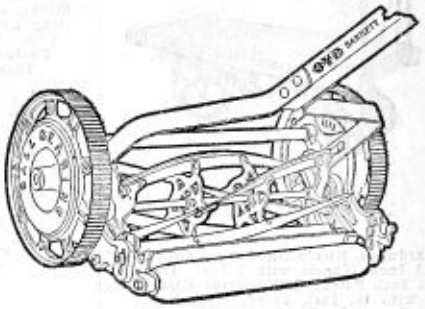
On this and the following pages we illustrate a line of Mowers which answers all the requirements of any dealer or locality. The several patterns are adapted to the demand as to the size, variety and quality, and at the same time embrace a wide variation in price. Special attention is called to the detailed description printed under each mower. These mowers are made by the best factories in the United States and will prove satisfactory in every particular. They represent the greatest value procurable for the money invested.

THE BARTLETT, BALL BEARING.

Furnished from Stock Only.

The Bartlett was made first and the cost figured afterwards. It is the most successful mower that we have ever known.

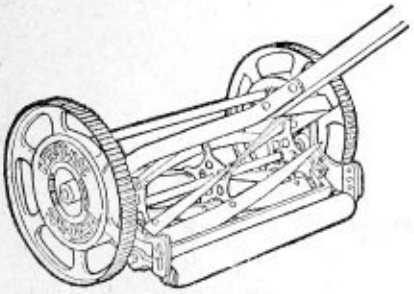


Every blade is made of crucible steel in the old fashioned way, hardened and tempered in oil, notwithstanding the fact that it involves six to ten times as much expense as if made of Bessemer or open hearth steel. Other manufacturers who harden and temper the revolving blades use open hearth steel and simply heat it enough to give it the necessary curve, allowing it to air harden. This simply puts a surface hardening on it, but does not affect the blade throughout.

We know of numerous instances where this machine has been running for many years without requiring regrinding or any other sharpening than that which can be done by use of a screw driver, in adjusting the under knife so that it is kept in contact with the revolving blades. This feature alone is worth the full retail price of the mower, because it will save the user the expense of sharpening.

The dust proof ball bearing equipment of this machine is equal to that of the finest bicycle or automobile. It costs three times as much to make these parts as it does in the usual style.

The reels are perfectly adjusted when at the factory and it is rarely that adjustment is necessary. The wheel axles are of extra large size and length, and made of cold drawn steel shafting. The entire machine is made in jigs on an interchangeable plan, so that if by accident a part is broken or worn out, a duplicate which will work properly can be secured at a small expense. This care in manufacturing produces a perfect working of all parts; a smooth running and noiseless machine that will wear a life-time if given ordinary care.



Decoration—Beautifully finished in gold, maroon and blue, striped to enhance color effect.

10 Inch Driving Wheels, 6 Inch Reel, Five Highest Grade Crucible Steel Revolving Knives, Upturned Dead Knife Ground on Both Edges, Three Reel Braces, 9-16 Inch Reel Axle with Bicycle Ball Bearings, 5-8 Inch Front Cross Rod, Hooks for Attaching Grass Catcher, Hardwood Roller and Handle.

Cut	15	17		19	21 in.

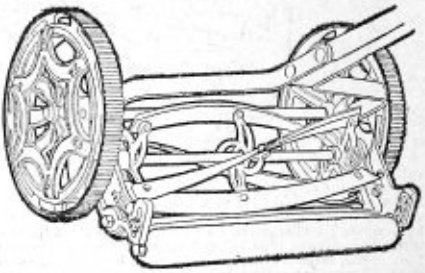
	JIDJ	AJEJ	ONE IN A CASE.	AAAE	ABGE

THE REVONOC, BALL BEARING.

One of the best constructed and highest grade B. B. lawn mowers ever placed on the market. All connecting points and bearings thoroughly machined. Second cut being taken on each operation to insure exact dimensions to 1-1000 in. Shoulders milled on end of steel shrub rod and recesses milled in ends of cutter bar. Distance from one shoulder to other on shrub rod precisely the distance from one recess to other in ends of cutter bar, making perfect four squared frame of strongest frame construction possible to build, so that mower will withstand hardest service.

Ball bearing parts of high speed steel, tempered under secret process, reel bearings equipped with new patented automatic adjustment, the most important invention in recent years in lawn mower construction. Consists of case hardened steel spring, working against a collapsible sleeve around shaft, and inside cone. At the instant all lost motion is taken up by spring sleeve grips shaft, preventing further pressure than is desired for most delicate adjustment. This adjustment continues to accommodate itself to conditions keeping bearings always adjusted to a nicety, without the slightest attention from operator.



A ¾ in. steel shaft and double riveted end spiders prevent reel from being sprung and add increased momentum. Five revolving blades of best crucible steel, tempered in oil, shear cut, self sharpening, and ground under water by same process used in manufacture of finest cutlery. Beautifully finished in gold and aluminum bronzes, with decorations in ultramarine blue.

11 in. drive wheels, 6 in. diam., reel, ¾ in. shrub rod.

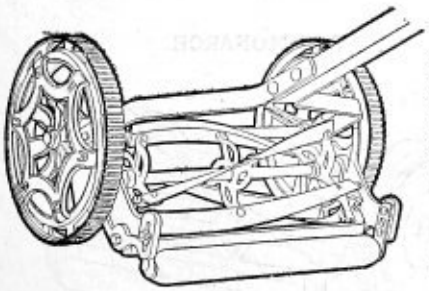
Cut	14	16		18	20 in.
Weight	59½	64		65	68 lbs.
Each	$22.00	23.00		24.00	25.00
	JGEJ	JGHJ	ONE IN A CASE.	JHAE	JHDE

H. S. B. & CO.'S LAWN MOWERS.

THE IL-A-NOY, BALL BEARING.

Very high grade ball bearing, of popular new open type construction, holes drilled through center of side plates, through which piece of steel shafting ⅝ in. in diam. passes, forming both a shrub guard and an axle for wheels, enabling them to turn on steel bearings. Fit between shafting and side plate holes so perfect that there is no play, and with a set screw passing through a lug on each side plate and fastening into recesses in shafting, makes a strong and immovable frame construction. Recesses in shafting accurately placed so that side plates are at right angles with the cutter bar, making a true "four squared" frame.

Four revolving blades of high grade steel, self sharpening and ground under water to preserve temper; reel bearings equipped with new automatic adjustment, ball bearing part of high quality cone steel, carefully hardened.



Decoration—Wheels red and gold, gold reel and bar, green side plates striped in appropriate colors.

10½ in. drive wheels, 6 in. diam., reel, screw adjusted cutter bar, hardwood roller and handle lacquered to protect from weather.

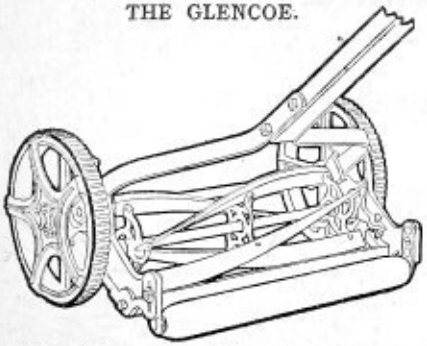
Cut	14	16	18	20 in.
Weight	57	61	64	63½ lbs
Each	$18.00	19.00	20.00	21.00
	JDHJ	JEAJ	JEDJ	JEGJ

ONE IN A CASE.

THE SUBURB.

Without doubt the best plain bearing mower ever built. All parts accurately machined and fitted; wheels turn on steel bearings, which add to the easy running qualities of this mower. Blades of excellent quality crucible steel, water ground and self sharpening, concave edge to allow user to preserve perfect cutting edge if mower is reground or resharpened. Reel rigidly constructed and ratchet indestructible. Reel spiders and roller brackets made of malleable iron preventing possibility of breakage, bracket made with gudgeon entering roller 2½ in. instead of an iron pin driven into roller, so that roller runs noiselessly and does not split.

Decoration—Cold wheels, sky blue frame, silver trimmings.



10½ in. drive wheels, 6 in. reel, four revolving blades, cutter bar screw adjusting, reel bearings fitted with brass bushings and a screw adjustment.

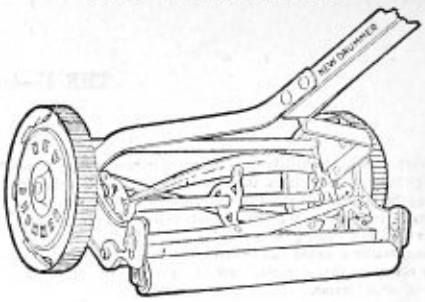
Cut	14	16	18 in.
Weight	52½	60	63 lbs.
Each	$16.00	17.00	18.00
	JDBJ	JDEJ	JDHJ

ONE IN A CASE.

H. S. B. & CO.'S LAWN MOWERS.

THE GLENCOE.

A medium priced mower, graceful in outline, light in weight, yet strongly constructed, with best quality materials and workmanship throughout. Cutter bar bed plate planed to true surface, so stationary knife can be firmly riveted to it and have a perfect and even bearing. This together with the fact that the reel is a perfect cylinder produced by accurate grinding, insures a smooth cut lawn. Adjusting screws of cutter bar operated from top and against a finger extending from main body of bar, making it impossible to spring bar, as in adjustments where the two screws act against each other on either side of a pivotal point. Both screws being on top, it is unnecessary to turn mower upside down for adjusting.



Decoration—Empire red and gold bronze.

9 in. Drive Wheels Turning on Steel Bearings, Four Revolving Blades of Crucible Steel, Thoroughly Hardened and Self Sharpening, 6½ in. Reel, ¾ in. Shrub Guard; Reel Bearings Equipped with a Lock Nut Set Screw Device for Taking Up All Wear.

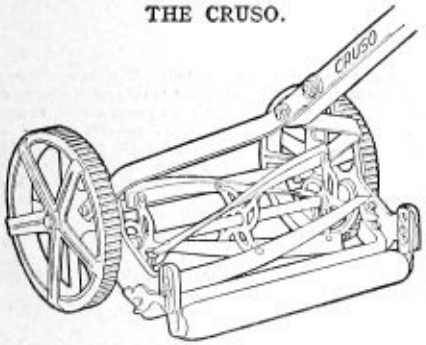
ONE IN A CASE.

THE NEW DRUMMER.

Guaranteed to be the best low priced mower ever made. Design new and attractive, very popular on account of lightness of draught. All connecting points machined to exact dimensions, shoulders milled on ends of steel cross rod to produce rigid frame. Wheels made with spoked ring, making a raised tread. Reel shaft is made of best machinery steel, ⅞ in. in diameter and has adjustable brass bushings to take up wear.



Decoration—Dark green wheels, apple green body and gold striping.

8½ in. Wheels, 3 Crucible Steel Blades Carefully Tempered and Self-Sharpening, Reel 6½ in. in Diameter, ⅝ in. Cross Rod, Screw Adjusting Cutter Bar, Malleable Iron Spiders, Hard Maple Handle and Roller.

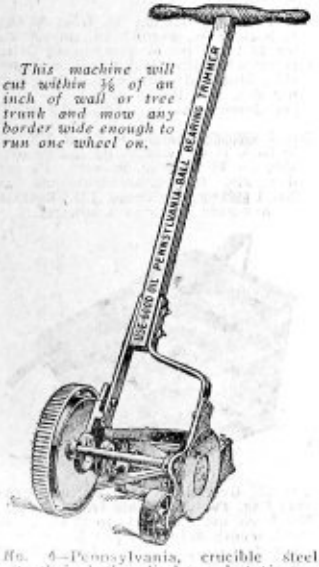
Extra Clamps, for Nos. 4 and 5, w't per doz. 1 2-3 lbs., per dozen **AJE** $2.50

ONE-HALF DOZEN IN A BUNDLE.

LAWN CLEANERS, TRIMMERS AND ROLLERS.

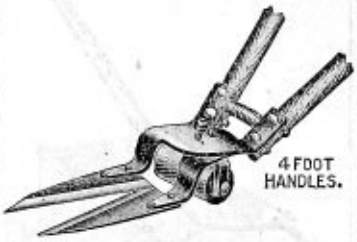
PENNSYLVANIA LAWN CLEANER AND RAKE.



This cleaner and rake is strongly built, it has a revolving reel to which is fastened three rakes with short steel wire teeth, an adjustable roller in front for regulating height, a large canvas box for catching leaves and rubbish.

Sizes, in.	24	36
W't per doz., lbs.	80	125
Each	$20.00	30.00
	AFJJ	BDJJ

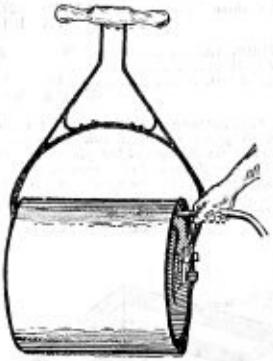
This machine will remove the cut grass, all sorts of leaves, litter and trash, its use has a beneficial result to the lawn as it raises up the low growing crab grass and other spreading weeds, so that the mower will cut them, thus preventing their going to seed. Very easy to operate, and with it one man will do as much work as three men with hand rakes.



LAWN TRIMMERS.

This machine will cut within ⅜ of an inch of wall or tree trunk and mow any border wide enough to run one wheel on.

No. 4—Pennsylvania, crucible steel teeth in both cylinder and stationary blades, self-sharpening, 8 in. wheel, 6 in. blade, ball bearings with Pennsylvania adjustments, hardwood handle with crossbar, 3 blades, w't 27 lbs., each ..... DEJ $7.50



LAWN TRIMMERS.

No. 2—Pierce Improved, malleable iron castings, shears of best quality steel, ball bearing, w't per doz. 75 lbs., per dozen ..... ADDJ $30.00

ONE-QUARTER DOZEN IN A BOX.

DUNHAM "WATER WEIGHT" ROLLERS.

One Section, Drum is Electric Welded and Cannot Break, Roller Bearings.

Per ft.	$0.23	.26
	AC	AE

Can furnish No. 3A REVONOC in corrugated design at same price as smooth cover. Shipment from factory only.

No. 15-R—Il-a-noy, Braided Smooth Cover, in.	½	¾
Pressure, lbs.	125	100
Approx. w't per 100 ft., lbs.	25	36
Per ft.	$0.18	.23
	AA	AD

No. 1 OVB Corrugated has the corrugated cover, which construction is preferred by many dealers. Cover and tube of the same quality and thickness as the plain.

Molded Reel Hose is more pliable, will stand short bends and is stronger in every way than ordinary construction. It is more flexible and will not kink, also it possesses durability which permits abuse average hose will not stand.

All brands are constructed with 2 plies of tightly twisted cotton yarn. Yarn in both plies are of double strand. The rubber is forced through the plies under high pressure during the process of vulcanizing, forcing this rubber from tube to cover and making a homogeneous body. This makes the unwrapping of the plies impossible.

Another feature is the long length which permits the dealer to sell any length called for, making it more convenient to handle as all grades run to approximately 500 ft. lengths.

No. 3A REVONOC smooth cover, same style and construction as No. 2 OVB and fully guaranteed in every way, but a trifle lighter in weight.

FIVE HUNDRED FEET ON A REEL.

FOUR-PLY, Special High Grade Duck and BLACK RUBBER, Strong and Durable, Guaranteed.

No. 4 OVB, in.	½	¾
Pressure, lbs.	150	125
Approx. w't per 100 ft., lbs.	29	38
Per ft.	$0.20	.25
	AA	AD

FOUR-PLY, Special High Grade Duck and RED RUBBER, Cover, Strong, Durable, Guaranteed.

CALCUTT'S QUICK REPAIR TIRES.

SECTIONAL VIEW OF CALCUTT'S QUICK REPAIR TIRE SHOWING COUPLING IN POSITION.

Pat. Nov. 6, 1906. Pat. April 6, 1909.
Pat. March 9, 1909. Other Patents Pending.

Extra Quality Rubber, Oil Tempered Steel Coil Wire Moulded in Center of Tire, for Go-Carts and Baby Carriages.

Sizes	¾	⅞	¾ in.
Per box	$8.00 CFJ	8.00 DHJ	6.00 CFJ

The best, quickest and most practical tire made. No machine needed for putting tires on wheels, not necessary to remove wheels, couples short pieces and avoids waste of material. Saves labor, no remnants.

DIRECTIONS FOR APPLYING.

To get correct length, simply measure tire in channel of wheel and cut tire about ¾ in. short per foot so tire will stretch over wheel under tension.

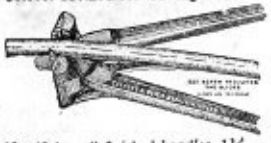
To join ends insert coupling with pliers in one end of tire, or put coupling in vice and push on tire, then hold end with coupling firmly in left hand and twist other end of tire towards you six complete revolutions (see cut), push together and screw from you by turning to the right, thus bringing tire back to natural position, then stretch over wheel by first placing coupled section of tire in channel of wheel between spokes and snap on from opposite side.

TO UNCOUPLE TIRE—Turn one end from you and pull apart gently.

⅜ AND ½ IN. 50 FT. WITH 24 COUPLINGS; ⅝ IN. 25 FT. WITH 12 COUPLINGS IN A BOX.

THERE'S ONLY ONE QUICK REPAIR TIRE THAT'S CALCUTT'S.

Calcutt's Quick Repair Tires for Go-Carts—The Best, Quickest and Most Practical Repair Tire Made.



Showing end of tire with coupling held firmly in left hand after twisting other end of tier towards you six complete revolutions.

To uncouple tire, turn one end from you and pull apart gently.

Remember—The tire is not screwed on to the coupling pin but pushed on with a twisting motion. In coupling or uncoupling tire always turn to the right.

CALCUTT'S QUICK REPAIR NIPPERS.

Correct Method for Cutting Tire.

No. 13—12 in., oil finished handles, 1¾ in. polished steel blades, w't 3¾ lbs., per pair ..... **B G J** $4.50

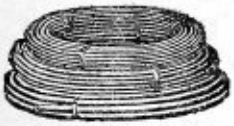
AUTOMATIC COUPLINGS.

For Coupling Mill Hose With Automatic Couplings.

Inches.....	1½	1½	2	2½
Extra per 50 ft. length..	$2.00	2.75	3.25	3.50
	ADJ	AFJ	BJJ	BAJ

These couplings are a trifle lighter than the regular fire hose couplings but for mill and kindred uses give entire satisfaction.



In ordering hose pipe couplings unless for iron pipe or hose pipe thread, exact measurements and thread must be furnished. It is always better to send sample of hose as different makes of hose vary a great deal.

State whether for Iron Pipe, Hose Pipe or Special thread. If special Thread, send sample.

LOOSE.

TUBING AND GARDEN HOSE FIXTURES.

RED C. I. TUBING.

WASHERS.

Rubber.

No. 20—For ½ or ¾ in. hose, per pound ..... **JEJ** $1.50

No. 21—For 1 in. hose, per pound ..... **JEH** 1.75

ONE POUND IN A BOX.

GARDEN HOSE NOZZLES.

REVONOC

No. 40 REVONOC—Polished wrought brass, for ¾ in. hose, screw tip, will spray or throw solid stream, length 4⅛ in., w't per doz. 6 lbs., per dozen ..... **JCIJ** $10.00

The spray can be graduated from a fine mist to a coarse spray. A fine operating and designed nozzle. Not rough on the inside but finished throughout.

No. 3—Gem, polished cast bronze metal, for ¾ in. hose, will spray or throw solid stream and can be regulated or closed, length 3½ in., w't per doz. 5½ lbs. .....per dozen **DBJ** $.800

No. 6—Genuine Boston, polished cast brass, for ¾ in. hose, will spray or throw solid stream and can be regulated or closed, length 4¼ in., w't per doz. 4½ lbs. ....per dozen **DBJ** $7.50

No. 5—Magic, polished cast brass, for ¾ in. hose, screw top, will spray or throw solid stream, with stop cock, length 5 in., w't per doz. 5½ lbs., per dozen ..... **DCJ** $9.00

Oakland, cast brass, polished, for ¼ in. hose, throws either straight or spray stream, length 3½ in., w't per doz. 2½ lbs. .....per dozen **CIJ** $4.50

By turning the spray key the deflecting plate may be thrown into the stream of water or turned entirely aside, thus giving the ordinary full straight stream.

ONE DOZEN IN A BOX.

No. 9—Plain stub, cast brass, polished, for ¾ in. hose, throws solid stream only, length 3 in., w't per doz. 3¼ lbs., per dozen ..... **AFJ** $3.50

TWO DOZEN IN A BOX.

No. 4—Cast brass, polished, for ¾ in. hose, screw tip, throws solid stream only, length 8 in., w't per doz. 6 lbs., per dozen ..... **CIJ** $7.50

TWO DOZEN IN A BOX.

SPRAY HOSE NOZZLES.

No. 10—Cruso, ¾ in., no shut-off, does not strain hose, w't per doz. 4⅝ lbs., per dozen ..... **CCJ** $5.50

The Cruso spray nozzle is the cheapest, simplest and best garden hose spray on the market, and gives a spray equal to that of any other.

Every one tested and guaranteed to be perfect.

ONE DOZEN IN A BOX.

Duo, for ¾ in. hose, wrought brass, no shut off, by snapping on spring spike it becomes a sprinkler, w't per doz. 2⅛ lbs. .....per dozen **AHJ** $3.00

Two in one, hose nozzle and lawn sprinkler, at half the price of one, throws either a spray or a solid stream. The large fan shaped spray covers more area and throws double the water, as the volume is not reduced to secure spray.

The Duo never leaks as there are no packed joints. A spring spike is furnished with each nozzle. Sprinkler can be moved about without turning off the water. As the Duo has no shut-off, does not strain the hose.

ONE DOZEN IN A BOX.

GARDEN HOSE COUPLINGS.

No. 01—Cast brass, cast brass nut, for ½ in. hose, w't per doz. 2 lbs., per dozen ..... **ABJ** $2.00

No. 1⅛—¾ in. hose couplings, per dozen ..... **ABJ** $2.00

No. 1¾—Cast brass, cast brass nut, for ¾ in. hose, w't per doz. 2¼ lbs., per dozen ..... **ABJ** $2.00

Nos. 01 *and* 1¾ *will fit* ¾ *in. Hose Bibbs.*

LOOSE.

No. 2 Complete. Part.

No. 2—Snap, brass, for attaching hose to faucet nozzle, or for coupling two lengths of hose, complete, per dozen ..... **BIJ** $5.00

No. 02—Female part, brass, for No. 2 Snap Coupling, per dozen **AIJ** $3.00

For use any place where a quick and easy connection is desired. It is necessary only to screw the snap coupling threaded parts on the old threaded parts already in use and coupling is complete.

LOOSE.

HOSE SUNDRIES.

HOSE COUPLINGS.

SHERMAN, Wrought Brass.

No. 14½—For ½ in. hose, w't per doz. 2¾ lbs. .....per dozen **ACJ** $2.00

No. 16¾—For ¾ in. hose, w't per doz. 3 lbs. .....per dozen **ACJ** $2.00

Made from sheet brass, is free from sand holes and other defects. The double knurled flanges on the nut afford a fine grip for the hand, full water way, deep corrugations for imbedding into lining of hose, no soldered joints, and the fact that all parts are seamless are some of the features.

LOOSE.

Perfect Clinching, Wrought Brass, Self-Fastening.

No. 15½—½ in., w't per doz. 1 lb., per dozen .....**AHE** $3.20

No. 15¾—¾ in., w't per doz. 1½ lbs., per dozen .....**AHE** $3.20

A self-fastening coupling that does not require extra bands, bolts or wires. It adjusts itself to any thickness of hose.

Will not pull off and cannot turn within the hose.

Makes a smooth and perfect joint that has no projecting points and cannot leak.

Requires one tool—a hammer.

The finger ends come down directly behind the head, buckling the hose over the head and clamping it tight against the body of the tube. Either a direct pull, or heavy water pressure tends to set the head more solidly into the rubber and the harder the pressure the tighter it gets. It makes the same joint with the hose as the Perfect Clinching Mender. The tough brass in the clamping fingers permits taking off and using again.

ONE DOZEN IN A DISPLAY BOX.

CATELAIN HOSE COUPLING CLAMP.

Consists of a Brass Band ¾ in. Wide, Encircling the Hose and Drawn Tight with a Screw and Brass Thumb Nut. Made to Fit the Following External Diameters.

Nos.	1C	2C	3C
Fits hose, in.	¾ to 1½	1¼ to 2½	2¼ to 4
W't, doz., lbs.	1⅛	1½	2
Per dozen	$2.80	3.10	3.60
	AFH	**AHF**	**BAE**

Clamps any round or oblong shape and can be installed without disconnecting hose. Can be tightened up with the fingers alone. Particularly adapted for applying in places that are hard to reach or where a tool cannot be used.

Widely used in connecting up automobile radiators.

ONE DOZEN IN A BOX.

HOSE CLAMPS.

	ABJ	**ADE**	**AIJ**	**CCE**

The ½ and ¾ in. two ply are adapted to cotton hose; the ⅝ in. two ply is for ⅝ in. braided reel hose.

On all orders where ply is not specified we will send three ply up to and including 1¼ in.

ONE GROSS IN A BOX.

SHERMAN'S, Double.

No. 17—Wrought brass, for ¾ in. three ply hose, w't per doz. 1 lb., per dozen .....**JFJ** $1.20

Very useful in connection with menders in repairing hose.

SIX DOZEN IN A BOX.

HOSE MENDERS.

"PERFECT CLINCHING" Brass Tube, Bright Galvanized Steel Clamp.

No. 28½—For ½ in. hose, w't per doz. 1 lb. .....per dozen **JIJ** $1.50

No. 28¾—For ¾ in. hose, w't per doz. 1½ lbs. .....per dozen **JIJ** $1.50

This mender adjusts itself to any hose, whether old or new, and makes a mend that will not leak and cannot pull apart. Slips into hose easily, no projecting parts, leaves the hose smooth, strong and tight. The finger ends come down perfectly, directly behind the head, buckling the hose over the head and clamping it tight over the body of the tube.

TWO DOZEN IN A BOX.

HOSE MENDERS.

No. 19—For ¾ in. hose, cast iron, length 3 in., w't per doz. 2½ lbs., per dozen .....**BE** $0.50

LOOSE.

Wrought Brass, Length 1¾ Inches.

No. 18½—For ½ in. hose, w't per doz. ½ lb. .....per dozen **CJ** $0.70

No. 18¾—For ¾ in. hose, w't per doz. ¾ lb. .....per dozen **CJ** $0.70

TWELVE DOZEN IN A BOX.

COOPER, Seamless Brass Tube, 2¼ Inches Long.

No. 22½—For ½ in. hose, w't per doz. ¾ lb. .....per dozen **JHE** $1.50

No. 22¾—For ¾ in. hose, w't per doz. 1 lb. .....per dozen **JHE** $1.50

Simple, practical and effective, does not reduce diameter of hose, will not rust, no wires, no pliers or mechanical skill to adjust.

THREE DOZEN IN A BOX.

MAGIC, Wood, Length 2⅝ Inches.

No. 20½—For ½ in. hose, per gross .....**JFJ** $1.00

No. 20¾—For ¾ in. hose, per gross .....**JFE** $1.10

ONE GROSS IN A BOX. WEIGHT TWO POUNDS.

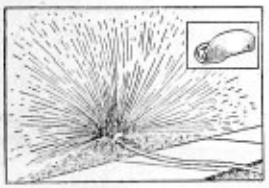
LAWN SPRINKLERS.

LAWN SPRINKLERS.

No. 501—Spiral, cast iron, japanned, diam. of base 3½ in., for ¾ in. hose, w't per doz. 12 lbs., per dozen .....**BEJ** $4.20



This sprinkler throws finely divided spray; adapted to any pressure.

ONE IN A BOX.

No. 502—Elgin, japanned iron, colored top, 7 in. runners, length 9 in., for ¾ in. hose, w't per doz. 30 lbs., per dozen .....**EGE** $8.00

ONE-QUARTER DOZEN IN A BOX.

No. 2—Shield for Elgin Sprinkler, cast iron, these are to be put on the sprinkler to throw all the water to one side so that the sprinkler can be put close to walk or house and not wet them, can be put on or taken off in one second. .....per dozen **ABJ** $2.00

ONE DOZEN IN A BOX.

LAWN SPRINKLERS.

No. 525 RIVERSIDE—Low standard with sled, polished brass head and arms, ground bearings, japanned frame, for ¾ in. hose, w't per doz. 27 lbs., per dozen .....**AADJ** $18.00

ONE IN A CARTON; ONE DOZEN IN A CASE.

No. 522—Cyclone, japanned with sled, polished brass head and arms, ground bearings, japanned frame, for ¾ in. hose, w't per doz. 47 lbs., per dozen .....**ACBJ** $20.00

Adapted to any pressure and will throw a fine misty spray which will not injure the most delicate flowers.

ONE IN A CARTON; ONE DOZEN IN A CASE.

No. 550—Butterfly, gray iron, galvanized by a new process, ¾ in. hose pipe, thread cut in base, w't per doz. 7½ lbs.....per dozen **CCJ** $4.00

ONE DOZEN IN A PASTEBOARD BOX.

No. 551—Butterfly, gray galvanized iron head, japanned iron sled base, w't per doz. 26 lbs., per doz. **JGHJ** $4.00

Being mounted close to the ground, the vibration is less, consequently the spoon revolves more rapidly and better distribution results. Hydrant pressure of 35 lbs. will distribute satisfactorily over a circle 30 ft. in diameter.

ONE IN A PASTEBOARD BOX.

LAWN SPRINKLERS.

No. 554—Butterfly, galvanized gray iron, head mounted on 4 ft. standard, sharp point in base for setting in ground, w't per doz. 42 lbs., per dozen .....**JIJJ** $12.00

No. 556—Butterfly, head mounted on 6 ft. standard, w't per doz. 54 lbs., otherwise same as No. 554., per doz. **AJBJ** $14.80

No. 554 is proving especially popular for private lawns while No. 556 is being used largely in parks, cemeteries and golf grounds.

LOOSE.

No. 504—Fountain, heavy brass, polished and lacquered, diam. 8 in., w't per doz. 9 lbs. ....per dozen **JEGJ** $12.00

These are ideal sprinklers; no moving parts to get out of order, durable and very easy to operate, adapted to ¾ in. hose, any pressure.

No. 500—Baby Fountain, brass, polished and lacquered, diam. 5¼ in., w't per doz. 9 lbs.....per dozen **DEJ** $7.50

This sprinkler has the same mist-like spray as the original fountain but sprinkles a square plot instead of a round plot.

LAWN SPRINKLERS.

FISHER SPRINKLER.

The sprinkler arms can be adjusted to cover a space from 6 feet to 60 feet in diameter with the ordinary city pressure of 30 pounds, and with the minimum pressure of 15 pounds, thirty feet in diameter can be covered perfectly.

Figure 1 shows the arms set at an angle of about 45 degrees opposite each other, which gives it the maximum speed and will cover from 25 to 30 feet in diameter.

Figure 2 shows the arms set in the same direction, one at an angle of 45 degrees, and the other slightly off the vertical position, pointing in the same direction. In this adjustment the sprinkler will revolve slowly but will cover the maximum amount of space.

Figure 3 shows the direction in which the sprinkler should be operated.

No. 534—Fisher, nickel plated brass arms and head, steel tube or shank painted black, height from ground 23 in., length over all 29 in., w't per doz. 36 lbs. ...per dozen **BAFJ** $42.00

LOOSE.

No. 519—Pluvius, with sled, w't per doz. 45½ lbs., otherwise same as No. 520 .....per dozen **ABJJ** $18.00

Adapted to any pressure and will throw a fine misty spray which will not injure the most delicate flowers.

ONE IN A CARTON; ONE DOZEN IN A CASE.

E-Z LAWN SPRINKLERS.

No. 526—4x8x11 in., tubing made of 1 in. B brass, stand of No. 6 galvanized wire, w't 8 lbs., per doz. **JFJJ** $10.00

Sprays on three sides only, leaving one side to approach and adjust it. Can be moved about without shutting off.

ONE-HALF DOZEN IN A PAPER PACKAGE.

THE "B" LAWN SPRINKLER.

No. J—"B" sprinkler, all brass, waters a space 20x40 ft. with square corners, w't each 3 lbs. per doz. **AHJJ** $30.00

No. D—"B" sprinkler, all brass, waters a space 10x40 ft. with square corners, w't each 3 lbs. per doz. **AHJJ** $30.00

No. F—"B" sprinkler, all brass, waters a space 22 ft. sq. with square corners, the sprinkler stand in one corner, w't each 3 lbs. ... per doz. **AHJJ** $30.00

WHAT THE "B" SPRINKLER DOES.

Throws water only in three directions so that it can be approached from the rear without wetting the operator.

Cannot upset.

Does not hurl the water high in the air to be blown away by the wind, but sends it swiftly at a height of less than a foot above the lawn.

Distributes the water evenly over the plot of ground. Rain gauges placed haphazard in tests all showed the same precipitation.

The water does not dig furrows in the lawn, but settles evenly and softly like rain.

Lastly, and this feature alone places it without an equal on the market, it throws water into corners and along the entire edges of curbs, etc., and WETS ONLY THE GRASS, not the walks adjoining. It does not fling water in strong spurts over a lawn in a ragged pattern, but it will wet a plot of grass in the shape of a square, or various sized oblongs, evenly and softly.

HOW THE "B" SPRINKLER DOES IT.

The "B" Sprinkler is an upright cylinder divided into 9 chambers. In each chamber are holes pointed at different parts of the lawn. A turn of the faucet and the particular size of spray you are using decreases or spurts faster but **always maintaining** a straight outer edge and a fixed proportion, something no other sprinkler can do.

A brass strainer in the base of the sprinkler keeps out dirt, but the whole may be easily taken apart and cleaned if desired.

In ordering always be sure and specify the size wanted, giving the letter number and area dimensions.

THE FOUNTAIN SHOWER.

No. 531—Fountain, polished brass, diam. 2¼ in., w't per doz. 3 lbs., per dozen .....**AEJ** $2.50

A serviceable hose nozzle giving a mist-like spray.

ONE DOZEN IN A DISPLAY CARTON.

GARDEN MIST SPRAY.

No. 527—Solid brass, nickel finish, diam. 2½ in. across face, w't per doz. 3 lbs. .....per dozen **CJJ** $5.00

For lawns and flower beds. Does away with the sprinkling can. Gives the lightest, "mistiest" of sprays.

ONE IN AN ATTRACTIVE BOX.

HANDY FOUNTAIN SPRINKLER.

No. 528—Handy, heavy brass, highly polished, 4½ in. long, 2¼ in. high, w't per doz. 4½ lbs., per doz. **CFJ** $6.00

Throws all the water away from the hose end, allowing operator to approach it from the rear without getting wet. Does not tip over. Gives a strong, high fountain spray. Can be used on flowers by holding in the hand.

ONE-HALF DOZEN IN A PASTEBOARD BOX.

HOSE REELS AND SPRINKLERS.

HOSE REELS.

No. 30—Hardwood frame and drum, *painted red* and varnished, height 36 in., capacity 150 ft. of ¾ in. hose, w't per doz. 125 lbs., per dozen **AAEJ** $24.00

The drum of the No. 30 reel is so constructed as to keep the hose in perfect condition, preventing kinking when winding up same.

ONE-THIRD DOZEN DRUMS IN A CRATE; ONE-THIRD DOZEN FRAMES IN A BUNDLE.

No. 2—Constructed entirely of metal, best tubular steel in frame, strong cast iron wheels 7 in. in diameter, solid steel reel arms, heavy galvanized iron drum, shipping w't 15 lbs., capacity 100 ft. of ¾ in. rubber hose, per dozen ..... **AIEE** $34.00

The drum is corrugated to allow circulation of air and prevent mildew on hose.

The galvanizing insures freedom from rust, the 9 in. drum prevents injury to hose from tight winding. The reel is equipped with a crank, making the winding up of the hose easy, the adjustable hose holder at top of frame holds the nozzle in any position while spraying. Frame enameled green, wheels and reel arm black, which with the galvanized drum makes a very attractive appearance. Are exceptionally strong, serviceable reel and without the least wood reel made.

HOSE REELS.

No. 05—Hardwood frame and drum, oiled, height 38 in., two 5 in. cast iron wheels, cross handle, capacity 100 ft. of ¾ in. hose, w't per doz. 115 lbs. ..... per dozen **JFDE** $11.50

TWO IN A BUNDLE.

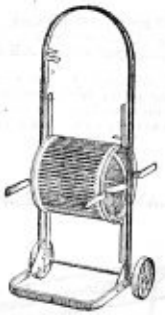
No. 42—Galvanized and malleable iron, special nickel plated brass faucet to attach to water pipe permanently, 20 in. reel, capacity 100 ft. of ¾ in. hose, w't per doz. (with faucet) 100 lbs. per dozen ..... **DJEJ** $60.00
Extra faucets ..... each **JHE** 1.25

The special faucet is attached to water pipe permanently, and forms a hollow axle on which the wheel revolves. The joint is made water tight by means of a leather gasket and thumb screw.

The reel can be instantly attached or detached or remain attached to the faucet. The hose pulls off in any direction while water is running and as much or as little of hose unreeled as desired.

Hose is easily drained, impossible to kink or twist it, which greatly increases the life of hose,

HOSE REELS.



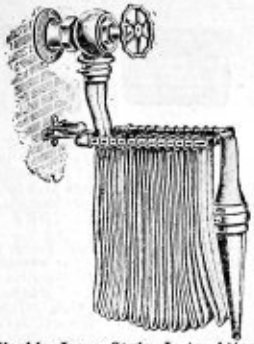
No. 10.

No. 10—Frame and wheel rims of steel tubing, 21 in. wheels, steel spokes, capacity 100 ft. of ¾ in. hose, w't per doz. 204 lbs. ....per dozen **BGFJ** $54.00

No. 20—Capacity 150 ft. of ¾ in., or 75 ft. of 1 in. hose, otherwise same as No. 10, w't per doz. 210 lbs., per dozen ..... **CBBJ** 60.00

TWO IN A BUNDLE.

VICTOR GARDEN HOSE REELS.



No. 4—Constructed with channel steel frame, strong, 4 in. cast iron wheels, solid steel reel arms and 9 in. drum of heavy corrugated iron, frame enameled green, wheels and reel black, capacity 100 ft. of ¾ in. rubber hose, w't 12½ lbs. .....per dozen **ADDJ** $24.00

TWO IN A BUNDLE.

FIRE HOSE SUNDRIES AND NOZZLES.

HOSE RACKS.

SPRAYERS AND PUMPS.

SPRAYERS.

No. 0—Cruso Special, conical reservoir, 6 in. bottom diam., 1¼ in. air pump, 14½ in. long, plunger rod coppered Bessemer, leather plunger with expander and wood backing, w't per doz. 9 lbs. .....per dozen **CIJ** $6.50

Patent integral construction built into the reservoir which provides great strength and prevents displacement of spraying adjustment. The conical shaped tank provides for perfect drainage, hence no rust or corrosion takes place.

With Reservoir.

No. 020—Lightning, encased detachable glass reservoir, Mason fruit jar pattern, air chamber of cylinder 2⅛x14½ in., painted red, w't per doz. 38 lbs., per dozen .....**JFJJ** $11.50

Nos. 02 and 020 Sprayers are provided with a beveled air chamber which throws the spray at an angle, making it useful for spraying downward or upward, by simply turning the sprayer over. The air chamber, when in position, performs a churning motion while the sprayer is in operation, keeping the ingredients thoroughly stirred. It also has a patent spring expander which keeps the leather open and prevents it from drying up. It is useful for spraying plants and trees and keeping flies from horses and cattle.

ONE DOZEN IN A CRATE.

GLASS TANK SPRAYERS.

No. 101B—Tin tube, zinc jar top, 1 qt. Mason fruit jar, pump cylinder 20 in. long and 1½ in. in diam., steel plunger rod, finished a bright red enamel, per dozen .....**EAJ** $2.00

COMPRESSED AIR CONTINUOUS SPRAYER.

No. 22 REVONOC—Galvanized iron reservoir 4 in. in diam., length 4 in., capacity 1 qt., tin air chamber 1½ in. in diam., length 18 in., steel pump shaft, wood grip, brass nozzles and filling hole cap, all parts interchangeable, w't per doz. 24 lbs., per dozen .....**JGBJ** $12.00

The REVONOC Sprayer is a CONTINUOUS sprayer, thus doing twice the work of any ordinary hand sprayer.

Size of spray is easily regulated by screwing the nozzle. One of the two nozzles throws spray straight ahead, the other up or down or in any direction.

This sprayer does rapid work and is adapted for all kinds of spraying purposes, but will produce best results in spraying all kinds of vegetables, plants, trees and disinfectants.

ONE IN A CARTON, ONE DOZEN IN A CASE.

No. 230 REVONOC—Brass, single tube, air chamber 14½ in. long, 1¼ in. diam., reservoir 4½x4 in., fitted with ¼ in. steel plunger rod, w't per doz. 14 lbs., per dozen .....**JHDJ** $14.00

No. 23—Cruso, single tube, air chamber 14½ in. long, 1¼ in. in diam., reservoir 4½x4 in., fitted with a ¼ in. steel plunger rod, w't per doz. 12 lbs., per dozen .....**CCJ** $6.00

No. 23½—Cruso, painted red, otherwise same as No. 23, per dozen **CFJ** $6.50

The special arrangement of the spraying tube is such that it thoroughly breaks up or atomizes all oils and solutions into a fine mist-like spray which penetrates all cracks and crevices. The sprayer is adapted for all kinds of general spraying and is used very extensively for spraying disinfectants.

ONE DOZEN IN A CASE.

No. 025—Cruso "Bantam," tank holding 1 pt. is 3 in. in diam. and 3 in. long, tube has ¼ in. pump rod fitted with anhydrous leather and special metal expanders to keep plunger leather in place, length over all 14 in., w't per doz. 9 lbs. .....per dozen **BGJ** $4.50

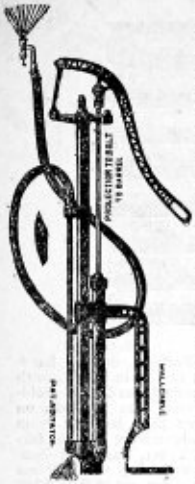
TWO DOZEN IN A BOX.

REVONOC TIN SPRAYER.

No. 24 REVONOC—Sprayer painted red, double discharge, reservoir 4x7 in. diam., capacity 1½ qts., tube 18½ in. long, diam. 1½ in., ends lock-seamed and cannot leak, w't per doz. 22 lbs., per dozen .....**DEJ** $8.00

The REVONOC Sprayer is different from the ordinary sprayer on the market for the following reasons—In the first place it is made with a patented slanting air chamber which enables the operator to stand in a natural position and spray up or down or in any direction desired by simply revolving the sprayer while in the hand, this feature cannot be accomplished with any other sprayer. This is a very important feature because in many cases it is necessary to spray on the under sides of leaves or plants as well as on the top. The sprayer has double discharge tubes. The plunger leather is of the best quality, provided with an expander to prevent the same from drying up. The sprayer is nicely finished, being painted bright red, with black plunger and handle, brass filler screw and cap and brass tubes, the sprayer is adapted for all kinds of spraying purposes, such as potato vines, garden vegetables, currant bushes, shrubbery, disinfectants, etc., and especially for spraying live stock.

BUCKET PUMPS.



No. 327½ — Little Giant, brass cylinders 1⅛ in. in diam., 18 in. stroke, cast brass base, malleable foot rest, complete with hose and Imperial combination fine, coarse spray and solid stream nozzle, large air chamber, continuous stream, pumps on downward stroke, 50 to 100 lbs. pressure, has agitator for mixing spraying solution, w't per doz. 72 lbs., per dozen ..**BHHJ** $66.00

ONE-THIRD DOZEN IN A BUNDLE.

BRASS BALL VALVES

PUMPS, SPRAYERS AND DRY POWDER DUSTERS.

BUCKET PUMPS.

No. 324—Myer's, brass, fitted with brass ball valves and patent agitator, diam. cylinder 1¼ in., with solid plunger, malleable iron foot rest and lever, complete with hose and graduating Vermorel fine, coarse spray and solid stream nozzle, w't per doz. 104 lbs., per dozen **DCBJ** $72.00

This pump can be operated with one-half the power of the ordinary spray pump, owing to the advantage of the lever handle. The air chamber is 50% larger than the ordinary bucket pump.

BARREL PUMPS.

No. 305B—Brass, fitted with bronze ball valves, and brass seats, mechanical and jet agitator, hemp packed brass plunger, complete with 15 ft. of ½ in. 5 ply discharge hose and graduating Vermorel nozzle, w't per doz. 1200 lbs., per dozen ..... **JICFJ** $156.00

The construction is such that the entire pump sets inside the barrel containing the liquid, being bolted fast at its upper end to the barrel staves. By this arrangement the working parts are entirely submerged in the liquid that is to be sprayed, thereby avoiding all possibility of losing priming, doing away with the necessity of suction pipe, placing the agitator in the bottom of the liquid in a simple form, and also doing away with a large amount of complicated parts. The air chamber is 30 inches in length, enabling the pump to throw a uniform, constant and elastic spray. It has good leverage, is very powerful and easily operated.

SPRAY PUMPS.

The "Auto-Spray" has a self-contained or inside brass air pump. By this arrangement the pump cannot be damaged. In this way, also, the air check valve is exposed and may be instantly removed or cleaned. The pump cylinder is extra heavy brass, and all parts of the sprayer are equally strong. The plunger rod is ⅜ in. steel, strong enough to stand all strain without bending. All cast parts are malleable.

This sprayer has ½ in. three ply hose of extra quality and permits large discharge ports, obviating back pressure and giving full force to the spray. The pump is fastened to the tank by a cam which gives direct and equalized pressure upon a heavy pure rubber gasket, making the joint absolutely air tight and one which will never leak, even under pressure.

The "Auto Pop" instantly and effectively controls the spray - and automatically cleans the nozzle. The lever control permits use without fatigue.

"Auto-Pop."

"AUTO-SPRAY" with Reservoir.

Suitable for Whitewash.

No. 1B—Brass, equipped with "Auto-Pop," w't per doz. 186 lbs., per dozen ..... **GHGJ** $96.00

No. 1C—Galvanized, equipped with stop cock device for regulating spray, w't per doz. 180 lbs., per dozen ..... **DIBJ** $60.00

No. 1D—Galvanized, equipped with "Auto-Pop," w't per doz. 192 lbs., per dozen ..... **EDJE** $56.00

Extra Parts for the Above.

Brass extension pipe, 2 ft., each	**DJ**	$0.75
Brass elbows	each **DJ**	.75
Strainers	each **JHJ**	2.00

PERFECTION SPRAYERS.

No. 110—Galvanized steel, pump is 1¾ in. seamless brass tubing, with a brass valve, rod is ⅞ in., fitted with anhydrous leather and our special metal expanders, hose is ⅜ in., 5 ply cloth, inserted, and is equipped with automatic shut-off nozzle attached to sprayer with clamps, tested to 60 lbs., w't per doz. 108 lbs. empty, per dozen ..... **EDJJ** $90.00

Perfection sprayer will handle whitewash, water paints, Bordeaux mixtures, etc., perfectly.

For whitewash and all heavy mixtures, turn the disc under the nozzle cap and put the projections outward.

Built of high grade material.

Tanks are made of heavier metal than has ever been used in sprayers of this kind, are lock-seamed at the corners to convex heads of metal two gauges heavier than the sides.

Shoulder strap is attached with snaps and can be quickly and easily removed.

ONE IN A CRATE.

DRY POWDER DUSTERS.

No. 17—Lightning, consists of one 1 qt. reservoir, three 16 in. tubes, two 4 in. nozzles, one 8x6¼ in. Y connection, two 7¼ in. elbows, and one carrying strap with a snap at each end, w't per doz. complete 72 lbs., per dozen ..... **JGIBJ** $132.00

The "Lightning" duster is far advanced over the old style cylinder pump arrangement. The gears are machine cut. It is made with gear wheels and no belt, and will spray anything in dry powder form.

The reservoir holds 1 quart of powder or 4 pounds of paris green. Provided with an agitator which produces a constant flow of powder which is blown out by the fan, also a gauge for regulating the amount of powder to be used. The duster will cover two rows at a time and may be adjusted for any width of row. Tubes may be connected to spraying trees, etc. Will kill insects, etc., not affected by a liquid spray.

ONE IN A CASE.

FODDER TYER, ROPE CLAMPS, SEED CORN TESTERS, ETC.

ROPE CLAMPS.

No. 1—Werum's, malleable iron, japanned, w't per doz. 2½ lbs., per dozen .....JIJ $1.40

ONE DOZEN IN A BOX.

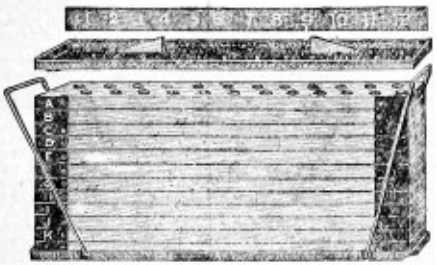
FODDER SQUEEZERS.

No. 4—Blair's, malleable iron frame and pin, with gray iron wheel, w't per doz. 7 lbs.....per dozen BGJ $4.50

SEED CORN GRADERS.

No. 2—Planter, double screen, corrugated, perforated and galvanized, top 12x18 in., bottom 12x21 in., frame painted red, w't per doz. 50 lbs., per dozen .....AADJ $18.00

This grader separates the different size kernels into three grades; large irregular grains, uniform large grains and small round or thin kernels.



It is simple, perfect and rapid (12 bushels per hour) and is absolutely substantial.

The fact that seed corn should be graded to size in planting is indisputable. The irregular kernels appear more or less in every ear of corn and cause trouble in the planter if not sorted out. By use of the grader the different sizes may be sorted and then by using the planter plates adapted to each size, all seed may be used. This insures perfect drop, perfect stand of stalks in field, which results in increased yield. The increase amounts to from six to twenty-five bushels per acre, hence a single acre will more than repay cost of grader.

ONE-HALF DOZEN IN A CRATE.

A very effective device for determining good or bad seed corn.

BROWN'S SEED CORN TESTERS.

Wire racks, each rack holding 24 ears of corn, twelve wooden trays 4x26 in., 27 in. long, 6 in. wide, upper and lower trays of metal.

The upper tray is perforated to receive moisture.

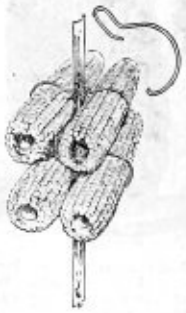
Two rules for locating sample and ear.

Six by twenty-seven inches is the floor space needed and when filled, ready for the test, can be readily transported as a suitcase.

The filling can be done in crib or granary and the racks of ears left in position there to await the examination to follow three or four days later. Instructions furnished with each tester.

No. 4—W't 15 lbs.★.....each DBJ $7.00

★*FOR FACTORY SHIPMENT ONLY.*



CORN DRYING RACKS.

No. 1—Brown's Perfect, double hardwood rack, 5x32 in., ¾ in. thick, with 24 No. 13 galvanized hard wire holders, holding twelve ears of corn on each side, twelve tags lettered from A to L, for identifying racks furnished with each set, each set consisting of twelve racks, w't per set 30 lbs. .....per set ABJ $2.00

SHIPPED KNOCKED DOWN, TWELVE DOZEN RACK IN A CRATE, 288 WIRES (ENOUGH FOR ONE DOZEN RACKS) IN A PASTEBOARD BOX.

RACK HOOKS.

No. 11—Brown's Economy, iron hanging strips to suspend from rafters with strong grab hooks which securely grip the ears, packed 250 in a box, four boxes in a carton, strips sufficient for hanging 1,000 ears to the carton.....per thousand CCJ $5.50

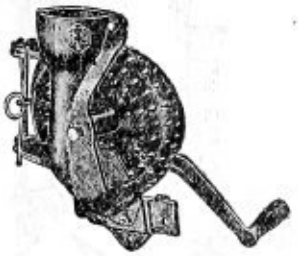
Brown's seed corn drying devices make it practical and possible for every farmer to give his seed the best possible chance to become perfect. The ears can be hung in the least possible space, and since no two ears touch, good circulation will dry the kernels quickly and evenly. Farmers throughout the country are finding a 25% gain in results by the use of these dryers.

SEED SOWERS AND CORN SHELLERS.

SEED SOWERS.

No. 14 REVONOC—Heavy duck hopper, ball bearing, 27 gauge iron fan wings riveted to solid cast base, malleable iron fly wheel and crank, w't per doz. 65 lbs.....per dozen **ADDJ** $24.00

Will sow wheat, rye, oats, rice, flax, millet, turnip seed, clover seed, grass seed, in fact all kinds of seed, broadcast, also plaster, fertilizer, salt, ashes, etc.



No. 12—Cruso, heavy duck hopper, capacity half bushel, heavy sheet steel feed plate and agitating device, with spring steel adjustments, w't per doz. 50 lbs.....per dozen **AJHJ** $20.00
Simple, strong and practical. Especially recommended for grass seed.
ONE IN A BOX; ONE DOZEN IN A CRATE.

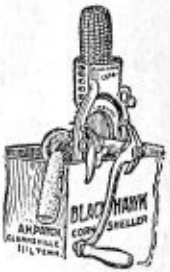
No. 10—Lightning, large canvas bag, with straps to go over shoulders, tin tube in three sections, of a graduating diam., length 22 in., the larger end fits into a stub joint which is securely fastened to the bag and in which is a gauge to regulate the quantity of seed sown to a certain area, w't per doz. 9 lbs.....per dozen **DEJ** $7.50

Will sow sixty acres of clover, timothy, millet, etc., per day, spreading the seed evenly from 30 to 40 feet. The wind has no chance to blow seed into bunches before it strikes the ground.

CORN SHELLERS.

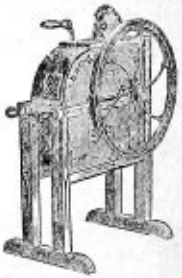
No. 100—Cruso, 10 in. sheller disc or wheel with projecting teeth, spring hopper, adjustable for different sizes of ears, malleable iron frame, disc, crank, etc., heavy steel hopper spring, long axle bearing and hook, 7 in. crank with wood grip, w't per doz. 150 lbs. .....per dozen **JGHJ** $16.00

The tension of the hopper spring allows the hopper to expand and contract according to the size of the ear. At the outlet of the hopper a flange holds the ear close to the shelling disc or wheel, thus assuring a thorough shelling of the ear.



ONE-HALF DOZEN IN A CRATE.

No. 12—Red Chief, 7¼ in. sheller wheel or disc, with projecting teeth, malleable iron frame and hopper, 9½ in. crank, with wood grip, cold rolled steel axle with long bearing, hopper is adjustable to any size ear, fastens to side of box or bin by means of two clamps, w't per doz. 138 lbs., per dozen .....**AEAJ** $40.00



ONE-HALF DOZEN IN A CRATE.

CORN SHELLERS.

No. 1903—Black Hawk, 8¼ in. sheller wheel or disc, with spur teeth, long chilled iron bearings, adjustable hopper spring, sure regulating device, will shell all sizes of ears, fastens to side of box or bin by means of two clamps with winged nuts, w't per doz. 228 lbs., per dozen **AIBJ** $40.00

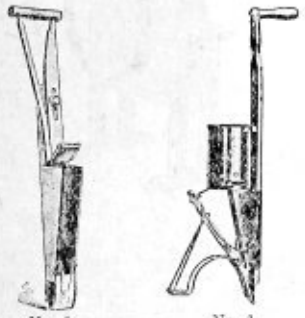
ONE-HALF DOZEN IN A BARREL.

EAGLE, Hardwood Frame, Painted, Striped and Varnished, Heavy Wrought Spoke Balance Wheel, Light Running Inside Gearing, and Adjustable Spring to Receive and Shell Any Size Ear of Corn. Height 3½ ft., Length 2½ ft., Width 1 ft. 7 in., 26 in. Fly Wheel.

No. 3—Without fan or feed table, w't each 131 lbs., per doz. **JHBHJ** $132.00
No. 3-T—Without fan, with feed table, w't each 139 lbs., per dozen .....**JIJJJ** $138.00
No. 3-F—With fan, without feed table, w't each 138 lbs., per dozen .....**JIJJJ** $138.00
No. 3-FT—With fan and feed table, w't each 166 lbs., per dozen .....**JIGBJ** $144.00
ONE IN A CRATE; PART K. D.

POTATO AND CORN PLANTERS AND BONE CUTTERS.

CORN PLANTERS.



Nos. 1 and 2. Nos 4 and 5.

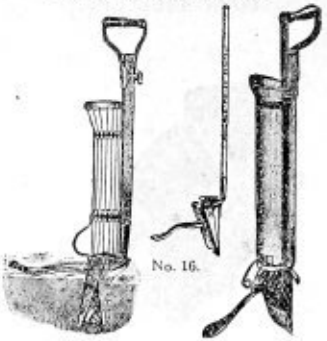
No. 1—Cruso wood frame, steel jaws, heavy tin hopper and conveying tube, wood grips securely bolted, height 34 in., w't per doz. 63 lbs., per dozen ..... **JFIJ** $12.00

No. 2—Cruso, with pumpkin seed attachment, otherwise same as No. 1, per dozen ..... **AJBJ** $18.00

No. 4—Improved Eclipse, hardwood frame, varnished, heavy steel jaws, securely riveted to frame, straight point, 4 iron discs for different feeds, one for broom corn and the others for corn, with perforations in each to drop 1, 2 and 3 grains each according to the number of holes, sheet steel hopper, height 34 in., w't per doz. 72 lbs., per dozen ..... **JIJJ** $16.00

No. 5—Improved Eclipse, wedge point, with spring on side to throw handles apart, otherwise same as No. 4, per dozen ..... **JICJ** $15.50

No. 6. No. 3.



No. 6—Monitor, heavy wood frame sheet steel hopper, with heavy iron plunger tongue, adjustable for all sizes of corn or beans, plunger parts of heavy iron, height 30 in., w't per doz. 60 lbs., per dozen ..... **JIFJ** $16.00

No. 3—American Standard, automatic, hardwood frame, heavy steel jaws, large sheet steel hopper, adjustable drop disc, brass spring cut-off, height 32 in., w't per doz. 80 lbs., per dozen ..... **AHJJ** $40.00

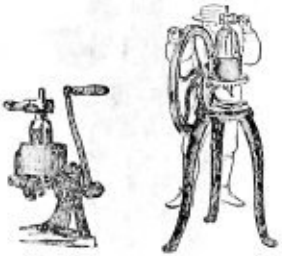
Any number and all sizes of kernels can be used with the No. 3 planter.

ONE-HALF DOZEN IN A CRATE.

POTATO PLANTERS.

No. 17. No. 16. No. 18.

No. 16—Pingree, spring steel self-locking jaws, adjustable malleable iron, depth gauge and socket, hard maple handle, height 42 in., w't per doz. 36 lbs ..... per dozen **JFEJ** $10.50



No. 18—Acme Tubular, spring steel self-locking jaws, with foot rest on both sides, comfortable wood handhold, galvanized steel conveying tube fastened to the stick handle, which is of hard wood, height 36 in., w't per doz. 72 lbs. ..... per dozen **ADDJ** $18.00

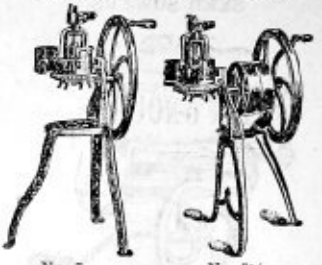
No. 17—Invincible, all steel, adjustable handle, double leaf non-breakable spring, w't per doz. 70 lbs., per dozen ..... **ACBJ** $22.00

NO. 16, ONE DOZEN; NOS. 17 AND 18, ONE-HALF DOZEN IN A CRATE.

GREEN BONE CUTTERS.

Cast iron frame, cylinder and balance or fly wheel painted black, automatic feed controlled by regulating screw, heavy crucible steel blades fitted to cutter by set screws, and can easily be removed for regrinding, fitted with knife holder and gauge for use in sharpening knives.

No. 5-C. No. 5-BM.



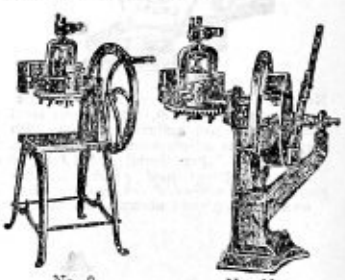
No. 5-C—Cylinder 6 in. in diam., 4 in. deep, 13½ in. crank, cutter head 7½ in. in diam., four knives, height from table 38 in., screw to table, w't 35 lbs., each ..... **FIJ** $7.50

No. 5-B—With balance wheel, otherwise same as No. 5-C, w't 60 lbs., each ..... **JIC** .. $10.00

No. 5BM—With stand and balance wheel, otherwise same as No. 5-C, w't 85 lbs. ..... each **AAAJ** $15.00

This model is intended for flock of 15 to 25 hens and will do excellent work.

GREEN BONE CUTTERS.



No. 7. No. 7½.

No. 7—Cylinder 7¼ in. in diam., 5¼ in. deep, strong iron stand with large table for box or pan, large open-hinged cylinder, heavy balance wheel with wood hand grip, gear guard, anti-clog device, 6 knives, w't 107 lbs., each ..... **ABIJ** $25.50

No. 7½—Semi-Power, anti-clog open cylinder, same size as No. 7, special feed, tight and loose pulley, speed of pulley 300 revolutions per minute, horse power required ½ to 1, w't 155 lbs., each★ ..... each **AFCJ** $33.00

No. 7½ is adapted to run either by hand or by power without changing any part.

Intended for flocks of 40 to 100 hens, can also be used for flocks up to 200 hens, but we recommend No. 9, for flocks of more than 100.

No. 9. No. 12.

No. 9—Cylinder 9 in. in diam., 6 in. deep, square topped iron stand for box or pan, cross braced with 2 rods, open-hinged cylinder, heavy balance wheel with wood hand grip, gear guard, anti-clog device, 6 knives, w't 170 lbs. ..... each **AIHJ** $27.60

The No. 9 is adapted to flocks of 100 *to* 300 *hens, the cylinder being larger gives greater holding capacity.*

No. 12—Power, diam. of cylinder 9 in., diam. of pulley 16 in., 3½ in. face, speed of pulley 300 to 350 revolutions per minute, open cylinder, automatic governing feed, anti-clog device and ample space for large box to catch the product, horse power required 1 to 2, w't 260 lbs.★ ..... each **CJFJ** $60.00

This machine, on account of its strength, capacity, simplicity, economy and convenience is recommended for market men, extensive breeders or anyone who has large quantities of bone to cut. An important device is the grab clutch by which the machine can be started and stopped instantly.

★FOR FACTORY SHIPMENT ONLY, MILFORD, MASS.

GRIST MILLS, BONE CUTTERS, ETC.

GRIST.

No. 36—Has patented burrs made of hard and tough metal, self-sharpening, grinds any small dry grain, pulverizes coffee, rice, corn meal, etc., grinds chicken feed, granulates coffee and cracks peas perfectly, fine for dry bone and shells, capacity 2 to 4 bushels per hour, w't 35 lbs., per dozen .....**DHJJ** $80.00

RED CHIEF.

No. 14—Red Chief, equipped with extra hardened burrs which are self-sharpening, and with hooks on which to hang a bucket, clamps or bolts to box, w't per doz. 180 lbs., per dozen .....**BEBJ** $48.00

This is an excellent mill and an ideal one for cracking grain of any kind for poultry and stock. Will make best corn meal and finest graham flour. Can be used with good results either with or without the revolving burr and can be cleaned and adjusted in a moment's time without the use of a wrench. Combines all the elements of rapid work and perfect grinding and requires little power.

DRY BONE, SHELL AND CORN MILLS.

No. 750—Height 17¼ in., base 6½x7½ in., diam. of hopper 3½ in., diam. of wheel, 19 in., capacity 1½ bu. of corn per hour, w't 60 lbs. .....each **GHJ** $8.50

Malleable iron frame, hopper and fly wheel, base screws to table or platform. A good general mill for farmers and poultrymen. Especially adapted for grinding bones (WHEN DRY ONLY), oyster and other shells, corn, roots, bark, grain, chicken feed, salt, etc.

This machine is not intended for grinding green bones, as they have to be shaved and require a special machine.

ONE IN A CRATE.

GRIST MILLS.

No. 10—Black Hawk, 11 in. malleable iron crank, chilled bearings, hardened metal grinding burrs, all parts interchangeable, 5x6½ in. hopper, base bolts to table or bench, w't per doz. 204 lbs. .....per dozen **CJJJ** $60.00

Will grind corn, wheat, rye, rice and other small grain. Easily adjusted for fine or course grinding.

ONE IN A CASE.

No. 32.

No. 1.

No. 32—Cast iron, height 15 in., hopper 6x6 in., base 5x6 in., 16 in. fly wheel, capacity one or two bushels per hour, w't per doz. 420 lbs. .....per dozen **EJDJ** $75.00

This mill embodies all the good features of other hand grinding mills to which have been added universal burrs or grinding plates that are adjustable for grinding coarse or fine. This machine grinds oats, barley, rye, corn, peas, dry bone, shells, etc., for feeding to poultry. It is a well designed machine, is strong and well made throughout, of excellent finish, and is light running.

No. 1—Bayley, height 8 in., heavy 18 in. balance or fly wheel, with wood grip, 5½x7¼ in. hopper, cast iron, base is made with holes to bolt or screw to table, machined bearings, cold drawn steel shaft, adjustable for grinding coarse or pulverizing corn, capacity 15 lbs. per hour, of fine, and 40 lbs. coarse meal, w't per doz. 270 lbs., per dozen .....**BHHJ** $48.00

ONE IN A CASE.

CIDER AND WINE MILLS.

WINE OR LARD PRESSES.

Varnished Hardwood Frame and Trough, Securely Bolted, Hardwood Tub, with Heavy Staves Riveted to Wrought Iron Bands, Steel Press Screw, with Cast Socket or Step, and Hand Wheel.

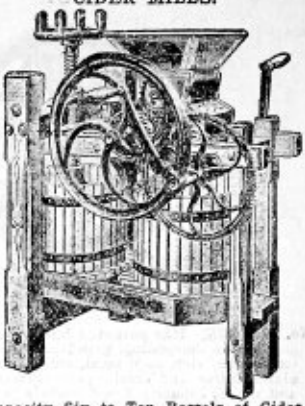
CIDER MILLS.

General Description.

Varnished hardwood frame, securely bolted, removable hopper and lever, cast iron yoke, balance wheel and journals; steel press screw with cast iron socket and top wheel with hand grips; steel shaft; cast iron roll casing with one plain and two corrugated adjustable rolls; triple geared; cast iron crank with wood grip; two plain hardwood tubs with heavy staves riveted to wrought iron bands; hardwood trough, neatly painted, striped and varnished.

Capacity Two to Four Barrels of Cider Per Day.



No. 1—Junior, 43 in. high, 12½x28½ in., trough, 10½ in. tub, 1⅛x18½ in. press screw, 29 in. lever, 13x14 in. hopper, floor space required 20x34 in., w't 190 lbs. .....each **AAAJ** $18.00

Capacity Three to Six Barrels of Cider Per Day.

No. 2—Medium, 49 in. high, 14½x29½ in. trough, 12 in. tubs, 1½x20½ in. press screw, 30 in. lever, 14x14 in. hopper, floor space required 22x35 in., w't 238 lbs. .....**ADGJ** $24.00

CIDER MILLS.

Capacity Six to Ten Barrels of Cider Per Day.

No. 3—Senior, 48 in. high, 19½x40¼ in. trough, 15½ in. tubs, 2x22 in. press screw, 40 in. lever, 13x15 in. hopper, floor space required 29x45 in., w't 420 lbs. .....each **BJAJ** $30.00

CIDER OR WINE MILLS.

Capacity About One Barrel of Cider Per Day.

No. 4—Family, 42 in. high, cast iron hopper 10x7½ in., studded revolving disc 7⅝ in. in diam. and roll casing, 16 in. cast iron fly wheel, hardwood frame securely bolted, heavy hardwood tub with staves bolted to wrought bands, ¾ in. steel shaft, 25x1¼ in. steel press screw, floor standards 2x2x10½ in., w't 110 lbs., each ..**JFCE** $10.00

This mill is not a force-feed mill, and to use for cider, apples will have to be halved or quartered and pressed down in hopper with a stick. This is intended for family use and for small lots of apples. It makes a good wine press and is suitable for any small fruits. Capacity two or three barrels a day.

No. 4½—"Kant Klog," height 45 in., hopper opening 6x11 in., uprights 1¾x5 in., floor standards 2¼x2¼x20 in., tub 12 in. high, 13½ in. outside diameter, 1½ in. steel press screw, w't 145 lbs., each ..**JHGJ** $12.50

Grinds apples either large or small, and is the only single tub mill on the market that will accomplish this work. Not necessary to halve or quarter the apples for this mill.

HUSKING PINS AND COTS.

HUSKING PINS.

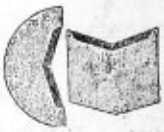
No. 1—2 in. opening, length 28 in., for calves only, w't per doz. 60 lbs., per dozen .....DJJJ $48.00
No. 2—3½ in. opening, length 40 in., w't per doz. 150 lbs., per dozen .....FCEJ $96.00
No. 3—4¼ in. opening, length 44 in., extra heavy, w't per doz. 198 lbs., per dozen .....JIAAJ $120.00

By use of the draw cut principle a great stride has been made in dehorning knife construction. With the old style knives, where very great pressure is required to do the work, clean cutting is impossible; they do not cut, but rather crush their way through the horn. The leverage power of this cutter is enormous.

No. 12—Ridgely's, crucible steel blades, 3½ in. opening, draw cut, malleable iron frame, wrought iron handles, length 3 ft. 4 in., w't per doz. 180 lbs., per dozen .....JGEIJ $120.00



No. 13—Leavitt's, V-shaped steel blades, for any size horns, iron frame and handles, length 38 in., w't per doz. 174 lbs., per doz. JFIJJ $120.00

The V-shaped blades hold the horn rigidly in position, avoiding all tendency to twist while cutting in four directions at once. The blades in the improved pattern cannot interlock nor cut each other.

LOOSE.

DEHORNER BLADES.

No. 13-B—Extra blades for No. 13—Leavitt's Dehorners, w't per doz. sets 18 lbs., per dozen sets.....AAJE $21.00

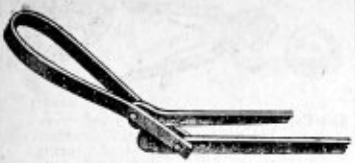
NOS. 1 AND 2, ONE DOZEN, NO. 3, ONE-HALF DOZEN IN A CARTON.



No. 7—HOOSIER, weaner and halter combined, tinned wire weaner, leather halter, for calves, w't per doz. 15 lbs., per dozen .....**JDBJ** $10.00
No. 6—HOOSIER, for yearlings, or range, otherwise same as No. 7, w't per doz. 17 lbs. .....per dozen **JEDJ** 12.50

ONE DOZEN IN A BOX.

ANIMAL POKES, PICKET PINS, ETC.

ANIMAL POKES.

No. 7—Horse, wood bow, varnished, w't per doz. 42 lbs., per dozen **C I J** $5.75

No. 41—Sunbury Pattern, with snap, ash or white oak, steel band over top, w't per doz. 45 lbs., per dozen .....**E A J** $9.00

The steel band over the top prevents the wood from breaking or slivering at that point.

No. 132—Cow Boy, 13 to 16 in., flat steel, riveted, adjustable, japanned, w't per doz. 34 lbs. ...per dozen **J F B E** $11.00

The punishment consists of a malleable iron spur or rowel wheel which pricks the animal in the neck when attempting to go through or over the fence. It is constructed and shaped in such a manner that it does not interfere with the animal while feeding, drinking or lying down.

ONE-HALF DOZEN IN A BUNDLE.

ANIMAL POKES.

¾ Inch Flat Steel, Riveted, Adjustable.

Nos.	31	32	33
Size, in.	9 to 12	13 to 16	17 to 20
W't, doz., lbs.	26	28	36
Per dozen	$10.50	12.50	16.00
	J D H J	**J E J E**	**J F J J**

No inconvenience to any animal in normal position, but when an attempt is made to go through the fence it becomes particularly severe; as soon as the animal backs up, the resistance of the neck, like a spring, throws the pole back to its normal position. Can be used with equal success on mules and colts.

ONE-HALF DOZEN IN A BUNDLE.

PICKET PINS.

Malleable Iron, Fluted.

No. 1—15 in., w't per doz. 12 lbs., per dozen .....**A E J** $2.00

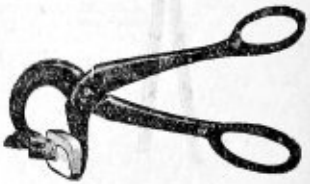
ONE-HALF DOZEN IN A BOX.

CAST STOCK MARKERS.



Attached to Ear with Perfect Hog Rings.

No. 65—Perfect, cast iron, raised letter, A to Z, w't per hundred 1¼ lbs., per hundred ..... J C J $1.00
In ordering, specify letters wanted.
ONE HUNDRED IN A BOX.

HOG TAMERS AND MARKERS.

Short's, malleable iron, japanned, reversible steel blade, 2 adjustable cutters, also circular knife, steel spring, length 10 in., w't per doz. 13 lbs., per per dozen ..... J G B J $15.00
Furnished with two blades. "T" blade for snout, and circular blade for ears and snout. The circular blade cuts across tip of nose with curve at each side and severing same in the middle, making two projections (about where two rings would be placed) heavy on the tips, their weight causing them to drop apart and heal quickly in that position, and leaving no loop to be torn off or hang over the nostrils. A great many marks can be made.
ONE-HALF DOZEN IN A BOX.

Miller's, malleable iron, japanned, 2 steel nose cutter blades—no ear markers—length 10½ in., w't per doz. 19 lbs. .....per dozen J G H J $15.00
This instrument not only cuts the hog's snout so as to deprive it of muscular side motion as well as the front root, but severs the cartilages and cuts the extremity of the snout, and as the snout heals, after the circular cutting of the muscles of the nose in such a manner that they curl outwardly on each side of the nose and form into lumps, and by so doing, prevent the animal from rooting to side or front. Any size hog can be operated upon with this instrument.
ONE-HALF DOZEN IN A BOX.

Ear Markers for Use in Connection with Miller's Hog Tamers.

No. 25—Steel, ½ in. triangular, per dozen ..... B D J $4.50

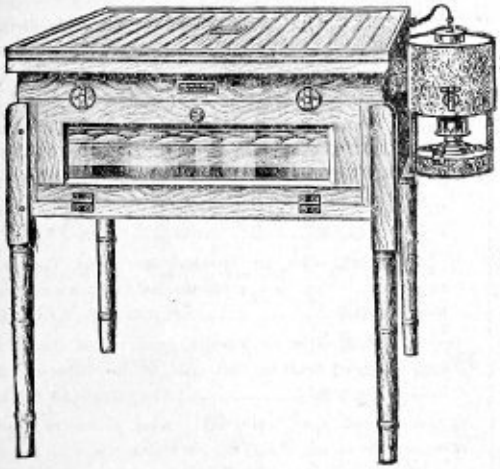
INCUBATORS.

All Incubators to give complete satisfaction must possess these features—

A case that is impervious to changes in climate or temperature, a steady, reliable heating system, and strong, solid construction.

[illegible] and CRUSO Incubators are heated by a perfect circulating HOT WATER SYSTEM. The hot water leaves the heater in an upward flow pipe which separates when the incubator box is reached. These branch pipes extend in opposite directions around the sides and ends. When the middle of the opposite end is reached the pipes unite, and the water, slightly cooler, returns in a downward flow through the inflow pipe to the bottom of the heater where it is again heated and the same operation again occurs. Thus a complete circuit takes place, and the retarding of circulation by the cooler water flowing against the hot water is eliminated. This system is vastly superior to any other because a more even temperature is maintained. Due to exceptional insulation, little fuel is required.

Temperature in the egg chamber is controlled by an automatic regulator.



Equipped with glass doors so that the thermometer, chicks and eggs can be seen without opening the door.

All Incubators have large, roomy nurseries under the egg trays.

Universally recognized as the standard Hot Water Incubator, over 200,000 have been sold in the past eight years.

Will prove successful from the start as there are no complicated parts to confuse the operator or get out of order. Complete instructions with each machine.

Lastly, great care is taken to insure a handsome, distinctive finish and—the price is right.

No. 1 [illegible]—Capacity 60 eggs, floor space required 20x24 in., height 30¾ in., regulating is done from the end, thus leaving the top free, walls made of 1 in. carefully selected lumber, ⅞ in. of wall board with double air space and ½ in. of lumber on the inside, four thicknesses in all, top and bottom two thicknesses of lumber with a layer of asbestos between, double glass door, copper tubular tank, boiler and hot water heating system, controlled by automatic regulator giving exact heat required, lamp, chimney, burner, bracket, trays, etc., all metal, wood parts finished in red with oxidized copper trimmings, shipping w't 65 lbs., each ..... **JICJ** $15.00

No. 2 [illegible]—Capacity 120 eggs, floor space required 24½x30 in., height 32¼ in., shipping w't 90 lbs., otherwise same as No. 1 [illegible] ..... each **ABJJ** $20.00

No. 3 [illegible]—Capacity 240 eggs, floor space required 30x42 in., height 32¼ in., shipping w't 135 lbs., otherwise same as No. 1 [illegible] ..... each **AECJ** $25.50

No. 8 [illegible]—Capacity 360 to 400 eggs, floor space required 34x53 in., height 32¼ in., shipping w't 200 lbs., otherwise same as No. 1 [illegible] ..... each **AHJJ** $30.00

WHY [illegible] AND CRUSO INCUBATORS ARE THE BEST.

THE CASE—The wood used in incubator cases must be practically perfect since the case is the most important part of the machine. It must not warp, shrink or open at the joints, it must be able to stand great changes of climate and temperature, and it must be of finest quality, most solidly put together. [illegible] and CRUSO cases have all these qualities, as the lumber is carefully selected and carefully put together. The first grade lumber used will last indefinitely and remain AIR TIGHT. Heat or cold cannot enter the chamber. Wall board is used as an insulation, the most sanitary, durable insulation made. Top of case is not nailed on but is removable by unscrewing.

THE HOT WATER HEATING SYSTEM is briefly—a Lake Superior copper tank, boiler and heater around the incubator walls through which circulates hot water. GUARANTEED against leaks. If the lamp accidentally goes out the water remains hot for hours. The water never gets too hot because the minute the water rises above a fixed point—

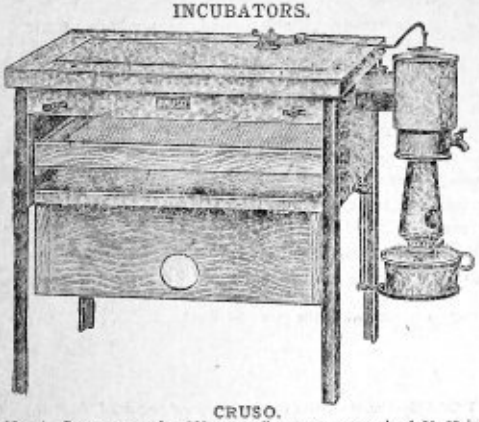
THE REGULATOR lifts a damper, thus letting the heat escape from the lamp without warming the water. A poor regulator makes a good machine useless. The [illegible] and CRUSO regulator is absolutely reliable. It consists of a double brass wafer filled with a volatile liquid which expands when heated, expanding the wafer and pushing a rod which opens the damper. When the temperature is normal again the liquid contracts and the damper shuts automatically.

THE LAMP is extra strong and absolutely safe. No gases can enter the incubator. Built of galvanized sheet steel with Sun Hinge burner and mica chimney window.

THE VENTILATION SYSTEM carries away all gases arising from the eggs and admits a supply of warm, pure air.

THE NURSERY has a lower temperature than the egg trays and is provided with a burlap lined tray.

THE EGG TRAY is strong and rigid with a heavy net bottom.



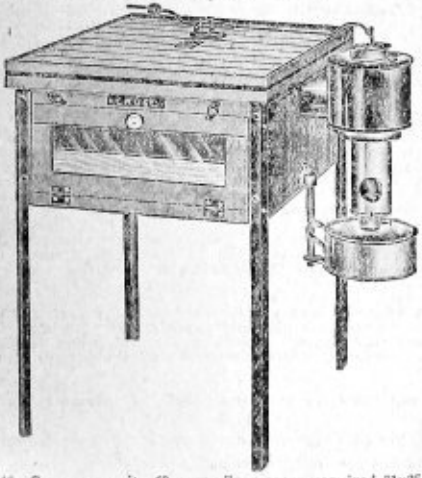
THE THERMOMETER is guaranteed to be absolutely accurate—a most important feature. It is supported by an improved holder which keeps it upright and stationary.

THE EGG TESTER will give the best of service for a life-time. Can be used on any lamp.

The price includes all attachments. When you purchase an [illegible] or a CRUSO you have no extras to buy. In shipping, legs are unfastened and boxed, thus insuring their good condition when delivered.

INCUBATORS AND BROODERS.

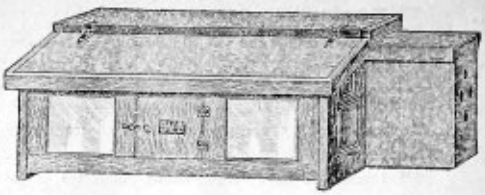
INCUBATORS.



CRUSO.

No. 4—Cruso, capacity 120 eggs, floor space required 22x29 in., height 26½ in., walls, bottom and top of 1 in. lumber and felt with a covering of heavy galvanized iron, two doors, outer one of wood and iron, inner one of glass, egg chamber 9 in. deep, heated by our tubular copper tank and hot water system, all parts including lamp, jacket, chimney, legs, brackets and regulating fixtures made of metal, shipping w't 80 lbs.....each **AJEJ** $18.00

No. 5—Cruso, capacity 175 eggs, floor space required 29½x29½ in., height 26½ in., shipping w't 95 lbs., otherwise same as No. 4 Cruso.....each **ABJJ** $20.00



No. 6—Cruso, capacity 240 eggs, floor space required 28½x40 in., height 26½ in., shipping w't 120 lbs., otherwise same as No. 4 Cruso.....each **ACHJ** $25.00

The chief difference between Cruso and [illegible] Incubators is that the Cruso is covered with galvanized iron and has iron legs. The inner construction and mechanical features are described on the previous page. The Cruso is an efficient and reliable machine in every particular.

No. 10—Cruso, capacity 60 eggs, floor space required 21x25 in., height 26 in., walls and top double construction and well insulated, double glass doors, has strong angle iron legs, heated by best cold rolled copper tank and boiler and hot water system, automatic regulator, shipped complete with regulator, lamp, lamp bracket, thermometer and holder, egg tray, egg tester, w't 50 lbs.....each **JFFJ** $11.00
Handsomely finished in dark red and well varnished.

BROODERS.

Outdoor or Indoor.

No. 60 [illegible]—Hot air brooder, capacity 60 chicks, floor space required 19x22 in., floor is 1 in. above the ground, hover has overhead hot air heating pipes of galvanized iron, cotton flannel curtain between hover and exercising room which is slightly cooler and has large double glass windows in front, lamp box and heater is entirely separate, fire proof box with double wall of galvanized iron, w't crtd. 65 lbs.....each **JGHJ** $13.00

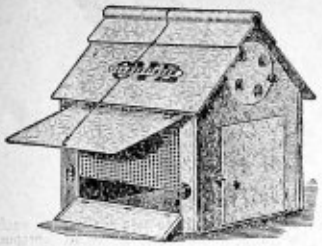
No. 120 [illegible]—Hot air brooder, capacity 200 chicks, floor space required 24x30 in., w't crtd. 85 lbs., otherwise same as No. 60 [illegible].....each **JICJ** $16.00

No. 240 [illegible]—Hot air brooder, 240 chicks, floor space required 32x44 in., w't crtd. 110 lbs., otherwise same as No. 60 [illegible].....each **AAGJ** $20.00

No. 360 [illegible]—Hot air brooder, capacity 360 chicks, floor space required 36x60 in., w't crtd. 140 lbs., otherwise same as No. 60 [illegible].....each **AECJ** $26.00

These brooders are rainproof. Roof is hinged, making them easy to clean. The foul air which settles to the floor in all brooders is automatically drawn off by a suction draft connected with the lamp.

Indoor.



No. 50—Cruso, Indoor brooder, capacity 50 chicks, floor space required 16x24x12 in., well built of selected lumber, glass windows in side, w't each 42 lbs.....each **JEGJ** $10.00

No. 100—Cruso, capacity 100 chicks, floor space required 22x22x12 in., w't each 60 lbs., otherwise same as No. 50, each .....**JGBJ** $12.00

No. 150—Cruso, capacity 150 chicks, floor space required 26x34x12 in., w't each 82 lbs., otherwise same as No. 50, each .....**JHDJ** $14.00

POULTRY SUNDRIES.

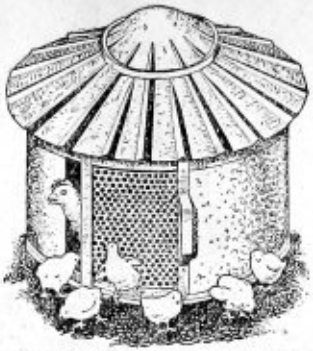
BROOD COOPS.

BEBJ—Galvanized iron, asbestos lined roof, collapsible, length 20 in., width 17 in., height 24 in., adjustable ventilators in each end to insure abundance of air, wide flanges 1 in. insuring easy assembling, w't per doz. 200 lbs. .....per dozen **BEBJ** $42.00

Carefully made of heavy galvanized iron, put together with only one bolt. Asbestos lined roof keeps out heat of the sun.

Lifting of side door makes a porch protecting chicks from rain and sun. Closing runway door makes coop vermin proof. Bottom can be removed for cleaning, and allowing hen or chicks on the grass. Rain, rat and vermin proof. Can be shipped from Chicago stock or Iowa factory.

KNOCKED DOWN AND CRATED; ONE-HALF AND ONE DOZEN IN A CRATE.

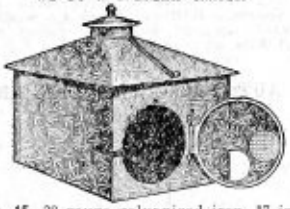


No. 2—Cruso Special, sanitary, 28 gauge galvanized iron, 17 in. wide, 23 in. long, 11 in. to eaves and 19 in. to top, bottom is removable for cleaning, w't per doz. 170 lbs., per dozen .....**AHJJ** $32.00

The special features of this coop is that it has extreme top ventilation, giving free egress of foul air. Has three perfect swinging doors hinged to the coop so that they can not get mislaid or lost. One door allows the chicks to pass in and out, keeps the hen inside, and another is made of screen to protect the chicks at night, but allows plenty of air. Door No. 3 is a solid door to shut up tight, being a protection from cold and storm. When doors are not in use they can be fastened back out of the way by a spring catch.

SIX IN A CRATE. W'T. CRATED, 85 LBS.
WE DO NOT BREAK CRATES.

CRUSO BROOD COOPS.



No. 12—Cruso, galvanized iron, diam. top 24 in., body 22 in., extreme height 21 in., top and bottom heavily corrugated making it rigid, one-piece door perforated at one end, storm proof ventilators opposite door as well as space under eaves insuring perfect ventilation when solid door is closed on hot nights, w't per doz. 164 lbs., per dozen .....**AFEJ** $27.50

No corners in this CRUSO in which dirt may collect and into which chicks crowd and either trample or smother weaker ones.

The one piece door perforated at one end is made so that it can be used either as a screen door or as a storm, rat and rainproof door, or, by sliding it to the extreme right, leaves an opening for the small chicks to pass through.

When confined in the coop, the hen has plenty of light and air.

KNOCKED DOWN AND CRATED; ONE-HALF DOZEN IN A CRATE.
WE DO NOT BREAK CRATES.

No. 15—28 gauge galvanized iron, 17 in. wide, 23 in. long, 11 in. to eaves and 19 in. to top, bottom removable for cleaning, w't per crate 87 lbs., per dozen .....**ADDJ** $24.00

The special feature of these coops is that they have extreme top ventilation, giving free egress of foul air. They are made by dies and are not touched by a pair of hand shears or scratch awl; therefore are all uniform and will assemble easily.

Each coop has one perfect swinging door with all of the features of three doors in one, hinged to the coop so that it cannot get mislaid or lost. The door is made double so that when the chicks are to be closed in, it turns with a knob and closes the opening, at the same time leaves the ventilating door open, and by a little further turn can be closed off entirely for bad weather.

SIX IN A CRATE.
WE DO NOT BREAK CRATES.

CHICKEN LIFE SAVERS.

Feeders and Waterers Combined.

No. 8—Galvanized iron, 18 in. long, 7 in. high, felt wicks suspended on either side of the machine immediately below oil gutters, full directions and one quart of compound furnished with each machine, w't per doz. 130 lbs.....per dozen **CBDJ** $54.00

Oil in gutters moistens felt at bottom; as the chicken sticks its head in feeder, the neck comes in contact with felt, the oil is deposited in feathers upon the back of the neck and the chicken distributes the same.

Large and small chickens can be treated alike, automatically.

ONE-HALF DOZEN IN A CARTON; FOUR CARTONS IN A CASE.

AUTOMATIC CHICK FEEDER.

No. 6—Cruso, extra heavy galvanized iron, beautiful corrugated top, extra reinforced bottom, height 21 in., diam. 30 in., capacity ¾ bushel, w't per crate 90 lbs.,
With bottom, per dozen **CCFJ** $ 56.00
Without bottom, per doz. **BHHJ** 48.00

Prevents the old birds from eating the chick feed; keeps feed dry and clean.

ONE-QUARTER DOZEN IN A CRATE.

POULTRY FOUNTAINS AND FEEDERS.

POULTRY FOUNTAINS.

CRUSO HENFRIEND, Best Galvanized Iron.

No. 3—4x4x6 in., for chicks, capacity 1-3 gal., w't per doz. 30 lbs., per dozen .....**BDJ** $5.00

No. 2—6x6x9 in., capacity 1¼ gals., w't per doz. 25 lbs., per dozen **CIJ** $7.00

No. 1—8x8x12 in., capacity 2½ gals., w't per doz. 40 lbs., per doz. **JEDJ** $10.00

The Henfriend provides a shallow drinking trough with a reserve supply of water that comes down automatically as the fowls drink it out.

The edges project beyond the flat surface of the body forming guards of three thicknesses of metal to take the wear all on the edges. They also hold the tank up from the ground to permit the circulation of air underneath which prevents it from rusting on the bottom.

A good many complaints of poultry can be cured by administering the medicine in their drinking water. The Henfriend is especially adapted for this, as by the action of the air in entering the top part of the fountain, it agitates the water and keeps the medicine mixed thoroughly with the water.

Will not drown chicks, is easy to fill and easy to clean. Keeps the water cool in summer and if filled with hot water in the morning it will not freeze during the day in cold weather.

NOS. 1 AND 2, ONE-HALF DOZEN; NO. 3, ONE DOZEN IN A CRATE.

MOE'S TOP FILL DRINKING FOUNTAINS.

Nos.	6	7	8
Capacity, gal.	1	2	4
Per dozen	$15.00	21.00	27.00
	ABFJ	AGGJ	BBHJ

Special Features.—Dead air space between cover and inner tank which keeps water cool in summer and warm in winter. Will keep water from freezing for about 6 hours at about 6 below zero.

CRUSO SANITARY FOUNTAIN.

No. 40—Cruso, heavy galvanized iron, capacity 1 gal., w't per doz. 30 lbs., per dozen .....**BIJ** $4.80

This sanitary fountain prevents chicks from standing in the water, thus keeping them dry and the water clean. Easily knocked down for shipping, insuring cheap freight rates.

ONE-HALF DOZEN IN A CRATE.

CRUSO WALL FOUNTAIN.

No. 22—Cruso, heavy galvanized iron, capacity 1 gal., w't per doz. 30 lbs., per dozen .....**CFJ** $6.00

No. 23—Cruso, capacity 2 gal., otherwise same as No. 22, per doen **DHJ** $9.00

Designed to hang on wall or post at any height, thus keeping them free from dirt. For small or large fowls, also pigeons. Will not break by freezing, easily cleaned by partly filling with pebbles, etc., and then shaking.

ONE-HALF DOZEN IN A CRATE.

AUTOMATIC FEEDERS AND FOUNTAINS.

No. 21—Cruso, furnished in Terne plate, will fit pint, quart or half-gallon Mason jars, w't per doz. 6 lbs., per dozen .....**ABJ** $2.00

Per gross .....**AAEJ** 19.20

It feeds water, grain, grit, oyster shell, etc., and is the most sanitary fountain on the market; having a glass reservoir, which is easily cleaned, and you can always see just how much water it contains without taking hold of it, and is so simple any child can fill it.

Any size Mason glass jar fits it. We do not furnish the jars, as everybody has them on hand, thereby saving the extra expense.

ONE DOZEN IN A PASTEBOARD CARTON AND SIX DOZEN IN A CRATE.

CRUSO GRIT AND SHELL BOX.

No. 1—Cruso, three compartments each holding about 2 qts., round bottom, heavy galvanized iron throughout, w't per doz. 30 lbs., per dozen **EAJ** $9.00

Cover slants, preventing fowls from roosting on the box. The automatic supply construction practically eliminates waste and keeps the grit, oyster shell and charcoal clean and sanitary. For a small flock this box can be used as a dry food hopper.

ONE-HALF DOZEN IN A CRATE.

DRY FOOD HOPPER.

Cruso Dry Food Hopper—Galvanized iron, two compartments, one holding 6 qts. of grain, one 3 qts. for beef, handle, hinged cover and round trough, w't per doz. 30 lbs., per dozen .....**EAJ** $9.00

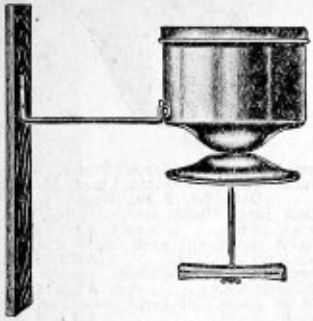
To be hung against wall of poultry house. Very economical. The cover protects the contents from all moisture and filth.

ONE-HALF DOZEN IN A CRATE.

CRUSO SANITARY FEEDING TROUGHS.

Best Grade Galvanized Iron.

Nos.	210	220	230
Length, in.	12	18	24
W't per doz., lbs.	12	23	31
Per dozen	$4.20	8.50	13.00
	BEJ	EAJ	JGHJ



The barred top prevents wasting of feed and if used for water, does away with the little chicks drowning.

The feed saved by using this trough will more than pay for itself in a few weeks. Made in three sizes.

PACKED ONE-HALF DOZEN IN A CRATE. WE DO NOT BREAK CRATES.

AUTOMATIC FEEDERS, POULTRY SUNDRIES, ETC.

AUTOMATIC POULTRY FEEDERS.

For Chicks.

No. 124—"Simplex Faultless," 4 qt. black steel drawn seamless construction, finished in brown enamel, height over all 14 in., w't per doz. 36 lbs., per dozen .....**AJAJ** $17.00

Invaluable for feeding small chicks. The bait bar revolves when pecked, and the feed is then automatically scattered about. Will not clog, and is easily operated. The Simplex Faultless is the result of experimenting on a device that will really be an automatic feeder and still be priced within the reach of all. It is guaranteed to be satisfactory in every respect and will last a life time. Besides keeping the food in good condition it is designed with the purpose of giving the chick some good growing exercise in getting the food. Furnished complete with bracket for attaching to side of post or coop.

No. 152—¼ bu. capacity, galvanized, height over all 18 in., w't per doz. 54 lbs. .....per dozen **AJAJ** $17.00
No. 153—½ bu. capacity, galvanized, height over all 24 in., w't per doz. 72 lbs. .....per dozen **AEHJ** $26.00
No. 154—1 bu. capacity, galvanized, height over all 32 in., w't per doz. 108 lbs. .....per dozen **BJAE** $34.00

These feeders are designed especially for full grown fowls. The general construction is the same as the No. 124 for baby chicks. Furnished with bail for hanging instead of bracket, however.

ONE IN A CARTON.

POULTRY LEG BANDS.

PERFECTION, Adjustable Double Lock, Aluminum and Numbered to Suit Purchaser.

HENS' NESTS.

No. 45—Steel wire, japanned, diameter 13 in., mesh 1½ in., w't per doz. 4 lbs. .....per dozen **JFE** $1.35

No. 15—Cruso, 14 in. diameter, 7 in. deep, mesh of No. 17 coppered wire, eight ribs of flat steel, coppered, top ring of No. 10 coppered wire, w't per doz. 8 lbs. .....per dozen **JIJ** $1.50
Patent lock ribbed.

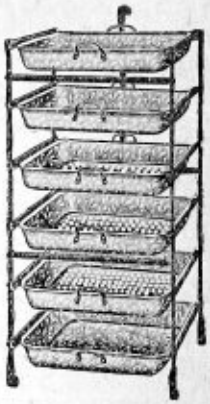
ONE-HALF GROSS IN A CRATE.

NEST EGGS.

No. 1—Opal glass, w't per doz. 10 oz., per dozen .....**AH** $0.50
Per gross .....**AEE** 2.60

ONE DOZEN IN A CARTON.

POULTRY PUNCH.



Roger's.

No. 1—Nickel plated, per doz. **CBJ** $5.30
No. 2—White finish, per doz. **BDJ** 4.00

Punches a small hole in the web between the toes of a young chick for marking purposes. Strongly made. Does not bruise the foot of the chicken but cuts a clean round hole. Indespensable to the poultry fancier.

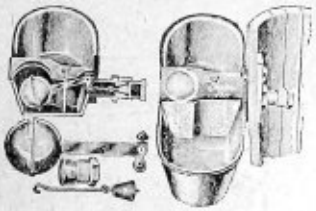
OATS SPROUTERS.

No. 11—Economy, iron rack 35 in. high, 5 sprouting pans, 1 drip pan 16x17 in., natural drainage, effective and economical to highest degree, w't 33½ lbs. .....each **EDJ** $9.00

When the oats in the sprouter are ready for feeding, each pan may be divided into four quarters. One quarter per day will feed a flock of about twenty-five chickens.

BEE SMOKERS.

IX Tin Stove, Galvanized Steel Brackets and Hook, Hinged Cover, Removable Grate.



No. 1—Junior, 6¼x2½ in. stove, 7x3¼ in. bellows, w't per doz. 15 lbs., per dozen .....**JIJJ** $15.00

No. 2—Standard, 6¾x3¾ in. stove, 7½x3¾ in. bellows, w't per doz. 18 lbs., per dozen .....**ABJJ** $20.00

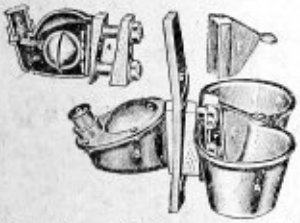
ONE IN A BOX.

STOCK WATERERS AND FOUNTAINS.

STOCK FOUNTAINS.

No. 5—Daisy, cast iron, japanned, working parts of brass, w't 144 lbs., per dozen .....**ACBJ** $28.00

The Daisy is very easily attached, having but one ¾ in. pipe to be inserted into tank or barrel. The float chamber is a continuation of the cups and having a raised bottom it throws all mud, etc., into the cups. The cover is secured by a thumb nut and can be removed easily. The valve is a tapering vulcanized rubber cork and can be adjusted, thus regulating the depth of water in the cups.

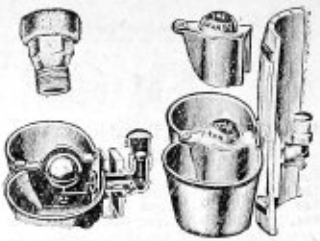


ONE-HALF DOZEN IN A CRATE.

No. 21—Float Valves with lever attached and brass machine screws with nuts for No. 5 Hog Waterers, per dozen .....**CFE** $6.00

No. 2—Rubber Cork or Valves with connecting wire and screw eye for No. 5 Hog Waterers, per dozen .....**AHJ** $3.00

No. 4—Improved Dewey, cast iron, japanned, w't 240 lbs., per dozen .....**AEJJ** $28.00



AA—Double drinking cup, B—valve and float chamber, C—top of chamber, D—Screen cap, E—division or shield, F—air inlet, F2—water outlet, G—represents barrel stave.

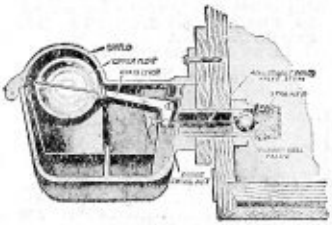
1—brass float, 2—valve, 3-3—wedges used in attaching to barrel, for tank use small wedge only and reverse ends, 4—barrel or tank space.

The valve is on the inside of tank or barrel in water and governed by water closet brass float which cannot rust, leak, freeze or allow mud to collect under it. It can be set for two pens. Will water from 150 to 300 hogs a day, also sheep, calves and poultry.

ONE-HALF DOZEN IN A CRATE.

STOCK FOUNTAINS.

No. 8—Handy, cast iron, japanned, w't 126 lbs. .....per dozen **ACBJ** $28.00



Has a soft rubber button valve and a brass valve-seat that will not corrode or get rough. It has an extra long lever. The brass ball float can be screwed up or down to regulate the flow of water into the pan by simply taking off the cover of center division. The distance from the bottom of pipe hole where water enters pan to bottom of the pan is over 2 in., this is where the mud settles; none can ever get back into the valve chamber. It is held to barrel or tank by 1 in. pipe nipple, equal to 1 in. bolt.

ONE-HALF DOZEN IN A CRATE.

No. 1—Float Valves, for No. 8, per dozen .....**BDJ** $4.00
No. 4—Rubber Button Valves, for No. 8, per dozen .....**DE** $0.80

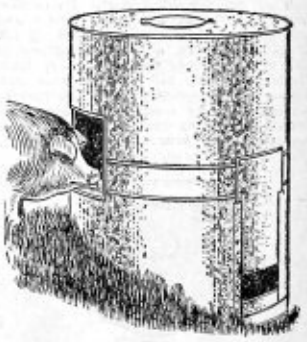
STOCK WATERERS.

Star—Working parts of brass, w't 156 lbs. .....per dozen **ADDJ** $24.00

The Star has fewer working parts than any other waterer. The shield is held secure by cotter pin instead of bolt or nut, which eliminates the rusting. The shield cannot be removed. The valve seat is made of composition that will not rust. Works well attached to either tank barrel or pipe. It holds one gallon of water.

The adjustment is in the drinking trough instead of on the inside of the barrel. This enables the user to regulate the flow from the outside. When the trough is being cleaned, the water can be entirely shut off. This feature is especially desirable, as it prevents the freezing of water in the trough.

SANITARY AUTOMATIC CATTLE WATERERS.



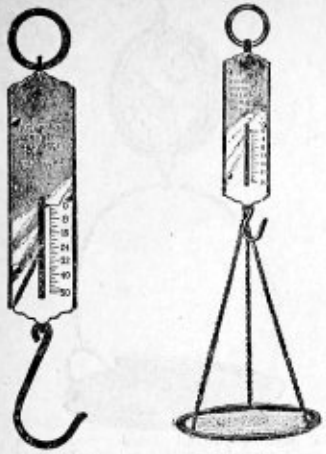
Cast Iron, Black Japan Finish, Also Furnished in Porcelain Lined, 12 in. Diameter, 8 in. Deep.

Black Japan finish, without cover, w't each 15 lbs. .....each **JIJ** $1.50
With cover, w't each about 17 lbs., each .....**ABJ** $2.00
Porcelain lined, without cover, w't each 18 lbs. .....each **AEJ** $2.50
With cover, w't each about 20 lbs., each .....**AHJ** $3.00
Tank float valve without float, w't each 3½ lbs. .....each **JFE** $1.10

Never leaks, always ready, waters two head of stock with one bowl. They are connected by a one-inch pipe to a tank placed at one end of the barn at proper height to regulate water in the bowls. This tank is connected with the tank at the windmill and height of water is controlled by a tank float and valve.

REVONOC HOG WATERER.

REVONOC—Heavy galvanized iron, very strongly built, w't each 90 lbs., each .....**AGDJ** $29.00



The **REVONOC** *Waterer consists of a 60 gallon tank encased in a heavy outer jacket with a one inch air space between. The heating apparatus consists of a lamp placed directly under the drinking pan, and is guaranteed to keep the contents from freezing when the temperature is 40 degrees below zero. The water height in the tank is automatically regulated, not by valves which continually get out of order, but by a simple vacuum arrangement. Perfectly sanitary, impossible for animals to get feet into the water, will give just the right temperature every day in the year, requires very little attention, and is easily installed.*

Special prices for lots of six.

Shipped either from Chicago or Des Moines, Iowa.

BALANCES AND SCALES.

BUTCHERS' BALANCES.

No. 101 REVISED—Silver finished dial, with black figures, very heavy steel body, handsomely black enameled and decorated with aluminum bronze, very sensitive and accurate, large steel platform, beautifully finished in aluminum bronze, can be easily folded when not in use and instantly adjusted by regulating screw on top, capacity 60 lbs. x 1 oz., w't boxed 12 lbs. .....each **B I J** $4.00

No. 366 REVISED—High grade pressed steel, enameled black, dial white with large black figures, 6 in. diameter, protected by glass and nickel plated sash, capacity 20 lbs. by ounces, folding white enameled platform 12 in. in diameter with steel tinned bow, w't each 5 lbs. .....each **B D J** $4.00

The regulating device conforms with the requirements of the new State laws. Handy for merchants and family use.

ONE IN A BOX.

FRUIT & VEGETABLE.

No. 166 REVISED—Heavy gauge pressed steel, making it light but very strong, enameled in black, dial diam. 9½ in., finished in aluminum and divided into 30 lbs. by ounces, indicator makes two revolutions giving scale a capacity of 60 lbs., scoop 24 in. long, 13½ in. wide and 7 in. deep, made of 24 gauge galvanized iron with a heavy wired edge and strong steel chains, holds one-half bushel of potatoes, each .....**J C D E** $12.00

In states where laws are being passed providing that fruits and vegetables must be sold by weight in place of measure there will be a big demand for this scale.

THREE IN A WOODEN CASE.

No. 266 REVISED—Body of scale heavy gauge pressed steel throughout, enameled black, dial white with large black figures, 6 in. in diameter, protected by glass and nickel plated sash, capacity 20 lbs. by ounces, once around scoop, 20 in. long, 12 in. wide, 6 in deep of galvanized iron heavy wired edge and strong steel galvanized chain, holds over a peck, w't each 32 lbs. .....each **B I J** $4.80

The regulating device conforms with the requirements of the new State laws.

FOUR IN A WOODEN CASE.

BUTCHERS' BALANCES.

No. M20—Improved double dial, with regulating device on top which adjusts both indicators at one time without taking scale apart, regulating screw is protected with a cap which complies with the new laws, the scale is heavily nickel plated throughout, white glazed platform, 10 in. glass sash, white dial with large figures, capacity 20 lbs. x 1 oz., w't 17 lbs., each .....**J H D J** $12.00

No. M30—Capacity 30 lbs., otherwise same as above .....each **J I J J** $12.50

ONE IN A BOX.

HANSON'S.

No. 16—Universal Improved, capacity 24 lbs. x 1 oz., steel case, 5¼ in. adjustable white enameled circular dial, large blue figures, 10 in. porcelain enameled pan, w't 2¾ lbs., each .....**A D E** $2.50

ONE IN A BOX.

HIBBARD REVONOC FAMILY SCALES.

No. 160 REVONOC—Counter, capacity 60 lbs. x 2 oz., constructed of steel, aluminum finished slanting dial diam. 9½ in., 9½ in. square steel platform, wood base 9½x12½ in., handsomely enameled in black, trimmings aluminum bronze, no castings, w't 16 lbs., each .....**BDJ** $4.00

No. 160T REVONOC—With heavy tin scoop 10½x20 in., w't 19 lbs., otherwise same as No. 160 REVONOC, each .....**CCJ** $5.50

This is an exceptionally strong scale and especially designed for weighing fruits and vegetables. This scale is intended to do the same work that the No. 166 REVONOC does.

ONE IN A BOX.

No. 165T REVONOC—Fitted with steel claw and large heavy tin scoop, 10½x20 in., highly polished, regulating screw inside of frame, protected with cap which conforms with new laws, built throughout of steel, and has large wooden base, handsomely finished in black enamel, slanting dial is silver finished with black figures 9½ in. in diam., capacity 60 lbs., w't boxed 18 lbs. .....each **CAE** $4.40

An exceptionally good, strong scale for weighing commodities of large amounts for restaurants, hotels and farmers' households.

ONE IN A BOX.

No. 24 REVONOC—Slanting dial, capacity 24 lbs. x 1 oz., square steel platform, w't 4 lbs. .....each **AJJ** $1.60

This style of scale is very popular for general family use. It is strong, accurate and very sensitive. Invaluable to every household.

ONE IN A BOX.

No. T25 REVONOC—Slanting dial, capacity 24 lbs. x 1 oz., steel fork and heavy tin scoop, w't 4¼ lbs., each .....**AJE** $1.80

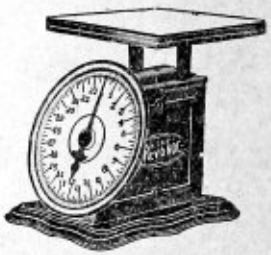
Where a large capacity scale for weighing spices, etc., is wanted, the No. T25 answers every requirement.

No. T12 REVONOC—Capacity 12 lbs. x 1 oz., otherwise same as No. T25 REVONOC, each .....**AJE** $1.80

A smaller weighing capacity on the same size dial as the No. T25 makes the fractional numerals more easily read and also makes it a convenient medium capacity family scale.

No. T6 REVONOC—Capacity 6 lbs. x 1 oz., otherwise same as No. T25 REVONOC, each .....**AJE** $1.80

ONE IN A BOX.



No. T26 REVONOC—Slanting dial, capacity 24 lbs. x 1 oz., square steel platform, tin scoop with collar, w't 5 lbs., each .....**ABJ** $2.00

A scale that is well adapted for family use.

The scoop is large and durable and the most serviceable for the preserving season.

ONE IN A BOX.

No. 25 REVONOC—Slanting dial, capacity 24 lbs. x 1 oz., tile top platform, w't 4½ lbs. .....each **ABJ** $2.00

Tile platform scales are very good sellers, because of the convenient way of keeping them clean and sanitary.

ONE IN A BOX

REVONOC SCALES.

The Dial—Is at a proper angle so that it can be read at a glance without stooping. The numerals and lines are stamped into steel, coated with aluminum bronze, and are large and distinct.

Platform—set well back and does not shade the dial and is supported on double steel uprights, distributing the weight and insuring accuracy.

Inside Mechanism—as well as the frame is pressed entirely of high grade steel, absolutely no castings to break in transportation.

Regulating Screw—is so arranged that it can easily be adjusted for any kind of vessel, and has a self-locking device inside of frame and cannot be tampered with after being set.

Finish—All our REVONOC scales have a heavy coat of black japan over the base, frame and uprights, and the dial is richly coated with aluminum bronze.

SCALES.

FAMILY.

No. 234—Blue enamel finish, dial protected by glass and nickel sash, capacity 24 lbs.x1 oz., square white tile platform, w't 4½ lbs., each .....AFJ $2.70
The white tile insures cleanliness and is very convenient.

ONE IN A BOX.

No. 61-S—Capacity 60 lbs. x 2 oz., constructed of steel, large dial, can be instantly regulated, neatly japanned in black, two upright removable steel posts, with a 16 in. heavy tinned scoop, w't 9½ lbs., each .....BCJ $4.50
ONE IN A BOX.

SCALES.

The Slanting Dial Glass Front Scales are the most up-to-date and highest grade that are made.

Finish—Beautifully enameled in **blue** and decorated in **gold.**

Dial—The scales have large white slanting dials, with plain black figures, protected with glass and nickel plated rims which prevet anyone from tampering with the indicator. There is a felt lining between two metal rims which acts as a cushion for the glass and makes it dust proof, keeping the dial always clean and easy to read.

Construction—The interior mechanism and the frame are made of the best cold rolled steel, absolutely no castings used. The pivots are properly fitted, and all parts very carefully assembled.

All scales are accurately tested.

The platform and scoops are supported on double steel uprights, distibuting weight and insuring accuracy.

The Scale is invaluable for family use.

CONFECTIONERY AND DELICATESSEN SCALES.

No. T69 REVISED—Silver finished dial, 6 in. in diam., steel claw and highly polished tin scoop, body enameled in black and decorated with aluminum bronze, adapted to weigh candies, teas, coffees, etc., capacity 6 lbs. x ½ oz., w't 3½ lbs. ..each **AAE** $1.60

No. 86—Imperial, computing confectionery, capacity 2 lbs. x ½ oz., large upright enamel dial, steel construction throughout, beautifully nickel plated with a polished brass scoop, w't 2 lbs., each .....**BGE** $4.40

This scale is warranted to accurately compute the cost of any merchandise in money from 5 cents to 60 cents per lb.

No. A6 REVISED—Large, white dial, with plain black figures, protected by glass and nickel plated rim, felt lining between two metal rims acts as a cushion for glass and also makes it dust proof, thus keeps the dial always clean and easy to read, body coppered and heavily nickel plated, steel claw with a large brass scoop, heavily nickel plated, strong and serviceable, an exceptional scale for weighing confectionery, capacity 6 lbs. x 1 oz., w't 4½ lbs. .....each **BFJ** $3.60

No. A5—Majestic, large white dial, welled over with transparent celluloid, body nickel plated throughout, steel claw and large solid brass scoop, heavily nickel plated, especially designed for show case, as it is very heavy and strong, handy for weighing candies, teas, coffees, tobaccos, etc., capacity 4 lbs. x ½ oz., w't 2¾ lbs. .....each **BJJ** $2.70

No. 80—Columbian, capacity 2 lbs. x ½ oz., adapted to weighing candy, spices, packages, letters, books, etc., steel construction and handsomely nickel plated throughout, with a one-piece nickel plated scoop, w't 1½ lbs., each .....**BAJ** $3.35

This is a very useful scale, as it is adapted to postal or confectionery uses.

No. 280—White dial, with large black figures, protected by glass and nickel plated rim, body enameled in black and artistically decorated, base 9½x12½ in., white glazed tile platform 8x10 in., supported on double steel uprights, capacity 20 lbs., x 1 oz., w't boxed 17 lbs., each .....**EBJ** $7.20

ONE IN A BOX.

No. 551—Invincible, very sensitive and accurate for weighing teas, candies, spices, etc., dial has large plain figures welled over with celluloid, making it indestructible in cleaning, handsomely nickel plated, equipped with a large brass nickel plated scoop, capacity 2 lbs. x ½ oz., w't 30 oz., each .....**AEE** $2.10

ONE IN A BOX.

No. 002—Standard candy computing scale, capacity 2 lbs. x ½ oz., computes cost of merchandise from 10 cents to 60 cents, prevents error and waste, easiest reading computing scale made, having rates per lb. on indicator, body nickel plated, furnished with a large, highly polished nickled brass scoop, w't 2 lbs., each .....**BJJ** $2.60

ONE IN A BOX.

CONFECTIONERY AND POSTAL SCALES.

CONFECTIONERY.

each .....BDJ $4.00
A very handsome and popular scale.

ONE IN A BOX.

REVONOC CANDY AND POSTAL.

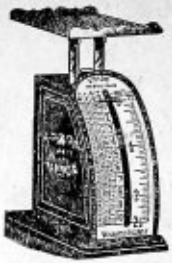
No. C5 REVONOC—Dial shows weight by ½ ounces, and indicates cost of postage, which makes it doubly desirable, beautifully nickel plated, furnished with brass scoop heavily nickel plated, very useful, being adapted to postal or confectionery uses, capacity 2 lbs. x ½ oz., w't 30 oz.,
each .....AHJ $3.00

ONE IN A BOX.

REVONOC POSTAL.

No. 79 REVONOC—Precision, most mechanically perfect round dial scale, substantially built of steel, shows automatically the exact cost of postage in cents on all classes of mail matter up to 4 lbs. x ½ oz., dials made in white, with black and red figures protected by a transparent celluloid cover, index of a sword shape, and does not cover graduations on dial, heavy platform 4x4½ in., supported on double steel upright, beautifully finished in black enamel, capacity 4 lbs. x ½ oz., w't 2 lbs. .....each AHJ $3.00

ONE IN A BOX.



No. 116 REVONOC—Capacity 2 lbs. x ½ oz., best cold rolled steel construction, handsomely finished in black enamel, nickel trimmings, a positively accurate and scientifically perfect automatic scale, w't 20 oz.,
each .....JIE $1.60

The REVONOC scale indicates instantly the exact weight and cost of postage on all classes of mail sent to any part of United States, Canada, Mexico, Cuba, Philippine Islands and also foreign rates. The great idea of this scale is the slanting and extended dial which is in direct range of vision without stooping, also the upward moving indicator, the effective locking device on the regulating screw, and the finely tempered springs.

ONE IN A BOX.

PELOUZE POSTAL.

No. 77—Union, capacity 2½ lbs. x ½ oz., steel construction throughout, handsomely japanned in black, beautifully decorated, very accurate, weighs by ½ oz. for foreign postage, 6½ in. high, w't 1 lb.,
each .....BJJ $3.30

No. 76—National capacity 4 lbs. x ½ oz., steel construction, beautifully nickel plated throughout, upright dial, weighs by ½ oz. for foreign postage, 7½ in. high, w't 1¼ lbs.
each .....BDJ $4.00

Having a larger capacity for weighing purposes, these scales are adapted to offices. Accurate, sensitive and durable.

ONE IN A BOX.

For Library or Desk.

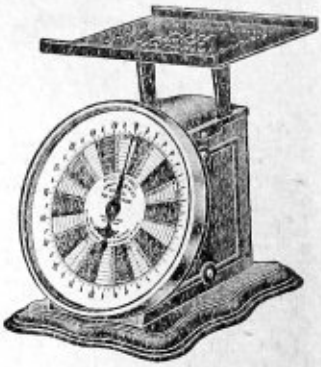
No. 60—Crescent, capacity 1 lb. x ½ oz., steel construction, beautifully nickel plated, strong spring, very accurate, 3 in. high, w't 4 oz., each JGJ $1.20

This scale computes the cost of postage instantly, in cents, on letters, books, packages, newspapers, etc. Very neat, attractive and serviceable.

ONE IN A BOX.

PARCEL POST SCALES.

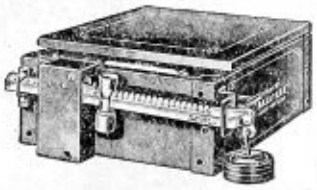
No. A-1 [illegible]—Automatically computes postage for different zones of mileage, large white dial 6 in. in diameter, with plain black figures covered with glass and nickel plated sash, felt lining which acts as a cushion for glass and also makes it dust proof, number of zones and mileage printed in red, shows weight on the dial by ounces up to 20 lbs. for family use, built of best cold rolled steel, enameled in blue, white glazed platform supported on double steel uprights, regulating device inside of frame in rear of scale, is sealed with a lid and cannot be tampered with, capacity 20 lbs.x1 oz., w't each 4½ lbs.....each **BDJ** $4.00



ONE IN A PASTEBOARD BOX.

No. 1200 [illegible]—Hanging scale, has computing chart complying with the new regulations, shows amount of postage in different zones, red figures indicate amount of postage, sections of dial alternately shaded, making pounds easily distinguished, shows weight by ounces up to 20 lbs., substantially built of best cold rolled steel, beautifully enameled, regulating device at bottom fastened with a washer and cannot be tampered with, capacity 20 lbs. x 1 oz., w't each about 2¼ lbs. .....each **AGJ** $2.80

These are identical with the Hanging Scales now in use by the Post Office Department. The most practical scale for commercial houses that have large sized packages; they may be weighed accurately as weight is suspended centrally.



ONE IN A PASTEBOARD BOX.

No. 20 [illegible]—Slanting dial, 6 in. diam., enameled in black, has computing chart complying with new regulations, automatically shows amounts for various zones, amounts shown in red, zones in black, sections on dial alternately shaded making amounts easily distinguished, shows weight in ounces up to 20 lbs., capacity 20 lbs., w't each 4½ lbs., each .....**AIJ** $3.20

A substantially built scale of the very best cold rolled steel. Has very heavy steel platform supported on double steel uprights. Regulating is on the inside of the scale in the rear. The interior is sealed with the lid which makes tampering out of the question.

ONE IN A PASTEBOARD BOX.

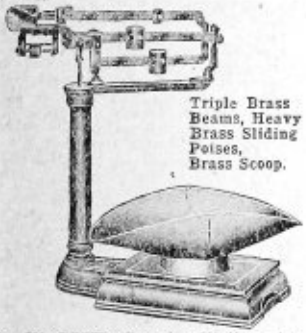
All Steel Platform.

No. 100—Triner, every part of high grade steel, black enameled, decorated in gold, beam and poise of solid brass highly polished and lacquered, 6 in. high, 12½ in. wide, 17½ in. long, platform 12½x14 in., beam shows weights to 20 lbs., hook weight used from 20 to 40 lbs., up to 100 lbs., celluloid computing chart is used, w't each 45 lbs.....each **ADDJ** $34.00

The U. S. Post Office Department has equipped the entire Parcel Post Service with these scales. The beam is below the platform, and directly in front of the operator. There is no reaching over the packages to adjust the weights as in other beam scales. The beam is deeply notched, and the poise sits true in the notch and gives absolutely correct and quick weights at all divisions of the beam. The computing chart is easy to operate and can be changed by any one very easily and with absolute accuracy. After the weight of the package has been computed, the operator draws out the chart to the figure corresponding with the number of pounds and reads the amount in the column designated by the zone to which the package is to be shipped.

ONE IN A WOODEN BOX.

COUNTER SCALES AND SCALE BEAMS.



GROCERS' SCALES.

Heavy Nickel Double Brass Beams, Heavy Nickeled Brass Poises, Heavy Brass Scoop.

No. 510—Capacity 1 oz. to 250 lbs., platform 10½x13½ in., finished in black with gold trimmings, hardened English tool steel bearings throughout, w't each 60 lbs., each .....AFBJ $27.00

PHYSICIANS' OR BATH ROOM SCALES.

No. 100

The has no loose weights, all computing being done on the brass beams which are marked on both sides so that the weight may be noted from either side. The can be furnished with or without the telescope measuring rod which is attached to the pillar by two nickel plated clamps with invisible joints.

The has a single beam and loose weights, and is furnished only with the measuring rod. The materials used in this scale are a trifle lighter than the .

The and Physician's and Bath Room Scales are built of the very best material throughout, and are finished in the most artistic and pleasing designs. Very handy scales for the Hospital, Sanitarium, Office or Home. Especially useful in bathrooms to obtain true personal weight without clothing. This is in all cases desirable, and in many cases of medical treatment absolutely necessary in order to note accurately and frequently any slight change in weight. They are guaranteed to be absolutely correct in every detail.

No. 100 —Capacity 300 lbs., all sown on beams, platform 12x15½ in., height over all 58 in., finished in white with best quality heavily nickel plated brass fittings throughout, w't each 85 lbs.,
each, with measuring rod.....BGFE $40.00
each, without measuring rod.....BDAE 42.00

Nos. 6 and 8 graduated up to 50 lbs. on the beam, and Nos. 10 and 12 graduated up to 100 lbs. on the beam.

The two swivel or caster wheels on the front or beam end of scale are supported on ball-bearing swivel head. The stationary rear wheels are supported on steel axle that runs clear through under frame. All wheels are enclosed within the base frame, protecting them from dirt and obstructions, and adding greatly to strength and appearance.

Fitted with hardened flexible lever bearing loops and platform bearing feet.

By use of this novel swivel wheel construction the operator is able to move the scale in any direction with the utmost ease.

PORTABLE PLATFORM. "IL-A-NOY."

The CE% Shallow Pit Scales require less space than any other first class scale made. The stringers are hung to the heavy steel bearings by steel stirrups which does away with all friction and the dulling of the knife edges. The CE% are made to hang in either wood or steel frames, however steel is strongly recommended. Prices given above are exclusive of platform, planking and foundation, but includes office fixtures or beam box as desired.

WAGON SCALES.

IL-A-NOY PITLESS.

Triple Beam

In the Il-a-noy Steel Pitless Wagon Scale, we have adopted the direct steel lever construction which embodies many of the valuable features of a high grade Pit Wagon Scale, with the improvements and advantages of a Pitless Scale.

Frame—Made with heavy steel channel end sills connected by tubular steel cross pieces secured at each corner by strong gray iron brackets which hold in place the heavy hardened loops that support the steel levers in scale frame.

Scale Levers—A single piece of T shaped rolled steel, the two long levers being trussed with heavy steel bars making them perfectly rigid.

Stringers—Heavy steel I beams are used, which support the platform planks, provision being made for fastening planks to I beams.

Pivot Bearings—Throughout the entire scale are made from best tool steel carefully tempered and ground to a knife edge, insuring sensitiveness.

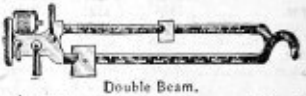
Brass Beam—Three bar, solid, combination, graduated to full capacity of scale and fitted with brass faced sliding poises.

Beam Pivots—Are of best tool steel carefully tempered, each one being secured in beam by hard friction steels.

I Beams—Are made of heavy steel supported on the steel levers in frame of scale by carefully chilled bearing feet that rest on tempered tool steel pivots in scale levers. N. B.—They are held in place on levers by tubular steel cross pieces.

Levers—Are of heavy rolled steel, supported at each corner of scale frame by heavy hardened loops hung over the corner brackets.

Beam Box—Is of selected one-inch tongued and grooved lumber, painted, and is provided with lock and key, also a heavy molded top.



Guarantee—Sealed to U. S. standard weights and against defective workmanship and material.

Shipping—Each scale is carefully boxed and crated for shipment with complete printed directions for setting up and installing. Purchaser is required to furnish only the platform planks.

SUBURB PITLESS.

Double Beam.

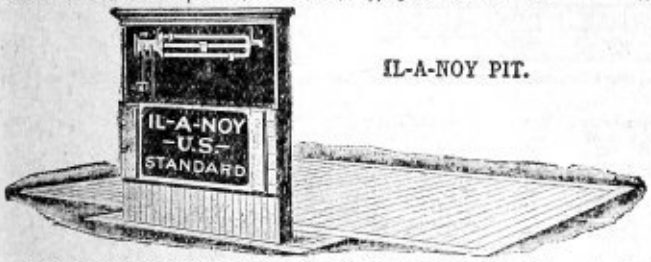
Our "Suburb" Pitless Wagon and Stock Scale with solid double brass beam, is well constructed in every particular and suitable for ordinary uses, being provided with full capacity double brass beam fitted with brass sliding poises.

Levers—Made from T shaped rolled steel and supported in frame of scale by tubular steel cross pieces, which hold wood end sills in place.

Platform Stringer—Next to the beam box is made from a heavy steel I beam and supported on levers by carefully chilled bearing feet.

Beam and Lever Pivots—Throughout the scale are of heavy tool steel ground to a knife edge and carefully hardened, thus insuring sensitiveness, accuracy and durability to all parts of scale where the wear and strain is greatest.

Beam Box—Is made of good materials, well painted and provided with lock and key.



Guarantee—Sealed to U. S. Standard Weights and against defective material and workmanship.

Shipping—Each scale is carefully crated and boxed for shipment with full and plain printed instructions for setting up and installing. The purchaser is required to furnish only the platform planks, two wood end sills 8 feet by 12 inches wide by 3 inches thick, and one platform stringer 14 feet long by 8 inches wide by 6 inches thick, this stringer being placed on the outer end of scale.

The printed instructions show and describe how all wood parts are cut and how foundation should be constructed.

IL-A-NOY PIT.

Triple Beam.

Il-A-Noy Trussed Steel Lever Pit Wagon Scale, is a high grade weighing machine and has many exclusive improvements not found in any other type of pit wagon scale. This scale excels in quality of materials used, accuracy in weighing, and is built to withstand the heaviest strain. It is intended for coal and grain dealers, manufacturers and others who use a scale constantly under all conditions and require them to stand under any test.

Beam—Furnished with double or triple solid brass beams graduated to full capacity of scale and fitted with brass faced sliding poises.

Levers—Made from rolled T shaped steel, each being strongly trussed.

Bearings—Throughout the scale are of best tool steel carefully tempered and ground to a knife edge.

Guarantee—Il-A-Noy Trussed Steel Lever Pit Wagon Scales are made from high grade materials throughout by skilled scale mechanics and guaranteed to be sealed to U. S. Standard Weights and against defective material or workmanship.

Shipping—Scale is carefully boxed and crated complete with building plans for setting up and installing. Purchaser is required to furnish platform planks and timbers for stringers and pit foundation sills. Building plans give bill of lumber required and how each piece is cut.

This sample board and assortment has been made up to assist the dealer in selling builder's hardware. It covers only the most necessary items and the patterns included are of the latest and best.

Our charge covers only the cost of the hardware included in the assortment, the oak sample board (18x24 in) and samples being furnished absolutely free.

We carry a full stock of all the items shown on board, also butts and other trimmings which will be needed.

We include also a folder giving numbers and retail selling prices of other items in our stock, to match the patterns and which may be necessary to completely trim a house, also stating what other finishes are carried in stock besides those shown on sample board..

See our builders' hardware catalogue for other patterns.

MAIL BOXES.

RURAL FREE DELIVERY.

Stock or F. O. B. Indianapolis, Ind.

No. 200—6x7½x18½ in. inside measurement, galvanized steel, aluminum bronzed, automatic spring hasp, opening at end, w't per doz., crated, 85 lbs., per dozen ..... JGBJ $12.00

ONE DOZEN IN A CRATE.

Stock or F. O. B. Deshler, O.

No. 300—R. F. D., 7x8x19 in., galvanized iron, aluminum bronzed, automatic spring hasp, end opening, knocked down and nested one-half dozen in a crate, w't per doz. 80 lbs., per dozen ..... JGBJ $12.00

Absolutely storm proof, perfect in operation, positive locking signal in either position, up or down, weather-proof slot in door for depositing the mail without unlocking the box.

Takes up less room in stock and takes lower freight rate than old style boxes.

ONE-HALF DOZEN IN A CRATE.

WE DO NOT BREAK CRATES.

RURAL FREE DELIVERY.

Stock or F. O. B. Indianapolis, Ind.

No. 100—6x7x18½ in. inside measurement, galvanized steel, self-locking signal, plainly lettered "U. S. Mail," w't per doz., crated, 105 lbs., per dozen ..... JGBJ $15.00

Each box is provided with a self-locking signal at the end, which can be seen at a great distance. This is to be used by patron and carrier to indicate that there is mail in the box, and can be operated only when the box is opened, so cannot be tampered with. On the inside is a receptacle for outgoing mail. Each one is plainly lettered "U. S. Mail," and stenciled "Approved by the Postmaster General." They are strictly storm-proof, safe and durable.

For master key padlocks, especially adapted for rural free delivery mail boxes, see page 303.

LEAD SASH WEIGHTS.

Compressed Lead, with wrought iron rod through center, twice as heavy as iron, solid, compact, noiseless, per pound .....**JH A/B** $0.15

These weights are twice as heavy as iron weights and consequently save one-half the space. They are the only lead weights with secure and reliable fastenings, a wrought iron rod being run through the center to which are securely attached the malleable iron fittings.

Table of Weights.

Size, Inches	Round, Per Ft., Lbs.	Square, Per Ft. Lbs.

TRANSOM CHAINS.

No. OC188—14 in., steel, polished old copper finish ..per dozen AEE $4.80
No. DB188—14 in., steel, dull brass finish .....per dozen AEE $4.80
ONE DOZEN IN A BOX, WITH SCREWS.
W'T PER DOZEN 4 LBS.

TRANSOM LIFTERS

PAYSON'S.

Top Hung (Push up to open.) | Center Hung (Pull down to open.) | Special Class 4, Bottom Hung (Pull down to open.) | Center Hung (Push up to open.)

The above cuts show the four different positions in which transoms may be hung.

The "Solid Grip" lifter will lock instantly at any point, and is adapted for either top, bottom, or center hung transoms, but all bottom hung transoms should be hung with special class 4 lifters, and must be so hung when there is but small space above the transom. Transoms hinged at the bottom afford better protection against rain, draughts, storms and intruders. They can be screened more easily and can be guarded with transom chains.

The Special Class 4 must be used for bottom hung transoms, where space overhead will not admit the swing of regular lifter.

Bronzed Iron.

Nos.	303	304	314	315

The Simplex Transom Lifter is an entirely new departure in lifters and its superiority is seen at once. It has greater strength than any other lifter as the lock is up beside the sash. One lift operates all styles of transoms and as it locks automatically and securely there is no need of transom chains. The lifter is up out of the way and a straight push or pull with one hand is all that is needed to open it. This lifter is easier to put up than any other, requires half the number of screws and half the time and does not mar the trim below the transom. It is approved by the best architects and is so simple in operation that a child can manage it.

THREE AND FOUR FT. LIFTERS, HALF DOZEN IN A BOX. OTHER SIZES LOOSE.

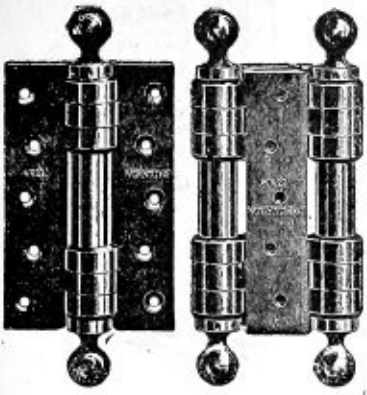
All goods branded CYD are guaranteed to be of highest quality material and workmanship and free from imperfections.

Divided efforts seldom result in success.

Concentrate on one brand of guaranteed quality—CYD



In selling CYD articles there is profit for you and satisfaction to your customers.

MAIL ORDER DEPARTMENT

Our constant attention in fifty-eight years of business has been given to the perfection of the system of handling mail orders. Our object has always been to handle them with the greatest possible speed, with the result that we are enabled, in most cases, to ship mail orders the same day they are received.

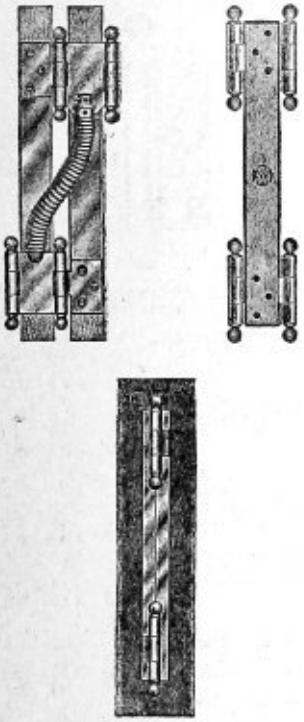
8 in.	1½ to 2¼ in.	1 in.	1½ in. x 3 ft. 0 in. to 2¼	in. x 2 ft. 6 in.

The General Construction of the "Triplex" Spring Butt has many features which are of recognized merit.

The Body is made of one integral piece, avoiding the necessity of means of fastening separate parts together. By this unique method it permits the use of heavier metal in the entire construction, with three-ply ("Triplex") of heavy metal at the end portions of the body between the barrels, producing a maximum of strength and rigidity.



The Springs are made of the best tempered steel wire in ample proportions and proper ratio of length, diameter and gauge.

The Application of the proper size butt, according to conditions, is an essential to consider in specifying. It is advisable to avoid overloading the hinge by the selection of too small a size, thereby causing the annoyance of doors improperly operating and possible breakages. We give above a schedule which will be of assistance in specifying.

This hinge has adjustable tension, new release feature, which allows door to remain open at any position and is automatic in re-engaging when it is closed. The "Adjustable Top Pivot" is always furnished with this hinge, permitting the door to be readily taken down and allowing full clearance of the doorway.

ONE SET IN A BOX.

DOUBLE ACTING FLOOR HINGES.

SHELBY CHIEF, DOUBLE ACTING DOOR CHECK AND FLOOR HINGE.

No. 4015—Dull brass plated, for doors 1⅜ to 1¾ in. in thickness, w't per set 7 lbs. ..... per set EDJ $13 75

No. 4042—Antique copper plated, for doors 1⅜ to 1¾ in. in thickness, w't per set 7 lbs. ..... per set EDJ $13 75

When properly installed has perfect control over double-acting doors, instead of a door swinging violently it will close with ease and without noise, and will stop on positive center.

This combination can also be used to swing a door but one way by placing a stop on the jamb

ONE SET IN A BOX COMPLETE, WITH SCREWS.

The tension is easily adjusted while hinge is in place. Raised ball bearings are near floor, giving easy movement, great durability and balanced power. Being elevated on center post and covered by hollow spindle, the ball bearing is protected from water, dirt and grit. Has broad top bearing plate, giving screws a good hold on flooring.

Per set	$2.80	3.40
	AGE	BAE

In ordering, always state the finish, number and size.

The Chicago "Premier" Spring Hinge is of unequalled merit, in this type of hinge and is a high grade article in every respect.

This hinge holds the door open when it is swung to ninety degrees. The weight of the door is carried on ball-bearings, the eccentric is equipped with hardened steel roller-bearings and the piston is made of drop-forged steel.

The compression spring is made of the best-tempered steel flat wire, producing the greatest efficiency and durability. The tension is adjustable.

The alignment feature is readily accessible at any time and is adjusted by turning a single screw. This eliminates any possibility of improper usage of this feature.

The attaching plate serves as a templet for cutting the door, requiring only the use of a saw and eliminates mortising projecting arms into the edges of the door.

Where floors are tile or concrete, the hinges should be specified with concrete floor-plates which are attached to the door casing. Concrete floor-plates are a part of the hinge and cannot be supplied individually for the regular hinges.

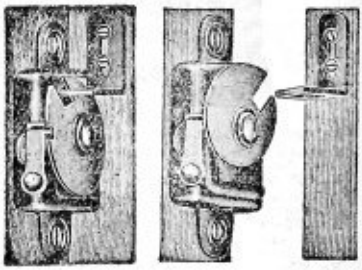
ONE DOZEN IN A BOX; ONE-HALF GROSS IN A CASE.

SCREEN DOOR CATCHES.



No. 00—Automatic, japanned steel, rubber rollers, with door plate, w't per doz. 1¾ lbs.....per dozen AGE $3.50
Applied on the door casing at the opening side of the door and can be placed anywhere along on the casing where it is necessary to bring a pressure on the door to force it closed. Remains open until the lower projection is struck by the door, releasing the spring and throwing the rubber roller against the outside of the door. Does not hinder the opening of door, and is reversible.
ONE DOZEN IN A BOX.

DOOR CATCHES.

No. 80—Superior, made of highest grade 16 and 18 gauge spring steel, securely riveted, black japanned, good quality rubber bumper, metal bushed, heavy strike plate for door, w't per doz. 3 lbs.....per dozen ADE $2.75
ONE DOZEN IN A BOX.

AUTOMATIC.

ONE DOZEN IN A BOX, WITH SCREWS.

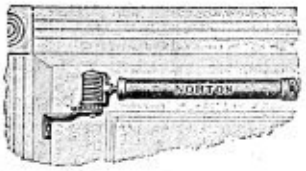
SCREEN DOOR CHECK.



No. 38—Superior, old copper finish, seamless brass cylinder 6¼x⅞ in., brass valve, all other parts cold rolled steel, reversible for right or left hand doors, requires only 1½ in. space between doors, w't per doz. 6 lbs, per dozen .....**JHAJ** $13.50
No. 528—Dull brasss finish, otherwise same as No. 38, per doz. **JHAJ** $13.50

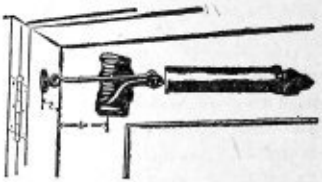
For Screen Doors Only.

No. 10—2¼ in. enameled screw knob, 2¼ in soft rubber stop, 1¼ in. round head blued crew, w't per doz. 2 lbs., per dozen .....**JIE** $1.50
When the door is closed it throws the rubber against the door and then drops to a perpendicular position. Complete directions and diagram are packed with each check.

DOOR CHECK AND SPRING.

No. 40—Norton, for screens, telephone, kitchen, pantry doors and office gates, reversible for right or left hand doors, adjustable spring and check, seamless brass tube 11x1¼ in., all parts gold bronzed, easily attached and durable, w't per doz. 25 lbs., each .....**AAJ** $2.00
ONE IN A BOX, WITH SCREWS AND DIRECTIONS.

DOOR CHECK AND SPRINGS.



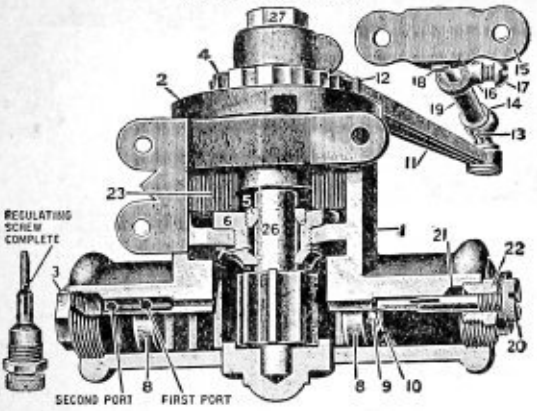
LARIMER, Oxidized Copper, Unpolished, for Either Right or Left Hand Doors.

No. L1—For heaviest inside doors not over 2 ft. 8 in. wide, w't 4¾ lbs., each .....**AHJ** $2.50

No. L2—For heaviest outside doors, w't 6¼ lbs.....each **BEJ** $3.50

These checks and springs apply to hinge side of door only. All parts are reversible excepting coil spring, which is made right and left, one each of which is furnished with each check.

ONE IN A BOX.



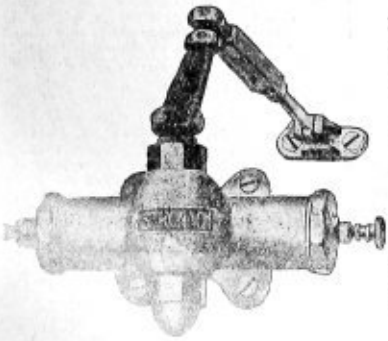
No. L0—Larimer, oxidized copper, unpolished, for either right or left hand screen or light inside doors not over 2 ft. 8 in., and ½ in. thick, w't 2lbs., each .....**JIJ** $1.25

This check is adapted for the jamb side of door only. All parts are reversible. The valve principle and plunger head is so simple in construction that there is nothing about it that can get out of order. If desirous of releasing the door from the action of the spring, all that is necessary is to lift the hook out of the eye. It is easily applied and perfectly adjustable.

ONE IN A BOX.

LIQUID DOOR CHECKS.

REV-O-NOC



The REV-O-NOC Check, although reversible, should be ordered for right or left hand door as required. It is compact and simple in construction, of attractive appearance, self lubricating and easily attached, checking power and spring easily and accurately adjustable.

It has all the features of the best checks on the market, and besides has these features which the others have not; checking of the door in opening, making unnecessary the use of floor stops and chains, and protecting walls and furniture; the checking of the door in closing, either steadily from start to finish, or quickly to the closing point then slowly, or slowly to the closing point then quickly. The door is absolutely under control all the way. Solid steel shaft with 3 bearings, gives greater strength and prevents leakage, solid steel pinion and double acting piston, spring non-breakable and guaranteed for two years, quick grip arm connection adjusted after check is in place and double jointed arm; great strength and wearing quality of all inside working parts. Regular finish gold bronzed. We guarantee this check to be better than any other.

ONE IN A BOX WITH FULL DIRECTIONS FOR ATTACHING AND REGULATING.

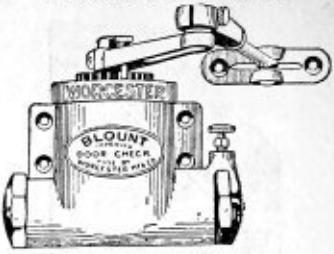
No. A REV-O-NOC—For heavy screen and light house doors	each	BHE	$3.50
No. B REV-O-NOC—For light inside doors not over 3×7 ft. ×1½ in.	"	CBE	4.25
No. C REV-O-NOC—For heavy inside or light outside doors not over 3×7 ft. ×2 in.	"	DAJ	5.00
No. D REV-O-NOC—For outside doors not over 3×8 ft. ×2¼ in.	"	DIJ	6.00
No. E REV-O-NOC—For outside doors not over 3½×8 ft. ×2½ in.	"	FEE	8.00
No. F REV-O-NOC—For extra large and heavy doors.	"	JHAE	10.00

STRONACH.

Reversible for Right or Left Hand Doors.

No. B—For light inside doors, w't each 8 lbs. .....each **CEE** $4.25

No. C—For heavy inside, vestibule and light outside doors, w't each 10 lbs., each .....**DBJ** $5.00



No. D—For outside doors not exceeding 8 ft. x 3 ft. x 2½ in., w't each 11½ lbs., each .....**EJE** $6.00

No. E—For heavy outside doors, w't each 12½ lbs. .....each **FGJ** $8.00

ONE IN A BOX.

Guaranteed spring, perfectly controlled tension, checking mechanism controls door from starting to closed point, easiest check to regulate, few parts and strong, main shaft held rigidly in three places, pinion steel working in steel ratchet piston.

WORCESTER BLOUNT.

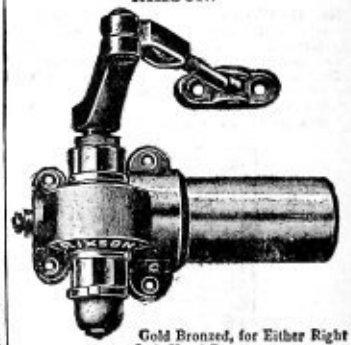
Worcester Blount Liquid, Gold Bronzed.

No. 1—For screen or other light doors not over 2 ft. 6 in. wide by 1¼ in. thick, w't 5 lbs. .....each **BHE** $ 3.25

No. 2—For outside doors not over 3 ft. wide by 1½ in. thick, w't 7½ lbs., each .....**CGJ** 4.25

No. 3—For vestibule and light outside doors not over 2 ft. 6 in. wide by 2 in. thick, w't 9 lbs. .....each **DDJ** 5.00

No. 4—For outside doors not over 3 ft. wide by 2½ in. thick, w't 12 lbs., each .....**EBE** 6.00



No. 5—For doors not over 4 ft. wide by 2½ in. thick, w't 16 lbs. ...each **GJJ** 8.00

No. 6—For extra heavy doors, requiring great power, w't 19 lbs. ...each **JHGE** 10.00

While these door checks are reversible, they should be ordered for right or left hand doors as wanted. Self-lubricating, reducing friction to a minimum, quickly and easily attached by any one. Adjustable to right and left hand doors with flush or projecting trim. Checking power perfectly adjustable by simple regulator; impossible for it to bind, owing to ball and socket joint of extension arms.

ONE IN A WOODEN BOX.

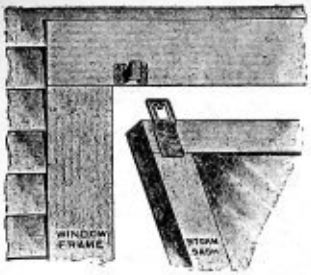
RIXSON.

Gold Bronzed, for Either Right or Left Hand Doors.

No. A—For inside doors not over 2 ft. 8 in. x7 ft., w't 8 lbs. .....each **CAJ** $ 4.25

No. B—For vestibule and light outside doors not over 2 ft. 6 in. x7 ft., w't 9 lbs. .....each **CGJ** 5.00

No. C—For outside doors not over 3x 7 ft. 6 in., w't 10 lbs. ....each **DDJ** 6.00



No. D—For doors not over 4x7 ft. 6 in., w't 11½ lbs. .....each **EIJ** 8.00

No. E—For extra heavy doors, w't 12½ lbs. .....each **JGCE** 10.00

It is adapted to right or left-hand doors without any change in the mechanism.

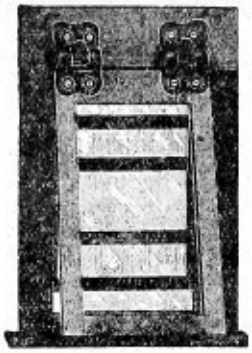
The spring may be broken in several parts, yet remain effective, an important feature.

STORM SASH AND WINDOW SCREEN HANGERS.

No. 1717—Schroeder's New Peerless, japanned, packed complete with screws, four pieces to a set, w't per doz. sets 3¾ lbs.....per dozen sets **J I J** $1.50

Lower Sections, for hinges to make screen and storm sash interchangeable, w't per doz. 2 lbs., per dozen pairs .....**DG** $0.80

Not only the strongest, but also the smallest device owing to the extra depth of the hook. Easiest to hang on, because of extra large eyes. Always automatically locked until you release fastener yourself; hence, the safest hanger ever invented. No rattling because of its peculiar construction. Neatest hanger, because of its simplest appearance. Also most effective.



ONE DOZEN SETS IN A BOX.

No. 1724—Schroeder's Peerless, steel japanned, w't per doz. sets 2 lbs., per dozen sets .....**J F J** $1.10

Easily hung and especially adapted for full size screens.

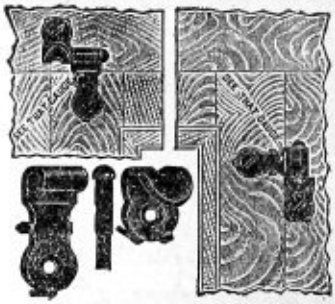
ONE DOZEN SETS IN A BOX.

Gossett, wrought steel, japanned, w't per doz. prs. 2½ lbs., per dozen pairs .....**J H J** $1.30

Gossett Lower Sections, for hinge, to make screen and storm sash interchangeable, w't per doz. prs. 1½ lbs., per dozen pairs .....**D B** $0.70

These hangers have guide flange, a feature which no other hanger has, which brings the screen or storm sash into proper place and makes it possible to hang them from within the building. Being fastened to the top of the screen, they admit of no sagging, as when hinged on the side.

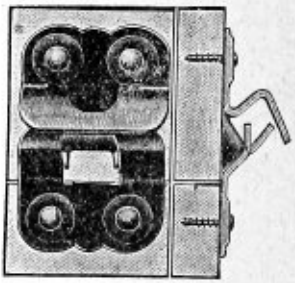
ONE DOZEN PAIRS IN A BOX, WITH SCREWS.



HALF SCREEN HANGERS.

No. 13—Watrous, set includes right and left hanger, escutcheon nails for attaching, hook and eye for fastening at bottom, w't per doz. sets 1 lb., per dozen sets .....**E J** $0.95

Applied in two minutes to any half screen by nailing hangers to outside of screen on either side at top, and driving small nails through the slot into the casement.



ONE DOZEN SETS IN A BOX.

No. 11—Watrous, japanned, packed complete with screws, four pieces to a set, w't per doz. sets 2½ lbs., per dozen sets .....**J I J** $1.50

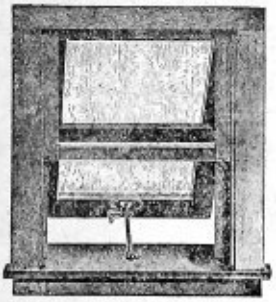
A hanger that will hang either a full sized sash or screen or a half screen. Will hang from either top or side casing.

The points afford a much stiffer and more rigid grip on the wood than screws.

No. 18—Watrous, japanned, complete for hanging, w't per doz. sets 3 lbs., per dozen sets .....**J F J** $1.00

No. 181—Watrous, galvanized, otherwise same as No. 18, per dozen sets .....**J G J** $1.30

Won't blow off or be dropped off by children or careless servants. Can't be set wrong. Only sash hanger on the market with gauge lugs which makes it impossible to set it in any way but the right way. Nine-tenths of the trouble with sash hangers comes from their being set wrong. Full directions with each set.



ONE DOZEN PAIRS IN A BOX, COMPLETE FOR HANGING.

Lower Parts, for No. 18, per dozen .....**C J** $0.50

Lower Parts, for No. 181, per dozen .....**C E** .60

SASH AND SCREEN HANGERS, CATCHES AND FASTENERS.

STORM SASH FASTENERS.

No. 2—Gossett, 8 in. wrought steel and No. 7 steel wire, japanned, w't per doz. 1 lb.....per dozen **DH** $0.80
Holds storm sash open for ventilation and locks it securely when closed. Does not interfere with raising or lowering of windows.
ONE DOZEN IN A BOX, WITH SCREWS.

No. 619—Sensible, malleable iron, japanned, w't per doz. sets 2¼ lbs., per dozen sets .....**AJE** $1.80
Extra Hooks, for attaching to screens, to interchange with storm sash, w't per doz. prs. 1¼ lbs., per dozen pairs .....**JFJ** $1.00
The storm sash or screen can be hung easily from the inside of the house. The peculiar construction forms an absolute lock and prevents the window from being blown off. A set does not include fasteners.
ONE DOZEN SETS IN A BOX.

STORM SASH FASTENERS.

No. 1719—Peerless, 10 in., japanned, malleable iron, w't per doz. 4½ lbs., per dozen .....**AAE** $2.00

This fastener will hold the storm sash open for ventilation. When storm sash is closed the fastener automatically locks itself.

ONE DOZEN IN A BOX.

No. 20—Sensible, 10 in., malleable iron, japanned, w't per doz. 3¼ lbs., per dozen .....**AAE** $2.00

Holds storm sash open for ventilation. When sash is closed fastener swings around locking itself. Does not interfere with raising or lowering of window.

ONE DOZEN IN A BOX.

STORM WINDOW EYES.

No. 501¼—Sherardized, bright, 2¼ in. under head, 2¾ in. overall, w't per gro. 5¼ lbs.....per gross **ACJ** $2.20

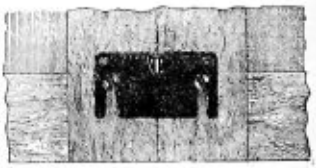
ONE GROSS IN A BOX.

SCREEN LIFTS.

No. 51—Steel, japanned, 3 in. long, with screws, w't per gro. 4½ lbs., per gross .....**AHJ** $3.25

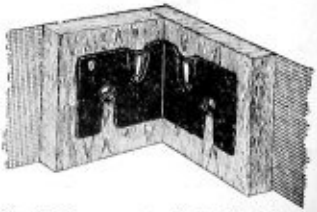
TWO DOZEN IN A BOX.

WINDOW SCREEN CATCHES.



No. 35—Watrous, japanned, packed complete with screws, w't per doz. 1 lb., per dozen .....**DE** $0.75
The co-operating flanges on catch and strike make a double lock, and when fastened the sash can neither be pulled out nor pulled up from casing. Locks any screen tight and fast, whether swung from hinges, hung from hinges or sliding in channels.
Light, neat and strong, takes up little space and does not interfere with the working of the window.
THREE DOZEN IN A BOX.

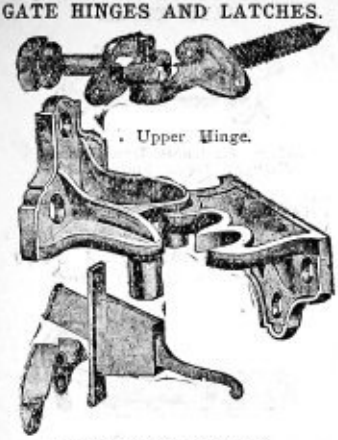
WINDOW SCREEN FASTENERS.



No. 1—Gossett, wrought steel and No. 7 steel wire, japanned, w't per doz. 1 lb. .....per dozen **CB** $0.55
An inside lock for screens, stronger and more secure than the ordinary screw hook and eye.
TWO DOZEN IN A BOX.

SCREEN COUPLINGS.

No. 16—Flat, steel, 2¾x1¼ in., japanned, with screws, w't per gro. 7 lbs., per gross .....**BDJ** $4.20
THREE DOZEN IN A BOX.



No. 15—Corners, steel, 1½x1½x1¼ in., japanned, with screws, w't per gro. 9 lbs. .....per gross **BDJ** $4.20
THREE DOZEN IN A BOX.

For putting up and fastening together porch screens, etc.

BLIND FASTENERS.

No. F—Extra fasteners used in connection with Clark's and Shepard's blind hinges, w't per doz. 3 lbs., per dozen .....CE $0.60

ONE-QUARTER GROSS IN A BOX.

GATE LATCHES.

No. 10—St. Louis, cast iron, natural finish, for right or left hand gates, w't per doz. 6½ lbs., per dozen .....DJ $0.55

ONE-HALF DOZEN IN A BOX.

No. 6—"G. P.," cast iron, japanned, self-adjusting, for right or left hand gates, w't per doz. 14 lbs., per dozen .....AGJ $3.00

The "G. P." latch is attached to a sliding carriage which adjusts itself by means of the projection shown in the illustration. As this point comes in contact with the strike, it is raised or lowered by the angle of the strike, so that any change of position due to the weather or general sag of the gate will not affect the closing of the gate. It is absolutely hog proof.

ONE DOZEN IN A HINGED WOOD BOX, WITH SCREWS AND MOUNTED SAMPLE.

Extra Bracket End, No. 645 hangers, each★ .....**AD** $0.21

A set of automatic fire door fixtures consists of everything necessary to hang a door, with the exception of hangers, track, brackets and wall bolts, including 16 pounds of counter balance weight, two fusible links, two small pulleys, weight holder, cast wedge, expansion screw eyes, guide roller, link bracket, two half oval strips, two flat strips for front door, eight steel bumper shoes, guide roller strip, two wall binders, front door stop to attach to track, rope pulley and back stop to attach to track, release trigger, flush door pull, steel handle, No. 6 sash cord. The illustration shows the arrangement of automatic device provided with two fusible links, one constantly in the opening is exposed from both sides, and one at rear ceiling; if either link fuses, the door is released. Underwriters require two hangers for doors up to 6 ft., and three hangers for doors over 6 feet.

In ordering, give kind of door and width of opening, doors must overlap opening 4 inches on each side, state whether doors are right or left hand. The above cut shows a left hand door.

BARN DOOR HANGERS.

TROLLEY HINGED ROLLER BEARING DOOR HANGER.

Hanger—Trolley hinged roller bearing door hangers are constructed entirely of steel, except the wheels which are of the best grade of cast iron, turned smooth. The axle passes through a case hardened steel tubing fitted with tool steel machine cut roller bearings which makes it anti-friction.

Pendant and Apron—Pendant and apron or strap comprise two parts, forming a joint hinge which allows the door to swing at right angles. Apron or strap clamping door on each side admits of fastening with two carriage bolts passing through the door, and this double apron is far stronger than the single.

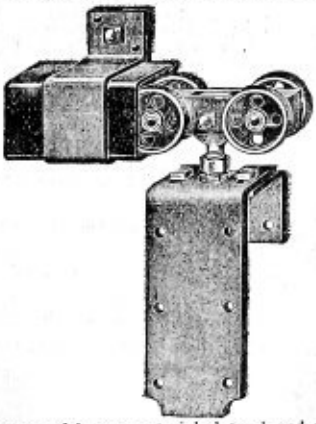
Finish—The finish and workmanship are the very best, as every hanger is carefully inspected. The hanger parts aarts are japanned and baked before being assembled.

The Track—Is made on special machinery so that every foot is precisely the same, absolutely true and straight. The wheels run freely and easily in the square groove of the track, which is amply wide to prevent any striking, binding or scraping of the wheels.

No. 211—For doors 1¾ to 2 in. thick and weighing approximately 300 lbs., complete with bolts and three brackets—two end and one center—w't per doz. prs. 96 lbs. .....per dozen pairs **AHJ J** $30.00

No. 201—With lateral adjustment for doors 1¾x2¾ in. thick, otherwise same as No. 211 , per dozen pairs ..... **AHJ J** $30.00

ONE PAIR IN A BOX; SIX PAIRS IN A CRATE.



No. 31-B—Extra brackets, w't 1¼ lbs. .....each **AJ** $0.20

No. 31-T—Trolley track for No. 211 door hangers, 6, 8 and 10 ft. lengths, w't per 100 ft. 167 lbs., per 100 ft. ..... **ABJ J** $25.00

EIGHT PIECES IN A BUNDLE.

Two end brackets and one center bracket are furnished with each pair of Hangers.

RICHARDS' TROLLEY ROLLER BEARING.

No. 292—Hanger of heavy material, lateral and vertical adjustment, suitable for doors 2½ to 3 in. thick and weighing approximately 600 lbs., complete with 4 flat head stove bolts for back apron which is countersunk, without brackets. w't per doz. prs. 180 lbs. .....per dozen pairs **BHHJ** $66.00

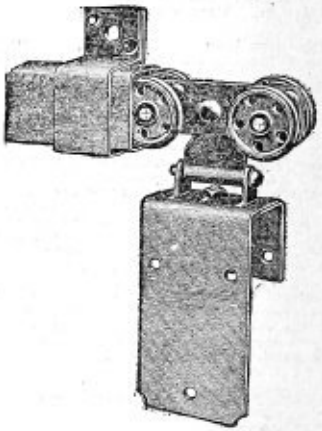
No. 232-B—Extra Brackets for No. 292 door hangers, each ..... **BJ** .36

No. 232-T—Trolley track for No. 292 door hangers, 14 gauge, 2½ in. wide, 3½ in. high, w't per 100 ft. 250 lbs., per 100 ft. ..... **BAFJ** $40.00

No. 1232—Hanger of extra heavy material, lateral and vertical adjustment, suitable for doors weighing 800 lbs., complete with 4 flat head stove bolts for back apron, which is countersunk, without blackets, w't per doz. prs. 216 lbs., per dozen pairs ..... **CIFJ** $78.00

No. 33-B—Extra brackets for No. 1232 door hangers, each ..... **CJ** .60

No. 33-T—Trolley track for No. 1232 door hangers, 13 gauge, 3 in. wide, 3½ in. high, w't per 100 ft. 375 lbs., per 100 ft. ..... **BHHJ** $60.00



Hangers, track and brackets sold separately.

Hanger—Made of steel throughout except wheels which are of the best grade cast iron. The axle passes through a case hardened steel tubing fitted with roller bearings, making it anti-friction.

Track—Extra heavy steel, absolutely true and straight. The wheels run freely in the square groove of track, without any binding or scraping.

Finish—All parts are japanned and baked before leaving the factory.

"CRUSO" BARN DOOR HANGERS.

For Doors Weighing Approximately 400 Lbs. Lateral Adjustment.

No. 2011—Cruso Hangers, used on doors 1¾ to 2 in. thick, w't per doz. prs. 130 lbs.....per dozen pairs **ACEJ** $22.50

Hinged pendant extra strong permitting door to swing to any angle desired.

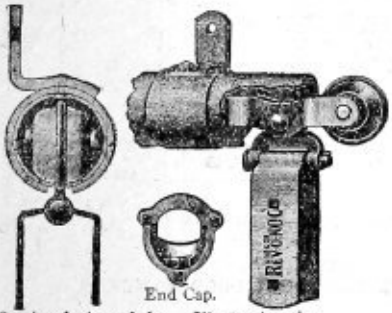
Hangers—A pair of hangers consists of two hangers, one center and two end brackets, lag bolts for brackets and stove and carriage bolts for hangers.

No. 311-T—Cruso, track can be attached to side or ceiling supports and is furnished in 6, 8 and 10 ft. lengths, w't per 100 ft. 167 lbs. .....per 100 feet **JIFJ** $16.00

No. 311-B—Cruso brackets.....each **JG** .12½

Distance from top of door to center of hole in bracket, 5¼ in.

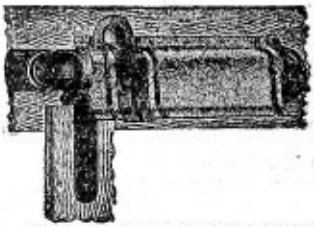
Brackets should be placed 2½ to 3 feet apart. Not over 3 feet.



BARN DOOR HANGERS.

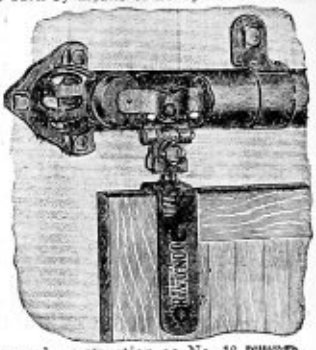
The Hanger consists of a malleable iron truss frame which supports the double door straps. The stirrup from which the door strap is hung is secured to the track by means of a steel axle. The door straps, which are double, have holes for two bolts on each strap so that the bolt can be run through the door and thus assure double strength.

The Truck has two solid ball wheels, or rollers, which have a very wide tread in the track, and are run on roller bearings. The side plates are shaped so as to allow the truck to run smoothly and evenly and without scraping the sides of the track. They are light running, frictionless, flexible and noiseless.



The Track is made of No. 14 gauge steel specially formed and slotted, ¾ in. on the under side to take the hanger frame. It is 2¼ in. in diameter, inside measurement, and furnished in 3 foot lengths. The sections are rigidly joined together by No. 12 gauge steel splices, 2½ in. wide, within which the sections meet at the center of the splice and lock. Birds cannot nest in the track, nor can snow or sleet clog it. The track is secured to the barn by means of heavy brackets.

REVONOC



Sectional view of the Track and Hanger.

End Cap. Illustrating the Hanger and Track.

Cover for No. 18-T REVONOC Track.

No. 18 REVONOC—Barn Door Hangers, complete with bolts, w't per doz. prs. 80 lbs. .....per dozen pairs **ACBJ** $24.00

ONE PAIR IN A BOX. SIX IN A CASE.

No. 19 REVONOC—Same general construction as No. 18 REVONOC, and uses same track and brackets, has both lateral and vertical adjustment, complete with bolts, w't per doz. prs. 85 lbs. .....per dozen pairs **ADDJ** $26.00

By the lateral adjustment, door is set close to or away from the building as desired. Easily and quickly operated.

ONE PAIR IN A BOX WITH BOLTS.

Track.

No. 18-T REVONOC—Track, in 3 foot lengths, per hundred feet .....**ABJJ** $20.00

96 FEET IN A CASE. W'T 205 LBS.

No. 181—Cover for track, reinforced galvanized iron, w't per 100 ft. including splicers 60 lbs. .....per 100 feet **CFJ** $6.00

This cover forms a perfect water-shed which prevents rain, snow and wind from entering the barn either behind the track or under the track over the top of the door.

Made entirely independent of track and is put up after the track is hung.

Close fitting waterproof splicers are furnished which slip over the track bracket and effectively close joints in the cover.

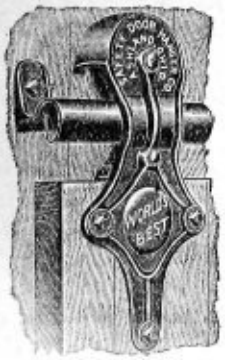
Track cover packed 32 pieces in the crate. Splicers packed 4 dozen in a crate.

Combination End Brackets and Caps.

No. 18-EB—Combination End Brackets and Caps .....each **JG** $0.13

End bracket and caps, although combined, are furnished at price of bracket only.

Regular Brackets.



No. 18-B—Regular brackets,, for each additional length of track .....each **JG** $0.13

When entering orders be sure to specify number of brackets wanted.

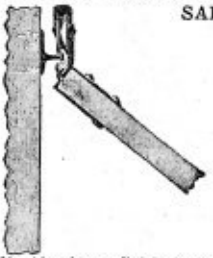
As brackets and end caps are NOT furnished with the hangers it is necessary to have two brackets to hang the first length of track, and one EXTRA for each ADDITIONAL length.

Brackets should be placed 2½ to 3 feet apart. Not over 3 feet.

WORLD'S BEST.

Will permit door to swing out at bottom sufficiently to pass any obstruction that may be in its way.

The large roller bearings dispense with all friction and make it easy to operate. The lower wheel underneath the rail prevents derailment.



The track has perfectly smooth surface, thus assuring easy running. A sufficient number of brackets are included with each length of track to hang securely.

No. 19—Malleable iron, finished in aluminum, complete with bolts, w't per doz. prs. 90 lbs. ..per dozen pairs **AAEJ** $19.20

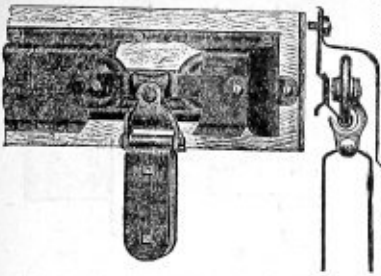
ONE PAIR IN A BOX. ONE-HALF DOZEN IN A CASE.

No. 19-T—Steel track, in 4, 6, 8 and 10 ft. lengths, complete with brackets, w't per 100 ft. 87 lbs., per 100 ft. **JHDJ** $14.00

SAFETY.

No. 20—Aluminum finished, frame and wheel malleable iron, wheel 1¼ in. in diameter with deep thread or groove, assuring a good grip on the track, w't per doz. prs. 80 lbs., per dozen pairs.....**JGBJ** $16.00

ONE PAIR IN A BOX, COMPLETE WITH BOLTS.



No. 6-T—Track, 1¼x3-16 in. round edge, 6, 8 and 10 feet lengths, with malleable brackets, w't per 100 ft. 100 lbs., per 100 ft. .....**JDHJ** $11.00

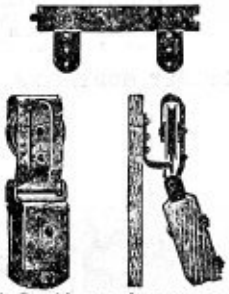
The retaining hook under the track makes it impossible for the hanger to be thrown off the track. The flexible feature allows the door to move easily without binding, and permits it to swing out in case of storms or stock pushing against it without throwing the door off the track or tearing the track loose.

BARN DOOR HANGERS AND STAYS.

BARN DOOR HANGERS.

REVOLOC Weather-Proof.

Hangers—Non-adjustable, wheels roller bearing, flexible and noiseless, bird and weather-proof, wheels in tandem as in railroad trucks, trucks and frame heavy steel held together by same center pin that fastens stirrup to truck. The weight of the door is supported from the top of the truck so that the full strength of the truck frame carries the door. The hangers being flexible prevents their being broken or damaged by the crowding of animals from within the barn, or by violent gust of wind.



Track—The hood or shield fits snugly against the barn. To make doubly sure the weather-proof feature, the rim or edge is turned in towards the building and clamped to it, making a tight connection. The lower edge of the hood is bent out, forming a deflector which throws the rain or sleet away from the building. REVOLOC Weather-Proof Track is easily put up, the brackets are properly spaced and welded to the track. The track and hood are held in place by the samebolts and are easily accessible with a wrench. Furnished in 3 ft. lengths, complete with the end stops and brackets.

No. 67 REVOLOC—Weather-Proof Barn Door Hangers, w't per doz. prs. 80 lbs., per dozen pairs ..... **ABJJ** $30.00

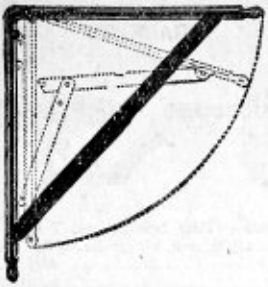
0114	36 to 38	54	14½	CIE	7.00
0115	39 to 41	54	15	DAE	7.50

One set, as priced above, consists of four balances, sufficient to hang one complete window—two sashes. They are placed in the window frame the same as ordinary pulley, having an automatic adjustment that does not require an adjusting screw or some similar device which makes the tape buckle or break. The Pullman balances are easily placed in position and owing to automatic adjustment can be quickly applied.

ONE SET IN A BOX.



Caldwell, Side, Malleable Iron Case and Face Plate, Flat Steel Ribbon.

ONE-HALF DOZEN PAIRS IN A BOX.

KOCH, Adjustable, Cast Iron, Japanned.

No. 101—3½x4½ in., w't 5½ oz., each★	**JG**	$0.12
No. 102—6x8 in., w't 1¼ lbs., each★	**AB**	.20
No. 103—8x12 in., w't 2 lbs., each★	**BJ**	.35
No. 104—8x16 in., w't 3 lbs., each★	**BF**	.45
No. 105—9x21 in., w't 4 lbs., each★	**CE**	.60
No. 110—Wall plates, 24 in. long, suitable for all sizes of brackets, w't 4 lbs. ..... each	**BI**	$0.50

These brackets are supported by a number of catches on either side, by means of which each is held firmly in place, there being no side-play or liability to slip down accidentally. The wall plates are provided with screw holes for every 6 in. of their length, so they can be fastened securely to the walls. The entire front is open and unobstructed, and the entire top surface of shelf boards is available for goods. The objectionable wood partitions are entirely done away with, allowing the unhindered use of every inch of space. The brackets do not shut out the light nor make dark corners to hide the goods and prevent the easy removal of dust.

A section of shelving may be put up on the Koch reversible brackets, and additions to it made, in length or height, as more room is wanted, without altering or marring the rest, and it will be finished and complete first as last. Shelving may be run in continuous parallel lines, or in long or short sections of various height or width, and shelf room may be increased or diminished at pleasure.

	AA	**AC**	**AH**

These casters are entirely constructed from the highest grade of basic (or base) steel. The steel balls are 7-32 in. in diameter and are used in all size casters. The "Universal" has the advantage over other disc bearing casters, as the balls will revolve readily in every direction, whereas other discs roll only horizontally, and any little obstruction, such as a small wood splinter, will prevent the disc from performing its functions.

Standard, Universal Metallic Bedstead with Spring Attachment, Wrought Steel.

These casters are now being made with a heavier gauge steel stem and larger sized steel balls. Washer or ball-retainer is securely kept in place by the upset of the stem avoiding the possibility of the balls working out. Axles are also being used and we believe that with these improvements this caster is practically indestructible.

DOMES OF SILENCE.

Display Easel.

"Domes of Silence," Polished Nickel Steel, Hardened by Secret Process.

No. 01—⅞ in., for any heavy furniture, in sets of 4,
per gross sets ..... **AGCJ** $28.80

No. 02—¾ in., for dining and parlor chairs, tables, etc., in sets of 4, per gross sets ..... **AGCJ** $28.80

No. 03—⅝ in., for small light chairs, in sets of 4,
per gross sets ..... **AGCJ** $28.80

No. 04—½ in., in sets of 4, per gross sets ..... **AGCJ** $28.80

No. 05—⅜ in., in sets of 4, per gross sets ..... **AGCJ** $28.80

Perfectly noiseless and saves wear on rugs and carpet.

Chairs and light tables can be fitted with a light hammer. Heavy pieces can be fitted by lifting and placing caster in position under each leg, the weight being sufficient to seat the prongs. "Domes of Silence" are superior in beauty of finish and sliding qualities to the cheap imitations now on the market.

Use largest size caster space will permit.

With orders for ¼ gross sets (one dozen of each size), we will furnish a handsome Easel Display Box holding 3 dozen sets of casters, which when set on show case, will very materially increase sale.

TWELVE SETS IN A BOX.

"HO" SLIDING CASTER.

PATENT FOLDING CASTERS.

Rockway—Cast iron, clamp by set screw to all cans, having space of 1½ in. or more under can, w't per doz. prs. 24 lbs....per dozen pairs **JFJJ** $10.00

When applied to Ash Cans or other receptacles, make a most economical and useful truck. Cut the cost in half and place them within the reach of all. Tilting by one handle they fold automatically and can rest flat. Tilting by opposite handles, rollers drop into action as shown in illustration.

LOOSE.

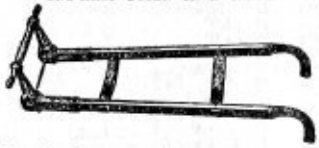
STOVE CASTERS.

No. 1—Ball bearing, gray iron casting, neatly japanned, fitted with all steel ball bearing casters, w't per crate 57½ lbs., per dozen sets **AJHJ** $19.00

Base is reinforced in such places where it carries the greatest weight, making it extra strong and durable. Where the body of the stove rests itself, prongs are located to keep the stove rigid, obviating the possibility of the stove slipping off the truck. Can be used under a square base range without feet as well as a stove with feet.

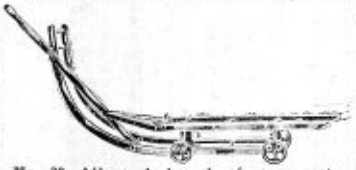
ONE-HALF DOZEN SETS IN A CRATE.

No. 2—Japanned, plain steel wheels, w't per doz. sets 72 lbs., per dozen sets .....**JHAJ** $14.00



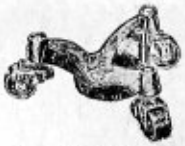
LOOSE IN BARRELS; FIVE DOZEN SETS IN A BARREL.

STOVE TRUCKS.



No. 25—Martin's, japanned steel frame, adjustable from 18x22 to 24x36 in., 4 swivel casters, w't per doz. 200 lbs., per dozen .....**BFDJ** $30.00

ONE-HALF DOZEN IN A CRATE.

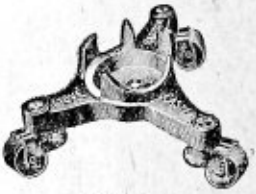


No. 10—Leavenworth, stove truck and carrier, length 4 ft., w't 22 lbs., per dozen .....**JFHDJ** $114.00

No. 20—All steel, length of stove rest 4 ft., wheels 4 in., height raised 7½ in., lowered 5½ in., w't 50 lbs., per dozen .....**JFHDJ** $114.00

★*FOR FACTORY SHIPMENT ONLY.*

STOVE CASTERS.

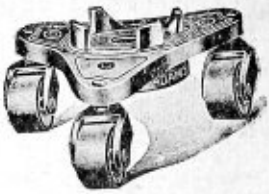


Low Base

No. 100—Harper, improved, japanned, with 3 iron swivel wheels, height of center ½ in., diam. of cup 2½ in., w't per doz. sets 120 lbs., per dozen sets .....**AJAJ** $19.00

The wheels are larger than heretofore used. The caster pins do not project above the arms. There is a screw hole through each arm so they can be fastened to any flat surface.

FOUR CASTERS TO A SET.



High Base.

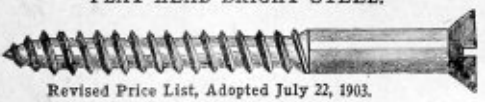
No. 105—Harper, japanned, with 3 iron covered swivel wheels, height of center 3 in., diam. of cup 2½ in., w't per doz. sets 120 lbs., per dozen sets .....**AJAJ** $19.00

Raises the stove or range 3 in. from the floor. Will pass over rough or uneven surfaces in the floor without becoming displaced. Can be used under a range without feet as well as stoves with feet. It is very strong.

FOUR CASTERS TO A SET.

ADAMS STOVE CASTERS AND RANGE ATTACHMENTS.

Adams—Very strong and flexible, main casting japanned, with three coppered swivel wheels, height of center 1 in., holes are provided for screwing the casters to a box, making a handy box truck, opening of socket 3¼ in. in diam., w't per doz. sets 114 lbs., complete with range attachments, per dozen .....**ABFJ** $20.40



The small casters being swiveled to the main casting by a pivot, turn from one direction to another with the utmost readiness.

To make range casters, insert the attachment in foot hole of regular stove caster. No stove leg too large for Adams caster.

FOUR CASTERS CONSTITUTE A SET.

These expansion bolt shields and screw anchors are well made. They are easy to use, and when once in place never loosen. They can, however, be taken out and put back in the same hole any number of times without marking the wall in the least. They are in general use by plumbers and have always given satisfaction.

The screw anchor is made in one piece of soft metal and permits the screw to cut its own thread, will fit any size and style of wood, machine or special screw. When it is up it never loosens until taken out.

The expansion shield is made of cast-iron, in two parts, and is extremely simple. It is very strong, and will resist the greatest strain or most severe vibration. Can be used with any lag screw, no special cut or length of thread required.

The washer is so constructed that the "body" of the washer carries the load of compression and the tapered ends are thus relieved, and the spring is constant. The barbs being free to move when subjected to vibration, force themselves deeply into the nut and metal backing.

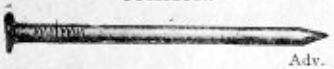
This washer is reversible and can be used many times. Does not injure the nut, its threads or the threads of the bolt.

Exhaustive tests, covering a period of many years on railroad track, drop presses, automobiles and machinery subject to vibration, have proven its superiority over every other nut lock manufactured.

LOOSE.

MALLEABLE IRON.

No. 201—For bolts, in.	5/8	3/4	7/8	1
Diameter, in.	2 3/4	3	3 1/2	4
Thickness, in.	1/8	1/8	1/16	1/2
W't per 100, lbs.	22	33	50	68
Comparative w't of Cast Washers, lbs.	80	90	120	170
Per pound	$0.08	.08	.08	.08



These washers are a substitute for the old style cast iron washers and while the price per pound is higher than on cast iron washers, yet the price per washer is cheaper than cast washers, besides saving two-thirds of all freight rates, hauling and weight to structure, and one-quarter to one-half inch in length of bolts, and a nut-locking feature added without additional expense.
